Rochester branch, Windsor Beach to Rochester.....	7.27
Phoenix branch, Woodard to Fulton.....	17.10
Rome branch, Richland to Rome.....	41.28

There are 3.47 miles of double track on the Ontario branch, 38.24 miles on the Watertown branch, and 0.21 mile on the Phoenix branch. The balance is single tracked. The total length of sidings is 156.18 miles.

*St. Lawrence Division*

	Miles
Watertown branch, Watertown Jet. to Massena Springs.....	91.07
Cape Vincent branch, Watertown Jet. to Cape Vincent.....	24.10
Sanford branch, Watertown, Main St. detour.....	5.21
DeKalb branch, DeKalb Jet. to Ogdensburg.....	18.89
Ogdensburg branch, Utica to Ogdensburg.....	134.31
Clayton branch, Rivergate to Clayton.....	15.85
Sackets Harbor branch, Watertown Jet. to Sackets Harbor.....	11.43
Carthage branch, Watertown to Newton Falls.....	63.39
Oswegatchie branch, Gouverneur Jet. to Edwards.....	13.07

There are 14.67 miles on the Watertown and 10.02 miles on the Ogdensburg branches which are double tracked. There are 210.39 miles of sidings.

*Adirondack Division*

	Miles
Adirondack branch, Herkimer to Malone.....	173.14
Hinckley branch, Prospect Jet. to Hinckley.....	2.96
Saranac branch, Lake Clear Jet. to Saranac Lake.....	5.89
Raquette Lake branch, Carter to Raquette Lake.....	18.13
St. L. and A. branch, Malone to International boundary.....	10.25

This is all single tracked. The sidings have a total length of 67.43 miles.

*Pennsylvania Division*

	Miles
Main line, Geneva to State Line.....	71.57
Penn Yan branch, Dresden to Penn Yan.....	6.55
Corning branch, Corning Jet. to Corning.....	0.75
Lyons branch, Lyons to Geneva.....	13.71

The main line for 68.58 miles, the Corning branch for 0.72 mile, and the Lyons branch for 12.67 miles, are double tracked. The balance is single tracked. The sidings have a total length of 103.27 miles.

The following table shows the length in miles of the tracks on each division:

Divisions	No. 1	No. 2	No. 3	No. 4	No. 5	No. 6	Total	Sidings

Curves are rather frequent on parts of the line, but they are usually moderate in degree. The sharper curves requiring it have permanent signs restricting the speed to a safe maximum. The cuts and embankments are maintained in a cross-section of ample width to support the tracks. They provide a substantial shoulder for the support of the ballast on the embankments and for proper ditches in the cuts. The ditches were generally cleaned and appeared properly to drain the roadbed. The track alignment and surface are particularly good on the passenger tracks on the main line of the Electric, Hudson, Mohawk, Western, and Adirondack divisions. They were good on most of the other tracks with the exception that tracks 3 and 4 on the Mohawk and Western divisions, tracks 1 and 2 on parts of the West Shore, the Hinckley and Raquette Lake branches on the Adirondack division, the DeKalb branch on the St. Lawrence division, the Attica branch, and in places on the Falls road are only fair. The particular points where poor line and surface were noticed are listed with the track defects.

The tracks are laid with rail in weight and kind as follows:

Totals.	201.33	1.11	0.19	116.83	65.75	29.40	2.83	4.65	

The total new rail laid was 319.46 miles, or about 7.37 per cent; and the relayer rail laid was 102.63 miles, or 2.37 per cent, making a rail renewal of about 9.74 per cent which is sufficient for proper maintenance. The rail was usually in good condition. There were only a few defective rails noted and these were scattered, indicating that proper care is being taken to remove such rails in the early stages of the development of the defects. The

rail is poor on the DeKalb branch and should be replaced. The Raquette Lake branch is laid with 75-lb. and 67-lb. rail in about equal amounts. The 67-lb. rail is poor and an effort is being made to replace it with 75-lb. rail. During the last year, 4.65 miles have been relaid with the heavier rail, and it is expected to continue this until the entire branch is relaid. The Chenango branch is being relaid with 80-lb. relayer rail replacing 60-lb. which is surface kinked and bent being too light for the equipment in use. Since the last inspection 4.24 miles of heavier rail have been laid. This should be continued until all the light rail is replaced. The Tonawanda and Attica branches are light traffic lines laid with light rail in fair condition. The Canandaigua branch has heavier traffic and the 65-lb. rail is being replaced with 80-lb. new and relayer rail. Since the last inspection 14.51 miles have been relaid with the heavier rail: this should be continued. The Putnam division has 27.97 miles of 65-lb. rail in the main tracks. In the past year 6 miles of 80-lb. rail were laid releasing lighter rail, and it is expected to continue replacing the light rail. The rail on the high speed tracks was in particularly good condition. Exceptional care seems to be taken to eliminate from these tracks any rails which from their appearance might develop defects. This was noted on the Hudson division where a considerable number of rails slightly marked on the head by a defective wheel were being replaced. These rails were comparatively new and the indications of damage were slight.

The ties in the main line and more important branches are principally yellow pine, treated pine, and a small percentage of oak. A few of the branches have a considerable number of chestnut, cedar, and cypress ties, but the predominating ties in the branches as in the main line are yellow pine. The ties are in good condition. The renewals for this season were practically complete with the exception of the freight tracks and some of the less important branch lines where the renewals were in progress at the time of the inspection. The total renewals since the previous inspection were made with 1,422,743 ties, and the total authorization for this season was 1,282,800. The renewals on the main line were about 78.8 per cent creosoted yellow pine, and the balance yellow pine and oak. Creosoted ties were also used in the renewals on most of the branch lines, but not so extensively as on the main line. These ties are protected from rail cutting by substantial shoulder tie-plates. It was observed that the ties before being creosoted are not dressed to give an even bearing under the rail, and it is therefore necessary at times to adze them after they are creosoted.

The track appliances are modern. They consist of spring and rigid frogs, split switches, point and lifting derails usually pipe connected to the switch stands with target stand and lamp at the derail. The rails are joined with 6-bolt angle-bar splices of the 3 tie supported joint type. There are a few Weber and continuous rail joints on some of the branches, but their use is not general. Tie-plates and anti-rail creepers of modern design are in use. The former are used on all creosoted ties and on all curves of 3 degrees and over. The rails are double spiked on all curves. The track appliances were in good condition with the exception that a number of the spring frogs were broken back of the point on the turnout side. The tracks are ballasted with crushed stone, gravel, and cinders. The total length of track ballasted with crushed stone is about 1520 miles, or 35.1 per cent; gravel about 21.05 miles, or 48.6 per cent; and cinders and slag 707.23 miles, or 16.3 per cent. Since the previous inspection 446.95 miles of track, or about 10.39 per cent have been re-ballasted. This was done with 275.25 miles of crushed stone, 118.2 miles of gravel, and 53.5 miles of cinders and slag. Extensive re-ballasting was done on the main line of the Electric, Hudson, Mohawk, and Western divisions, amounting to 245.2 miles. The West Shore main tracks were re-ballasted with 85.5 miles of stone and gravel. The Harlem division is being re-ballasted with stone about 11.15 miles having been completed since the previous inspection. The balance was distributed over the various other divisions and branches, including 22 miles on the Pennsylvania, 14.7 miles on the Adirondack, 32.3 miles on the St. Lawrence, and 21.6 miles on the Ontario divisions. The ballast was generally of good quality and sufficient in amount. The gravel and cinder ballast in places is full of weeds. It was noted, however, that a start had been made to remove them on some of the divisions. It is presumed that this has been left until the other track work is completed, and will then be given the necessary attention. Churning track particularly in the gravel ballast was noted on tracks 3 and 4 and in places on the West Shore railroad. The particular points noted are listed under track defects. The right of way was generally clean and well kept. The construction work in progress at various places is responsible for an untidy condition which is unavoidable. There was a considerable amount of moving to be done which was being given attention in some places at the time of the inspection. The fences, where required, are well maintained. Concrete posts and wire are being used in their rebuilding. The road crossings are well maintained as to planking and approaches, but some of the signs are very dingy. The signs at road crossings, particularly

where there is no other protection provided, should be as conspicuous as possible: this can be accomplished only by keeping these signs well painted. The constantly increasing number of automobilists traveling on roads with which they are not familiar increases the possibility of accident at the railroad crossings, and an effort should be made to minimize this danger. The track sections on the four tracked divisions have an average length of about 2.5 miles with a force of 10 men during the summer season. This is equivalent to about 1 man per mile of single main track. The more important single and double tracked divisions have sections of greater length but slightly decreased force. However, the ratio of miles of main track to the force remains about the same as on the main line. The less important single tracked branches have sections varying from 10.5 miles with 8 men on the Albany branch to 9.67 miles with 5 men on the Attica branch. The generally good condition of the tracks is indicative that the force employed is ample for proper maintenance.

The minor defects in the track particularly noted were as follows:

Harlem division: the highway crossing-signs at the following points should be painted: the crossings in Chatham; near tower B A; near Philmont south of Craryville; at Martindale; north of milepost 108: this sign also appears to be hidden by a tree; near Colemans; north of milepost 79: this sign is also broken; and between bridges Nos. 66 and 67; the bell at the highway crossing south of Millerton was not ringing; the curve at bridge No. H-129 is not tie-plated and the low rail appeared to be spreading; a frog broken on the turnout side of the point at the south end of the passing siding near telegraph pole W. U. 2771, should be replaced; Lake Mahopac branch: a frog broken on the turnout side of the point at the east end of the siding at Lake Mahopac should be replaced.

Putnam division: the sign at the highway crossing near Yorktown Heights should be painted; the track ties are poor on bridge No. Y4A, and should be renewed at once.

River division: the track is open on the southbound near milepost 24; the surface and line are irregular on the northbound track between telegraph poles 27.05 and 27.15; churning track in the northbound at Congers; loose track bolts in both tracks north of Haverstraw; 3 joints near telegraph pole 32-13 in the northbound track had 5 loose bolts in each; at telegraph pole 32-16 one joint in the southbound track had all bolts loose and several joints had from 3 to 5 loose bolts; the eastbound track is churning at West Haverstraw, and loose bolts were noted in both tracks near here; the crossing-sign north of Tompkins Cove should be painted; the eastbound track at the west end of bridge No. 46 needs additional ballast, the track is loose, and the ties skewed; the eastbound track is churning at Fort Montgomery; the track is creeping, and the ties are bunched near milepost 43; the surface and line were poor in the westbound track at telegraph pole 108-15 and telegraph pole 111-05; Albany branch: the shoulder is too narrow properly to support the ballast on the east end of bridge No. 191; the surface and line are irregular between telegraph pole 7-10 and telegraph pole 7-15.

Mohawk division: main line: track 1 is open west of milepost 164; track 3 has poor surface and line, the rail surface bent and kinked, and the joints churning west of Hoffmans: it is expected to replace this rail with 100-lb. relayer and make extensive repairs to this track; track 4 has churning joints and creeping rail west of Little Falls, churning joints near milepost 240 and east of milepost 258, and poor surface and line, and lacks ballast west of milepost 258; tracks 3 and 4 have poor surface and line near milepost 263 and milepost 271; cracked splice bars (one bar only) were noted in track 1 at telegraph pole 158-8 and telegraph pole 158-9; there are 2 rails with halfmoon breaks in the base in the westbound freight track a short distance south of tower 99, Rensselaer; West Shore railroad: the crossing-signs should be painted at stop 7, in the city of Utica, west of milepost 190, at crossings 215, 216, and 204, between milepost 172 and milepost 170, near milepost 148, east of bridge No. W 213, at Guilderland Center, and at Feura Bush; the sign at the highway crossing west of Ilion is broken; the track is churning on the eastbound between milepost 181 and 180; the rail is curve worn on the eastbound track on curve 175-C.

Western division: main line: churning track and poor surface and line on track 4 east of tower 4; the surface and line is irregular on track 4 east of milepost 410, at milepost 301, and east of milepost 296 on track 3; the crossing-signs need painting east of milepost 367 and east of milepost 321; the ties are bunched in track 4 west of bridge No. 680; frogs broken on the turnout side of the point were noted in track 4 east of tower 16, and in the crossover between tracks 1 and 2 west of tower 24, Brighton; track 4 is churning near signal 33961; Syracuse Junction railroad: the crossover between tracks 3 and 4 east of S X tower has no switch timbers between the heel of the switch and the toe of the frog in track 3; the ties are laced; and the south rail in track 3 is supported on ties at intervals of about 45 inches; trackmen were observed raising track 3 east of bridge

No. J610 with the jack on the inside of the rail; West Shore railroad: the westbound needs additional ballast south of milepost 293 and north of bridge No. 447; the stock rail is worn in the main line connection at Jordan: it should be replaced; there is a cracked splice (one bar only) in the eastbound track on bridge No. 456; frogs in the main tracks broken on the turnout side of the point were noted as follows: in the crossover east of tower 432, in the eastbound west of Catherine street, Syracuse, 2 in the crossover east of Catherine street, Syracuse, 2 in the crossover at section house No. 19, Syracuse, in the westbound near milepost 277, in the westbound east of road crossing No. 347, Syracuse, 2 in the 2 turnouts at the east city line sign of Syracuse, in the crossover east of the east city line sign of Syracuse, and in the crossover west of Walden avenue; Chenango branch: the 80-lb. rail laid recently has only 3 bolts to a joint near milepost S-21 and east of milepost S-22; east of Ballina extensive tie renewals were being made, and the track raised on new cinder ballast; the poor ties had been removed and new ones put in place but not spiked; at places 2 or 3 ties together were not spiked and this condition existed for a considerable distance back of the track gang, so that the ties would probably remain unspiked for a day or more: it is the best practice to spike the ties when they are put in the track.

Buffalo division: Buffalo belt: the rail on both tracks between bridges Nos. 23 and 22 is of light section and rather poor; frogs broken on the turnout side of the point were noted in the eastbound on bridge No. B10 and near the water tank north of bridge No. 8; the rail is curve worn between bridges Nos. B20 and B21; a rail in the main track at signal station T has a piece of the head broken out on the gauge side about 4 inches long; Terminal railway: there is a split end rail on the eastbound track near telegraph pole 4-16; piped or split head rails were noted in the eastbound track near telegraph pole 4-15 and one about 500 feet and another about 700 feet west of the overhead highway bridge west of milepost 4; the first 2 mentioned above had angle-bars spiked on the one side of the rail.

Rochester division: Auburn road: the crossing-signs were dingy at many of the crossings; those particularly noted in this respect were at the following points: east of Solvay, at telegraph pole 63-15, milepost 5-76, and west of milepost S-92; Canandaigua branch: new rail has been laid and cinders distributed for re-ballasting near milepost C-9; the surface and line of the new rail are poor, and the rail will be permanently damaged if the track is not given prompt attention; the highway crossing-signs should be painted at the crossing west of milepost C-17 and at milepost C-43; Attica branch: the surface and line are only fair on this branch; the traffic is very light, and the track is safe; Falls road: the surface and line of the westbound track under the new rail is irregular between Suspension Bridge and Walmore, particularly on the curve near milepost R-74; the crossing-signs should be painted at the crossings near milepost R-72, east of milepost R-72, and west of milepost R-59; a frog broken on the turnout side of the point in the westbound track west of section tool house No. 16 should be replaced; Charlotte branch: the surface and line of the northbound track are poor; new 80-lb. rail has been laid on this track, and it is now being re-ballasted, surfaced, and aligned; the new rail replaced 65-lb. rail, and the ties were not adzed uniformly: the wheel bearing is consequently irregular on the rail; several points were observed where the rail was rolled in so that it is worn on the outer edge of the head; the track was being repaired, but a long time would be required to finish it, and it is likely that in the meantime under these conditions the rail would become surface bent and kinked.

Ontario division: Ontario branch: the crossing-sign should be painted at Walker; Watertown branch: loose track bolts were noted on bridge No. 12; main track frogs broken on the turnout side of the point were noted at the north end of the siding at Central Square and south of Mallory.

St. Lawrence division: Watertown branch: the passing track at Richville is overgrown with grass and weeds; Ogdensburg branch: the crossing-sign should be painted at Morristown; Carthage branch: there is a frog broken on the turnout side of the point in the main track at the east end of Wilna siding; the surface and line are irregular near milepost SH-47 and through the swamp near milepost SH-48; Oswegatchie branch: the crossing-sign at the tale mill near milepost G4 appears to be hidden from view by trees; the crossing-signs should be painted at the crossing west of milepost G5 and east of milepost G11; DeKalb branch: there is a defective rail in the south side of the main track on bridge No. 18D. The rust under the head on the gauge side is streaked, indicating a piped or split head; the rail on this branch is generally poor: it is to be replaced during next year.

Adirondack division: Adirondack branch: loose track bolts were noted in the main track north of Newport; a piped or split head rail was observed on the east side of the main track 6 telegraph poles south of milepost H-14; the rust was streaked on the gauge side under the head; the highway crossing-signs at the following crossings were dingy and should be painted: the 2

crossings between mileposts H-21 and H-22 and at milepost H-23; Raquette Lake branch: the rail is light, surface bent, and kinked between Eagle Bay and Raquette Lake: the balance of the line is laid with 75-lb. relayer rail in good condition; the replacement of the light rail will be continued each year until finished: this should be done with as little delay as possible.

Pennsylvania division: main line: the rail on the high side of the curve north of bridge No. 9 is curve worn and should be replaced; the surface and line are irregular on the southbound track north of milepost L27; there is a frog broken on the turnout side of the point in the southbound track at the connection of the south leg of the wye south of Dresden, and another broken in a similar manner in the crossover near milepost L34; the track needs additional ballast on the northbound south of milepost L64, on the southbound south of bridge No. 54, and on both tracks north of bridge No. 68, and near milepost L39; Lyons branch: the surface and line on the southbound track north of milepost L10 are irregular; Penn Yan branch: the highway crossing-sign west of milepost D5 should be painted.

The bridge structures are with a few exceptions permanent in character. The larger openings are usually steel in one form or another supported on either concrete or stone masonry. The smaller openings are usually solid I-beams, longitudinal trough, or rail floors with or without concrete slabs. The girder and truss bridges in many cases have solid floors with the tracks ballasted thereon. These solid floors are usually transverse troughs or I-beams. On some of the transverse trough floors the track ties are supported on ballast between the plates making the tie spacing rather open. The bridges of recent construction having solid floors are made with transverse I-beams, and the ties are concreted in the deck with a wedge at one end. The ties are sized, creosoted, equipped with shoulder tie-plates, and the rails are fastened with screw spikes. The concrete floor is sloped down from the ends of the ties, and there is an opening between the concrete floor and the girder for the water to drain off of the bridge. In the older bridges of this kind the water collected under the ballast and had a tendency to corrode the steel.

The bridges are with a few exceptions in good condition. A criticism which applies to a number of them is the insufficient spiking of the guard-rails. The ties on the open floor bridges are spaced about 12 inches center to center, and the guard-rails and main rails on the majority of these are spiked at 24-inch intervals on the bridges, and about 20-inch intervals elsewhere. Although this appears to be inconsistent, the general practice being to spike the rails on a bridge at least as frequently as on ordinary track, it is safe. There are however a number of these bridges on which the guard-rails are spiked every fourth or fifth tie, and some ballasted floor bridges with the tie spacing 24 inches or more on which the guard-rails are spiked on alternate ties. This is obviously incorrect. The guard-rails should be full spiked to every tie where the tie spacing is 14 inches or more. It is the standard practice on this railroad to equip with inside guard-rails all the open span bridges over 20 feet between under copings. This is equivalent to a span of about 25 feet between back walls. It is the best practice to apply inside guard-rails to spans of 15 feet or more between back walls.

The minor defects in the bridges particularly noted are as follows:

Electric division: New York and Harlem railroad: bridge No. H60 and the first deck plate girder bridge north are about 20 feet and 35 feet in length respectively and they are not equipped with guard-rails; bridge No. H55, the masonry abutments have failed and the steel truss is supported on timber blocking.

Hudson division: bridge No. 147 is a deck plate girder raised on temporary wooden blocks; I-beam grillages are being made to replace the temporary blocks; bridge No. 223, the girders under the present tracks are supported on frame bents: 2 additional tracks are being built along the east side of the present tracks, and when they are placed in service this bridge will be rebuilt; bridges Nos. 302 and 324, the stone masonry is poor and the girders are supported on frame bents: the renewal of these bridges is held up pending the completion of plans for the construction of the third and fourth tracks; bridge No. 306, the bridge seats on the east abutment are cracked.

Harlem division: bridge No. H151 is being rebuilt with concrete abutments and new girders; bridge No. H149A is about 20 feet in length and has no inner guards; bridge No. H145, the inner guards are not properly spiked: in some places they are spiked on every fifth tie; bridge No. H114, the north abutment is being rebuilt with concrete: it is expected to shorten the span about 5 feet and thus strengthen the girders; bridges Nos. 107, 106, 102, 101, 100, 99, 97, 96, 75, and 74 are plate girder or I-beam spans with ballasted floors on which the inner guards should be full spiked; the 6 span deck plate girder bridge east of milepost 49 needs some new ties: about 200 will be replaced; bridge No. 83 has some poor ties: Lake Mahopac branch: bridge No. L165 is a rail floor span with stone masonry abutments which are cracked; bridge No. 162 has saprot on the deck

which should be adzed off: it is about 30 feet long and has no inner guards.

Putnam division: bridge No. P16 has a poor deck: this bridge is to be replaced; bridge No. P22 has saprot on the deck; bridge No. P27 has some poor ties and guard stringers; bridges Nos. P30 and P31 have saprot on the deck timbers; bridge No. P35 has some poor ties; bridge No. P50 is a ballast floor span: the inner guards are not full spiked; bridge No. P67 is a temporary trestle in use during the construction of a permanent bridge for the elimination of a grade crossing.

River division: bridge No. 22, the running rail on the west-bound is spiked on every fourth tie; bridge No. 25 is on a curve: the ties are rail cut on the eastbound track: tie-plates would prevent this and should be installed; bridge No. 27, the steel is dirty; bridge No. 27A is about 30 feet long and has no inner guards; bridges Nos. 34 and 56 are through truss double track spans: the floor beams are supported on blocking and the trusses are relieved from any load; bridge No. 63, the steel and bridge seats are dirty; bridges Nos. 131, 132, and 140 have saprot on the decks; Walkill Valley: the Rosendale viaduct is of light steel construction and a speed limit of 6 miles per hour is enforced: there are some poor ties in the deck, about 100 ties are to be renewed this year; the steel was being painted at the time of the inspection; Albany branch: bridge No. 191, the stone masonry bridge seats on the east abutment have failed: the truss is temporarily supported on a double frame bent in front of the abutment; the masonry was to be repaired at once; bridge No. 194 has saprot on the deck timbers.

Mohawk division: the steel and bridge seats are dirty on the Mohawk River bridge at Schenectady and also on bridges Nos. 391 and 413; bridge No. 422 is a 2-span through plate girder with ballasted floor about 60 feet in length: there are no inner guards; bridges Nos. 425 and 447 are ballasted floor through plate girders about 30 feet in length with no inner guards; bridge No. 450, the inside guard-rails on tracks 1 and 2 are spiked on every fifth tie; bridge No. 452, inner guards are installed on tracks 1 and 4, and they are spiked to every fourth or fifth tie; the ballasted floor through plate girder bridge east of milepost 213 has the guard-rails spiked on alternate ties: it should be full spiked; bridge No. 455 has inner guards on tracks 1 and 4 only, and they are spiked on about every sixth tie; bridge No. 456 is about 30 feet in length and has no inner guards; bridge No. 466, the inner guards are spiked in places 4 times to the rail, and the main rail on track 2 is spiked in places on every fourth tie; bridge No. 467, the inner guards in places are spiked on every fifth tie; bridge No. 468 is about 40 feet long and has no inner guards; bridge No. 476 is about 35 feet long and has no inner guards; bridges Nos. 480A and 586 the inner guards are spiked every fourth tie; bridge No. 494 is about 30 feet long, and has no inner guards; bridge No. 565 is about 24 feet in length and has no inner guards; bridge No. 572 is a ballasted floor through plate girder on which the guards should be full spiked; West Shore railroad: the bridge east of Manlius Center and the 2 span girder bridge east of South Bethlehem have the inner guards spiked every fourth tie; the bridge east of CV tower has the inner guards spiked every fifth tie; the bridge east of YO tower is a ballast floor through plate girder about 60 feet long with no inner guards; bridge No. W383 is about 90 feet long and has no inner guards; bridge No. W380 is a through plate girder about 30 feet in length and has no inner guards; bridges Nos. W379, W322, W315, W242, W241, and W216 have the inner guards spiked every fifth tie; bridge No. W368 is a ballasted floor through plate girder, and should have the inner guards full spiked; bridge No. W364 and the first bridge east of milepost 227 have the main rail and inner guards spiked every fourth tie; bridge No. W360 is a through plate girder about 30 feet in length, and has no inner guards; the 2-span ballasted floor through plate girder bridge west of Mohawk is about 80 feet long and has no inner guards; bridge No. W306 is about 30 feet long and has no inner guards; the girder bridge east of Indian Castle has the inner guards spiked every fourth tie; bridge No. W279, the inner guards are spiked every fourth tie, and the bridge seats and steel are dirty; bridge No. W278, the inner guards are spiked every fifth tie, and the bridge seats are dirty; the through girder bridge west of Sprakers has the inner guards spiked every fourth tie, and the bridge seats and steel are dirty; bridge No. W261 the inner guards are spiked every sixth tie, and the bridge seats are dirty; bridges Nos. W260 and W259 have the inner guards spiked every sixth tie; the deck girder bridge west of Auriesville has the inner guards spiked every fifth to seventh tie, and the bridge seats are dirty; the through girder bridge east of milepost 163 and bridges Nos. W224 and W215 are each about 35 feet long and have no inner guards; bridge No. W236 has the inner guards on the east-bound spiked about every sixth tie; bridge No. W233, the bridge seats are dirty; Troy and Greenbush branch: the bridge near Iron Works needs new outer guards; Troy and Schenec-

tady branch: bridges Nos. T37, T36, T19, and T14 have the inner guards spiked every fourth tie.

Western division: the bridge over Hamilton street, Syracuse, has a cracked bridge seat on the east abutment under the middle girder; the 3-span ballasted floor bridge over the street west of tower 25 has no inner guards; bridges Nos. 669 and 666 have the inner guards on tracks 3 and 4 spiked on every fourth tie; bridge No. 636 is about 100 short spans of deck girders on stone and concrete piers: the stone masonry piers in many instances are failing, and they are being replaced with concrete: they are reinforced with frame bents pending their replacement, which was progressing in a satisfactory manner at the time of the inspection; bridge No. 627 is a ballast floor 1-beam span about 24 feet in length with no inner guards; bridge No. 590 is a girder span about 80 feet long and has no inner guards; Syracuse Junction railroad: J616, the ties are about 30 inches center to center, and the inner guards are spiked on alternate ties; J608A and J609 are deck girder bridges with inner guards on 1 track only; West Shore railroad: bridge No. W433 is a deck girder about 80 feet long, and it is not equipped with inner guards; bridge No. W454, the inner guards in several places are spiked on the third and fourth ties; the long deck girder bridge west of milepost 308 has some poor ties, and saprot on the deck timbers; bridge No. W473 has some poor ties due to saprot; bridge No. W494 has saprot on the eastbound deck; bridge No. W500, the ties are poor on the eastbound track; bridges Nos. W438 and W501 have saprot on the decks; bridge No. W507 has saprot on the deck and some poor ties; bridge No. W507 D is a frame bent trestle: new concrete masonry is completed, and steel is being assembled to replace the trestle; bridge No. 584, several angle-bar slots are spiked to the bridge ties; Chenango branch: bridge No. E17 is a deck girder about 20 feet long on a curve, and it has no inner guard-rails; bridge No. E46 is about 25 feet long, on a curve, and has no inner guards; bridge No. E47 has the inner guards spiked on every fourth or fifth tie; bridges Nos. E63, E64, and E65 are timber trestles with the inner guards spiked every fifth tie; bridge No. E71 has creosoted deck timbers: the track is on a curve, and there are no plates to protect the ties which are consequently rail cut; bridges Nos. E73 and E78 have shims under the rails which can be removed by putting plates under the girder bearings.

Buffalo division: Niagara branch: bridge No. 24 has a cracked bridge seat on the west abutment; Lockport branch: bridges Nos. K128 and K129 have the inner guards spiked every fourth tie; Belt line: the guard-rails on the approach to bridge No. B23 should be full spiked; Terminal railway: bridge No. 8 is a 2-span through plate girder bridge about 180 feet in length with no inner guards.

Rochester division: Auburn road: bridge No. A19 has a transverse trough floor with ordinary track ties between the plates: the inner guards are spiked on alternate ties: they should be full spiked; Canandaigua branch: bridge No. P1, the ties are spaced about 15 inches apart, and the inner guards are spiked on alternate ties; bridges Nos. P15C and P30 have some poor ties; bridge No. P23, the ties are spaced about 15 inches apart, and the main rail and inner guards are spiked on alternate ties; bridge No. P45 the inner guards are spiked on every fourth tie; bridge No. P51, the masonry joints in the pier on the east side under the north girder are open and should be pointed; bridge No. P57 has a ballast floor with the guard-rails spiked on alternate ties; Falls road: bridge No. F186 is a solid floor with the ties embedded in concrete between the transverse I-beams: the inner guards are spiked on every fourth tie.

Ontario division: Ontario branch: bridge No. O-56, the inner guards are not full spiked off of the bridge; bridge No. O-56A is a solid floor made of transverse troughs with track ties on ballast between the plates: the inner guards are spiked on alternate ties; bridge No. O-97 is a steel viaduct with the ties spaced about 15 inches apart: the main rail and the inner guards are spiked on alternate ties; bridges Nos. O-99, O-130, O-138, O-142, O-145, and O-201, the inner guards are spiked on every fourth tie; bridge No. O-102, the east abutment is cracked: it is braced with timbers, and the girders are supported on a frame bent in front of the abutment; bridge No. O-186A is an I-beam ballasted floor about 24 feet long without inner guards; bridge No. O-196 is a through plate girder with ballasted floor: the inner guards are not full spiked; the 3-span girder bridge east of Red creek has the inner guards spiked every fourth tie, and joined with half angle-bars with 2 bolts in the joints; bridge No. O-226 is about 28 feet long and has no inner guards; bridge No. O-227 is a deck girder about 28 feet long without inner guards and the main rail in places on the westbound track is spiked every fourth tie; Phoenix branch: bridge No. P4 has the inner guards in places spiked every fifth tie; Watertown branch: bridge No. 3, the steel is dirty; bridge No. 12, the masonry is poor: the steel is supported on frame bents: steel is on hand to replace this bridge, but the work is delayed pending negotiations with

the State on account of the Barge Canal, the channel of which this bridge spans: the canal channel has been dredged under the bridge, and it is likely that it is now below the foundation of the piers; trains are restricted to a speed of 8 miles per hour, and the structure is carefully inspected at frequent intervals; bridge No. 14, the bridge seats are dirty, and the inner guards are spiked on every fourth tie; bridge No. 22, the inner guards are spiked every fourth tie; Rome branch: bridges Nos. R-1, R-44, and R-52 have the inner guards spiked about every fourth tie.

St. Lawrence division: Watertown branch: bridge No. 78 has poor ties, and the inner guards are spiked every fourth tie: it is expected to renew the deck; bridge No. 99 has the inner guards spiked about every fifth tie; bridge No. 116, the south abutment is cracked under the west bearing; bridge No. 187 is being replaced with a concrete flat top culvert; bridge No. 188 is a one span pile trestle: the deck is poor: this opening is to be replaced with a concrete flat top culvert; Ogdensburg branch: bridge No. U-206 is a through girder span about 39 feet long with a ballast floor: it has no inner guards; bridge No. U-176, the bridge seat on the west side of the north abutment has a piece broken out: it is expected to face the abutment with concrete; bridge No. U-74 has saprot on the deck timbers; bridge Nos. U-53 and U-50 have the inner guards spiked about every fourth tie; bridge No. U-52 has poor stone masonry abutments which are reinforced with frame bents: this bridge will be rebuilt next year; bridge No. U-29 has some saprot on the deck timbers; Cape Vincent branch: bridge No. V8 has the inner guards spiked about every fourth tie; bridges Nos. V20, V31, V32, V33, and V36 are girder bridges over 20 feet long having no inner guards; Cathage branch: bridges Nos. C-3 and C-5 have the inner guards spiked every fourth tie; bridges Nos. C-17 and C-18 have poor stone masonry: these structures will be replaced with concrete flat top culverts; bridges Nos. C-22, C-23, and C-32 are I-beam spans about 24 feet long having no inner guards; Oswegatchie branch: bridge No. G-2 is a through girder about 32 feet long without inner guards; bridge No. G-17 has the inner guards spiked on alternate ties: the ties are about 16 inches apart; bridge No. G-20, the inner guard rails are spiked on about five ties to the rail; bridge No. G-22 has saprot on the deck timbers; DeKalb branch: bridges Nos. D-6 and D-18 the inner guards are spiked every fourth tie; bridge No. D-14, the deck is poor: this opening will be replaced with a concrete flat top culvert; Adirondack branch: bridge No. M-10 is a ballast floor span about 25 feet long with no inner guards; bridge No. M-14 has poor ties; bridge No. M-15 is a through truss with a transverse trough ballasted floor: the ties are between the plates, and the inner guards are spiked on alternate ties or at about 4-foot intervals: some of the ties are poor; bridge No. M-16 has a ballast floor and the inner guards are spiked on alternate ties: the ties are poor; bridge No. M-28 has a ballasted floor: it is about 30 feet in length and has no inner guards; bridge No. M-113, the main rail and inner guards are spiked on every fourth tie; bridge No. M-112 is about 25 feet in length and has no inner guards; St. Lawrence and Adirondack: bridge No. 17 has the inner guards spiked every fourth tie; bridge No. 29, the inner guards are insufficiently spiked on the approaches to the bridge; Hinckley branch: the 3-span deck girder bridge has some angle-bar slots spiked to the ties.

Pennsylvania division: bridge No. 25 has the inner guards spiked every fourth tie; bridge No. 33 has saprot on the deck of the southbound track; bridge No. 39 has the inner guard-rails spiked every fourth tie; bridge No. 54 has a ballasted floor and the inner guards are spiked on alternate ties; bridge No. 64 is a through girder about 30 feet long without inner guards; bridge No. 68 is a deck girder about 24 feet long without inner guards; bridge No. 70 is a through girder with a transverse trough, ballasted floor. The ties are spaced 12 to a rail, and the inner guards are spiked on alternate ties; Penn Yan branch: bridge No. Y-2 is a deck plate girder supported on temporary wooden blocks: the inner guards are spiked every fourth tie: this bridge will be replaced with I-beams and concrete.

The station buildings generally appear to provide facilities consistent with the peculiar needs of each locality. The buildings are in good repair and usually well painted. Where it is available, running water with flush closets and sanitary drinking fountains are provided. The waiting rooms were clean and orderly, and the driveways, lawns, and platforms were in good condition. The buildings are principally frame of which there are 517. There are, however, 77 brick, 24 stone, and 3 stucco buildings which are at the more important junction points and cities. The platforms are elevated at most of the stations in the commuter district of New York city and at some of the other important stations. Where the platforms are covered by a canopy they are usually concrete. Brick is being used extensively to replace exposed screening and wood platforms. Since

the previous inspection 16 frame, 3 brick, and 2 stone station buildings have been completed and placed in service. Among these are the stations at Utica and Rochester which are modern structures, each peculiarly adapted to the local conditions, and although dissimilar in design, they are both conveniently arranged for the safe and prompt handling of passengers and equipped with modern and sanitary conveniences. They are by far the finest examples of station architecture within the jurisdiction of this Commission and they are a credit to the railroad company and the communities which they serve. The concrete island platforms with shelter roofs are connected with the waiting-rooms by well lighted subways. The upper stories of these buildings are utilized for division offices.

The other new stations are modern, convenient, sanitary, and of fitting design for the local requirements. There are new stations in course of erection or contemplated in connection with the extension of the third and fourth tracks and change in alignment at Poughkeepsie and Fishkill on the Hudson division, and at White Plains and Ossining on the Electric division. The station at Bryn Mawr Park on the Putnam division was destroyed by fire, and a passenger car is in use temporarily until the station can be rebuilt. The station at Heuvelton on the DeKalb branch has been moved to a new location and is being rebuilt. A passenger car is being used temporarily. The steps in front of the station at West Rush on the Canandaigua branch should be repaired. The platform was dirty at Massena Springs.

The grade crossings with steam railroads are as follows:

Hudson division: Cold Spring, 4 tracks are crossed by 1 track of the J. B. and J. M. Cornell Company, protected by mechanically interlocked signals with derails in the industrial track. Hudson, 4 tracks are crossed by two tracks of the Boston and Albany railroad, protected by mechanically interlocked signals and derails.

Harlem division: Millerton, 1 track is crossed by 1 track of the Central New England railway, protected by gates which swing across the track. Boston Corners, 2 tracks are crossed by 1 track of the Central New England railway, protected by gates which swing across the track. Lake Mahopac branch. Lake Mahopac, 1 track is crossed by one track of the Putnam division, protected by interlocked signals.

River division: Kingston, 2 tracks are crossed by 2 tracks of the Ulster and Delaware railroad, protected by electrically controlled mechanically operated signals.

Mohawk division: Rensselaer, 3 tracks are crossed by 3 Boston and Albany railroad tracks, protected by mechanical interlocking. Albany Basin, 1 siding is crossed by 2 main tracks of The Delaware and Hudson Company's railroad, protected by low pressure pneumatic interlocking. Troy and Schenectady branch: Schenectady, 2 tracks are crossed by 2 tracks of The Delaware and Hudson Company's railroad, protected by mechanically interlocked signals. Green Island, 3 tracks are crossed by 1 siding of The Delaware and Hudson Company's railroad, protected by an interlocking plant. West Shore railroad: Voorheesville, 2 tracks are crossed by 1 track of The Delaware and Hudson Company's railroad, protected by a swinging gate operated by day and night flagmen. South Schenectady, 3 tracks are crossed by 1 track of The Delaware and Hudson Company's railroad, protected by mechanical interlocking. New York Mills, 2 tracks are crossed by 1 track of the Delaware, Lackawanna and Western railroad, protected by mechanical interlocking. New York Mills, 2 tracks are crossed by 1 track of the New York, Ontario and Western railway, protected by mechanically interlocked signals. Clark Mills, 2 tracks are crossed by 1 track of the New York, Ontario and Western railway, protected by mechanical interlocking. Canastota, 2 tracks are crossed by 1 track of the Lehigh Valley railroad, protected by mechanical interlocking.

Western and Buffalo divisions: Batavia, 6 tracks are crossed by 1 track of the Erie railroad, protected by electric interlocking. Syracuse, 1 track is crossed by 1 track of the Delaware, Lackawanna and Western railroad, protected by mechanical interlocking. Salina, 2 tracks are crossed by 2 tracks of the Ontario division, Watertown branch, protected by mechanical interlocking. Buffalo, 4 tracks are crossed by 1 track of the West Shore railroad, connection with the Buffalo Creek railroad, protected by pneumatic interlocking; 4 tracks are crossed by 2 tracks of the Pennsylvania railroad, protected by electric interlocking; and 4 tracks are crossed by 2 tracks of the Erie railroad, protected by pneumatic interlocking. Lyons, 5 tracks are crossed by 1 track of the Pennsylvania division, protected by mechanical interlocking. Attica branch: Batavia, 1 track is crossed by 1 track of the Erie railroad, protected by a tilting board. Niagara branch: Black Rock, 2 tracks are crossed by 2 tracks of the Erie railroad, protected by mechanical interlocking. North Tonawanda, 6 tracks are crossed by 1 track of the Erie railroad, protected by mechanical interlocking. Suspension Bridge, the main track and the Y tracks are crossed by tracks of the Grand Trunk, Michigan Central, Erie, and Lehigh Valley railroads, protected by pneumatic interlocking controlled from tower No. 65. Tonawanda branch: North Tonawanda, 1 track is crossed

by 1 track of the Erie railroad, protected by mechanical interlocking; and 1 track is crossed by 3 tracks of the Lockport branch, protected by mechanical interlocking. Lockport branch: North Tonawanda, 2 tracks are crossed by 1 track of the Erie railroad, protected by all electrically interlocked signals and derails. Terminal railway: Gardenville Junction, 2 tracks are crossed by 2 tracks of the Pennsylvania railroad, protected by mechanically interlocked signals and derails. Chenango branch: Rippleton, 1 track is crossed by 1 track of the Lehigh Valley railroad, protected by a revolving target connected with the manual block signal. West Shore railroad: Syracuse, North Franklin street, 2 tracks are crossed by 1 track of the Watertown branch, Ontario division, protected by mechanically interlocked signals. Mortimer, 2 tracks are crossed by 1 track of the Lehigh Valley railroad, and 1 track of the Erie railroad, protected by mechanically interlocked signals and derails. Genesee Junction, 2 tracks are crossed by 1 track of the Pennsylvania railroad, protected by swinging gates. Akron Junction, 2 tracks are crossed by 1 track of the Tonawanda branch, protected by mechanically interlocked signals and derails.

Rochester division: Canandaigua branch: Golah, 1 track is crossed by 1 track of the Erie railroad, protected by a tilting board. Caledonia, 1 track is crossed by 1 track of the Genesee and Wyoming railroad, protected by mechanically interlocked signals. Leroy, 1 track is crossed by 1 track of the Buffalo, Rochester and Pittsburgh railroad, protected by a tilting board; and 1 track is crossed by 1 track of the Erie railroad, protected by a tilting board. Charlotte branch: Charlotte, 3 tracks are crossed by 2 tracks of the Ontario division, protected by interlocked signals. Auburn branch: Auburn, 1 track is crossed by 1 track of Lehigh Valley railroad, protected by mechanically interlocked signals. Phelps Junction, 1 track is crossed by 1 track of the Northern Central railway, protected by flagman; all trains stop before crossing; a red flag by day and a red light at night are the indications to proceed for Northern Central railway trains; a white flag or light displayed indicates proceed for New York Central and Hudson River railroad trains.

Ontario division: Ontario branch: Wallington, 1 track is crossed by 1 track of the Northern Central railway, protected by mechanically interlocked signals. Sterling, 1 track is crossed by 1 track of the Lehigh Valley railroad, protected by mechanically interlocked signals and derails. Oswego, at 1.04 and 1.67 miles east 1 track is crossed by 1 track of the New York, Ontario and Western railway: each of these crossings is protected by a tilting board. Watertown branch: Central Square, 1 track is crossed by 1 track of the New York, Ontario and Western railway, protected by semi-automatically interlocked signals and derails.

St. Lawrence division: Watertown branch: Philadelphia, 2 tracks are crossed by 2 tracks of the Ogdensburg branch, protected by semaphore signals. G. and O. Junction, 1 siding is crossed by 1 leg of the wye on the Oswegatchie branch, no protection is provided. Norwood, 1 track is crossed by 1 track of the Rutland railroad, protected by interlocked semaphore signals.

Adirondack division: Tupper Lake Junction, 1 track is crossed by 1 track of the New York and Ottawa railway, protected by electrically interlocked signals. Malone Junction, 2 tracks are crossed by 1 track of the Rutland railroad, protected by electrically operated and interlocked signals.

Pennsylvania division: Corning, 2 tracks are crossed by 2 tracks of the Erie railroad, protected by mechanically interlocked signals and derails.

The grade crossings with electric railroads are as follows:

Electric division: New York and Harlem railroad: White Plains, 2 tracks are crossed by 1 track of the Westchester Street railroad, protected by gates.

Putnam division: Dunwoodie, 2 tracks are crossed by 1 track of the Yonkers railroad, protected by gates. Nepperhan, 1 track is crossed by 1 track of the Yonkers railroad, protected by gates and derails in the trolley track. Elmsford, 1 track is crossed by 1 track of the Westchester Street railroad, protected by gates and derails in the trolley track.

River division: Kingston, 3 tracks are crossed by 1 track of the Kingston Consolidated railroad, protected by gates.

Mohawk division: West Shore railroad: South Utica, 2 tracks are crossed by 2 tracks of the New York State Railways at Mohawk street and at Genesee street, both crossings being protected by gates and derails in the trolley tracks. Old main line at Rome: Rome, 2 tracks are crossed by 2 tracks of the New York State Railways, protected by derails in the trolley track. Main line: Amsterdam, 1 siding is crossed by 1 track of the Fonda, Johnstown and Gloversville railroad, protected by a derail in the trolley. Tivoli Hollow railroad: Albany, 1 track is crossed by 1 track of the United Traction Company, protected by a flagman. Troy and Schenectady branch: Green Island, 1 track is crossed by 1 track of the United Traction Company, protected by gates.

Western and Buffalo divisions: Syracuse, East Genesee street, Warren street, and Salina street, 2 tracks are crossed by 2 tracks of the New York State Railways: each crossing is protected by a

flagman. Tonawanda branch: North Tonawanda, 1 track is crossed by 1 track of the International railway, protected by mechanical interlocking. North Tonawanda, Goudry street, 1 track is crossed by 1 track of the International railway, protected by a flagman. Niagara branch: Buffalo, Hertel avenue, 4 tracks are crossed by 2 tracks of the International railway, protected by a flagman and derails in the trolley tracks. Niagara Falls, Second street, 6 tracks are crossed by 2 tracks of the International railway, protected by gates. Lewiston, 2 tracks are crossed by 1 track of the Niagara Gorge railroad, without protection. Lockport branch: North Tonawanda, 0.16 mile east, 2 tracks are crossed by 1 track of the International railway, protected by an all electric interlocking plant. North Tonawanda, Vandervoort street, 3 tracks are crossed by 1 track of the International railway, protected by a flagman. North Tonawanda, Paynes avenue, 2 tracks are crossed by 2 tracks of the International railway, protected by mechanical interlocking. North Tonawanda, 1.01 miles east, 1 track is crossed by 1 track of the International railway, protected by mechanical interlocking. West Shore railroad: Syracuse, James street and Salina street, 2 tracks are crossed by 2 tracks of the New York State Railways, protected by gates at both crossings. Terminal railway: Depew, 2 tracks are crossed by 1 track of the Buffalo Southern railway, protected by derails in the trolley tracks.

Rochester division: Auburn branch: Canandaigua, 2 tracks are crossed by 1 track of the New York State Railways, protected by derails in the electric line. Geneva, 1 track is crossed by 1 track of the Geneva and Auburn railway, and near the station, 2 tracks are crossed by 1 track of the Geneva and Auburn railway; the former is protected by derails in the trolley track, and the latter by a flagman. Auburn, 2 tracks are crossed by 1 track of the Auburn and Syracuse Electric railroad, protected by a flagman. Falls branch: Otis, 2 tracks are crossed by 2 tracks of the New York State Railways, protected by derails in the electric line. West Lockport, 3 tracks are crossed by 1 track of the International railway, protected by a flagman.

Ontario division: Ontario branch: Oswego, 1.74 miles west, 1 siding is crossed by 1 track of the Empire United Railways; 0.03 mile and 0.44 mile east, 2 tracks are crossed by 1 track of the Empire United Railways; and 1.13 miles east, 1 track is crossed by 1 track of the Empire United Railways; these crossings are unprotected except that they are flagged by the conductors on the electric railroad. Watertown branch: Syracuse, 0.20 mile east, 1 track is crossed by 2 tracks of the New York State Railways, without protection except for the flagging done by the crews of the electric cars. Syracuse, 0.32 mile east, 1 track is crossed by 2 tracks of the Empire United Railways, protected by derails in the trolley tracks. Rochester branch: Rochester, 2.72 miles north, 1 track is crossed by 1 track of the New York State Railways, protected by derails in the trolley track.

St. Lawrence division: Watertown branch: Watertown, 0.5 mile south, 3 tracks are crossed by 1 track of the Black River Traction Company, protected by gates; derails should be provided in the electric tracks on account of the steep grade on the approach to the crossing. Watertown, 0.5 mile north, 1 track is crossed by 1 track of the Black River Traction Company, without protection except the flagging done by the crews of the electric cars. Watertown, 1 mile north, 1 siding is crossed by 1 track of the Black River Traction Company, without protection. Cape Vincent branch: Watertown, 1.5 miles west, 1 track is crossed by 1 track of the Black River Traction Company, protected by gates. Carthage branch: Watertown, 0.5 mile east, 2 tracks are crossed by 1 track of the Black River Traction Company, protected by derails in the electric tracks.

Pennsylvania division: Geneva, 1.1 miles north, 2 tracks are crossed by 1 track of the Geneva and Auburn railway, protected by derails in the electric track.

Train movements on the main line between New York city and Buffalo are controlled by automatic and controlled manual block systems. The latter was formerly used exclusively, but in recent years an electric automatic block system has been installed which has replaced it on all but a comparatively short mileage. The West Shore railroad from Nyack to South Schenectady, the Troy and Greenbush branch, Niagara branch from Crosstown Junction to Suspension Bridge, the New York and Harlem railroad from the New York city line near Mt. Vernon to Dykemens, the Yonkers branch, the Falls road between West Lockport and Lockport Junction, the Watertown branch from Syracuse to Salina, and the eastbound track on the Terminal railway from Gardenville Yard to Depew Junction are equipped with automatic electric block signals. These signals are either the 2-arm, 2-position lower quadrant or the 1-arm 3-position upper quadrant types. The West Shore railroad between Clark Mills and Kirkville Junction, and the Hoffmans connection are equipped with a controlled manual block system. The other lines have the manual or telegraphic block system except on one or two of the minor branches. There are automatic disc or banjo signals on the main line of the Niagara branch between Exchange street and Terrace stations in Buffalo. Train movements are restricted to a speed of 6

miles per hour where these signals are in service, and under the conditions their use is not considered unsafe. In addition to the signal stations for the manual block system there are a considerable number of interlocking plants protecting grade crossings, crossovers, yard entrances, etc. These are principally mechanically, pneumatically, or electrically operated. The newer installations are all electric and have 3-position upper quadrant signals.

The train order signals are both upper and lower quadrant types with the east and west or north and south arms on the same pole located in front of the telegraph station.

The signals were in good condition and no defects were noted.

The main line south of Croton-on-the-Hudson and the New York and Harlem railroad south of North White Plains are equipped for electric traction, and the trains destined to the Grand Central Terminal are electrically operated. Terminal facilities are nearing completion at Harmon on the main line where the change from electric to steam locomotives is now made on all trains.

The West Shore railroad is also equipped for electric traction between Clark Mills and Syracuse. The electric cars of the New York State Railways are operated over this track under an agreement. The electric power is supplied by a third rail system in which the contact rail is supported head down on a gooseneck casting resting on the ends of long track ties. The contact shoe on the cars or locomotives is held in place against the head of the rail by a spring. The third rail is covered with a wooden box which fits over the top and sides leaving only the head exposed.

The principal terminals on the main line are at New York city and Buffalo. The former is the largest shipping center in the United States, and the centrally located passenger and freight terminals in this city yield a large volume of business destined to points in central and northern New York and to points west of Buffalo via the Great Lakes and the various railroad connections in Buffalo. The Boston and Albany railroad connection at Albany is a very important line of communication between New England and points north and west of Albany, and a considerable volume of business is handled through this gateway.

The West Shore railroad parallels the main line from Weehawken, on the west bank of the Hudson river opposite New York city, to Buffalo. A heavy suburban passenger service is performed south of West Haverstraw and a limited number of local trains are operated to and from Albany. The passenger service between Ravena and South Utica is strictly local with the exception that 3 through passenger trains in each direction between Weehawken and Buffalo use the West Shore tracks south of Rotterdam Junction. Between South Utica and Syracuse there is no passenger service except that which is performed by the New York State Railways. West of Syracuse a local passenger service is performed by 1 train in each direction to Fairport. There is no passenger service between Fairport and Churchville Junction. One main line through train in each direction between Buffalo and New York, and 3 local trains between Buffalo and Rochester are operated over the West Shore tracks between Churchville Junction and Buffalo. The various connections with the main line between Albany and Buffalo make it a valuable auxiliary freight line for which it is extensively used. The Adirondack division from its connection with the Ogdensburg branch of the St. Lawrence division at Remsen to Malone Junction is used principally for passenger service, due to prohibitive grades and the state regulations requiring oil burning locomotives during the greater part of the day in the Summer. The summer travel to the Adirondack lake and mountain resorts is comparatively heavy, and in addition through trains are operated between Utica and Montreal. The branch lines to Raquette Lake and Saranac Lake have a moderate summer traffic. Trains from the latter branch are operated over the tracks of The Delaware and Hudson Company to Lake Placid. There is a comparatively heavy freight traffic north of Malone Junction which is handled in connection with the St. Lawrence division by trackage over the Rutland railroad from Malone Junction to Norwood. There is some freight traffic between Malone Junction and Remsen but it is moved at night during the summer season when coal burning engines are permitted.

The St. Lawrence division has a purely local passenger traffic which is somewhat increased during the summer season by travel to and from the east shore of Lake Ontario and the St. Lawrence Valley. The through freight traffic is comparatively heavy from Massena Springs, the Grand Trunk railway connection, and Norwood the Rutland railway connection where the Adirondack division freight trains are received as mentioned previously, south to Watertown and via the Ontario division to Syracuse and Rome where connections are made with the main line. There is also a comparatively heavy freight traffic over the Ogdensburg branch between Ogdensburg where connection is made with the lake steamers, and Utica.

The Watertown and Rome branches of the Ontario division have comparatively heavy freight traffic. The Ontario branch has a considerable local freight traffic consisting of farm, orchard, and

dairy products. The passenger traffic is moderate on the entire division. Passenger trains are operated over the tracks of the New York, Ontario and Western railway between Oswego and Broadway, Fulton.

The Rochester division has a moderate local freight and passenger service, except on the Falls road where the freight traffic is heavy between Rochester and Suspension Bridge, where connection is made with the Michigan Central and Grand Trunk railways. The Lehigh Valley railroad trains to and from Suspension Bridge are operated over the Tonawanda and Niagara branches from Tonawanda Junction to Suspension Bridge. The Pennsylvania division has a comparatively heavy traffic in coal from the Clearfield coal region of Pennsylvania. The passenger traffic is moderate.

The main line branches are usually light traffic lines with the exception of the Troy and Greenbush branch, and the Niagara branch. The former is used in connection with The Delaware and Hudson Company's tracks from Albany to Troy as a belt line on which passenger trains of both railroads are operated at about 30 minute intervals. The Niagara branch has heavy traffic between Buffalo and Suspension Bridge. The Terminal railway is used exclusively for freight interchange with the Lake Shore and Michigan Southern railway.

The main line of the Electric division has a heavy suburban traffic which extends north to Peekskill on the Hudson division and Brewster on the Harlem division. The freight and passenger traffic north of Brewster is moderate.

Since the previous inspection the following improvements have been made:

Electric division: the length of sidings has been increased 2.02 miles; 1 plate girder bridge, 2 pipe, and 7 rail floor culverts have been rebuilt; 2 passenger stations have been rebuilt; 1.84 miles of new 105-lb., and 0.09 mile of new 100-lb. rail have been used in renewals; 22,841 ties were replaced; 9.35 miles of track were re-ballasted with stone; the electrification of the tracks to Croton has been completed; the terminal at Harmon has been completed; the Scarborough improvement is finished; the elimination of the grade crossings at Irvington and Ossining is in progress; grading for the Croton classification yard is partly completed; the Hartsdale and White Plains improvements are in progress; the grading for the White Plains local delivery yard is partly finished; permanent bridge warnings have been erected; the installation of the upper quadrant signal system has been completed.

Hudson division: track 3 has been extended 1.91 miles; track 4 has been extended 2.05 miles; sidings have been extended 6.05 miles; a new brick station has been built at Rhinecliff; 24 miles of new 105-lb., and 2 miles of relayer 100-lb. rail have been laid releasing 100-lb. rail; 86,900 ties were renewed; 100 miles of track were re-ballasted with stone; a new coaling bridge and water station at Poughkeepsie has been completed; a new pump house at Tivoli is completed; the highway grade crossing has been eliminated at Crugers.

Harlem division: sidings have been increased 0.31 mile; 2 rail floor culverts have been built; a new combination freight and passenger station, and freight yard at Towners has been completed; 9.8 miles of new 105-lb. rail has been laid releasing 80-lb. rail; 52,700 cross ties were used on renewals; 10 miles of track were re-ballasted with stone; 2.5 miles of track were re-ballasted with cinders; Babbitts highway grade crossing at Bedford Hills has been eliminated; new freight yards have been completed at Bedford Hills and Pleasantville.

Putnam division: there has been no change in track mileage; 2 single span plate girder bridges have been rebuilt; 2 pile trestles, 1 of 4 spans and the other of 6 have been rebuilt; 4.5 miles of new 80-lb., and 1.5 miles of relayer 80-lb. rail have been laid releasing 65-lb. rail; 21,600 cross ties were renewed; 1 mile of track was re-ballasted with cinders.

River division: the total length of sidings has been increased 3.73 miles; new combination passenger and freight stations have been built at Iona Island and Marlborough, and a new freight station at Coxsackie; 44.07 miles of new 105-lb. rail and 4.99 miles of relayer 80-lb. rail were laid releasing 80-lb. rail; 110,251 cross ties were renewed; 540 miles of track were re-ballasted with stone and 3.5 miles with cinders; 2 rail floor culverts, replacing timber trestles, and 5 pipe culverts were installed; a new siding has been built at Alsen; the station at Highland Falls has been raised and repaired; a new 85 foot turntable has been installed at Kingston; the grade crossing of Orange avenue, Walden, has been eliminated; a 70 foot turntable has been installed in the New York, Ontario and Western railway pit at Campbell Hall; a new concrete retaining wall on bridge No. 85, the strengthening of bridges Nos. 54, 56, and 45, and the painting of Coeymans viaduct have been completed.

Mohawk division: the change in line at Rome reduced the mileage of tracks 1, 2, 3, and 4 about 0.32 mile; track 3 on the West Shore was reduced 0.45 mile; changes on the Hoffman's connection increased the mileage of tracks 1 and 2 about 0.8 mile, and on the Schenectady detour track 2 was increased 0.11 mile;

the net decrease in total length of tracks 1, 2, 3, and 4 is 0.82 mile; bridge No. 385-A has been replaced with a 1 span deck plate girder bridge; bridge No. T25, an overhead highway, has been replaced with a through plate girder span; bridges Nos. 487, 550, 553, and 554 have been replaced with concrete arches; bridge No. 557 has been replaced with a rail floor culvert; 12 new openings have been made with castiron pipe; 40 openings have been replaced with castiron pipe; a new freight station has been built at Ilion, and extensions have been made to the freight stations at Amsterdam, St. Johnsville, and Little Falls; new passenger stations have been built at Utica and Rome; 64.47 miles of new 105-lb. rail replacing 100-lb. and 80-lb. rail, and 22.90 miles of relayer 100-lb. and 9.15 miles of relayer 80-lb. rail replacing 80-lb. and 65-lb. rail have been laid; 291,850 ties were renewed; 32.5 miles of stone and 32 miles of gravel ballast were installed; additional team tracks have been installed at Albany and Amsterdam; the water pans have been extended at Herkimer; a new coaling plant has been erected at Indian Castle.

Western and Buffalo divisions: track 3 on the Syracuse Junction branch was increased 6.27 miles, and track 1 on the Chenango branch was decreased 0.02 mile; sidings have been increased 38.25 miles, which includes 29.21 miles of track laid in the Gardenville yard; bridges Nos. 646, 657, 658, 673, and 696 are new longitudinal trough and I-beam spans about 18 feet in length; bridges Nos. 702 and 703, each 4 spans longitudinal trough, are new; bridges Nos. 723 and J-600, overhead highway bridges have been rebuilt; bridges Nos. J-603, J-608 A, and J-609 have had the masonry extended and steel erected for an additional track; 4 pipe culverts have been extended; 5 rail floor culverts have replaced less permanent structures; the freight platforms and offices at Minoa and East Rochester have been rebuilt; a new freight house and train track has been completed at Savannah; 2 new freight platforms at East Buffalo, a freight house and platform at Suspension Bridge, and a new baggage room at Terrace have been completed; 43.79 miles of new rail and 46.76 miles of relayer rail were used in renewals; 328,451 ties were renewed; 57 miles of stone, 31 miles of gravel, and 23.5 miles of cinders were used in re-ballasting; a new main line connection with the West Shore railroad at Wayneport has been completed; the switches have full interlocking protection with No. 18 crossovers in the main line and No. 10 crossovers in the West Shore.

Rochester division: the net increase in length of sidings is 8.63 miles; bridges Nos. C-4 and C-6 have been replaced with 3 span through plate girder bridges, and 1 bridge on the Auburn branch has been replaced with a 1 span through plate girder bridge; bridges Nos. A-6 and P-42A have been replaced with concrete arches; bridges Nos. A-76 and A-75 are new rail floor culverts, and 4 culverts have been replaced with castiron pipe; new stations have been completed at Camillus, Relius, Panther, and Rochester; 36.27 miles of new 80-lb. rail and 4.47 miles of relayer 80-lb. have been used in renewals; 130,960 ties have been renewed; the Kent street freight station in Rochester has been remodeled and enlarged, and alterations made to the tracks; a new Gantry crane has also been installed in the freight yard; the car shop yard has been remodeled, and a new transfer platform built at Portland avenue; the team tracks have been remodeled and the middle track extended at Sanborn; a grade crossing has been eliminated at Camillus.

Ontario division: the main track mileage has been decreased 0.03 mile, and sidings have been increased 3.69 miles; bridges Nos. O-61 and O-133 have been replaced with deck plate girder bridges; bridge No. O-204 has been replaced with a concrete arch; bridge No. O-228 has been replaced with deck plate girder and deck truss spans; bridges Nos. O-198 and R-6 are overhead bridges which have been replaced with plate girders, wooden stringers, and bents; bridge No. R-12 has been replaced with plate girders; new combination freight and passenger stations have been built at Wilson and Morton, and a new passenger station at Adams; new 80-lb. rail has been laid on 25.33 miles of track and relayer 80-lb. on 1.8 miles; 137,369 ties have been renewed; 21.6 miles of track have been re-ballasted.

St. Lawrence division: sidings have been increased 6.65 miles; bridges Nos. 158, 165, D-18, and U-231 have been replaced with deck plate girders, and 166 and D-17 with concrete arches; bridge No. U-289, an overhead bridge, has been replaced with through plate girders and a truss; 5 culverts have been replaced with castiron pipe; new passenger stations have been built at Potsdam and Redwood, and new freight stations at Potsdam, Cape Vincent, Redwood, Brier Hill, Ogdensburg, and Emeryville; new rail was laid on 23.58 miles of track and relayer rail on 4.41 miles; 170,760 ties were used in renewals; 32.3 miles of track were re-ballasted; at Watertown, a new brick oil house, snow fence, air line, and compressor plant for testing train lines, 100 ton 52 foot track scale, new stock yard track, 3 new cripple tracks, the extension to the transfer tracks, and Massey yard tracks are completed; at DeKalb Junction a

new concrete pit has been installed under the track scales; at Norwood, the new car department plant, extension to the cripple track, and a new house track have been completed; a new receiving track at Massena Springs, double track changes at Philadelphia, new team tracks at Antwerp and Richville, a new interchange track with the Adirondack division at Remsen, and the new passing track and stock yard track at Hammond have been completed; new brick platforms have been built at Carthage, Redwood, and Capo Vincent; new 52 foot 100 ton track scales with concrete pits have been completed at Ogdensburg, Benson Mines and Taleville; the grade crossing at State street, Clayton, has been eliminated; the station at Heuvelton has been enlarged and remodeled; the driveway in the freight yard at Ogdensburg has been paved.

Adirondack division: the length of sidings has been increased 5.51 miles; bridge No. M64 has been replaced with a 2 span through plate girder bridge, and bridge No. M-83 with a single span through truss; 2 rail floor culverts and 2 pipe culverts were installed; new combination freight and passenger stations were built at Childwold and Carter; new 105-lb. rail was laid on 19.62 miles of track, and 75-lb. relayer rail on 4.65 miles of track; 69,016 ties were used in renewals; 14.7 miles of track were re-ballasted; the construction of a new ladder track and the extension to the yard tracks at Malone Junction have been completed.

Pennsylvania division: the length of the main tracks was increased 6.75 miles by the extension of track 2 to Lindley; sidings were decreased 1.65 miles in length; bridge No. 64 has been replaced with a through plate girder bridge; bridge No. Y-3, a deck girder, has been replaced with a rail girder span; bridge No. 64-A has been replaced with a concrete arch; an addition of 6 feet to the station at Dundee to provide for inside toilets has been completed; 22.1 miles of track were relaid with 80-lb. new rail; 106,280 ties were used on renewals; 22 miles of track were re-ballasted.

The improvements under way or authorized include the following:

Electric division: new freight tracks Irvington to Tarrytown; new set of crossovers at Irvington; new Y. M. C. A. and other buildings at Harmon; completion of the Mt. Vernon improvement including the elimination of Fleetwood avenue grade crossing and the construction of a new station; the grade crossing elimination at Bronxville; the change in line, elimination of crossings and construction of a new station at White Plains.

Hudson division: extension of tracks 3 and 4 Dutchess Junction to Chelsea, Poughkeepsie to Staatsburgh, and Tivoli to Germantown; new passenger station at Poughkeepsie; elimination of the grade crossing at Rhinecliff.

Harlem division: new passenger station at Lincolnale; elimination of grade crossings at Croton Falls.

Putnam division: new passenger station at Bryn Mawr Park; elimination of the highway grade crossing at Tilly Foster Mines.

River division: painting Rosendale viaduct; general repairs to bridge No. 45; new freight house and westbound siding at Alsen; elimination of highway grade crossing at Cementon.

Mohawk division: filling in Albany basin; elimination of grade crossings at North Pearl and Van Woert streets, Albany, Dyke road at North Frankfort, and New Salem highway at Voorheesville; completion of the general improvements at Utica; completion of the change in line at Rome.

Western division: completion of the Rochester improvement; elimination of the grade crossings at Military road, Hertel avenue, and Skillen street, Buffalo; elimination of the grade crossings in Rochester by the construction of a subway at Saxton street; construction of an interchange track with the Rochester division at Syracuse.

Rochester division: new dam and pump house for water supply at Gasport; replacing present track scales at Lockport and Kent street, Rochester, with 150 ton track scales, and new 150 ton scale at Goodman street, Rochester; reconstruction of bridge No. F118.

St. Lawrence division: new 85-foot turntable at enginehouse; strengthening the bridges for heavier power between Norwood and Massena Springs; a new brick platform at Hammond; new water supply at Emeryville; replacing the present overhead bridges Nos. U-215 at Redwood and U-258 at Hammond with steel on concrete abutments; replacing bridges Nos. C-17, C-18, C-27, C-31, C-33, and C-39 with new concrete abutments and solid rail floors; replacing bridge No. C-34 with deck plate girders and new concrete abutments; replacing bridges Nos. D-13 and D-14 with rail and I-beam floors and new concrete abutments.

There has been considerable improvement since the previous inspection in the condition of the track bolts. With the exception of loose bolts on parts of the River division there were few instances noted where their condition would warrant criticism. The season's tie renewals were practically completed at the time of the inspection, and the other track work in preparation for the Winter was progressing favorably. The number of broken

frogs which were without exception of the spring rail type, all of which were broken on the turnout side of the point at about the same place, would indicate faulty design or manufacture. In either case the fault should be determined and corrected. The presence in the running tracks of these broken frogs is objectionable, not that they endanger the safety of train movements, but because they represent faulty track appliances. The general conditions in and around the station buildings were much improved, and the untidy conditions noted in the previous inspection have been corrected.

It is recommended (1) that the defective frogs and rails listed in the report be removed from the running tracks; (2) that the other track defects be repaired; (3) that the running rails and inside guard-rails be full spiked to the ties on all bridges having a tie spacing of 14 inches or more center to center; (4) that the other bridge defects be remedied.

Respectfully,

W. G. HIMES,

Inspector Division of Transportation.

#### NEW YORK, CHICAGO AND ST. LOUIS RAILROAD.

Inspected June 9, 1914. Last previous inspection July 8, 1913. To the Public Service Commission, Second District:

I have inspected that part of the New York, Chicago and St. Louis railroad which lies within the State of New York and submit the following report:

This line extends from Buffalo westward to the state line, a distance of 68.07 miles. It is all single track excepting 7.84 miles of leased double track between Silver Creek and Dunkirk. Connection is made with the various eastern lines at Buffalo.

The line crosses a rolling country bordering the south shore of Lake Erie. The curvature is moderate but there is a succession of grades, the maximum being 1 per cent. The cuts and fills, which are of moderate extent, are in good condition, and suitable drainage is maintained. The surface and alignment of the track are fair to good. There were many shims in the track, however, and these should be removed as soon as practicable.

The track is laid with 75-lb. and 85-lb. rail, the most of which is in good condition. The joints are made with 4-bolt angle-bars and continuous joints. Three broken bars of the latter style were found on bridge No. 21. The track ties are chiefly oak timber and generally in good condition. The renewals in the past year amounted to about 12.2 per cent. The turnouts are equipped with split switches, spring frogs, and rigid switch stands, most of which appeared to be in good repair. Broken frogs were observed at Angola, at the Dunkirk tank, at both ends of the passing track west of bridge No. 32½, and at the Brocton turntable. In each case the break is on the turnout side, and although the defect is not dangerous such frogs are not desirable for main track service. The ballast consists of gravel and cinders. Additional ballast is needed in several places, and it is evident that a heavier bed of ballast throughout would be better suited to the heavy freight traffic which passes over the track. The right of way is clean and open and fences are maintained where they are required. The road crossings are in good condition and are equipped with signs, but some of the signs are faded and need painting. The track sections have an average length of 5.22 miles, and the average force per section during the working season is 7 men. This amount of labor is sufficient for the usual maintenance work.

The steel bridges comprise several large trestles and heavy trusses and a number of plate girders of various sizes. With a few minor exceptions these structures are in good condition. There still is a considerable number of open timber culverts and cattle-passes, but these are being replaced by concrete boxes or pipes as rapidly as practicable. The following defects were found: the bridge seats were dirty at a number of the bridges; No. 4, the northeast seat stone is loose; No. 9, some of the hand-rails are loose on the safety platforms; No. 14, the east back wall is loose, there is a loose steel shim under the girder on the easterly stone pier, there is some poor blocking at the west end, and the west abutment has settled; No. 18, there are loose shims under the girder at the west end; No. 19, the east back wall is loose and the northeast seat stone is cracked; No. 20, there are loose shims under the girder on the middle pier; No. 21, the east abutment needs pointing and the west back wall is loose; No. 25, the abutments are poor and the bridge seats are crushing; No. 32½, the girder is tight against the west back wall, and there are shims on the ties; No. 132, a culvert has some poor caps; No. 39, the northeast seat stone is loose; Nos. 191 and 201, culverts, the timber walls have bulged, and the former requires more bracing; No. 211, has a poor batter post. Several timber culverts are to be rebuilt in permanent form this season.

The local passenger business on this line is very light, the territory being served by other railroads. The few station buildings maintained by this company are in fair condition and appear to provide sufficient facilities for the traffic.

At Buffalo, Seneca street, 1 track is crossed by 1 track of the Erie railroad, protected by a tilting board signal. At Buffalo,

Smith street, 2 tracks are crossed by 2 tracks of the Delaware, Lackawanna and Western railroad, protected by electric semaphore signals: the work of eliminating this crossing by raising the Delaware, Lackawanna and Western tracks is now in progress. At Buffalo Creek, 1 track is crossed by 2 tracks of the Buffalo Creek railroad, protected by a tilting board signal. At Blasdell, 1 track is crossed by 1 track of the Erie railroad, protected by a tilting board signal. At Dunkirk, 1 track is crossed by 1 track of the Erie railroad, protected by a tilting board signal; 1 track is crossed by 1 track of the Dunkirk, Allegheny Valley and Pittsburgh railroad, protected by a tilting board signal. At Dunkirk, 1 track is crossed by 1 track of the Buffalo and Lake Erie Traction Company, protected by gates and a trolley guard.

There is a heavy train movement on this railroad, consisting largely of fast through freight trains, and it seems very desirable that these grade crossings should have better protection both to facilitate operation and to promote safety. The grades might be separated at some of the crossings, and at the other points interlocking should be installed.

A large volume of freight traffic is handled on this railroad, and although the terminal facilities at Buffalo are comparatively limited the business is handled without serious friction or delay. Train movements are controlled by the telegraphic train order and block system under the standard code operating rules.

During the past year the following improvements were made: sidetracks laid in excess of those taken up, 3839 feet; new 85-lb. rail laid, replacing 75-lb. rail, 5.15 miles; cinder ballast applied, 2 miles; lift bridge at Buffalo Creek was completed; 3 bridges have been rebuilt; 6 culverts have been rebuilt, and 1 culvert has been filled. The replacing of timber structures with concrete and steel is to be continued in the current year.

The recommendations of the preceding report were carried out as far as possible. It is recommended that the essential defects mentioned in this report be remedied.

Respectfully,  
J. B. STODER,  
Steam Railroad Inspector.

#### NEW YORK, NEW HAVEN AND HARTFORD RAILROAD.

Inspected June 20, 1914. Last previous inspection July 1 and 2, 1913.

To the Public Service Commission, Second District:

I have inspected the lines of the New York, New Haven and Hartford railroad within this Second Public Service District and submit the following report:

The main line of this railroad extends in an easterly direction from the New York city line near Mount Vernon to the New York-Connecticut state line near Port Chester, a distance of 13.32 miles. This is a 4 track railroad with the exception of 0.06 mile on the west end which is double track. The sidings and yard tracks have a total length of about 15.85 miles. The Harlem River branch is 1.74 miles in length and extends in a westerly direction from its connection with the main line at New Rochelle to the New York city line near Pelham Manor. This is a 6 track railroad. The length of sidings and yard tracks is 0.89 mile.

The topography of the region is such that with moderate grades and curves the cuts and embankments are comparatively heavy. The highway crossings are either over- or undergrade, there being no grade crossings with public highways within this district. The cuts and embankments are of ample cross-section properly to support the tracks. Ditches are maintained in splendid condition, and the drainage of the roadbed is good throughout. The alignment and surface of the tracks are good.

The tracks are laid with 100-lb. rail. The mileage of track laid with the different kinds of rail is as follows: Bessemer: main line 9.29, branch 7.16; Mayari: main line 5.80, branch 0.81; open hearth: main line 38.07, branch 2.14: total 63.27.

The rail is in good condition, and no defective or excessively worn rails were observed. Since the previous inspection about 28 per cent of the rail in the main tracks has been replaced. The rails are joined with 4-bolt angle-bar splices properly adjusted, and the bolts were tight. The ties are principally chestnut, oak, and creosoted yellow pine. The renewals since the previous inspection amounted to 33,132, or 19.67 per cent of the total ties in the main line, and 2303, or 7.2 per cent of the ties in the Harlem River branch: these renewals were made with creosoted yellow pine ties. It is expected to renew about 31,480 ties, or 18.69 per cent, on the main line and about 150 ties, or about 0.5 per cent, on the branch. With the renewals contemplated for this season, practically all of the chestnut ties in the main tracks will be replaced, and the main tracks will be laid with creosoted ties throughout. Tie-plates and screw spikes are used on the creosoted ties. The tie condition of all the tracks is excellent. The track appliances are all modern. Rigid manganese frogs, split switchers, and automatic stands equipped with targets and lamps are used. Derails where necessary are installed, and

anti-rail creepers of a modern design are extensively used. There were no defective track appliances, and all are properly adjusted and maintained. The ballast is crushed stone of good quality and of a depth to insure stable track. Much of the ballast has been forked over recently and the dirt removed. The ballast is in good condition, and the only defect observed was that a little more ballast is needed on the shoulder of track 4 east of tower 21. The right of way and fences are in good condition and properly maintained. There are no public highway crossings at grade. The right of way is cleared and clean. The retaining walls in the cuts are substantial and in good condition. The sections have an average of 8 miles of single track with a maximum length of 3.08 miles. The force during the working season consists of a foreman and 12 laborers. This is sufficient for proper maintenance.

The bridges are all permanent. The main line has 1 through plate girder, 24 half through plate girders, 7 deck plate girders, 1 pin connection pony truss, 2 pin connection deck truss, 2 pin connection through truss, 11 riveted through truss, and 1 riveted deck truss; the branch, 4 half through plate girders and 3 deck plate girders. There are 17 arch and 4 box culverts on the main line, and 1 arch on the Harlem River branch. The bridges are generally well maintained. The criticism common to many of the structures is that the steel work should be painted. The other minor defects were as follows: main line: bridge over street at Columbus avenue, steel needs painting, and some new ties required; bridge No. 10.44, the steel should be painted; Harlem River branch: bridge No. 11.09, the top cover plates on the girders should be scraped and painted; bridge No. 11.00, steel should be painted and needs some new ties and guard stringers; bridge No. 10.64, steel should be painted, saprot should be adzed off of deck timbers, and some new ties and guard stringers are needed; bridge near catenary bridge No. 196-H needs some new ties, and spikes should be removed from the angle-bar slots, and steel should be painted; bridge between catenary bridges Nos. 193-H and 192-H needs some new ties and the steel should be painted; bridge No. 9.87 needs some new ties.

There are 5 brick, 3 stone, and 9 frame station buildings on the main line; and 1 brick and 1 stone buildings on the Harlem branch: these buildings are clean, well maintained, and seem to provide accommodations for the traffic. The westbound station buildings are usually large and equipped with modern conveniences. Over- or undergrade passage ways for passengers are provided to reach the eastbound platforms and shelter sheds. The platforms are in good condition. Fences erected between the tracks in front of the platforms are properly maintained.

There are no grade crossings with other steam or electric railroads.

The passenger traffic is heavy. Local passenger trains are frequent, and through trains between New York city and points in the New England States are numerous. The power used is electricity. The trains are drawn by motors equipped with pantographs for contact with the conductor suspended over each track: these conductors are attached to a catenary cable suspended from bridges spaced about 300 feet apart which span all the tracks. The conductor is supported in such a manner that it is in a horizontal plane parallel with the track.

Train movements are controlled by operating rules, timetables, and train orders, supplemented by a manually controlled lock and block system on the main line. The signals at the block stations are hung from the under side of the catenary bridges. Distant signals are provided at each block station. Train orders are transmitted by telegraph. On the Harlem River branch, automatic 3-position, upper quadrant block signals are in use.

Since the previous inspection the following improvements have been made: Main line: main tracks have been increased 0.02 mile at New Rochelle Junction; sidings have been increased 0.47 mile; 15.84 miles of new 100-lb. rail has replaced a like amount of 100-lb. rail; 33,132 creosoted ties have been used in renewals. Harlem River branch: 2.01 miles of new 100-lb. rail have been used to replace 100-lb. rail; 2303 creosoted ties have been used in renewals. The contemplated improvements include the renewal of 31,480 ties with creosoted ties on the main line, and 150 ties on the Harlem River branch.

This railroad is being maintained in a very satisfactory manner. It is recommended that the defects noted in the body of the report be remedied.

Respectfully,  
W. G. HIMES,  
Inspector Division of Transportation.

#### NEW YORK, ONTARIO AND WESTERN RAILWAY.

Inspected July 6 to 11, 1914. Last previous inspection July 14 to 18, 1913.

To the Public Service Commission, Second District:

I have inspected that part of the New York, Ontario and Western railway within this State and submit the following report:

This railway extends in a northwesterly direction from a connection with the West Shore railroad at Cornwall to Oswego on Lake Ontario, a distance of 272.22 miles. The coal fields in Pennsylvania are reached by a line extending in a southwesterly direction from a connection with the main line at Cadostia to Scranton, Penna., a distance of approximately 54 miles, only a small part of which is within New York state.

The lengths of the main line and each branch comprising the 3 divisions are as follows: Southern division: main line, Cornwall to Sidney, 147.48 miles; Kingston branch, Summitville to Kingston, 35.18 miles; Port Jervis branch, Summitville to Port Jervis, 21.96 miles; Monticello branch, Valley Junction to Monticello, 16.24 miles; Delhi branch, Walton to Delhi, 16.87 miles; total, 237.73 miles. Northern division: main line, Sidney to Oswego, 124.74 miles; New Berlin branch, New Berlin Junction to Edmeston, 29.25 miles; Pecksport railway, Pecksport to White Corners, 3.70 miles; Utica division, Randallville to Utica, 31.23 miles; Rome division, Clinton to Rome, 12.79 miles; total, 201.71 miles. Scranton division: main line, Cadostia to Pennsylvania-New York line, 2.92 miles; total length of main line and branches, 442.36 miles.

The main line of the Southern division south of Cadostia is double track except through the tunnels at Bloomingburgh, Fallsburgh, and Hawk Mountain where it is single track. The Scranton division is double track. The balance of the main line and branches is single track. The total length of double track is 105.16 miles on the Southern division, and 2.9 miles on the Scranton division.

This railway traverses a mountainous and rolling country throughout the greater part of its length, and the grade line is a succession of comparatively steep ascending and descending grades. The curves are frequent and in some places moderately sharp. The cuts and embankments are maintained in a good cross-section. The ditches were open and seemed to provide for the proper drainage of the roadbed. The alignment and surface of the tracks were only fair to good on the main line, and generally good on the branches. Poor line and surface were noted on the main line at the following points: north of Rock Tavern on the northbound track; south of Burnside on the northbound track; south of milepost 255; north of milepost 256; on the tangent; north of bridge No. 364; north of milepost 303; north of milepost 304. The poor line and surface is usually due to the rail being surface bent, and the ballast being too light and inferior in quality for the heavy tonnage hauled.

There are four single track tunnels on this railway as follows: the Bloomingburgh tunnel, 3855 feet in length; the Fallsburgh tunnel, 1123 feet in length; the Hawk Mountain tunnel, 1108 feet long; and the Northfield tunnel 1700 feet long. The first three are in double track territory, and the single track movements through these tunnels are controlled by interlocked signals, switches, and derails. The Northfield tunnel is in single track territory and the protection is by absolute automatic block signals controlled by track circuits. The tunnels are carefully inspected at frequent intervals and they appear to be in good condition.

The tracks are laid with rail in the following weights and kinds: main line, Northern and Southern divisions: 95-lb. Bessemer 58.24 miles, 90-lb. open hearth 26.88 miles, 85-lb. open hearth 70.82 miles, 76-lb. Bessemer 169.47 miles, 75-lb. Bessemer 51.97 miles; total 377.38 miles. Main line, Scranton division: 85-lb. open hearth 5.82 miles. Kingston branch: 75-lb. open hearth 2.24 miles, 75-lb. Bessemer 1.27 miles, 67-lb. Bessemer 30.72 miles, 56-lb. Bessemer 0.95 mile; total 35.18 miles. Port Jervis and Monticello branches: 75-lb. Bessemer 36.34 miles, 67-lb. Bessemer 1.86 miles; total 38.20 miles. Delhi branch: 75-lb. open hearth 4.86 miles, 67-lb. Bessemer 3.18 miles, 56-lb. Bessemer 8.83 miles; total 16.87 miles. New Berlin branch: 75-lb. Bessemer 29.25 miles. Utica division 76-lb. Bessemer 5.35 miles, 75-lb. open hearth 12.06 miles, 75-lb. Bessemer 12.40 miles, 67-lb. Bessemer 1.42 miles; total 31.23 miles. Rome branch 76-lb. Bessemer 0.54 mile, 75-lb. open hearth 6.79 miles, 75-lb. Bessemer 5.46 miles; total 12.79 miles. Pecksport railway: 76-lb. Bessemer 3.70 miles.

The general condition of the rail on the main line has been considerably improved since the previous inspection by the replacements of 1.61 miles of 75-lb., 24.23 miles of 76-lb., and 1.04 miles of 95-lb. rail with 90-lb. A R A, B open hearth rail laid with tie-plates, and 1.58 miles of 76-lb. rail with 85-lb. open hearth rail. The Kingston, Delhi, and Utica branches have been relaid with 3.51 miles, 0.40 mile, and 2.94 miles respectively of 75-lb. open hearth rail replacing 56-lb., 67-lb., and 76-lb. worn rail. It is expected to replace about 32 miles of 75-lb., 76-lb., and 95-lb. with 90-lb. open hearth rail on the main line, and 5 miles of light rail on the Utica, 2 miles on the Kingston, and 1 mile on the Delhi branches with 75-lb. open hearth rail during this season. When the new rail is laid the fit rails released will be used to replace the poorer rails remaining in track. Poor and defective rails were noted at the following points: Southern division: main line: north of bridge No. 32 on northbound track, rail is poor: several rails appear to be piped; mashed end rail on the west side of the northbound track west of signal 89½; mashed end rail in the west

side of the northbound track of milepost N. Y. 91; the rail in the west side of the southbound track near milepost N. Y. 107 is poor; a split end rail on the west side of the northbound track north of signal 129; Northern division: main line: the rail is poor on the curve south of milepost N. Y. 214; new 90-lb. rail has been distributed, and it is expected to replace this rail promptly; there is a piped or split head rail on the west side of the main track just south of milepost 214; there is a rail in the west side of the main track south of milepost N. Y. 243, and another in the west side about 500 feet south of bridge No. 322 which appear to be piped; a rail in the west side of the main track north of milepost N. Y. 265 appears to be piped; the joints are tight and rails kinked south of milepost N. Y. 275; there is a piped or split head rail in the west side of the main track 4 rails south of bridge No. 443, and another in the east side of the main track south of bridge No. 432; Utica branch: there are 2 piped rails in the west side of the main track on the curve south of bridge No. 2; there is an apparently piped rail on the west side of the main track about 500 feet south of milepost 249; there is a split end rail in the west side of the main track at the road crossing south of Hamilton; there are 2 rails, one on each side of the track near the highway crossing north of milepost 247, which appear to be piped; the one on the west side is 4 rails north of the crossing, and the other is just south of the crossing in the east side; the new rail south of bridge No. 33 is not full spiked; there is a piped rail cracked in the web in the west side of the track in front of the section tool house south of bridge No. 49. The ties are principally yellow pine in the main line of the Southern division; 90 per cent yellow pine and 10 per cent chestnut and cedar in the main line of the Northern division; 85 per cent yellow pine and 15 per cent chestnut on the Kingston branch between Summitville and Ellenville, and all yellow pine from Ellenville to Kingston; and 65 per cent yellow pine and 35 per cent chestnut and oak on the Port Jervis and Monticello branches. The tie renewals since the previous inspection amounted to 218,748 ties, or approximately 11 per cent of those in track. About 40 per cent of this season's renewals had been made at the time of the inspection. The best practice is to complete the tie renewals early in the season and devote the remaining time to track surfacing and other work of this character. It is to be deplored that on many railroads the track work is not started early in the season and the tie renewals not being completed until late leaves an insufficient time for the other general track work. The tracks are consequently not in condition for the winter weather, and rough track is the result. It is expected to renew about 11 per cent of the ties this season, which will be sufficient for proper maintenance. Poor ties were noted in the tracks at the following points: northbound track north of bridge No. 33½; northbound track north of milepost N. Y. 99; northbound track north of signal 103; northbound track near milepost N. Y. 111; northbound track south of milepost N. Y. 131 and 130; main track north of bridge No. 384; south of bridge No. 14 on the New Berlin branch. New ties were distributed at most of these points, and it is expected to make the renewals promptly.

The track appliances include rigid and spring frogs, split switches, rigid and automatic switch stands, tie-plates, and anti-creepers. These were generally in good condition and no defects were noted. Derails are in use where needed, and many of them are pipe connected to the switch stands. The switch stands are equipped with targets and lamps. Tie-plates and anti-creepers are being used extensively on the new rail. The mileage and kind of ballast on the main line and each branch are as follows:

	<i>Cinder and Culm</i>	<i>Gravel</i>	<i>Cinder</i>	<i>Culm</i>	<i>Stone</i>	<i>Total</i>
Main line.....	135.97	139.63	99.00	2.78	377.38	
Kingston branch.....	3.00	17.51	14.67		35.18	
Port Jervis and Monticello branches.....	23.75	10.70	3.75		38.20	
Scranton division.....		5.82			5.82	
Delhi branch.....	13.54	3.33			16.87	
New Berlin branch.....			29.25		29.25	
Pecksport railway.....			3.70		3.70	
Utica division.....	3.20	5.43	3.51	19.09	31.23	
Rome branch.....	.79	.16	11.84		12.79	
Totals.....	3.99	181.69	180.66	181.30	2.78 550.42	

The ballast is in nearly equal amounts gravel, cinder, and culm as shown in the above table. The culm and cinder are not suited to the heavy traffic, and the gravel being fine and unwashed is dirty. The track supported on such ballast is difficult to maintain under the heavy traffic. The consequence is that there is a considerable amount of track with churning joints. This condition is difficult to remedy except by the substitution of a more substantial ballast. This has been considered by the company, and a quarry has been opened at Ellenville on the Kingston branch and a crusher installed to crush stone for ballast. The crusher was in operation at the time of the inspection. It is expected to re-ballast a considerable amount of track with stone this season.

The principal defects in the tracks particularly noted were as follows: Northern division: main line: track creeping and ties

bunched on the northbound track north of bridge No. 30; track creeping, ties bunched, and joints churning on the northbound track north of bridge No. 46; churning joints in the southbound track between culverts 74 and 77; the curve on the northbound track north of signal 101 should have the ties plated and rail rolled in; ties bunched in the northbound track near signal 105; the ballast is poor in the northbound track near milepost N. Y. 111; ties bunched and skewed at milepost N. Y. 112 in northbound track; spikes sticking up in southbound track near Livingston Manor, in northbound track north of signal 135, and south of bridge No. 154; joints churning and ties bunched north of bridge No. 190, between milepost N. Y. 185 and bridge 203; south of bridge 211, and between mileposts N. Y. 191 and 192; Kingston branch: open track north of bridge No. 6 and at telegraph pole 103-30; Port Jervis branch: open track between mileposts 102 and 103; Monticello branch: grass in track at milepost 121. Northern division main line: churning joints north of bridge No. 269, north of milepost N. Y. 228, near bridge No. 300, and near milepost N. Y. 230; insufficient ballast north of milepost N. Y. 239; grass and weeds in the track north of bridge No. 328, on the loop at Sylvan Beach, and south of milepost N. Y. 300; shims in track north of milepost N. Y. 259; Utica division: a cracked splice one bar only in the east side of track near the whistle-post north of Hamilton; new rail laid north of bridge No. 29 has poor line and surface, and it is not full spiked: this should be surfaced and aligned promptly or the rail will be permanently surface kinked; the right of way is particularly well kept, and a considerable amount of the right of way has been mowed; the fences where required are maintained in good condition; the road crossings and signs are properly maintained: the signs are well painted and the wing-fences are whitewashed; many crossings have crossing-bells which were working properly, with these exceptions: the automatic flagman crossing signals installed at the two street crossings in Oriskany Falls did not indicate the approach of trains at the time of the inspection: it was explained that the installation was improperly made; new relays have been ordered and it is expected to have the signals working in a short time; at Fulton, the street crossings have bells with signs affixed with a warning not to cross the track while the bell is ringing: the bells are not now in working order: they were installed at the request of the town authorities; the company has asked the town authorities for permission either to dig up the streets to replace the circuit wires, or to allow the removal of the bells, but neither request has been granted: the bells do not seem to be necessary as the speed of the trains through Fulton is restricted to 8 miles per hour; the signs should be removed from the bells when they are not working properly: the wording of these signs is misleading when the bells are not working, and it is suggested that the wording on a sign attached to a crossing-bell convey the information that there is a railroad crossing at grade without mentioning the bell; the crossing-sign at the highway grade crossing north of Harding street, Oncida, is hidden from view by trees and it should be re-located. The sections have an average length of 5 miles, and the force consists of 5 men on the single track and 7 men on the double track sections. This force, if allowed for the full working season, should be sufficient for the proper maintenance of the tracks.

The bridges supporting the tracks are in number and kind as follows:

	Main line	Branches	Total
I-beams	90	100	190
Through truss	10	10	20
Deck truss	5	.....	5
Through girder	9	13	22
Deck girder	16	23	39
Deck girder viaduct	13	5	18
Solid floor, rail and concrete	59	10	69
Solid floor, I-beams	16	.....	16
Timber stringers	20	46	66
Timber trestles	12	6	18
Concrete arch	3	.....	3
Deck truss and girder	1	1	2
Through truss and girder	5	2	7
I-beams and solid floor I's	1	.....	1
Viaduct, deck plate and lattice girder	1	.....	1
Deck girder and I-beams	1	.....	1
Reinforced concrete	10	1	11

Totals	1401	686	2087

#### Bridges over the tracks:

	Main	Branches	Total
<i>Highways:</i>			
Timber	13	2	15
I-beams	12	.....	12
Through girder	3	.....	3
Through truss	7	2	9
Solid floor, rail and concrete	0	1	1
Totals	35	5	40
<i>Railroads:</i>			
Through girder	4	.....	4
Solid floor	0	1	1
Through truss	1	.....	1
Totals	5	1	6

The bridge structures are generally in good condition and properly maintained. A criticism which applies to many of the steel bridges and viaducts is that they need to be painted.

The practice of raising some of the I-beam and wooden stringer spans on shims and temporary wooden blocks to conform to the grade of the track on either side of the bridges is satisfactory for a temporary expedient, but these should be replaced promptly by permanent blocks or shoes. If timber blocks are to be used permanently they should be long enough to extend under the girders of each track. The minor defects noted in the bridges were as follows: Southern division: main line: bridges 2, 72, and 217 need some new ties; bridges Nos. 6, 104, 182, 217, and 223 should have the steel painted; bridge No. 8 has saprot on the deck which should be adzed off; bridge No. 20, I-beams are light: it is expected to replace this opening with a concrete flat top culvert; bridge No. 46, the girders are tight against the back wall; bridge No. 89½ needs a new deck: the temporary wood blocks under the southbound span are loose; bridges Nos. 95, 96, and 104 need some new ties and guard stringers; bridge No. 123, the steel is dirty; bridge No. 144 needs a new deck; bridge No. 160 needs some new guard stringers; bridge No. 233, an overhead highway bridge, should have the hand-rail repaired; Kingston branch: bridge No. 8 needs new guard stringers; bridge No. 43 has a poor piece of guard stringer; Port Jervis branch: bridges Nos. 11 and 12 need some new guard stringers; bridges Nos. 14 and 45 have saprot on the decks; bridge No. 49, the wing-wall on the south abutment is broken off: this will need attention; bridges Nos. 50, 52, and 53 have poor masonry: they will require careful watching until rebuilt; bridge No. 28, the masonry in the abutments is poor: it is expected to rebuild the abutments at once; bridge No. 27 needs a new deck; Monticello branch: bridges Nos. 3 and 6 have saprot on the decks which should be adzed off; bridge No. 4, the masonry in the west abutment is cracked under the bearing; bridge No. 5, the masonry in the east abutment is shaking apart and needs attention; bridge No. 7, the masonry in the pier is shaking apart and needs attention; Delhi branch: bridge No. 2 is a 19 span frame bent trestle: it is expected to fill this opening: the trestle is in poor condition and should be given prompt attention; bridges Nos. 12 and 23 need some new ties; bridge No. 22 needs some new ties and guard stringers. Northern division: main line: bridge No. 240, one I-beam has a poor bearing: the masonry should be pointed; bridge No. 242 needs some new guard stringers and the steel should be painted; bridge No. 246, the I-beams on the south abutment are supported on track splice bars in two piles of 3 bars: these should be removed and permanent bearings provided; bridges Nos. 255, 256, and 334 have the I-beams supported on temporary wood blocks: these blocks should be replaced by permanent bearings; bridge No. 258½ needs a new deck and the back walls should be raised; bridges Nos. 260, 293, and 363 will be replaced with permanent structures, 260 and 293 with concrete flat top culverts, and 363 with concrete abutments and I-beams; bridges Nos. 260 and 363 should be replaced promptly: they are frame bent trestles in poor condition; bridge No. 261, the south abutment is bulged; bridges Nos. 267, 313, and 319 have poor masonry, but there is no evidence of immediate failure; bridges Nos. 269, 278, 279, and 325 need some new ties; bridges Nos. 272 and 285, the masonry should be pointed; bridge No. 282 is a 17 span steel viaduct of light construction: day and night watchmen patrol this bridge, and a competent bridge man makes a thorough inspection of the steel every 2 weeks; bridge No. 284 needs a new deck: bridge No. 295, the pier is failing: the I-beams are supported on frame bents on each side of the pier; bridge No. 312, the inside metal guard-rails are not full spiked to the ties; bridges Nos. 315 and 316 are frame bent trestles: they need general repairs; bridge No. 320 needs new caps and posts; bridge No. 335 needs new eap and sill; bridge No. 342 needs some new posts; bridge No. 344, the south bent supporting the timber back wall is out of plumb and needs prompt attention; bridge No. 349, a steel viaduct, needs painting, and the saprot on the deck should be adzed off; bridge No. 351, the bridge seats are dirty; bridge No. 361 needs some new ties and guard stringers: the steel needs painting; bridge No. 364, the saprot on the deck timbers should be adzed off; bridge No. 372, the south bent supporting the back wall is out of plumb; bridge No. 373 is an 8 span frame bent

trestle: it is expected to replace this bridge with a concrete arch and fill within a year; bridges Nos. 375, 376, and 378 need general repairs; bridge No. 382 is a 7 span frame bent trestle in need of minor repairs: it is expected to replace this with a solid floor culvert next year; bridge No. 383, an 8 span frame bent trestle: the 2 bents on the north end are out of plumb; bridge No. 384 needs a new piece of guard stringer; bridges Nos. 392, 441, and 442 need some new ties, and 392 has a cracked bridge seat on the north abutment under the east beam; bridge No. 397 needs a new deck; bridge No. 438, the north bent is out of plumb; New Berlin branch: bridges Nos. 1 and 51, the steel needs painting; bridges Nos. 3, 69, and 73 have saprot on the decks; bridge No. 8 needs 2 new pieces of guard stringer; bridge No. 11 needs new posts; bridge No. 14 needs several new caps and posts; bridge No. 17 needs a new cap on the timber abutment at the north end; bridge No. 19 needs a new cap on the north abutment; bridge No. 21 is a single span frame bent trestle: it needs general repairs: it is expected to rebuild this bridge at once; bridge No. 26 needs a new deck; bridges Nos. 27, 32, 64, and 66 need general repairs; bridge No. 34, the temporary timber blocking under the beams should be replaced; bridges Nos. 50 and 53 need new caps; bridge No. 55, the timber back wall on the north abutment needs repairs; bridge No. 60, the I-beams are supported on timber cribs: the south crib is in poor condition and should be replaced; bridge No. 63, the timber stringers are poor; bridge No. 68 is a 4 span frame bent trestle in need of immediate repairs: it is expected to replace this with concrete abutments and I-beams; bridge No. 76 is a frame bent trestle of 1 span: the south abutment is out of plumb; Utica branch: bridges Nos. 9, 36, 38, and 43 need new ties; bridges Nos. 24 and 32, the steel needs painting; bridge No. 30, the masonry is poor: a frame bent supports the girders in front of the north abutment; bridge No. 31 needs some new pieces of guard stringers: the saprot on the ties should be adzed off; bridge No. 35 needs a new deck: it is expected to buy the rights to this cattle-pass and fill the opening; bridge No. 37½, the masonry needs pointing; bridge No. 44 has some poor guard stringers; bridge No. 50 was a long frame bent timber trestle about one-half of which has been replaced with deck girder spans on concrete piers: it is expected to build a retaining wall along the north side of the remaining trestle and fill it in: this can only be done after the enginehouse on the south of the trestle is removed: this trestle is in very poor condition and should either be replaced or filled at once: the ties and stringers are in bad condition, and the trestle has reached a point where it can not be patched; Rome branch: bridge No. 10 needs a new deck; bridges Nos. 12, 24, and 25 need some new ties and guard stringers; bridge No. 13, the stone masonry abutments are failing: they are braced with timbers; bridges Nos. 15, 16, and 19 have saprot on the decks; bridges Nos. 17 and 18 need general repairs; bridge No. 27, the stringers are poor, the south bent is out of plumb, and it needs general repairs; bridges Nos. 28 and 29 have some poor guard stringers. It is the practice to replace the timber trestles and light steel bridges when their renewal is necessary with more permanent structures. During the past year 12 light I-beam bridges, 1 steel girder bridge, and 5 timber trestles have been replaced with concrete flat top culverts and fill; 5 timber trestles have been replaced with concrete and I-beams; and 1 timber trestle with concrete piers and girders. It is expected to replace 4 timber trestles with more permanent structures during this season. These improvements are commendable, and they will result in economy in the bridge maintenance and an increase in safety.

The station buildings are generally in good condition and appear to provide ample facilities for the business handled. They were clean and orderly, and the platforms are properly maintained. There are 23 frame and 10 brick passenger stations; 101 frame, 4 brick, and 1 stone combined passenger and freight stations; and 20 frame and 9 brick freight stations. The long wooden platform at Sylvan Beach has been replaced with screenings, and is now in good condition. The new passenger and freight stations at Rome, Ferndale, and Valley Junction have been completed.

At Burnside, 2 tracks are crossed by 1 Lehigh and Hudson River railway track, protected by mechanically interlocking with derails. At Campbell Hall, 2 tracks are crossed by 1 Erie railroad Montgomery branch track, protected by mechanical interlocked signals: it is proposed to install complete interlocking protection at this crossing: this has been in prospect for several years, but the work has not been started: the present plant is in poor condition and should be replaced. At Sidney, 1 track is crossed by 2 Delaware and Hudson Company's tracks, protected by interlocked signals: the New York, Ontario and Western trains come to a full stop before crossing, but The Delaware and Hudson Company's trains cross without stopping if the signals indicate proceed. At Fish Creek, 1 track is crossed by 1 Lehigh Valley railroad track: the Lehigh Valley railroad and the New York, Ontario and Western railway use the single track Barge Canal bridge in common: the Lehigh Valley railroad junction switches

are located on each end of the bridge and the operation is controlled by mechanically interlocked switches, derails, and signals. At Central Square, 1 track is crossed by 1 New York Central and Hudson River railroad track, protected by mechanically interlocked signals and derails. At Oswego Shop and Fort Ground, 3 crossings of the New York Central and Hudson River railroad, protected by a tilting board. At Clark Mills on the Rome branch, 1 track is crossed by 2 New York Central and Hudson River railroad West Shore tracks, protected by mechanical interlocking with derails. At New Hartford on the Utica division, 1 track is crossed by 3 New York Central and Hudson River railroad West Shore tracks, protected by mechanical interlocking with derails. At Utica, 1 track is crossed by 1 Delaware, Lackawanna and Western railroad track, protected by a tilting board. At Oswego, 1 track is crossed by 1 track of the Oswego Traction Company, protected by a flagman. At Port Jervis, 2 tracks are crossed by 1 track of the Port Jervis Traction Company: the electric railway is on a steep grade; a derail is installed in the trolley track on the descending approach, and it is operated by the trolley conductor who flags the crossing for his car: the steam trains are restricted to 8 miles per hour over this crossing. At Utica, Columbia street, 1 track is crossed by 1 track of the New York State Railways, Utica and Oneida lines, protected by derails in the trolley track and crossing gates. At Utica, Lafayette street, 2 tracks are crossed by 1 track of the New York State Railways, Utica and Oneida lines, protected by derails in the trolley track, and gates.

The principal traffic is coal from the anthracite region of Pennsylvania, the greater volume of which is destined for points south of Cadosia. Northbound coal shipments are destined to local points and for shipment by boats from Oswego to lake points. Milk and agricultural and manufactured products are also important items of traffic. The passenger business is comparatively heavy in the summer season on the lines south of Cadosia, and particularly between Weehawken and the stations in Sullivan county, New York. Train movements are controlled by operating rules, timetables, and train orders supplemented by automatic signals on the parts of the line where the traffic is dense. Train orders are transmitted by telegraph on the entire line except the Seranton division where telephones are used. The terminal, road, and passenger facilities seem ample for the present traffic. Automatic signals are in use between Cornwall and milepost 167 near Apey, and between Fulton and Oswego. These signals are 2-position, lower quadrant, motor types, with 2 arms in the double track and single arms in the single track territory. Since the previous inspection the banner signals between Livingston Manor and Cadosia have been replaced with 2 arm signals as mentioned above. Distant banner signals operated by clockwork are used to protect some of the facing point switches. The banner is yellow and the indication is caution. There are also automatic signals protecting train movements through the Northfield tunnel as mentioned previously.

Since the previous inspection the following improvements have been made: length of sidings has been increased about 2 miles; new modern stations have been built at Valley Junction, Ferndale, and Rome; 26.88 miles of 90-lb. and 1.58 miles of 85-lb. open hearth rail were laid replacing 75-lb., 76-lb., and 95-lb. worn rail in the main line; 3.51 miles of 75-lb. open hearth rail replaced 56-lb. and 67-lb. rail on the Kingston branch; 0.40 mile of 75-lb. open hearth rail replaced a like amount of 56-lb rail on the Delhi branch; 2.94 miles of 75-lb. open hearth rail replaced 67-lb. and 76-lb. rail on the Utica branch; 218,748, or about 11 per cent of the ties in track, were renewed; about 30 miles of main track were re-ballasted with gravel and 1½ miles with cinders; 2½ miles of track on the Utica division were re-ballasted with cinders; bridges Nos. 5, 125, 126, 127, 129, 130, 133, 180, and 239, light I-beam bridges, were replaced with solid floor concrete culverts; bridge No. 171, a light steel span, has been replaced by a concrete culvert and fill; one span each of bridges Nos. 146 and 148, and bridges Nos. 312 and 320 have been replaced with heavier steel; bridges Nos. 235, 236, 318, 326, and 359, timber trestles, have been replaced with concrete culverts and fill; bridges Nos. 328 and 396, timber trestles, have been replaced with concrete abutments and I-beams; bridge No. 452, a timber overhead highway bridge, has been replaced with steel; bridge No. 7, Utica division, light I-beams, has been replaced by a concrete culvert and fill; bridges Nos. 20 and 21 on the Utica division, timber trestles, were replaced with I-beams on concrete with openings reduced about one-half; bridge No. 52, Utica division, a timber trestle, has been replaced in part by concrete piers and steel girders; bridge No. 52, New Berlin branch, a timber trestle, has been replaced by I-beams on concrete and fill; bridges Nos. 18 and 19 on the Port Jervis branch, formerly light I-beams, have been replaced by solid top concrete culverts and fill; bridge No. 15 on the Delhi branch has been replaced with I-beams on concrete; a new modern shop for painting passenger cars at Middletown has been completed; the elimination of grade crossings at Livingston Manor, Kingston, and Utica are nearly complete; a new car repair yard at Norwich has been completed; new 2 arm, lower quadrant,

2-position, motor type automatic block signals have been installed between Livingston Manor and Apex; a quarry has been opened and a crusher installed at Ellenville to crush rock for ballast.

The improvements contemplated at this time include a rearrangement of the yard tracks and the construction of a new freight house at Norwich; the replacement of timber bridges Nos. 360, 362, 363, and 373 with more permanent structures; the replacement of about 32 miles of 75-lb., 76-lb., and 95-lb. worn rail with new 90-lb. ARA, B, rail joined with Bonzano splices and laid on shoulder tie-plates; the replacement of about 5 miles of light rail on the Utica division, 2 miles on the Kingston branch, and 1 mile on the Delhi branch with new 75-lb. open hearth rail.

It is recommended (1) that the defects in the tracks noted in the body of the report be repaired; (2) that the minor defects in the bridges be repaired; (3) that the timber trestle on the east end of bridge No. 52 in Utica be either filled or rebuilt at once; (4) that the tie renewals be completed as early as possible, and that particular attention be given to the surface and line of the main tracks; (5) that the re-ballasting with stone be continued as fast as practicable.

Respectfully,  
W. G. HIMES,  
Inspector Division of Transportation.

#### NIAGARA JUNCTION RAILWAY.

Inspected April 30, 1914. Last previous inspection May 21, 1913.

To the Public Service Commission, Second District:

I have made an inspection of the Niagara Junction railway and submit the following report:

The Niagara Junction railway is a single track industrial railroad at Niagara Falls. It extends for some distance along the Niagara river from the power house to a point near Echota where it turns sharply to the left and continues in a northerly direction to a connection with the Rochester division of the New York Central and Hudson River railroad about 2 miles east of Suspension Bridge. The length of line is 4.86 miles, and it has a total of about 7.71 miles of sidings. The topography in the region of this railroad favored the construction of the line with easy grades and light earthwork. The maximum grade is 1.06 per cent, used in the ascent to avoid a grade crossing with the New York Central and Hudson River railroad and the Erie railroad. The maximum curve is 10 degrees.

The embankments are of ample cross-section properly to support the track, and the drainage seemed to be fairly well provided for. The alignment and surface of the track south of the carbide works were good. The section of the track north of the carbide works has not been used for several years, and the switch connection with the Rochester division of the New York Central and Hudson River railroad has been removed. This section of the road is not now in fit condition to be used. There are no unusual features in the construction or operation of this railroad.

The tracks are laid with 80-lb. rail, joined with 4-hole angle-bar splices. The rails and fastenings were in good condition. The ties are principally oak and yellow pine with a few treated pine ties installed since the last inspection. The renewals during the last year were 3942 ties. This was sufficient for the proper maintenance of that part of the line used. The ballast is a good quality of crushed stone and of sufficient quantity. The right of way on the part of the line that is in use was generally in excellent condition. The fences, road crossings, and signs were also in good condition on this part of the line.

The tracks are maintained by a section foreman with an average of 8 laborers: the general condition of the tracks shows that this force is ample for proper maintenance.

There are 4 bridges on this railroad including 1 frame bent trestle of 3 spans, 1 through plate girder bridge of 1 span carrying the track over Buffalo avenue, 1 through plate girder bridge of 3 spans carrying the track over the New York Central and Hudson River and the Erie railroads, and 1 I-beam span over Pike creek. The bridges were well maintained throughout. The only defect observed was that the inside guard-rails were not full spiked to the ties on the bridge over the New York Central and Hudson River railroad.

As this is solely a freight road there are no passenger stations. One track is crossed by 2 tracks of the International Railway Company in Buffalo avenue on the connection with the Falls branch of the New York Central and Hudson River railroad. Protection is provided by the train crew flagging the crossing when it is desired to cross the electric railroad tracks.

The business conducted by this railroad is in the nature of a switching service to and from the various industries along its property, and the train movements are under the direction of a yard master. There are no block signals, and there is no train dispatching system with train orders.

Since the last inspection a considerable amount of work has been done in the way of surfacing and aligning the tracks and

renewing the cross-ties. The railroad is now electrically operated. Since the previous inspection 2 electric locomotives have been secured, a new locomotive house has been built, and that part of the main line which is in use and all sidings have been equipped with an overhead contact cable suspended from a catenary cable in such a manner that it is in a straight line horizontally. The catenary cable is supported at frequent intervals by cross cables hung on wooden poles erected along the side of the track. The electric locomotives have pantograph frames on top which make a sliding contact with the overhead cable.

The recommendation in the previous report has been complied with. It is recommended that the inside guard-rail on the bridge over the New York Central and Hudson River railroad be full spiked to the ties.

Respectfully,  
W. G. HIMES,  
Inspector Division of Transportation.

#### NORTHERN CENTRAL RAILWAY.

Inspected June 16, 17, 1914. Last previous inspection July 23, 24, 1913.

To the Public Service Commission, Second District:

I have inspected the Northern Central railway within this State and submit the following report:

This railroad is divided into two parts, that south of Elmira is known as the Elmira and Williamsport railroad and that part north of Elmira is known as the Elmira and Lake Ontario railroad. The former extends south from a connection with the Susquehanna division of the Erie railroad at Southport Junction, about 1 mile south of Elmira, to the New York-Pennsylvania state line, a distance of 6.44 miles. This is single track with the exception of about 0.34 mile of double track in Southport yard. The sidings have a total length of 4.88 miles. The Elmira and Lake Ontario railroad extends in a northerly direction from a connection with the Susquehanna division of the Erie railroad at Chemung Junction, about 4.1 miles north of Elmira, to Canandaigua, a distance of 64.19 miles. This is single track with the exception of 1.14 miles of double track from Chemung Junction to Horseheads. The Sodus Bay branch is 34.06 miles in length and extends from Stanley to Sodus Point. The Canandaigua Lake branch, extending from Canandaigua to Canandaigua Lake, is 1.47 miles in length. The branches are single track throughout. The sidings have a total length of 38.48 miles on the main line; 11.30 miles on the Sodus Bay branch; and 0.49 mile on the Canandaigua branch. Trains are operated over the Erie railroad tracks between Southport Junction and Chemung Junction under a trackage agreement, and joint use is made of the Erie railroad station at Elmira and the New York Central and Hudson River railroad station at Canandaigua.

The cuts and embankments are maintained in a good cross-section throughout. Considerable difficulty is experienced with slides in the cuts and embankments on the sidehill south of Montour Falls. The soil here when saturated with water fills the ditches and overflows the track. At one point during last Spring the embankment settled under the track and caused considerable trouble. Watchmen are employed to patrol the track at these places during storms to prevent accidents to trains. The embankment was narrow just south of milepost 6 on the Sodus Bay branch. The ditches have been well made and are maintained in good condition. The alignment and surface are generally good. North of milepost 49 and south of Hall station the track was a little irregular in line and surface.

The tracks are laid with rail as follows: south of Elmira: 5.66 miles Bessemer 85-lb. steel, and 1.12 miles open hearth 85-lb. steel; north of Elmira: main line: 4.37 miles Bessemer No. 1 100-lb. steel, 0.05 mile open hearth No. 1 100-lb. steel, 0.37 mile Bessemer No. 2 100-lb. steel, 5.09 miles open hearth No. 1 85-lb. steel, 44.41 miles Bessemer No. 1 85-lb. steel, 11.04 miles Bessemer No. 1 70-lb. steel; Sodus Bay branch: 6.22 miles open hearth No. 1 85-lb. steel, 8.32 miles Bessemer No. 1 85-lb. steel, 1.40 miles Bessemer No. 1 70-lb. steel, 18.12 miles Bessemer No. 1 60-lb. steel; Canandaigua Lake branch: 0.05 mile Bessemer No. 1 85-lb. steel, 1.21 miles Bessemer No. 1 70-lb. steel, 0.21 mile Bessemer No. 1 60-lb. steel. The rail was general good on the main line, and no defective rails were found. Since the previous inspection 1.72 miles of new 100-lb. rail have been laid on the main line north of Elmira, replacing 0.51 mile of 70-lb., and 1.21 miles of 85-lb. rail, and 0.79 mile of new 85-lb. rail replacing worn out 85-lb. rail. On the Sodus Bay branch, the rail is from fair to good. More than half of the mileage of this branch is laid with 60-lb. rail, which in places is surface kinked and bent; an effort is being made to replace this with heavier rail. Since the previous inspection 1.60 miles of new 85-lb. rail and 0.48 mile of fit 70-lb. rail have been laid replacing 2.08 miles of 60-lb. rail. There is apparently no authorization for rail renewals on this branch this season. This should not be neglected. The replacement of this light rail should be continued as rapidly as possible. The ties in

track are as follows: south of Elmira: oak 51 per cent, chestnut 22 per cent, treated 25 per cent, and yellow pine 2 per cent; north of Elmira: main line: oak 69 per cent, yellow pine 23 per cent, treated 7 per cent, and chestnut 1 per cent; Sodus Bay branch: oak 65 per cent, yellow pine 20 per cent, chestnut 9 per cent, and treated 6 per cent; Canandaigua Lake branch: oak 82 per cent, chestnut 16 per cent, and yellow pine 2 per cent. The renewals since the previous inspection were made as follows: south of Elmira: main line: oak 1788, chestnut 252, yellow pine 899, treated 791; north of Elmira: main line: oak 24,011, chestnut 1495, yellow pine 2034, treated 2121; Sodus Bay branch: oak 9075, chestnut 576, yellow pine 36, treated 839; Canandaigua Lake branch: oak 105. These renewals represent about 11 per cent on the main line north and south of Elmira, 8.5 per cent on the Sodus Bay branch, and 1.3 per cent on the Canandaigua Lake branch. This is sufficient for proper maintenance. The renewals contemplated for this year are 3200, or 9.4 per cent, on the main line south of Elmira; 28,775, or 10.7 per cent, on the main line north of Elmira; 13,765, or 11.1 per cent, on the Sodus Bay branch; and 460, or 5 per cent, on the Canandaigua Lake branch. This is sufficient for proper maintenance, but only a small percentage of these renewals had been made at the time of inspection, and it is evident that they will not be completed until late in the Summer or early Fall. The best results in track work are obtained when the tie renewals are completed in the early Summer.

The track appliances are all modern and in good condition. Rigid, manganese, and spring frogs are used. Split rail type switches with rigid and automatic switch stands equipped with targets and lamps are used. Derails are provided where necessary. They are generally of the lifting type although some point derails are used. They are usually pipe connected and have targets and lamps. Distant signals are provided where the view of the switch is obscured to an approaching train. Tie-plates are universally used on curves and on all new ties except oak ties on tangents. The ballast is a good grade of cinders and sufficient in amount. Since the previous inspection 22.6 miles of main line, 13.8 miles of the Sodus Bay branch, and 0.4 of a mile of the Canandaigua Lake branch have been re-ballasted. Cinders have been distributed in many places for re-ballasting this season. About  $\frac{1}{3}$  of the lines north of Elmira have been re-ballasted in the past year and equally as much more requires re-ballasting now. The heavy and frequent traffic pulverizes the cinders and soon renders them ineffective as ballast. A more substantial ballast is required for economic maintenance. The heavy bed of cinders underlying the track would make a splendid foundation for stone ballast. South from Stanley for about 14 miles the Sodus Bay branch is well ballasted. The balance of this branch is not so good. Here in many places weeds and grass are growing in the track. The right of way is in splendid condition, and the right of way fences are properly maintained. During the past year 10.9 miles of new woven wire fence have been erected and 62 iron farm crossing gates have been substituted for wooden gates. The road crossings and signs are generally in good condition: the exceptions noted were that the wooden crossing-signs on the Sodus Bay branch are very dingy and should be either repaired or replaced. There were 10 crossings between Sodus Point and bridge No. 142 where the signs were in poor condition. The average length of the track sections south of Elmira is 2.41 miles, and the working force consists of a foreman and 5 laborers. North of Elmira on the main line the sections average 4.35 miles; and on the Sodus Bay branch 5.67 miles. The working force on each consists of a foreman and 5 laborers per section. The generally good condition of the track and railroad property indicates that this force is sufficient.

The structures are main line south of Elmira, bridges: 2 through steel truss, 3 half through plate girder; culverts: 17 iron pipe, 5 open I-beam; main line north of Elmira: bridges: 9 half through plate girder, 13 deck plate girder, 6 wooden trestle, 1 stone arch, 2 reinforced concrete slab; culverts: 13 brick arch, 1 concrete arch, 8 stone arch, 98 stone box, 201 iron pipe, 4 open I-beam, 6 open wooden, 2 solid rail top, 1 concrete pipe; Sodus Bay branch: bridges: 2 through steel truss, 6 half through plate girder, 3 deck plate girder, 5 I-beam, 1 through Howe truss timber, 6 wooden trestle, 1 brick arch; culverts: 1 brick arch, 7 stone box, 70 iron pipe, 1 open I-beam, 1 open wooden, 1 concrete slab top. There are no openings on the Canandaigua Lake branch. The bridges are in generally good condition and properly maintained. The minor defects observed were as follows: south of Elmira: the first open culvert north of the Pennsylvania-New York state line needs some new ties and guard stringers; bridges Nos. 23, 24, 24A, 25, and 26 have inside metal guard-rails, but they are not full spiked to the ties; north of Elmira: bridge No. 101B, timber bridge seat on south abutment should be replaced; bridge No. 105, the timber back walls are in poor condition; first culvert north of bridge No. 107A, the bridge seats are failing; it is expected to rebuild these promptly; second culvert north of bridge No. 107A, the masonry shows evidence of failure: the walls are securely braced with timbers; first culvert south of Himrods,

the approaches are low; first culvert north of milepost 33 should have the track raised on the approaches and tamped solid; bridge No. 114 is a 3-span timber trestle: it is expected to replace this with a concrete flat top culvert; bridges Nos. 115A, 115B, 115C, 115D, and 115E are frame bent trestles: it is expected to rebuild these trestles and the timber is on hand for that purpose; bridge No. 116 is a 1 span deck plate girder on masonry abutments: the wing-walls on the north abutment have settled away from the abutment, this should be given prompt attention; bridges Nos. 125 and 127 have spikes driven in the angle-bar slots; bridge No. 131, the track is loose on the approaches and should be tamped solid; bridge No. 134 is a frame bent trestle of 12 spans: it is expected to fill in this trestle and install a castiron pipe this season; bridge No. 140 was formerly a 2-span timber Howe truss, which was burned on August 18, 1913, a temporary timber trestle now spans the opening, and considerable difficulty is experienced in keeping the track in surface on account of the bents settling: a speed of 4 miles per hour for all trains is observed and day and night watchmen are on duty; bridge No. 141 a short distance north of the temporary trestle is a single span timber Howe truss bridge: it is expected to dig a channel for the creek along the east side of the railroad and eliminate these two bridges; bridge No. 107A should have the bridge seats cleaned; bridges Nos. 100, 107A, 111, 111A, 114, and 122 have inside guard-rails which are not full spiked to the ties. The bridges are well maintained throughout. The substitution of permanent structures for the timber spans, and the elimination where possible of temporary bridges is being accomplished. Since the previous inspection 2 such bridges have been replaced with concrete flat top culverts, and 1 has been replaced by concrete pipe.

There are 26 frame and 2 brick station buildings. The stations, grounds, platforms, and driveways are in splendid condition.

There are no grade crossings with other steam railroads south of Elmira. North of Elmira on the main line at Stanley, 3 tracks are crossed by 1 Lehigh Valley railroad track, protected by manual interlocked signals with derails in the Lehigh Valley railroad track. The normal position of the signals indicate proceed on the Northern Central railway and stop on the Lehigh Valley railroad. When a Lehigh Valley train wishes to use the crossing the signals and derails are set by a member of the train crew operating the levers in the tower adjacent to the crossing. On the Sodus Bay branch at Phelps Junction, 1 track is crossed by 1 track of the Auburn branch of the New York Central and Hudson River railroad, protected by flagmen: a white light or flag displayed permits the New York Central and Hudson River railroad trains to cross; a red light or flag permits the Northern Central railway trains to cross. At Wallingford, 1 track is crossed by 1 track of the Ontario division of the New York Central and Hudson River railroad, protected by manual interlocked signals.

On the main line at Montour Falls, 1 track is crossed by 1 track of the Elmira and Seneca Lake Traction Company, protected by flagmen and derails. On the Canandaigua Lake branch at Saltonstall street, Canandaigua, 1 track is crossed by 1 track of the Rochester and Eastern Rapid railway, protected by derails.

There is a moderate northbound traffic in coal. The traffic originating on the lines of this railroad is principally agricultural and manufactured products, salt, etc. The facilities for handling the business are ample. Train movements are governed by a manual telegraph block system, positive for opposing movements and for trains following where a first-class train is involved. The block signal stations have 3-position type signals with marker lights. Telegraphic train orders, timetable schedules, and operating rules are in effect.

Since the previous inspection the following improvements have been made: sidings south of Elmira increased 0.13 mile, sidings north of Elmira increased 0.06 mile, and sidings Sodus Bay branch increased 0.04 mile; the interior of Watkins passenger station was painted, and the platform rebuilt at the freight station; new toilets were installed at Pine Valley and Himrods Junction tower; tie renewals were 3730, or about 11 per cent, south of Elmira; 29,661, or 11 per cent, on main line north of Elmira; 10,526, or 8.5 per cent, on the Sodus Bay branch; and 105, or 1.3 per cent, on the Canandaigua branch; track re-ballasted with cinders was 22.6 miles on the main line, 13.8 miles on the Sodus Bay branch, and 0.4 mile on the Canandaigua Lake branch; 1.72 miles of new 100-lb. rail and 0.79 mile of new 85-lb. rail were laid replacing 0.51 mile of 70-lb. and 2 miles of 85-lb. rail on the main line; 1.6 miles of new 85-lb. and 0.48 mile of 70-lb. rail were laid replacing 60-lb. rail on the Sodus Bay branch; bridges Nos. 116A and 118A, timber trestles, have been replaced with concrete flat top culverts; bridge No. 114N, an overhead highway bridge south of Penn Yan, has had the entire floor system renewed; the enginehouse doors at Southport were widened to provide better clearance; new wagon scales were installed at Glenora and Lewis; new subdivision tool houses have been built at Pine Valley and Himrods Junction on the main line; and at Stanley, Orleans, and Sodus Center on the

Sodus Bay branch; 5 new distant signals were installed to protect the facing point switches at the north end of the brick switch Horseheads, south end of passing sidings at Pine Valley, Watkins, and Lakemont, and the coal switch at Lakemont; a standard arrangement of non-interlocked crossover, protected by switch target and bolt lock, was put in at a crossover just south of Millport; 8.2 miles of woven wire right of way fence were built on the main line and 2.7 miles on the Sodus Bay branch; 34 iron farm crossing gates on the main line and 28 on the Sodus Bay branch replaced old wooden gates. The contemplated improvements for this season include the renewal of 3200 ties south of Elmira, 28,775 ties on the main line north of Elmira, 13,675 ties on the Sodus Bay branch, and 460 ties on the Canandaigua Lake branch; the elimination of the present timber trestle bridge No. 140 and the timber Howe truss bridge No. 141 by digging a new creek channel and filling the openings; the replacement of bridges Nos. 110A and 114 with new concrete flat top culverts; the replacement of bridge No. 118B with castiron pipe and fill; the replacement of the open timber cattle-pass 2500 feet south of Ennerdale with a 74-inch concrete pipe and fill; the pipe has been placed, and the filling is nearly completed; the replacement of bridge No. 134, a timber trestle, with 48-inch castiron pipe and fill; the renewal of the masonry at bridge No. 144; the renewal in timber of bridges Nos. 115A, 115B, 115C, 115D, and 115E; the rebuilding of the yard office at Southport; the extension of about 60 feet to the ice house at Southport yard; the replacement of the present 46-foot track scale with 52-foot scale at Southport yard; the construction of a new public delivery siding and wagon scale between Stanley and Lewis.

This railroad is being maintained in a very satisfactory manner. It is recommended (1) that the crossing-signs on the Sodus Bay branch, which require it, be either painted or replaced by new signs promptly; (2) that the inside metal guard-rail be full spiked to the ties; (3) that the other minor defects in the track and bridges mentioned in the body of the report be repaired.

Respectfully,  
W. G. HIMES,  
Inspector Division of Transportation.

#### NORWOOD AND ST. LAWRENCE RAILROAD.

Inspected May 23, 1914. Last previous inspection June 10, 1913.

To the Public Service Commission, Second District:

I have inspected the Norwood and St. Lawrence railroad and submit the following report:

This railroad has a standard gauge single track line extending from Norwood to Waddington, a distance of 19.2 miles. At Norwood there is track connection with the Rutland and the New York Central and Hudson River railroads, and at Waddington there is a passenger and team ferry across the St. Lawrence river to Morrisburg, Ont. There is a branch 1200 feet long near Raymondville, extending to a small passenger station and industry tracks at a mill.

This line extends across a rolling country and crosses the Raquette and La Grasse rivers. There are some fairly heavy grades, but the curvature is moderate. The cuts and fills generally are in good condition, but in two places the line has not yet been brought to final grade. The surface and alignment of the track are good.

The rail consists of 70-lb. steel except a small amount of 60-lb. steel near Norwood. The rail is in good condition, except that some loose joints were found near Norwood which should be repaired. Cedar ties are used and apparently are renewed in sufficient numbers each season properly to maintain the track timber. The track is fairly well ballasted with gravel and cinders. The track appliances include split switches, rigid frogs, and automatic switch stands all of which appeared to be in good repair. The right of way is clean and open, and suitable fences are maintained. The road crossings are in good condition and are equipped with standard signs. The line is divided into 3 track sections with an average force of about 6 men per section during the working season. The amount of track labor used appears to be sufficient.

The bridge and culvert structures consist of plate girders, I-beams, concrete arches and boxes, and small timber trestles. These quite generally are in good condition, but a few minor defects requiring mention are as follows: bridge west of East Norfolk, the east abutment is cracked, but the masonry apparently is standing without movement at present; bridge west of Norfolk has poor abutments which are assisted by timber bents; the plate girder bridges east and west of Raymondville should have the saprot trimmed off of the deck timbers; bridge east of Chase Mills should have the guard-rail spiked more securely, to every second tie. The timber bridges are being replaced by permanent structures as rapidly as practicable.

There are 4 stations maintained by this company, all of which are in good condition and suitable for the traffic. There also are shelters at several flag stops, and the station at Norwood is used jointly with the New York Central and Rutland railroads.

There is only a moderate traffic on this road, the train work being handled by 2 crews. Train movements are controlled by the timetable schedules, telephonic train orders, and the operating rules. This method appears to be satisfactory for the present conditions. The facilities provided are suitable for the existing business.

During the past year ballast has been applied on about 10 miles of track, and some work has been done in widening cuts and raising fills to bring the track to a permanent grade line. Improvements proposed for the current year include a continuation of the ballasting, the improvement of the grade line, and the replacing of two timber trestles by concrete culverts.

The recommendations of the last previous report generally were carried out. It is recommended that the repairs of minor defects as mentioned in the body of this report be made.

Respectfully,  
J. B. STOUDEK,  
Steam Railroad Inspector.

#### OTIS RAILWAY.

Inspected May 14, 1914. Last previous inspection May 13, 1913.

To the Public Service Commission, Second District:

I have inspected the Otis railway and submit the following report:

The Otis railway is 1.08 miles in length extending from a connection with the Catskill Mountain railway at Otis Junction to a connection with the Catskill and Tannersville railway at Otis Summit. The track is 3 feet gauge and of a three rail construction. The center rail is used in common with the outside rails to form the up and down tracks. There are no curves in the railway except at the middle point where the tracks separate and 4 rails are used to give clearance for passing the cars. The difference in elevation between the termini is about 1600 feet. The grade however is not uniform. It generally follows the surface of the ground with light grading. Where cutting was necessary it was through solid rock. The maximum grade is 38 per cent, and the minimum grade near Otis Junction is about 4 per cent. The embankments and cuts are of good section, and the ditches where required are properly maintained. The alignment and surface of the tracks are good.

The rolling equipment consists of 2 single-truck open passenger cars with seats running crosswise. There are 15 seats with a capacity of 8 persons to a seat, but the number of passengers carried in each car is restricted to 75. Two 1¼ inch steel cables, each a little longer than the distance traveled by each car, are attached to the rear of the descending car and to the front of the ascending car. These cables pass around a drum driven by two Hamilton Corliss engines, and thence around an idler wheel which is set at an angle so the cable returns to the other track in the proper position. When the cars are operated, one is hauled up by the one end of the cables and the other drops down the grade by gravity, being restrained by the other end of the cables. The operation is controlled by two men in the tower which is situated at the head of the plane over the engine room. From here a clear view of the entire plane is had with the exception of about 1000 feet which is obscured by a break in the grade. The cars are in plain view with the exception of a few seconds. The engine throttle and the control for the brakes are in the tower. Telephones are installed in the tower, on each car, and in the station at the foot of the plane. The platforms at each end of the line are level with the car floor. A safety clutch is installed under each car which in an emergency grips each side of a stringer laid in the track and securely bolted to the ties on the inside of each outside rail. This grip automatically clutches the stringer when the speed of the car reaches 12 miles per hour, or it can be set by hand by the car man in charge of each car.

The rails are 40-lb. Bessemer steel in good condition throughout. The ties are 6 inches by 8 inches by 9 feet 10 inches, yellow pine, driftbolted to three stringers, one under the center rail and one under each end of the ties just outside of the outside rails. The stringers are supported on mudsills which extend across the track under the three stringers at intervals of about 8 feet. The rails were full bolted and tight, and full spiked to the ties. There were several poor ties and stringers, but new timber was on hand to make the renewals; and it was stated that these renewals would be made at once. The right of way is cleared. There are no highway or private road crossings at grade. The track repairs are made by the section gang on the Catskill and Tannersville railway.

There are one timber truss overhead highway crossing, two timber stringer masonry abutment undergrade highway crossings, one reinforced concrete trestle with concrete stringers, posts, caps, and sills, and one steel trestle with the track carried on I-beams supported on steel towers. These structures were in generally good condition. One of the longitudinal braces in the concrete trestle has been damaged considerably on the end which is supported on the rock, by falling stones from the hillside adjacent.

There are two frame stations. The one at Otis Junction is used jointly by this railway and the Catskill Mountain railway, and the one at Otis Summit is used in common with the Catskill and Tannersville railway. Repairs have been made to the platforms, and the stations were in generally good condition. They seem to provide ample accommodations for the class of service performed.

The operator in the tower at Otis Summit arranges by telephone with the official at Otis Junction for starting the cars. The trip is made without stop. A limited freight business is handled. Package freight and baggage is hauled in an open car securely attached to each passenger car. Carload freight is handled by attaching one freight car to the rear of the passenger car on the north track and hauled to the summit where a turnout is provided, and the freight car uncoupled from the passenger is hauled up to the Catskill and Tannersville railway by a cable from a hoisting engine. A derailing switch is placed just below this turnout to derail the freight car in case of accident. No passengers are carried when the freight car is being handled on the plane.

Since the previous inspection a new steam pipe line has been built in the boiler room; the engines have been thoroughly overhauled; the ears have been painted and extensively repaired; and the two cables have been replaced with new 1¼ inches steel cables; many of the idlers in the track supporting the cable have been replaced; and new ties and stringers have been installed. There are no extensive improvements contemplated for this season.

This property is being maintained in a satisfactory manner. It is recommended that the damaged brace in the concrete trestle be repaired, and that the poor ties and stringers be replaced.

Respectfully,

W. G. HIMES,  
Inspector Division of Transportation.

#### OWASCO RIVER RAILWAY.

Inspected October 6, 1914. Last previous inspection October 21, 1913.

To the Public Service Commission, Second District:

I have inspected the Owasco River railway and submit the following report:

This railroad is a standard gauge, single track switching line, located in the city of Auburn. One part of the main track extends from a connection with the New York Central and Hudson River railroad near the passenger station to the International Harvester Company works on Genesee street, about one-half mile. Another line connects with the New York Central and Hudson River railroad at a point about one-half mile east of the other connection and extends to warehouses and a lumber yard of the International Harvester Company, and also extends northward to a connection with the Lehigh Valley railroad. The total amount of main track is 2.11 miles, and the company also has trackage rights on the New York Central and Hudson River railroad between the two connections.

The line to Genesee street lies along the Owasco river and is carried on three trestles for about 1200 feet. The other line has some heavy grades and sharp curves. At a curve near the old quarry, the outside rail is elevated sufficiently for high speed traffic. As the speed of trains at this place is moderate the superelevation of the outside rail evidently is excessive. The rail consists of 60-lb., 70-lb., 75-lb., 80-lb., and 90-lb. sections, and quite generally it is in good condition. A rail with a split head north of the New York Central tracks should be taken out of main track service. The track ties are in good condition. The switches, frogs, and other track appliances are in good repair, except that the rails were spreading at the heel of a switch in the lumber yard.

The Owasco river is crossed on a 2-span deck truss bridge which is in good condition, except that it has a few poor ties. The track is on a curve, and the ties have suffered from frequent re-spiking. Tie-plates applied to the bridge ties on the curve would prevent this damage. There are three trestles along the river bank between the river bridge and Genesee street. The two trestles between the bridge and North street have been rebuilt with concrete piers and I-beam girders. The timber trestle between North and Genesee streets is in fair condition. Several

concrete piers have been built there, and it is expected to complete the rebuilding next season. The inside guard-rails on all of these structures are too close to the main rails properly to guide a derailed truck. The space between the heads of the guard and main rails should be not less than 8 inches, and it is suggested that the change be made gradually whenever extensive re-spiking is done.

The line to Genesee street is crossed by 2 tracks of the Auburn and Syracuse Electric railroad on Genesee street and by 1 track of the same railway on North street. The only protection consists of flagging by the train crews of either road when using the crossing.

The road is operated as a yard under the direction of a yardmaster. There is a small classification yard north of the New York Central tracks where cars are assembled and classified according to the plants to which they are destined. Derails and castiron blocks are provided at several places on the steep grades to prevent runaway cars from doing serious damage. The track is closed to entrance from the streets by gates which are kept locked when not in use.

The principal improvements in the last year are a new side-track to a new malleable casting plant and the building of 8 concrete piers at the timber trestle. It is intended to complete the rebuilding of this structure next season.

The recommendations of the preceding report were carried out. It is recommended that the defective rail be removed from the track and that the track be gauged at the switch in the lumber yard; that tie-plates be applied on the curve on the Owasco River bridge; and that the guard-rail on the trestles be properly spaced when re-spiking is done on the bridge decks.

Respectfully,

J. B. STODER,  
Steam Railroad Inspector.

#### PITTSBURG, SHAWMUT AND NORTHERN RAILROAD.

Inspected June 5, 1914. Last previous inspection June 18, 1913.

To the Public Service Commission, Second District:

I have inspected the Pittsburg, Shawmut and Northern railroad within this State and submit the following report:

This is a single track, standard gauge railroad extending from the New York-Pennsylvania state line near Prosser in a north-easterly direction to a connection with the Delaware, Lackawanna and Western railroad at Wayland, a distance of 69.36 miles. The Olean branch, 9.01 miles in length, extends from its main line connection at Prosser to Olean, where it has a connection with the Buffalo division of the Pennsylvania railroad. The Hornell branch extending in a southerly direction from Moraine to Hornell, a distance of 10.38 miles, connects with the Buffalo division of the Erie railroad. The total length of sidings and yard tracks is 28.05 miles.

The grades on the main line are comparatively steep in places. The maximum is 1.8 per cent, 5000 feet long ascending southward from Swains to Grove. The Hornell branch has comparatively light grades with a maximum of 0.45 per cent about 4500 feet long near Arkport. The Olean branch has a 1.44 per cent grade 1800 feet long near White House. The curves are rather frequent. The maximum curvature is as follows: main line near Swains 10 degrees; Hornell branch near Moraine 10 degrees; Olean branch near Olean 22 degrees. The cuts and embankments are well formed and have generally a cross-section of ample proportions to support the track. The ditches are properly maintained. The track alignment and surface are generally good; however, the tangents in several places needed attention. This was particularly noted on the main line between Moraine and Wayland. The traffic here is light and the speed is restricted to 20 miles per hour. The tangent south of Richburg and near bridge No. 59.4 should have attention.

The track is laid with Bessemer rail as follows: main line 85-lb. rail, 54.81 miles; main line 56-lb. rail, 14.55 miles; Hornell branch 85-lb. rail, 1.08 miles; Hornell branch 56-lb. rail, 9.30 miles; Olean branch 85-lb. rail, 0.24 mile; Olean branch 56-lb. rail, 8.77 miles; total 88.75 miles. The rail is generally in good condition and no defective rails were found. The 85-lb. rail is jointed with 6-bolt Weber splices and the 56-lb. rail with 4-bolt Bonzano splices. The bolts were tight with a few exceptions where not more than 2 bolts in any joint were loose.

The ties are principally oak and yellow pine. The renewals since the previous inspection were 29,000 or about 14 per cent on the main line, 4600 or 15 per cent on the Hornell branch, and 3800 or 15 per cent on the Olean branch. The renewals contemplated for this year are 22,000 on the main line, and 4000 each on the branches: this is sufficient for proper maintenance. The renewals during the past year were made with yellow pine, but there are now on hand native oak ties which will be used with yellow pine for the renewals. Spring and rigid frogs, split

rail type switches, and automatic switch stands with targets and lamps are used: they are in good condition. When it is necessary to renew 56-lb. switches it is done with 85-lb. materials. Tie-plates are extensively used under the 56-lb. rail and with the 85-lb. rail on the curves. Anti-rail creepers of a modern design are used where needed: they are properly installed and appear to be satisfactory.

The ballast is gravel throughout with the exception of about 14 miles of main line which is slag: of this about 6 miles is coarse slag, and the remaining 8 miles is sugar slag. The gravel ballast is fair to good in quality and generally sufficient in amount. In places grass and weeds are growing in it. The coarse slag ballast is clean and appears to be of good quality. Where it was applied the track is in splendid condition.

The right of way is clean and well kept, the fences are in good condition, and the road crossings are properly maintained. The crossing-signs are in many places in need of painting. This was especially noted at the following points: Hornell branch, crossing south of bridge No. 15.7; main line, at 3 crossings between bridge No. 57.2 and Bolivar, and at crossing between bridges No. 64.0 and 65.2; Olean branch, between bridge No. 69.1 and White House, and between bridges Nos. 70.4 and 71.1. The sign at the crossing just north of Angelica station is behind a tree and should be moved to a new location where it will be in plain view.

The sections have an average length of 4.94 miles, and the force consists of 4 men on the main line, 5.09 miles and 4 men on the Hornell branch, and 5.81 miles and 4 men on the Olean branch: this force is sufficient for proper maintenance if judiciously handled. The track work for this season is being postponed for financial or other reasons until the close of the fiscal year. Only such work as is absolutely necessary for safety is being done at present. This is a common practice on some railroads and one that is to be deplored in that the best results from track work are obtained in the Spring and early Summer.

All the bridges on the main line are steel I-beam and plate girder types. There are 3 plate girder and 1 through truss bridges on the Hornell branch, and 5 plate girder bridges and 2 timber trestles on the Olean branch: they are in generally good condition. A criticism common to many of the bridges is that the inside guard-rails are not full spiked to the ties, this being particularly noted on the following bridges: Nos. 13.2, 17.7, 31.5, 33.3, 33.7, 34.2, and 40.3. The other minor defects in the bridges were as follows: saprot on bridges Nos. H17.2, 44.9, 61.3, 61.4, 61.7, 63.0, 65.2, 0-69.1, and 0-71.1 should be adzed off to prevent fire; the bridge seats should be cleaned on bridges Nos. H-13, 56.4, and 69.3; the steel was dirty on bridge No. 15.7; new guard stringers are required on bridges Nos. 47, 59.4, and 0-71.1; new ties are required on bridges Nos. 33.3 and 69.3; the track is loose on the approaches to bridges Nos. 40.3 and 48.4, and the ties should be tamped solid; the embankment on the approach to bridge No. 0-71.1 is narrow and should be filled out to provide a proper shoulder for the ballast; the concrete pier on the south end of bridge No. 33.7 has settled, and the girders are supported on temporary timber blocks: it is expected to replace these with cast steel shoes; the two timber trestles on the Olean branch Nos. 0-76.3 and 0-76.4 are in poor condition: it has been definitely decided to rebuild 0-76.4 with timber; bridge No. 0-76.3 requires some new caps and practically a whole new deck, and it is believed that a thorough examination will determine that this bridge should be rebuilt. There are 259 arch and pipe culverts on the main line, 18 on the Hornell branch, and 18 on the Olean branch.

The stations and shelters are generally well maintained and seem adequate for the service rendered. There are 30 frame stations and shelters and 2 brick stations. The Delaware, Lackawanna and Western station at Wayland is used jointly.

At White House on the Olean branch, 1 track is crossed by 1 track of the Buffalo division, Pennsylvania railroad, protected by mechanical interlocking signals and derails. At Ceres on the main line, 2 legs of the wye are crossed by 1 track of the Western New York and Pennsylvania Traction Company, no protection provided. At Hornell on the Hornell branch, 1 track is crossed by 1 track of the Hornell Traction Company in Seneca street, no protection is provided.

The principal traffic is soft coal from the Pennsylvania mines: this is delivered to the Erie railroad at Hornell and the Delaware, Lackawanna and Western railroad at Wayland. The local traffic is farming products. The passenger traffic is light, and the service rendered is in accord therewith.

Train movements are controlled by telegraphic train orders, timetables, and operating rules. There are no automatic block signals. The pusher service on the grades has been discontinued, and the trains are now operated with 2 engines thus reducing the number of train movements by eliminating the return of the light engine to the foot of the grade.

Terminal facilities are provided at Hornell, Angelica, and Olean, and these with the interchange facilities at junction points seem adequate.

Since the previous inspection the following improvements have been made: sidings and yard tracks have been increased 0.23 miles on the main line, and 0.46 of a mile on the Hornell branch; 0.3 of a mile of new 85-lb. rail and 0.25 of a mile of relayer 85-lb. rail have replaced 56-lb. rail on the main line, and 0.12 of a mile of new 85-lb. has replaced 56-lb. rail on the Hornell branch; 29,000 yellow pine ties, representing 14 per cent, were used in renewals on the main line, 4600 yellow pine ties, representing 15 per cent, were used in renewals on the Hornell branch, and 3800 yellow pine ties, or 15 per cent, were used in renewals on the Olean branch; 6 miles of track were re-ballasted with coarse slag, and 8 miles with sugar slag; new concrete abutments have been installed in the Canaseraga Creek bridge on the Hornell branch; 2 span deck plate girder bridge on pile bents has replaced a timber trestle at bridge No. 1.3. The contemplated improvements include the renewal of 22,000, or 10.6 per cent of the cross-ties on the main line, 4000, or 13 per cent, on the Hornell branch, and 4000, or 15.8 per cent, on the Olean branch; the renewal of the two timber trestles on the Olean branch; and the erection of two new shop buildings at Angelica.

This railroad is being maintained in a satisfactory manner. It is recommended (1) that the inside guard-rails on the bridges be full spiked to the ties; (2) that timber trestles Nos. 0-76.3 and 0-76.4 be replaced with new structures; (3) that the highway crossing-sign at Angelica be re-located; (4) that the other minor defects in the track and bridges mentioned in the body of the report be remedied.

Respectfully,  
W. G. HIMES,  
Inspector Division of Transportation.

#### RUTLAND RAILROAD.

Inspected August 11, 12, 1914. Last previous inspection September 2, 3, 1913.

*To the Public Service Commission, Second District:*

I have inspected that part of the Rutland railroad which is within the State of New York and submit the following report:

There are parts of 3 single track lines of this railroad within this State. The Ogdensburg division extends in an easterly direction from Ogdensburg on the St. Lawrence river to the state line in Lake Champlain near Rouses Point, a distance of 118.8 miles. The Addison branch extends in an easterly direction from a connection with The Delaware and Hudson Company's railroad at Fort Ticonderoga to the New York-Vermont state line, a distance of 9.82 miles. The Chatham division extends in a southerly direction from the New York-Vermont state line north of Petersburg Junction to a connection with the Boston and Albany and the Harlem division of the New York Central and Hudson River railroads at Chatham, a distance of 51.29 miles. The sidings have a total length of 41 miles on the Ogdensburg division, 0.3 mile on the Addison branch, and 4.5 miles on the Chatham division. The Ogdensburg division is exceptionally well located. The curves and grades are moderate, and the embankments and cuts have an unusually wide cross-section which provides an ample shoulder for the support of the tracks on the fills and for the drainage ditches in the cuts. On the Chatham division, the embankments and cuts have a good cross-section, and the ditches are properly maintained. The curves are frequent and some are moderately sharp. The alignment and surface of the tracks are fair to good.

The tracks are laid with rail in weight and section as follows: Ogdensburg division: 80-lb. old New York Central section, 79.275 miles; 80-lb. Dudley section, 26.395 miles; 75-lb., 3.310 miles; 72-lb., 9.820 miles; Addison branch: 56-lb., 0.820 mile; Chatham division: 80-lb. New York Central section, 6.695 miles; 75-lb., 36.120 miles; 72-lb., 8.475 miles. The 80-lb. rail on the Ogdensburg division is joined with 6-bolt angle-bar splices, and on the Chatham division the splices are mixed 6-bolt angle-bars and 4-bolt continuous rail joints. The 75-lb., 72-lb., and 56-lb. rail is joined with 4-bolt angle-bar splices. Many continuous rail joints have been applied to the rails replacing surface bent splices. It is expected to continue this practice with the idea of prolonging the life of the rail. On the 72-lb. rail these joints are replacing old one-tie supported 4-bolt joints and the change should make a material improvement in the tracks. The bolts are tight and no loose bolts were observed. Rails which appeared to be defective were noted in the main tracks at the following points: Ogdensburg division: Piped or split head rails in the south side of the track near the crossing west of bridge No. 355, near telephone poles 2486, 2130, 1661, and 276. The ties are principally cedar, chestnut, and oak. The renewals since the previous inspection were made with 23,000 cedar and 9500 chestnut ties, equivalent to 10 per cent, on the Ogdensburg division; 200 cedar and 100 chestnut, equivalent to 13 per cent, on the Addison branch; and 10,200 cedar and 11,400 chestnut ties, or about 15 per cent, on the Chatham division. The destruction of the ties is principally by rail cutting. The cedar ties are soft wood, and they

are in places cut deeply by the rail. Tie-plates have been installed on the curves, and it is suggested that if they were used on the soft ties on the tangents their life would be considerably prolonged. The renewals made during the past year are sufficient for proper maintenance. This season's renewals amounting to 45,700 ties on the Ogdensburg division, 300 ties on the Addison branch, and 20,000 ties on the Chatham division were about 75 per cent complete at the time of the inspection. The tracks are ballasted with gravel and cinder on the Ogdensburg division, gravel with a few cinders mixed on the Chatham division, and dirt and cinders on the Addison branch. The ballast is generally sufficient in amount and of good quality. The track appliances include rigid and spring frogs, rigid and automatic switch stands equipped with targets and lights, split switches, point, stub, and lifting derails. There are also some manganese steel guard-rails in use. The appliances were in good condition, and no defects were noted.

The right of way was clean and well kept. The fences where required are in good condition. The road crossings and signs are well maintained with the exception that a few of the crossing-signs should be painted to make them more conspicuous. The signs particularly noted in this respect are at crossings where no other protection is provided, and the necessity for keeping these signs well painted is obvious. The sections have an average length of 5 miles and a force of 1 foreman and 4 men during the working season on the Ogdensburg division; 5.3 miles and a force of 1 foreman and 4 men on the Chatham division; and 7½ miles and 1 foreman with 4 men on the Addison branch. This force is sufficient properly to maintain the tracks if allowed for the full working season.

The minor defects in the tracks particularly noted were as follows: Ogdensburg division: The crossing-sign on the south side of the crossing west of milepost A98 appears to be hidden from the view on that approach by a tree. The signs at the following highway crossings should be painted: between bridges Nos. 365 and 366, east of Knapps, east of bridge No. 363, west of bridge No. 358, second crossing west of milepost A85, east of milepost A76, east of Brushton, west of milepost A71, at Bangor, east of milepost A53, west of Altona, east of bridge No. 327, at milepost A19, east of bridge No. 316, east of bridge No. 308, west of milepost A6, and east of Rouses Point. The surface and line were a little irregular between milepost A74 and A73, west of milepost A39, on the tangent east of milepost A26, and south of bridge No. 320. Considerable trouble is experienced with the cedar ties in keeping the spikes driven down, and at several places on the Ogdensburg division the spikes were sticking up. This was particularly noted near Knapps. The ties are badly rail cut at telephone pole 2420. The ditch on the south side of the cut at milepost A49 should be cleaned to afford proper drainage. Chatham division: The water tank north of North Stephentown is in very poor condition and liable to collapse. The shims in the track south of bridge No. 23 should be removed and the track surfaced. The churning track in the cut north of bridge No. 3 should have attention.

The bridges are in number and kind as follows:

	Ogdensburg Division	Chatham Division	Addison Branch	Total
I-beam.....	16	3	.....	19
Wooden stringer.....	17	12	.....	29
Deck plate girder.....	25	4	.....	29
Solid rail floor.....	3	2	.....	5
Deck truss.....	5	1	.....	6
Frame trestles.....	5	4	.....	9
Pile trestles.....	1	7	1	9
Through plate girders.....	1	7	.....	8
Through truss.....	1	1	.....	2
Rail stringers.....	.....	11	.....	11

The stone masonry in the larger bridges on the Ogdensburg line is usually built for two tracks and is in splendid condition; that in some of the smaller openings is dry rubble and not in good condition. In several of these abutments the walls have bulged, and they are braced with timbers necessitating constant watching. Many of these openings can be replaced with pipe and filled. There are a number of wooden stringer bridges, pile and frame trestles that should be replaced with permanent structures. This would materially reduce the maintenance cost and increase the safety of operation. Several instances were noted where this has been done by the construction of concrete flat top culverts. A programme could be arranged dividing the work over a number of years so that the expense would not be great in any one year, but their elimination would be complete eventually. The dry masonry abutments no doubt have quite thick walls, and in many places they could be faced with concrete of moderate thickness and grouted thereby filling the voids in the walls. This would make a substantial abutment at moderate cost. The saprot on the decks and wooden stringers should be adzed off to prevent fire. This is a matter of small expense which lessens the danger from fire and increases the safety. Inside guard-rails are considered necessary on spans of 15 feet or over between back walls. These guards should be full bolted and full spiked to the ties. The running rails should also be full spiked to the bridge ties.

The minor defects in the bridges were as follows: Ogdensburg division: bridges Nos. 380, 370, 357, 355, 354, 351, 349, 348, 347, 341, 338, 336, 335, 330, 329, 315, 314, and 306 are 20 feet or more in span and have no inner guard-rails; bridges Nos. 374, 370, 367, 357, 355, 354, 338, and 330 should have the running rail full spiked to the ties; bridges Nos. 374, 367, 331, 328, 325, 321, 316, 312, and 310 have inner guards which are not full spiked to the bridge ties; bridges Nos. 376, 367, 357, 351, 347, 323, 321, and 316 have saprot on the deck timbers which should be adzed off; bridge No. 374 needs some new ties and guard stringers; bridge No. 372 needs a new deck; bridge No. 365 has dry rubble masonry abutments in rather poor condition; bridge No. 364 needs some new ties and the steel should be painted; bridge No. 362, the stringers are poor; bridge No. 351, the shoulder back of the west abutment is narrow: it should be filled properly to support the track; the open culverts west of bridge No. 345, and east and west of milepost A67 are in rather poor condition: it is expected to replace these openings with castiron pipe and fill: the pipe is on hand, and they will be installed promptly; the cattle-pass east of milepost A62 and bridges Nos. 317 and 308 have poor masonry: the abutments are braced with timbers; the open culvert east of milepost A58 has a poor deck; the open culvert east of milepost A53 has poor masonry: it is suggested that this opening could be replaced with pipe and fill; bridge No. 328 has some poor ties; bridge No. 323, the ties are rail cut: tie-plates used on the bridge ties would prevent this; bridge 321, the steel needs painting; the trestle in Lake Champlain is being rebuilt: new pile bents have been driven and new stringers are being installed: when completed this trestle will be in good condition: it is expected to expend about \$15,000 on this trestle during this year and next: the single track of the Central Vermont railway uses this trestle in common with the Rutland railroad: the tracks are laid in a gauntlet with the frogs at either end of the trestle: there is a draw span about the middle of the trestle: only a part of the trestle is within this State. Chatham division: bridges Nos. 47, 44, 43, 38, 37, 33, 31, 26, 25, 24, 23, 21, 17, 15, 10, 9, 8, 7, 4, and 1 have no inner guards: they are trestles, girder or truss spans 30 feet or more in length between back walls; bridges Nos. 23, 22, 20, 15, 10, 9, 8, 7, 4, 2, and 1, and the culvert north of North Stephentown should have the running rail full spiked to the ties; bridge No. 3 has inner guards which are not full spiked to the ties; bridges Nos. 44, 37, 22, 10, and 9 have saprot on the deck timbers which should be adzed off. The second culvert west of bridge No. 43C has poor masonry, the abutments are crumbling, and it is suggested that a pipe and fill could be used to replace this opening; bridge No. 42, an overhead highway, is being rebuilt and strengthened; bridge No. 33 has rail stringers laid side by side the full width of the track: it has 2 spans: the pier has failed and the stringers are supported on frame bents one on each side of the pier: the bridge has a total length of about 30 feet, the two spans appear to be too long for the rail stringers, and it is suggested that in rebuilding it be made 3 spans by constructing 2 piers; at the open culvert south of bridge No. 29, the timber crib on the north abutment is in poor condition and should be replaced; the ties and stringers are poor on the cattle-pass north of South Berlin; bridge No. 27 has poor caps; bridge No. 23 has drift, old ties, etc., obstructing the channel; the open culvert south of North Stephentown has poor masonry which is braced with timbers; bridge No. 19, the timbers on the abutments supporting the girders are in poor condition and should be replaced; bridge No. 5 is in poor condition: castiron pipe is on hand, and it is expected to replace the opening with this and fill.

There are 4 brick and 20 frame stations on the Ogdensburg division, and 13 frame stations on the Chatham division. The stations were generally in good condition and clean. The brick station building at Chateaugay is being remodeled, and a combined coach and baggage car is used temporarily.

At Norwood, 1 track is crossed by 1 track of New York Central and Hudson River railroad, protected by interlocked semaphore signals; the 4 blades, one for each direction over the crossing are on one pole: this signal has been placed in service since the previous inspection. At Moira, 1 track is crossed by 1 track of the New York and Ottawa railway by means of junction switches, protected by a 2-ball signal with lights. At Malone Junction, 1 track is crossed by 2 tracks of the New York Central and Hudson River railroad, protected by electrically operated and interlocked home signals located 15 feet each way from the crossing. At Mooers Junction, 3 tracks are crossed by 1 track of The Delaware and Hudson Company's railroad, protected by a 2-ball signal with lights. At Rouses Point Junction, 1 track is crossed by 1 track of The Delaware and Hudson Company's railroad, protected by a 2-ball signal with lights. At Petersburg Junction, 1 track is crossed by 2 main tracks of the Boston and Maine railroad, protected by mechanically interlocked signals and derails.

Train movements are controlled by timetables, operating rules, and train orders. There are no automatic or other block signals. The train order signals are 2-position lower quadrant types with both arms on one pole. The passenger traffic is light,

and principally local. The service rendered seems to be sufficient for the present needs. The freight traffic is heaviest in the summer season when navigation is open on the Great Lakes. The western terminal at Ogdensburg on the St. Lawrence river is equipped with docks, warehouses, and yard tracks to facilitate the interchange of freight with the lake steamers. Grain for local New England points and export is the principal freight eastbound, and package freight westbound. The freight originating on the lines within this State is principally milk and farm products. The freight trains of the New York Central and Hudson River railroad use the tracks of this company between Norwood and Malone Junction, a distance of about 36 miles. This section of the railroad has comparatively heavy traffic. It has been previously suggested that some form of block signaling be installed here, but nothing has as yet been done in the matter.

Since the previous inspection the following improvements have been made: a new siding 336 feet long has been built at North Lawrence; 32,500 ties have been renewed on the Ogdensburg division, 15,000 on the Chatham division, and 300 on the Addison branch; 12 miles of gravel and 3 miles of cinder ballast were applied on the Ogdensburg, and 3½ miles of cinders on the Chatham divisions; extensive repairs have been made to the Rouses Point trestle, and minor repairs to other bridges; 2 open bridges have been replaced with concrete solid floor culverts. The improvements contemplated include an extension to the passing tracks at Brandy Brook and Knapps, and the completion of the repairs to Chateaugay station now in progress.

It is recommended (1) that inside guard-rails full spiked and full bolted be placed on all bridges having a total length of 15 feet or more between back walls: the longer bridges should be equipped first and the work continued until all are completed; (2) that the minor defects in the tracks and bridges be repaired; (3) that the crossing-signs requiring it be painted.

Respectfully,

W. G. HIMES,  
Inspector Division of Transportation.

#### SCHOHARIE VALLEY RAILWAY.

Inspected May 5, 1914. Last previous inspection May 19, 1913.

To the Public Service Commission, Second District:

I have inspected the Schoharie Valley railway and submit the following report:

This railway connects with the Susquehanna division of The Delaware and Hudson Company's railroad at Schoharie Junction and extends to Schoharie a distance of 4.38 miles. At the latter point connection is made with the Middleburgh and Schoharie railroad.

The line lies in the valley of Schoharie creek, and in some places the location is close to the creek bank. There has been some erosion of the bank in former years but it is now well protected by riprap. The grades and curvature are moderate and suitable for a light railway. The grading of the roadbed is light in amount. The cuts and fills are narrow but serve fairly well in holding the ballast. Track ditches are provided for surface drainage. The surface and alignment of the track are fair and satisfactory for the class of traffic which is handled.

The rail is in fair to good condition, consisting of about two and one-half miles of 80-lb. relayer rail and the remainder of 65-lb. rail. A defective rail which should be removed from the track was found about one-quarter mile south of Hollenbeck's. The defect apparently is a pipe, and a piece of the head of the rail has started to split out on the gauge side. In Schoharie Junction yard there are several cut rails which are not drilled for track bolts. This work should be done and the joints properly bolted. The condition of the track ties is fair to good. Some tie renewals have been made this season and the percentage of renewal appears to be suitable for good maintenance. In Schoharie yard there were several switch ties not full spiked. The track appliances comprise split switches, both rigid and automatic switch stands, and rigid and spring frogs. These all appeared to be in good condition, except that at Schoharie Junction the south switch does not fit closely at the point. The ballast consists of broken stone, stone screenings, and cinders. The depth of ballast apparently is small but is fairly satisfactory for the loads which pass over the track. The right of way is clean and well kept, and suitable fences are maintained. The road crossings are in good condition and are equipped with standard signs. The track work is handled by a gang of about 5 men during the working season.

There is one through truss steel bridge and one timber overhead bridge. The culverts consist of pipes and reinforced concrete boxes. The structures are in good condition.

There is one station on this line, located at Schoharie. The interior of this station has been remodeled, and a concrete station platform has been built. There is also a separate freight

house at Schoharie, and at two other points where trains receive and discharge passengers, small shelters are provided. At Schoharie Junction joint use is made of the Delaware and Hudson station. The stations appear to afford adequate facilities for the existing traffic. The traffic on this road is light, and one train crew handles all of the trains. The train service and facilities for handling both passengers and freight appear to be satisfactory. There are no grade crossings with other railroads.

A new milk platform has been built at Hollenbeck's. The station at Schoharie has been remodeled on the interior, and a new concrete station platform has been built. The recommendations of the preceding report have been carried out. As a result of my inspection, it is recommended that the rail joints in Schoharie Junction yard be properly bolted; that the south switch in the same yard be adjusted; that the defective rail south of Hollenbeck's be removed from the track; and that the switch ties in Schoharie yard be full spiked.

Respectfully,

J. E. STODER,  
Steam Railroad Inspector.

#### SKANEATELES RAILROAD.

Inspected October 5, 1914. Last previous inspection October 20, 1913.

To the Public Service Commission, Second District:

I have made an inspection of the Skaneateles railroad and submit the following report:

This railroad is a standard gauge single track line extending from a connection with the New York Central and Hudson River railroad at Skaneateles Junction to Skaneateles, a distance of 5 miles. The line lies in the valley of the creek which is the outlet of Skaneateles lake. It was built with very light grading, resulting in heavy grades and sharp curves. The roadbed generally has a fair cross-section and suitable track ditches are provided. The surface and alignment of the track are fair to good. The rail consists of 4.8 miles of 70-lb. open hearth steel and 0.2 mile of 56-lb. Bessemer steel. The 70-lb. rail has been laid in the last few years and is in good condition. The 56-lb. rail is in fair condition. The track ties are oak and yellow pine timbers. The renewals in the last year amounted to 2909, and the rate of renewal appears to be sufficient for proper maintenance. The ties have not been properly spaced under the joints of the new 70-lb. rail however, even where extensive surfacing has been done and tie renewals made. The rail joints need the fullest possible support from the ties to prevent low joints and longitudinal creeping, and the joint tie should be properly spaced as soon as practicable. The switches, frogs, and other track appliances are in good condition. The track is fairly well ballasted with gravel and cinders. The right of way is properly cleared, and suitable fences are maintained where they are required. The road crossings are in good condition and are equipped with signs. The regular track force consists of about 7 men, but 6 additional men were employed during a part of the season.

The bridges are all of moderate size and are in fair condition. There are 3 plate girder bridges, 8 timber trestles, and several culverts. The open deck timber culverts are being replaced gradually by slab tops of rails and concrete. It was stated that a considerable amount of permanent bridge work probably will be undertaken next season. Structural defects were found at the following bridges, using the numbers on the railroad company's maps which number the bridges from Skaneateles Junction southward: No. 5, drift should be cleared away; Nos. 6 and 7 have no inside guard-rails; No. 9 has a poor stringer and a very bad wall plate: this culvert is to be rebuilt; No. 10 has a poor stringer; No. 11 has some poor shims on the bents; No. 14 is not fully anchored; No. 15 has a poor bearing block at the south end: the south abutment is cracked but appears to be safe at present.

The only station on the line is at Skaneateles, and it is in good condition. Flag stops are made at several points but the passenger traffic is light, and the existing facilities appear to be satisfactory. There are a number of manufacturing plants along the line which furnish a good freight traffic. The installation of a heavier locomotive for switching and rearrangement of tracks have materially increased the freight facilities in the last two years. Train movements are controlled by the timetable and telephonic train orders.

Improvements made during the past year are as follows: new 70-lb. open hearth rail laid, 1.2 miles; 2 timber culverts replaced by slab tops of rails and concrete; additional yard room purchased, and a new coal storage plant erected; a new freight locomotive purchased. Improvements contemplated for the ensuing year include extensive bridge renewals and the remodeling of the station building at Skaneateles.

The recommendations of the preceding report were followed. It is recommended that the track ties be properly spaced under the rail joints as soon as practicable in connection with surfacing

and tie renewals; that the structural defects mentioned under the description of the bridges be remedied.

Respectfully,  
J. B. STODER,  
Steam Railroad Inspector.

#### SOUTH BUFFALO RAILWAY.

Inspected April 29, 1914. Last previous inspection May 20, 1913.

To the Public Service Commission, Second District:

I have made an inspection of the South Buffalo railway and submit the following report:

The South Buffalo railway extends in a southerly direction from a connection with the Buffalo Creek railroad near the Buffalo river to a connection with the Lehigh and Lake Erie railroad at West Seneca, a distance of 5.91 miles. It is single track, and there are 1.372 miles of sidings. There are also 3 branch lines extending to various industries. The name and length of track on each branch are Shenandoah branch, 1.010 miles; Seneca Iron and Steel branch, 0.245 mile; Howard branch, 0.809 mile. The railroad ascends and descends in making over- and undergrade crossings of most of the railroads and highways intersected. The general ground surface being flat and nearly level, the tracks are supported on an embankment of varying height, and the grades while not excessive are comparatively heavy. The maximum grade is 1.75 per cent, and the maximum curve is 14 degrees 26 minutes. The embankment is of ample cross-section properly to support the track. The alignment and surface of the track were good throughout.

The main track and sidings are laid with rail weighing 80-lbs. or more to the yard, and it is in good condition. The length of track laid with the different weights and kinds of rail is as follows: main line 100-lb. open hearth, 0.17 mile; 90-lb. open hearth, 0.49 mile; 80-lb. open hearth, 0.13 mile; 80-lb. Bessemer, 5.12 miles; ferro-titanium, a few sample rails; sidings, 80-lb. Bessemer, 1.37 miles. The tracks are laid with white oak and a few treated yellow pine ties. The ties were in good condition, and the renewals during the past year, amounting to 5949 ties or about 37 per cent, were sufficient for proper maintenance. Rigid frogs, split switches, automatic switch stands with switch lights, and tie-plates, all of modern design, are in use. The rails are joined with angle-bar splices of the 4- and 6-bolt type. The tracks are ballasted with 0.66 mile of crushed stone, and the balance is cinder ballast of generally good quality and sufficient in quantity. The right of way was clean, and the fences where required were well maintained. The sections have an average length of about 2 miles, and the force during the working season averages 7 men to the section. The generally good condition of the track shows that this force is sufficient. There are 8 bridges on this railroad, all of which are metal trusses or plate girders. They are generally in good condition. It was observed, however, that the inside metal guard-rail on the bridges was not full spiked. The single span through truss bridge over the Buffalo, Rochester and Pittsburgh railway needs new ties and guard stringers. It was stated that new ties were ordered for this bridge and that they would be promptly installed when received.

There is a frame waiting-shed near the crossing of the Hamburg Turnpike which is used by the employees of the various industries in that vicinity. A passenger service is operated in connection with the Delaware, Lackawanna and Western railroad to and from Buffalo. A brick freight station for local shipments and two frame terminal freight stations are maintained.

Two tracks of the South Buffalo railway are crossed by 3 sidings of the Buffalo, Rochester and Pittsburgh railway near the connection with the Buffalo Creek railroad. The most northerly of these crossings is protected by a semaphore signal operated by the trainmen. The other two crossings have tilting boards operated by the towerman in station C. One of the latter crossings is not now in service, and the frogs should be removed from the tracks. There are no grade crossings with electric railroads.

Physical connections with the railroads entering Buffalo from the south and east, and the location of the Lackawanna Steel Company and several other industries along its line, give this railroad a considerable carload freight business, consisting principally in the receipt and delivery of cars to and from the connecting railroads and the industries, and the interchange of cars between the various railroad connections. The character of this business is such as to make the bulk of the train operations in the nature of yard movements, and a considerable part of the railroad is within yard limits and operated under yard rules. Train movements are controlled by operating rules, timetables, and train orders. There are no block signals. The train dispatching is by telephonic train orders. The terminal and road facilities seem to be adequate to handle the business.

Since the last inspection 0.57 of a mile of new 80-lb. rail has been laid in track, and 5949 ties renewed; about 16 per cent of these ties were creosoted pine. It is expected to make the tie

renewals this year with a good percentage of treated ties. This is in line with modern practice and will eventually result in decreasing the cost of track maintenance. There are no extensive improvements contemplated for this season. It is recommended (1) that the inside metal guard-rail be full spiked on all bridges; (2) that the ties and guard stringers be renewed on the bridge over the Buffalo, Rochester and Pittsburgh railway.

Respectfully,  
W. G. HIMES,  
Inspector Division of Transportation.

#### STERLING MOUNTAIN RAILWAY.

Inspected May 7, 1914. Last previous inspection May 22, 1913.

To the Public Service Commission, Second District:

I have made an inspection of the Sterling Mountain railway and submit the following report:

This railroad connects with the Erie railroad at Sterlington and extends to Lakeville, a distance of 7.6 miles. The several sidings amount to about 1 mile.

The line ascends Sterling mountain and has a heavy grade over the larger part of the distance, the maximum grade being about 3¾ per cent. There are several sharp curves, the maximum of which is 9 degrees. The cuts and fills are in good condition, and suitable ditches are maintained. The surface and alignment of the track are fair. In a few places the track surface should be improved.

The rail consists of 60-lb. and 80-lb. steel, and its condition is fair to good. The ties generally are in good condition, and the renewals appear to be ample for maintaining the track. The track appliances comprise split switches, automatic switch stands, and rigid frogs. Rail braces are used freely on the curves. About 4½ miles of track have been ballasted with broken stone from the mine dumps, and it was stated that additional ballasting will be done this season. The right of way is fenced where required, and the few road crossings are in good condition. The track is maintained by one gang of about 10 men during the summer season. There are 7 timber stringer bridges of moderate span and 10 pipe culverts. The bridge structures are in good condition, except that Moorehead's bridge has a poor sill and a bent is not plumb. Two bridges, McKegg's and Springsteen, are to be eliminated by the diversion of a stream, part of the work being already done.

This railroad does not maintain any stations of its own, and as the passenger business is very small none appears to be needed. At Sterlington, joint use is made of the Erie station.

Nearly the whole business of this road consists of the transportation of iron ore from the mines at Lakeville. One train crew handles all of the trains which are required at present. There are no grade crossings with other railroads.

In the last year 4 culverts were rebuilt, and a considerable amount of stone ballast was applied on the track. This season it is intended to extend the stone ballasting and to eliminate 2 bridges as mentioned under the description of the bridge structures.

The recommendations of the preceding report apparently were carried out. The general condition of this road is satisfactory for the handling of its traffic. The program of repairs which was outlined to your inspector is sufficient properly to maintain the property, and the only recommendation required is that the work shall be carried through to completion.

Respectfully,  
J. B. STODER,  
Steam Railroad Inspector.

#### ULSTER AND DELAWARE RAILROAD.

Inspected June 25, 26, 1914. Last previous inspection June 26, 27, 1913.

To the Public Service Commission, Second District:

I have inspected the Ulster and Delaware railroad and submit the following report:

This railroad comprises the following lines, all of which are single track: main line, Kingston Point to Oneonta, 107.02 miles; Stony Clove and Kaaterskill branch, Phoenicia to Kaaterskill, 19.04 miles; Hunter branch, Kaaterskill Junction to Hunter, 2.60 miles. The railroad connections are with the West Shore railroad at Kingston, with the Delaware and Northern railroad at Arkville, and with The Delaware and Hudson Company's railroad at Oneonta. There also are dock facilities at Rondout for the transfer of coal to boats on the Hudson river.

This line extends through the Catskill mountains and has very heavy grades and sharp curvature. The cuts and fills generally have a good cross-section, and suitable ditches are maintained. On the re-located line near the Ashokan reservoir, some of the ditches are filled by small slides. The company has a power ditching machine, and it is intended to open these ditches

during the present season. The surface and alignment of the track quite generally are good.

There is 90-lb. rail on about 66 miles of the main line from Kingston westward, and the Stony Clove and Kaaterskill branch is laid with 90-lb. rail throughout. The remainder of the rail is 70-lb. and 62-lb. sections. Most of the rail is in good condition. Defective rails due to piping were found, however, at bridge No. 45, east of bridge No. 70, and two on the curve west of Davenport Center. Rails which appeared from the inspection engine to be defective were observed about 10 telegraph poles west of bridge No. 36, a short distance east of milepost 072, on the south side of the track about half way between milepost 036 and 035, and opposite a farmyard east of milepost 034. It is suggested that these rails be examined, and those which are found to be actually defective should be removed from the track. The track ties consist largely of yellow pine. The ties quite generally are in good condition, and the renewals evidently are ample for properly maintaining the track timber. The re-located part of the main line is well ballasted with crushed stone, amounting to 13.4 miles. All of the other ballast is gravel and cinders, of which fair quantities are used. The track appliances comprise split switches, rigid frogs, and automatic switch stands equipped with targets and lights. Tie-plates are used extensively on the curves. The right of way is clear and open and properly fenced. The highway crossings are in good condition and are equipped with standard crossing-signs. The track sections have an average length of about  $4\frac{3}{4}$  miles, with labor forces of 7 men per section in the Summer and 4 men per section in the Winter. This amount of labor is ample for track maintenance.

The bridges and culverts generally are in good condition. Most of the bridges are steel structures on masonry abutments; there also are some reinforced concrete arches and boxes, and a few timber trestles. In many of the stone abutments the body of the masonry seems fairly good, but the upper courses are too thin to make suitable bridge seats. Some of these bridge seats now are cracked, and occasional replacements will be necessary, putting in heavier blocks of stone or concrete. The following structural defects were found: Nos. 34, 59, and 97, the saprot should be trimmed off of the deck timbers; No. 44 has some poor ties; No. 51, the masonry needs pointing; No. 58 has a few poor ties; No. 66 has no inside guard-rail; No. 73, the east abutment needs pointing; No. 76 has poor stringers: a new steel bridge is to be put in; No. 99 has some poor deck timbers: the deck is to be renewed; No. 104, the bridge is blocked with timber about 4 feet above the west pier, and the latter is on a skew while the bridge is square with the track; when the blocking requires renewal the pier should be rebuilt or enlarged to fit the bridge; No. 107 has some poor ties and a loose block under the east end of the girders.

The stations are in good condition and are well kept, and they appear to be well suited to the needs of the traffic. Well appointed lawns are maintained at some of the more important resort stations. At Stamford, the floor is in poor condition at the waiting room door.

At Kingston, 2 tracks are crossed by 3 tracks of the West Shore railroad, protected by interlocking signals; all trains approach the crossing under control. In the city of Kingston the main track is crossed by the Kingston Consolidated railroad on The Strand, lower Hasbrouck avenue, upper Hasbrouck avenue, and Prince street; the crossing on The Strand is protected by a flagman when train movements are made over it, and at the other three crossings flagmen are on duty from 7 a. m. to 6 p. m., and there also are single derrails in the electric road; the two derrails at the crossings on Hasbrouck avenue are each located above the crossing on a descending grade, and the deraill at the Prince street crossing is so located that it affects eastbound cars.

There is a moderate freight traffic on this railroad consisting chiefly of coal handled from Oneonta to Kingston and Rondout. The passenger traffic is moderate during most of the year but is largely increased during the summer months. The passenger train service appears to be excellent. Train movements are controlled by the timetable schedules, telegraphic train orders, and the operating rules. Electric automatic block signals also are in use between Kingston and Phoenicia, a distance of 24.2 miles. These signals are the home and distant type, with 2-position, lower quadrant indications. The facilities, both at the terminals and on the road, appear to be sufficient for the traffic which is handled. During the past year the following improvements were made: rail renewals amounting to 1.89 miles of relayer rail, of 62-lb., 70-lb., and 90-lb. sections; tie renewals were about  $9\frac{1}{2}$  per cent; cinder ballast was applied on 3.38 miles of track; 2 bridges were filled; 2 bridges had extensive repairs made to the piers; 5 bridges were painted; 2 new overhead highway bridges were built, 1 of concrete and 1 of timber; 4 culverts were rebuilt; new stations were completed and put in service at Woodstock, Ashokan, Haines Falls, and Davenport Center; new woven wire fencing was built, amounting to 5.95 miles; 4771 tie-plates and 200 rail anchors were applied to the track; new automatic block signaling was installed on 12.4

miles of the re-located line near the Ashokan reservoir and the existing block signals were extensively rearranged and standardized, making an increase of 49 per cent in the number of automatic block signals in use; a new yard was built at Kingston, in the western part of the city, consisting of a passing track and 4 storage tracks; new sidings were built or existing sidings extended at Rondout, Siding No. 7, Cold Brook, Bloomville, and Tannersville; the total increase of sidetracks amounts to 3.90 miles; a jetty was built and riprap placed to protect the railroad embankment along a creek near Davenport Center; the freight house platform at Oneonta was extended two car lengths. The following improvements are contemplated for the ensuing year: the track through Ferry street, Rondout, to be rebuilt and laid with 141-lb. girder rail; 11 miles of new 90-lb. rail to be laid from milepost 69 westward, replacing 62-lb. rail; additional crushed stone ballast to be applied on the re-located line, amounting to about 6000 cu. yds; trestle bridge No. 76 to be replaced by a plate girder; sidetracks to be extended at Pine Hill and Edgewood to provide better facilities for industries. No recommendations were made in the preceding report. This railroad, in most respects, is being maintained in good condition for handling its traffic, and the general maintenance programme practically covers the necessary repairs. It is recommended that defective rails be removed from the track; that other defects of track and structures described in this report be remedied.

Respectfully,

J. B. STODER,  
Steam Railroad Inspector.

#### UNADILLA VALLEY RAILWAY.

Inspected May 25, 1914. Last previous inspection May 16, 1913.

To the Public Service Commission, Second District:

I have inspected the Unadilla Valley railway and submit the following report:

This is a standard gauge single track railway extending in a southerly direction from a connection with the Richfield Springs branch of the Delaware, Lackawanna and Western railroad at Bridgewater to a connection with the New Berlin branch of the New York, Ontario and Western railway at New Berlin, a distance of 19.14 miles. There are no branch lines. The total length of all sidings and yard tracks is about 2.5 miles. It is in the valley of the Unadilla river throughout its entire length, and the grading is comparatively light. The grades and curves are moderate. The maximum curve is 6 degrees. The cuts and embankments were generally of sufficient cross-section properly to support the track. The ditches were generally overgrown with grass and weeds, but at the time of the inspection there were no places observed where the track did not appear to be well drained. The alignment and surface of the track were from fair to good.

The track is laid with 4 miles of 70-lb. and 15.14 miles of 56-lb. Bessemer rail joined with angle-bar splices of the 4-bolt type. The rail was from fair to good condition, and the joints were full bolted and tight. The ties are principally yellow pine, chestnut, and white oak. The renewals since the previous inspection amounting to 5500 ties, or about 10 per cent, were long leaf yellow pine ties. It is expected to renew about 4500 to 5000 ties during this season. Ties were distributed, and the renewals were being made where most needed at the time of the inspection. Rigid frogs, automatic switch stands, and split rail type switches are used. They were in generally good condition, and no particular defects were noted. The ballast is gravel procured from local gravel banks. It is only fair in quality though generally sufficient in amount. The tracks are overgrown with grass and weeds, which shows that the gravel ballast contains a large amount of loam which supports this vegetation. The right of way is cleared and in good condition. The fences, road crossings, and signs are well maintained. The only defect noted was some bad planking in the road crossing between bridges Nos. 32 and 33. The track force consists of two sections each about 9.5 miles in length with a working force of 8 men. These sections are equipped with gasoline motor cars. The force is ample for proper maintenance if judiciously applied.

The bridge structures are all of steel supported on either concrete or stone masonry with the exception of bridge No. 35 which has the I-beams supported on pile bents. The bridges are generally in splendid condition. It was observed, however, that the inside guard-rails were not full spiked to the ties on bridges Nos. 7, 16, 18, 21, and 30. Where an inside guard-rail is used on bridges it should be full spiked to the ties.

There are 7 frame station buildings on concrete foundations. The platforms are concrete with the exception of one station which has cinders. These buildings are generally in good condition and appear to provide ample facilities for the passenger and freight service.

There are no grade crossings with other steam or electric railroads.

The traffic consists principally of outbound shipments to connecting lines of manufactured, dairy, and farm products, and miscellaneous inbound shipments. A local passenger service is performed, and a through service is established with the connecting lines. The territory through which this railroad is built being sparsely settled the service of 3 passenger trains in each direction seems to provide ample facilities. There are no automatic or other signals and no interlocking plants. The terminal, road, and passenger facilities seem to be ample for handling the business.

Since the previous inspection there have been rebuilt 3 24-inch castiron pipe culverts, and 5 20-inch Mumsville culverts; 5500 ties, or about 10 per cent, have been renewed; and about one mile of track has been re-ballasted. Ten acres of land have been bought at Bridgewater to be used eventually for the construction of a wye track and other terminal facilities. A two-story frame building and plot of ground have been purchased at New Berlin, and the building is being remodeled for a general office. A new enginehouse with 3 stalls and a machine shop of hollow tile stuccoed and an asbestos roof has been built. A new roof has been put on the New Berlin depot, and electric lights have been installed in the station at Leonardsville. It is proposed to equip the machine shop with a boiler and the necessary machinery to make light repairs, and furnish light and heat for the enginehouse, station, and office building; to widen some of the narrowest cuts; to rebuild and enlarge the freight house and station at West Edmeston which work has been started; to construct an elevated coaling station with a storage bin and an ash pit at New Berlin; and to rebuild the section houses at New Berlin and Bridgewater making them substantial and fireproof. The railroad is being maintained in a satisfactory manner. It is suggested that the extermination of the weeds and grass in the ballast would tend to lengthen the life of the cross-ties and make the track more stable. This can be done by burning or some other modern means at a comparatively low cost.

It is recommended that the guard-rails on bridges Nos. 7, 16, 18, 21, and 30 be full spiked to the ties.

Respectfully,  
W. G. HIMES,  
Inspector Division of Transportation.

#### UNITED STATES AND CANADA RAILROAD.

Inspected May 26, 1914. Last previous inspection June 11, 1913.

*To the Public Service Commission, Second District:*

I have made an inspection of that part of the United States and Canada railroad lying within the State of New York and submit the following report:

This railroad, which is a part of the Grand Trunk System, extends from the International boundary near Fort Covington to Massena Springs, a distance of 22.18 miles. At the latter point it connects with the New York Central and Hudson River railroad, and at Helena there is a connection with the New York and Ottawa railway.

The line is built through a fairly level country, and both grades and curvature are moderate. The cuts and fills generally have a good cross-section, and good track ditches are maintained. The surface and alignment of the track are fair to good and suitable for the class and amount of traffic which is handled.

The rail is very largely 65-lb. steel, and most of it is in fair condition. Defective rails apparently due to piping were found at the following places: a badly piped and split rail on Salmon River bridge; a split switch heel at Bombay: this will be renewed with 80-lb. material; a rail with split end between first two culverts east of milepost 82; 2 piped rails, 1 with an open crack, between milepost 83 and the first culvert east; a rail with mashed head west of first culvert west of milepost 83; two piped rails between milepost 84 and the first culvert east; a piped rail west of road crossing east of milepost 93. The presence of defective rails in the track, especially those which have developed open cracks, is a source of very real danger, and they should be promptly replaced by sound steel. The track ties consist largely of cedar, with yellow pine used in renewals on curves. The condition of the ties generally is from fair to good. The renewal of ties last year amounted to 11,169 or about 13 per cent, and the renewal authorized for the current year is 10,000 ties or about 12 per cent. When this proposed work is done the track timber should be in satisfactory condition throughout. Some poor ties were observed both east and west of milepost 89, and renewals should be made there as promptly as possible. The track appliances consist of split switches, rigid and spring frogs, and automatic switch stands equipped with targets and lights. Several switches have been renewed with 80-lb. material, and the same improvement is to be made at other turnouts. The line is well ballasted with gravel. The right of way is clean and open and inclosed with suitable fences. Road crossings are in good con-

dition and are equipped with the standard signs of this railroad. The track sections have an average length of 6 miles and a force of 4 men per section: this amount of labor is less than what is usually considered necessary for proper maintenance. The line has been ballasted recently however, and as the traffic is light it may be possible to secure fairly satisfactory results with these forces. It is suggested that on a line of this kind the use of section motor cars would be found both efficient and economical.

There are 6 plate girder bridges, 3 of which are modern structures. The other 3 steel girders are carried on timber bents and are not suitable for modern railway loads: they are to be rebuilt this season. A number of open culverts have been replaced by concrete pipes, and a large amount of this work is to be done this season. When the proposed programme of work is completed, the bridges and culverts should be in very good condition. A number of the bridge seats and stringers should be cleared of sand and gravel which apparently had lodged there when the ballasting was done.

There are 3 stations in the State of New York, all of which are in good condition. At Massena Springs joint use is made of the New York Central station.

At Helena, 1 track is crossed by 1 track of the New York and Ottawa railway, protected by mechanical interlocking.

Train movements are controlled by timetable schedules, telegraphic train orders, and operating rules. There is only a light traffic on this road, and the facilities appear to be ample for all the business which is presented.

During the past year the following improvements were made: about 1500 feet of 80-lb. rail was laid replacing 65-lb. rail; 2 switches were relaid with 80-lb. material; the line was re-ballasted throughout with gravel; 12 culverts were rebuilt, 6 with concrete pipes and 6 with timber. Improvements proposed for the current year are as follows: 2 switches to be relaid with 80-lb. material; 17 timber culverts to be replaced with concrete pipes, and 1 cattle-pass to be closed; 3 steel bridges to be rebuilt; coal chutes to be built at Fort Covington and a freight shed at Helena; passing track at Fort Covington to be extended.

The general condition of this road shows a commendable improvement. The recommendations of the preceding report were or are being carried out. It is recommended that defective rails be removed from the track; that the programme of bridge and culvert renewals be carried out as outlined at the time of the inspection; and that the other defects mentioned in the body of the report be remedied.

Respectfully,  
J. B. STODDER,  
Steam Railroad Inspector.

#### WESTERN NEW YORK AND PENNSYLVANIA RAILWAY.

Inspected July 16 to 18, 1914. Last previous inspection August 7 to 9, 1913.

*To the Public Service Commission, Second District:*

I have inspected those lines of the Western New York and Pennsylvania railway (operated by the Pennsylvania railroad) which lie within the State of New York and submit the following report:

These lines comprise parts of two divisions as follows: Buffalo division: main line, Buffalo to state line near Portville, 76.38 miles; Union Terminal railroad (Buffalo), 2.32 miles; West Seneca branch, 7.67 miles; Rochester branch, 98.37 miles; Terminal branch (Rochester), 2.38 miles; Scottsville branch, 2.90 miles; Swains branch, Nunda Junction to Nunda, 2.36 miles; Chautauqua branch, Buffalo to state line near Clymer, 85.84 miles; Allegheny division: Salamanca branch, A Y Block station (near Olean) to state line near Onoville, 35.42 miles: total in State of New York, 313.64 miles.

These lines are all single track excepting 27.27 miles of double track on the main line and 1.67 miles of double track on the Union Terminal railroad. Freight service only is operated on the West Seneca, Terminal (in Rochester), and Scottsville branches.

The main line and Chautauqua branch extend through the rolling and rough country in the southwestern part of the State. The curvature is moderate, but the grades are fairly heavy. On the Chautauqua branch extensive grade reduction work now is in progress. The Rochester line lies in the valley of the Genesee river along the line of the old Genesee canal. The track was laid directly on the tow path for a large part of the distance, involving many sharp curves and some fairly heavy grades. The Salamanca branch lies in the valley of the Allegheny river. It has numerous curves of moderate deflection, and the grades are light. The cuts and fills generally have a cross-section which is fair to good. At some of the bridge ends the fills should be built up to provide full support for the track ties. Suitable ditches are maintained for surface drainage. The surface and alignment of the track are fair on the main line and on the Chautauqua and Salamanca branches. On the Rochester line a great deal of the

track surface is poor and unsuitable for the class and amount of traffic which is borne. This line is well covered with signs which indicate the allowable speed on the sharper curves. These speed restrictions are suitable for smooth track, but on both curves and tangents there are many rough spots which cause severe swings of a train running at the usual speed. Rough track was observed at the following places: main line, south of Springbrook and between Protection and Chaffee; Salamanca branch, south of Shongo; Rochester branch, north of milepost 18, between bridges Nos. 404 and 405, between mileposts 47 and 48, south of milepost 50, between West Nunda and Oakland, south of Rosburg, between mileposts 66 and 67, between bridges Nos. 426½ and 427, south of Black Creek, south of milepost 89, and between mileposts 92 and 94.

The rail on the several lines comprises various weights from 67-lbs. to 100-lbs. per yard. The general condition of the rail is only fair, there being a large amount of badly worn and battered rail. Heavy rail with battered ends is very noticeable on the main line. This condition may be due in part to a poor quality of steel, but it seems probable that at least a part of the damage has resulted from insufficient attention given to surfacing. There is a considerable amount of badly curve-worn rail on the Rochester and Salamanca branches. On the latter branch, at bridge No. 143 and at Wolf Run, the wear of the rail apparently has fully reached the limit of safety. Piped rails were observed near Arcade, near Tuscarora, and at Nunda, and a rail with a halfmoon break in the flange was found on the Salamanca branch just north of bridge No. 141. In the piped rail near Tuscarora, the defect extended over a length of at least 4 feet, and the failure of the rail was so far advanced that its condition was dangerous: arrangements were made to remove it from the track at once. It also was observed that a considerable amount of heavily curve-worn rail has been reversed and again laid in the main track. The track ties consist of white oak, yellow pine, and treated timbers. The general condition of the ties is fair to good, but the renewals are not as far advanced as they should be at this season. It is suggested that the delivery of ties should be hastened in order that the renewals may be completed during the summer months. The track appliances include split switches, rigid and spring frogs, and rigid and automatic switch stands equipped with targets and lights. Derails are used where that form of protection seems desirable, many of them being operated by the switch behind which they are located. Tie-plates are used extensively, and some rail anchors also are used. All of these appliances appeared to be in good condition. The ballast consists of crushed stone, gravel, slag, and cinders. The quality of ballast is good and generally it is installed in sufficient quantity. Some re-ballasting was in progress at the time of the inspection. The right of way is well cleared and suitable fences are maintained. Drawbars lying near the track were noticed, however, on the main line near S W block station; on the Rochester branch near the water tank south of bridge No. 428; and on the Chautauqua branch north of Clymer and north of B W block station. The road crossings are in good condition and are equipped with suitable signs. On the Salamanca branch a number of the whistle-signs need painting. The track sections have an average length of about 5 miles, and the section forces amount to about 1 man per mile of main track on the more important lines. This amount of labor for the working season appears rather low for tracks bearing a fairly heavy traffic and presumably is supplemented by extra forces on ballasting and other heavy work.

The bridges and culverts generally are in good condition. There are a few timber structures, and these together with certain light steel bridges are being replaced as rapidly as practicable with heavier structures of steel or concrete. A few of the steel bridges are being reinforced to make them suitable for heavier loads. The following structural defects were found: main line: No. 309 has small blocks under the girders; cattle-pass near milepost 20, the fill is narrow at the bridge ends; No. 359, the masonry needs pointing; No. 364, the abutments are cracked; the structure apparently is safe at present, but the masonry should be reinforced to prevent future deterioration. Rochester branch: No. 414 has a few poor ties; No. 424 is a large deck truss bridge across the Genesee river; the structure has a concrete slab deck and is equipped with a hand-rail on each side, the tops of the trusses serving as sidewalks, and covers should be placed over the expansion spaces between the trusses to protect employees from injury; No. 429, part of the masonry needs pointing; No. 443, a timber trestle, has a few poor posts. Chautauqua branch: No. 550 has a badly cracked bridge seat which is reinforced by an iron clamp; the structure is to be replaced by a concrete arch; No. 541 has some poor guard timbers; No. 522, a heavy truss bridge, had very slack diagonal bracing in two spans, and it seems evident that this condition had existed for several weeks: adjustments should be made promptly. Salamanca branch: No. 148 has some poor deck timber, and the west abutment is cracked; No. 145, the masonry needs pointing; Nos. 144, 142, and 133, the masonry is cracked and becoming loose, and at No. 142 the

southwest bridge seat is in bad condition: repairs should be made at an early date; No. 141, the masonry needs pointing: some loose rivets had been marked by the bridge inspector for tightening; No. 135, the abutments apparently have settled, and the girders are tight between the back walls.

The station buildings are in good condition, and they appear to furnish suitable accommodations for the traveling public. At Buffalo, the passenger trains use the Exchange Street station of the New York Central Lines.

At Buffalo, Emslie street, 2 tracks are crossed by 4 tracks of the New York Central and Hudson River railroad and 2 tracks of the Lake Shore and Michigan Southern railway, protected by an interlocking plant. At East Buffalo, 2 tracks are crossed by 2 tracks of the Buffalo Creek railroad and by 4 tracks of the Erie railroad, protected by sliding target signals. At East Buffalo, 3 tracks are crossed by 2 tracks of the Delaware, Lackawanna and Western railroad, protected by an interlocking plant. At Gardenville Junction, 2 tracks are crossed by 2 tracks of the Terminal Railway of Buffalo, protected by an interlocking plant. At Machias, 2 tracks are crossed by 1 track of the Buffalo, Rochester and Pittsburgh railway, protected by a tilting board signal. At Olean, 2 tracks are crossed by 2 tracks of the Erie railroad, protected by an interlocking plant. At White House, 1 track is crossed by 1 track of the Pittsburg, Shawmut and Northern railroad, protected by an interlocking plant. At Rochester, 1 track of the Terminal branch is crossed by 3 tracks of the Buffalo, Rochester and Pittsburgh railway, protected by a tilting board signal. At Genesee Junction, 1 track is crossed by 2 tracks of the West Shore railroad (New York Central Lines), protected by gates swinging across the tracks. At Mount Morris, 1 track is crossed by 2 tracks of the Delaware, Lackawanna and Western railroad, protected by an interlocking plant. At East Buffalo, 1 track of the Chautauqua branch is crossed by 4 tracks of the Erie railroad, protected by sliding target signals. At East Buffalo, 1 track of the Chautauqua branch is crossed by 1 track of the Erie railroad, protected by a tilting board signal. At Buffalo, Smith street, 2 tracks are crossed by 2 tracks of the Delaware, Lackawanna and Western railroad, protected by electric semaphore signals: the work of eliminating this crossing by raising the Delaware, Lackawanna and Western tracks is now in progress. At South Buffalo, 1 track is crossed by 2 tracks of the Buffalo Creek railroad, protected by a tilting board signal. At Blasdell, 1 track is crossed by 1 track of the Erie railroad, protected by a tilting board signal. At Dunkirk, 1 track is crossed by 1 track of the Erie railroad, protected by a tilting board signal; 1 track is crossed by 1 track of the Dunkirk, Allegheny Valley and Pittsburgh railroad, protected by a tilting board signal. At Mayville, 1 track is crossed by 1 track of the Jamestown, Westfield and Northwestern railroad, protected by an interlocking plant. At Riverside Junction, 1 track is crossed by 2 tracks of the Buffalo, Rochester and Pittsburgh railway and by 1 track of the Erie railroad, the latter two roads being parallel; a tilting board signal governs movements on both crossings. At Winchester and at Ebenezer, 2 tracks are crossed by 1 track of the Buffalo Southern railway, derails provided in the electric road at both crossings. At Olean, 4 tracks are crossed by 1 track of the Western New York and Pennsylvania Traction Company, protected by crossing gates; and 1 track is crossed by 1 track of the same railway, protected by derails in the electric line. At White House, 1 track is crossed by 1 track of the Western New York and Pennsylvania Traction Company, protected by derails in the electric line. At Rochester, 1 track is crossed by 2 tracks of the New York State Railways, protected by a flagman and by derails in the electric line. At Dunkirk, 1 track is crossed by 1 track of the Buffalo and Lake Erie Traction Company, protected by crossing gates. At Allegheny, 2 tracks are crossed by 1 track of the Western New York and Pennsylvania Traction Company, protected by a flagman and by derails in the electric line.

There is a fairly heavy traffic on the main line, the freight consisting largely of northbound coal. The traffic on the Rochester and Chautauqua branches is moderate. On the latter line extensive grade reduction work is in progress, and when that is completed a large amount of the coal which now moves via the Salamanca branch and the main line will reach Buffalo via the Chautauqua branch with a saving in distance of 40 to 50 miles. The maximum grades will be 0.5 per cent northbound and 0.7 per cent southbound, excepting a pusher grade of about 8 miles from Brocton to Prospect. A telephonic block signal system is in use on the main line and a telegraphic block signal system on the Rochester, Chautauqua, and Salamanca branches. The block is made permissive for freight trains following freight trains, but absolute for all other movements. The telephone system includes telephone instruments at passing sidings, by which the crew of the train taking the siding reports clear of the main track and receives permission to again occupy the main track.

The following are the more notable improvements which have been made during the past year: the main track has been increased 0.98 mile, and sidetracks have been increased 14.59

miles; new rail was laid amounting to 11.4 miles of 100-lb. rail and 3.0 miles of 85-lb. rail; relayer rail was laid amounting to 2.8 miles of 100-lb. rail, 19.4 miles of 85-lb. rail, and 1.2 miles of 80-lb. rail; gravel ballast was applied on 41 miles of track, and cinder ballast was applied on 14.7 miles of track; 8 bridges have been rebuilt, and 5 bridges have been strengthened; driveways have been opened and improved at Buffalo, providing increased facilities for handling freight; various improvements were made at the Buffalo engine terminal; additional track room was provided at the Olean engine terminal; the driveway at the Rochester freight house was paved with brick; a frame boiler washhouse was built at the Rochester engine terminal; the bascule drawbridge at Buffalo Creek was placed in service. Extensive improvements are in progress on the Chautauqua branch: the grades and curvatures are being reduced; new passing sidings are being built and old sidings are being extended; and various freight handling facilities are being installed; four and one-half miles of fence have been built, and 532 feet of a

long timber trestle have been filled on the Salamanca branch. The more important improvements contemplated for the ensuing year include further improvements at the Buffalo freight station; new yard facilities in the vicinity of Gardenville Junction; improved facilities at the Rochester freight station; strengthening two large steel trestles for heavier power; and the completion of the grade reduction work on the Chautauqua branch.

The recommendations of the preceding report were followed in most respects, but not all of the work was completed. The poor track surface on the Rochester branch which was mentioned in that report does not show improvement at this time. It is recommended that defective and badly worn rails be removed from the track; that the surface and alignment of the track on the Rochester branch be improved; that other defects of track and structures described in this report be remedied.

Respectfully,

J. B. STODER,  
*Steam Railroad Inspector.*

By whom authorized;	Par value issued for other consideration;
Par value authorized for issue;	Average price realized per cent of par.
Table 309: Operating Revenues.....	115-123
Showing in detail amounts of electricity sold expressed in kilowatt hours, amounts of gas sold expressed in M cubic feet, and all miscellaneous electric revenues and gas revenues; with average net revenue per kilowatt hour or M cubic feet.	
Table 310: Operating Expenses.....	124-133
Electric Department:	Gas Department:
Production expenses,	Production expenses,
Transmission expenses,	Transmission and distribution expenses,
Storage expenses,	Street lighting expenses,
Distribution expenses,	Commercial expenses,
Utilization expenses,	General expenses;
Commercial expenses,	With all items of expense expressed in cents per M cubic
General expenses;	feet sold.
With all items of expense expressed in cents per kilowatt hour sold.	Coal gas or water gas manufactured, M cubic feet;
Kilowatt hours generated, purchased, and sold.	Gas purchased and gas sold, M cubic feet.
Table 311 a: Operating Statistics.....	134-137
Electric Department:	Gas Department:
Motive power, and average kilowatt hours generated per day;	Gas manufactured or purchased, M cubic feet;
Pounds of coal consumed per kilowatt hour generated;	Gas sold, used, and not accounted for, M cubic feet;
Average fuel cost per kilowatt hour generated;	Gas on hand at beginning and end of year, M cubic feet;
Kilowatt capacity of generating stations;	Average candle-power gas supplied;
Kilowatt hours generated, purchased, sold, used, and not accounted for;	Number of consumers' meters;
Maximum load on outgoing lines;	Number miles of mains;
Locality served and number of flat rate consumers;	Locality served.
Number of consumers' meters in service.	
Table 311 b: Street Lighting Statistics.....	138-141
Electric Department:	Gas Department:
Number and kind of lamp, and locality served;	Number and kind of lamp and locality served;
Schedule for lighting service;	Number of hours lamps lighted per year;
Watts at are or candle-power for each kind of lamp;	Gas per lamp per hour;
Number of hours lamps burned per year;	Price per lamp per year.
Price per lamp per year.

# ELECTRICAL CORPORATIONS AND GAS CORPORATIONS

## HISTORICAL AND EXPLANATORY STATEMENT

### PART I: OPERATING AND LESSOR CORPORATIONS

The following statement gives for operating and lessor electrical corporations and gas corporations under the Commission's jurisdiction the history of their organization and certain other information which can not be conveniently shown in tabulated form. For the most part the facts given are based on annual reports and correspondence relating thereto. The dates of organization, consolidation, merger, etc., have, however, so far as possible been verified by reference to the records of the Secretary of State.

In a number of cases where reports have not been received or have been so incomplete or inconsistent as to render of no value the inclusion in the tables of any statistics taken from them, the name of the corporation (in a few instances of the unincorporated plant) has been omitted from the tables, and is included only in this statement with a brief abstract of such information as is available. Lessor companies are listed under the name of the operating corporation. By "lessor company" is meant any company whose property is operated by another under lease or contract, or by the mere fact of stock control. The statement includes all operating and lessor electrical corporations or gas corporations, but does not include operating unincorporated electrical or gas companies except where the returns contained in their annual reports have not been tabulated.

#### **Adams Electric Light Company**

*Organization:* Incorporated May 28, 1912, under the Transportation Corporations Law. August 1, 1912, it acquired the property and franchises of The Adams Electric Light Company (Limited), incorporated May 2, 1889 (term twenty years), under "An act to provide for the organization and regulation of certain business corporations," L. 1875, ch. 611.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Adams (not operated during 1914).

*Principal officers:* President and Treasurer, M. B. Steele; Vice-president and Secretary, J. F. Steele.

*Main business office:* Adams.

#### **The Addison Electric Light and Power Company**

*Organization:* Incorporated April 5, 1902, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Addison.

*Principal officers:* President, C. A. Champlin; Vice-president, W. P. Shanley; Secretary, L. S. Zimmer; Treasurer, J. S. Hubbs.

*Main business office:* Addison.

#### **Addison Gas and Power Company**

*Organization:* Incorporated September 21, 1903, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of natural gas.

*Principal officers:* President, E. C. Fish; Vice-president, Harry S. Cassada; Secretary and Treasurer, Miles T. Cassada.

*Main business office:* Addison.

#### **Adirondack Electric Power Corporation**

*Organization:* Incorporated December 27, 1911, as a reorganization of Hudson River Water Power Company, incorporated November 11, 1899, under the Transportation Corporations Law (term fifty years); The Hudson River Power Transmission Company, incorporated July 16, 1897, under the Transportation Corporations Law (term fifty years); Hudson River Electric Company, incorporated April 23, 1901, under the Transportation Corporations Law (term fifty years); Hudson River Electric

Power Company, incorporated December 28, 1903, under the Transportation Corporations Law (term fifty years); The Saratoga Gas, Electric Light and Power Company, incorporated January 27, 1897, under the Transportation Corporations Law (term fifty years); and Madison County Gas and Electric Company, incorporated November 19, 1901, under the Transportation Corporations Law (term fifty years). December 27, 1911, it acquired by conveyance from the purchaser at a sale pursuant to foreclosure by advertisement the property of Empire State Power Company, incorporated August 9, 1899, under the Transportation Corporations Law (term fifty years). In December, 1911, it acquired control of the property and franchises of The Ballston Spa Light and Power Company, incorporated May 28, 1897, under the Transportation Corporations Law.

*Term of corporate existence:* See constituent companies.

*Location of generating plants:* Electric: Spier Falls, Mechanicville, Schoharie, Utica, Oneida; Coal gas: Oneida; Water gas: Saratoga Springs.

*Principal officers:* President, James R. Hooper; Vice-president, Charles E. Willock; Secretary, Francis M. Edwards; Treasurer, Henry B. Sawyer.

*Main business office:* 7½ Ridge street, Glens Falls.

#### **The Afton Gas Light Company**

The latest information in the possession of the Commission indicates that this company sold gasoline gas to a few users in the village of Afton during 1914, but that such service was discontinued prior to the close of the year and that the company is now practically defunct.

#### **Afton-Windsor Light, Heat and Power Company, Inc.**

*Organization:* Incorporated April 5, 1913, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Center Village.

*Principal officers:* President, C. F. Wright; Vice-president, W. E. Bennett; Secretary, Frank J. Mangan; Treasurer, F. Miller Wright.

*Main business office:* Postoffice Building, Susquehanna, Penna.

#### **The Akron Natural Gas Company**

*Organization:* Incorporated April 1, 1903, under the Business Corporations Law (principal place of business

changed from Akron to Binghamton by certificate filed February 25, 1905). June 27, 1903, Akron Natural Gas Company, incorporated July 6, 1901, under the Transportation Corporations Law (term fifty years), and The Clarence Mutual Natural Gas Company, incorporated September 4, 1894 (act not specified, filed with transportation corporations), term fifty years, were merged into The Akron Natural Gas Company.

*Term of corporate existence:* One hundred years.

*Location of natural gas wells:* Towns of Newstead, Alden, Marilla, Clarence, Lancaster, and Elma in Erie county; and town of Pembroke, Genesee county.

*Principal officers:* President, I. D. Eckerson; Vice-president, R. H. Rose; Secretary, J. B. Hun; Treasurer, T. B. Crary.

*Main business office:* Phelps Building, Binghamton.

#### **Albany Southern Railroad Company**

*Organization:* See Electric Railroad Corporations.

*Term of corporate existence:* One thousand years (Albany and Hudson Railway and Power Company).

*Location of generating plants:* Electric: Stuyvesant Falls; Coal gas and water gas: Hudson, Rensselaer.

*Principal officers:* President, William Loeb, jr.; Vice-president, Richard Sutro; Secretary and Treasurer, Irvin W. Day.

*Main business office:* Rensselaer.

#### **The Alden-Batavia Natural Gas Company**

*Organization:* Incorporated October 11, 1901, under the Business Corporations Law. February 23, 1909, it merged Corfu Gas Company, incorporated July 2, 1896, under the Business Corporations Law (term fifty years). October 7, 1909, it merged Alden Natural Gas and Fuel Company, incorporated June 15, 1893, under the Business Corporations Law; certificate of extension (territory) filed November 26, 1901 (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of natural gas wells:* Towns of Darien, Pavilion, Bethany, and Pembroke, Genesee county; towns of Lancaster and Alden, Erie county; towns of Covington, Middlebury, and Attica, Wyoming county; town of York, Livingston county.

*Principal officers:* President, T. B. Crary; Vice-president, Robert H. Rose; Secretary, J. B. Hun; Treasurer, M. R. Christian.

*Main business office:* Phelps Building, Binghamton.

#### **The Altamont Illuminating Company**

*Organization:* Incorporated October 29, 1902, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Acetylene gas: Altamont.

*Principal officers:* President, Frederic Crounse; Secretary, Edward C. Sturges; Treasurer, Dayton H. Whipple.

*Main business office:* Altamont.

#### **Amenia Acetylene Gas Company**

No report of the operations of this company has been rendered to the Public Service Commission, Second District, since 1912.

#### **Antwerp Light and Power Company**

*Organization:* Incorporated January 20, 1910, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Antwerp.

*Principal officers:* President, J. A. Baumert; Vice-president, Peter Campbell; Treasurer, H. M. Baumert.

*Main business office:* Antwerp.

#### **Atlantic Light and Power Company**

*Organization:* Incorporated May 12, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years from May 12, 1905.

*Location of generating plant:* Electric: Coeymans.

*Principal officers:* President, John N. Briggs; Vice-presidents, Arthur Hartt, William H. Baldwin; Secretary, Stephen W. Mosher; Treasurer, Thomas T. Briggs.

*Main business office:* Coeymans.

#### **The Attica Natural Gas Company**

*Organization:* Incorporated April 30, 1898, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of natural gas well:* Attica, Wyoming county.

*Principal officers:* President, Thomas B. Crary; Vice-president, Frank M. Lowry; Secretary and Treasurer, M. R. Christian.

*Main business office:* Phelps Block, Binghamton.

#### **The Attica Water, Gas and Electric Company**

*Organization:* Incorporated February 26, 1901, under the laws of West Virginia. Certificate authorizing the transaction of business in the State of New York filed March 26, 1901. Succeeded to the franchises, etc., of Maplewood Electric Light and Power Company, incorporated October 6, 1897, under the Transportation Corporations Law (term fifty years); and The Attica Water Company, incorporated October 7, 1879, under the act for the formation of water works companies (L. 1873, ch. 737).

*Term of corporate existence:* Until February 14, 1951.

*Location of generating plant:* Electric: Attica; Natural gas wells: town of Attica, Wyoming county.

*Principal officers:* President, Thomas A. Sullivan; Secretary and Treasurer, Edward McM. Mills.

*Main business office:* Attica.

#### **Ausable Valley Light, Heat and Power Company**

*Organization:* Incorporated June 13, 1904, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Remarks:* The electric plant of this corporation is said to have been installed in connection with a sawmill which had water power already developed, and is used for lighting the village of Keene Center. No part of the capital stock has been issued. The report for the year ended December 31, 1914, shows no balance sheet, but in previous reports the cost of plant and equipment has been stated at \$2000. Receipts during the year are reported at \$800, and disbursements at the same amount. It is stated that the company supplies about twenty customers.

*Principal officers:* President, Wallace Murray; Vice-president, C. F. Carpenter; Secretary, A. K. Botsford; Treasurer, E. W. Parker.

*Main business office:* Keene.

#### **Avon Electric Company**

*Organization:* Incorporated April 21, 1896, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Avon.

*Principal officers:* President, William W. Dake; Secretary, Donald M. Lewis.

*Main business office:* Avon.

#### **Babylon Electric Light Company**

*Organization:* Incorporated August 28, 1886, under the act for the formation of gas light companies.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Babylon.

*Principal officers:* President, John C. Robbins; Secretary, James B. Robbins; Treasurer, Benjamin B. Wood.

*Main business office:* Babylon.

**Baldwinsville Light and Heat Company of Baldwinsville, N. Y.**

*Organization:* Incorporated August 21, 1902, under the Transportation Corporations Law. Purchased in August, 1902, franchises and property of Baldwinsville Heat and Light Company, incorporated August 26, 1896, under the Transportation Corporations Law (term fifty years from August 1, 1896).

*Term of corporate existence:* Fifty years from August 9, 1902.

*Location of natural gas wells:* Towns of Lysander and Van Buren.

*Principal officers:* President, W. F. Morris; Vice-presidents, Jacob Amos, Windsor Morris; Secretary and Treasurer, J. T. Wilkins.

*Main business office:* Baldwinsville.

**Bath Electric and Gas Light Company**

*Control by other corporation:* Majority of capital stock owned by C. Clothier Jones and Company.

*Organization:* Incorporated July 27, 1900, as a consolidation of Bath Gas Company, incorporated July 26, 1883, under the act for the formation of gas light companies (L. 1848, ch. 37), term fifty years, and Bath Electric Illuminating and Power Company, incorporated July 14, 1892, under the Transportation Corporations Law (term forty-five years from July 14, 1892).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Bath; Coal gas and water gas: Bath.

*Principal officers:* President, C. C. Jones; Secretary and Treasurer, S. W. Appleton.

*Main business office:* Bath.

**Belleville (Harlow E. Ralph)**

Unincorporated electric plant. Plant installed during 1914 and operated in connection with grist mill.

**Bemus Point Electric Light and Power Company (George H. Rappole)**

The latest information in the possession of the Commission indicates that George H. Rappole has sold his business at Bemus Point to Western New York Electric Company. No report has been received since 1913.

**The Berlin Electric Light, Heat and Power Company**

*Organization:* Incorporated May 8, 1908, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Berlin.

*Principal officers:* President, W. J. Cowee; Vice-president, Fannie T. Cowee; Secretary and Treasurer, C. H. Cowee.

*Main business office:* Berlin.

**Binghamton Gas Works**

*Control by other corporation:* Majority of capital stock owned by American Light and Traction Company.

*Organization:* Incorporated May 7, 1898, under the Transportation Corporations Law. May 16, 1898, Binghamton Gas and Electric Company (term fifty years), incorporated December 28, 1887, as a consolidation of The Binghamton Gas Light Company (term fifty years), incorporated July 25, 1853, under the act authorizing the formation of gas light companies (L. 1848, ch. 37); and The Brush-Swan Electric Light and Power Company of Binghamton, N. Y., incorporated February 4, 1884, as The People's Electric Light Company of Binghamton, New York, under the General Manufacturing Law (term fifty years from February 5, 1884), and new name as above assumed by order of the Supreme Court December 3, 1884, were merged into Binghamton Gas Works.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Coal gas and water gas: 283-291 Court street, Binghamton.

*Principal officers:* President, Alanson P. Lathrop; Vice-president, James W. Manier; Secretary, C. W. Bennett; Treasurer, Robert W. Manier.

*Main business office:* 40 Chenango street, Binghamton.

**Binghamton Light, Heat and Power Company**

*Organization:* Incorporated January 10, 1902, under the Transportation Corporations Law. It purchased all the rights and franchises of Binghamton General Electric Company, incorporated July 11, 1892, as a consolidation (term fifty years) of Thomson-Houston Light, Heat and Power Company, incorporated February 23, 1889, under the act for the formation of gas light companies (L. 1848, ch. 37), filed as manufacturing corporation, term fifty years; and The Binghamton Electric Company, incorporated May 27, 1890, under the General Manufacturing Law (L. 1848, ch. 40), term fifty years from May 27, 1890.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: 293 Court street, Binghamton.

*Principal officers:* President, Carl M. Pihl; Vice-president, S. H. Dailey; Secretary, A. B. Cheadle; Treasurer, N. P. Zech.

*Main business office:* 172 Washington street, Binghamton.

**Binghamton Railway Company**

*Control by other corporation:* Majority of capital stock owned by Scranton and Binghamton Railroad Company.

*Organization:* See Electric Railroad Corporations.

*Term of corporate existence:* Five hundred years (Binghamton, Lestershire and Union Railroad Company).

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, G. T. Rogers; Vice-president, George E. Green; Assistant Secretary, W. H. Hecox; Treasurer, E. M. White.

*Main business office:* 375 State street, Binghamton.

**Bolton Light and Power Company**

*Organization:* Incorporated May 28, 1910, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy. Operation of electric generating plant at Bolton Landing discontinued and plant partly dismantled during 1914.

*Principal officers:* President, Fred R. Smith; Vice-president and Secretary, H. E. Barber; Treasurer, H. C. Knoblauch.

*Main business office:* Bolton Landing.

**Boquet Electric Power Company**

*Organization:* Incorporated May 25, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Willsboro.

*Principal officers:* President, E. L. Mason; Vice-president, J. B. Burnham; Secretary and Treasurer, S. M. Mason.

*Main business office:* Essex.

**Boro Oil and Gas Company**

*Organization:* Incorporated June 8, 1899, under the Business Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of natural gas wells:* Town of Collins.

*Principal officers:* President, Secretary, and Treasurer, Michael McIntyre.

*Main business office:* Gowanda.

**Brasher Falls (Milling and Lighting Company)**

Unincorporated electric plant. The Milling and Lighting Company is a copartnership organized about July 1, 1914, and conducts a grist mill, feed store, coal business, and pumping station in connection with its electric lighting operations.

**Broadalbin Electric Light and Power Company**

*Organization:* Incorporated September 20, 1905, under the Transportation Corporations Law. Succeeded to the franchises and property of Northville Electric Light and Power Company (William Harris, owner).

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, William Pierson Judson; Secretary and Treasurer, Henry C. Finch.

*Main business office:* Broadalbin.

**The Brockport Gas Light Company**

*Organization:* Incorporated January 17, 1859, under the act for the formation of gas light companies (L. 1848, ch. 37).

*Term of corporate existence:* Fifty years from January 15, 1859; extended fifty years from expiration of period by certificate dated January 11, 1904, filed January 15, 1904.

*Location of generating plant:* Coal gas: Brockport.

*Principal officers:* President, John F. Bush; Secretary, Edward J. Hancy; Treasurer, William MacBain.

*Main business office:* 3 State street, Brockport.

**Brocton Gas and Fuel Company**

*Control by other corporation:* Entire capital stock owned by Frost Gas Company.

*Organization:* Incorporated May 20, 1904, under the Business Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of natural gas.

*Principal officers:* President, W. H. Frost; Vice-President, T. J. Cummings; Secretary, H. W. Frost; Treasurer, C. J. Berg.

*Main business office:* 53 West Main street, Fredonia.

**Buffalo and Niagara Falls Electric Light and Power Company**

*Control by other corporation:* Majority of capital stock owned by Buffalo General Electric Company.

*Organization:* Incorporated February 26, 1892, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Fourteenth street and New York Central and Hudson River railroad, and Canal Basin and Walnut avenue, Niagara Falls. All current purchased, none generated, in 1914.

*Principal officers:* President, George Urban, jr.; Vice-president, William C. Warren; Secretary, W. Wallace Denner; Treasurer, Charles R. Huntley.

*Main business office:* 107-109-111 Main street, Niagara Falls.

**Buffalo Gas Company**

*Organization:* Incorporated October 11, 1899, as a consolidation of Buffalo City Gas Company, incorporated November 23, 1897, under the Transportation Corporations Law (term fifty years), and Buffalo Gas Light Company, incorporated February 29, 1848, under the act authorizing the formation of gas light companies (L. 1848, ch. 37), term fifty years, and extended fifty years by certificate dated March 28, 1895, filed May 21, 1895. November 2, 1899, The Buffalo Mutual Gas Light Company, incorporated December 3, 1870, under the act for the

formation of gas light companies (term fifty years), was merged into Buffalo Gas Company. November 27, 1897, The Citizens Gas Company, incorporated December 26, 1873, under the act for the formation of gas light companies (term forty-five years), was merged with Buffalo City Gas Company. By deed dated March 25, 1874, The Citizens Gas Company acquired the property sold under foreclosure of Buffalo Oxygen and Hydrogen Gas Company, incorporated April 26, 1871, under the act for the formation of gas light companies (term fifty years). September 24, 1914, Alexander C. Humphreys and Harry T. Ramsdell were appointed receivers by the United States District Court for the Western District of New York.

*Term of corporate existence:* Fifty years from October 11, 1899 (see extension Buffalo Gas Light Company, above).

*Location of generating plants:* Coal gas: 249 West Genesee street, Buffalo; Water gas: Bradley and Dart streets, Buffalo (leased from Peoples Gas Light and Coke Company of Buffalo, but apparently not operated during 1914).

*Principal officers:* President, Alexander C. Humphreys; Vice-president, Robert L. Fryer; Secretary and Treasurer, William S. Riselay.

*Main business office:* 186-188 Main street, Buffalo.

**Lessor Company**

**Peoples Gas Light and Coke Company of Buffalo:** Property leased November 25, 1901, to the Buffalo Gas Company, which owns the majority of respondent's capital stock. May 25, 1898, Queens City Gas-Light Company, incorporated February 15, 1893, under the Transportation Corporations Law, term fifty years (see special act passed May 4, 1893, ch. 556), was merged into Peoples Gas Light and Coke Company of Buffalo, incorporated December 3, 1897, under the Transportation Corporations Law (term fifty years).

*Remarks:* Returns incomplete; not tabulated. The following information is abstracted from the report as rendered. Balance sheet December 31, 1914:

<i>Assets Side:</i>	
Cost of plant and equipment.....	\$5,083,785
Cash.....	50
Deficit.....	46,384
<b>Total.....</b>	<b>\$5,130,219</b>

Insurance.....	120
<b>Total expenses.....</b>	<b>\$407</b>
Taxes.....	5,550
Interest.....	874
<b>Total deductions.....</b>	<b>\$6,830</b>
Deficit for year.....	\$1,847
Deficit at beginning of year.....	44,538
<b>Deficit at close of year.....</b>	<b>\$46,385</b>

*Principal officers:* President, Edward McM. Mills; Vice-president, Louis L. Babcock; Secretary and Treasurer, William S. Riselay.

*Corporate office:* 186 Main street, Buffalo.

**Buffalo General Electric Company**

*Organization:* Incorporated August 19, 1892, as a consolidation of Brush Electric Light Company of Buffalo, incorporated June 3, 1881, under the act for the formation of gas light companies (L. 1848, ch. 37), term fifty years, and Thomson-Houston Electric Light and Power Company of Buffalo, incorporated June 20, 1887, under the act for the formation of gas light companies (term fifty years).

*Term of corporate existence:* Fifty years from July 27, 1892.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Charles R. Huntley; Vice-presidents, George Urban, jr., Andrew Langdon; Secretary, Walter P. Cooke; Treasurer, Horace L. Mann.

*Main business office:* Electric Building, Buffalo.

#### **The Buttermilk Falls Electric Company**

*Organization:* Incorporated October 23, 1893, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years from January 1, 1893.

*Location of generating plant:* Electric: Highland Falls.

*Principal officers:* President and Treasurer, George W. Flood; Secretary, Lucile C. Flood.

*Main business office:* Highland Falls.

#### **The Caledonia Natural Gas Company**

*Organization:* Incorporated April 27, 1899, under the Business Corporations Law. Succeeded to the franchises and property of The Caledonia Gas Light and Heating Company, incorporated December 16, 1895, under the Business Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of natural gas wells:* Caledonia.

*Principal officers:* President and Treasurer, A. Miner Wellman; Vice-president, T. N. Crary; Secretary, Guy Wellman.

*Main business office:* Caledonia.

#### **The Canandaigua Gas-Light Company**

*Control by other corporation:* Majority of capital stock owned by Ontario Light and Traction Company.

*Organization:* Incorporated August 3, 1853, under the act for the formation of gas light companies (L. 1848, ch. 37).

*Term of corporate existence:* Fifty years; extended fifty years by certificate dated November 17, 1900, filed November 30, 1900.

*Location of generating plants:* Coal gas: South Main street, Canandaigua; Clark street, Canandaigua.

*Principal officers:* President, Horace E. Andrews; Vice-presidents, William K. Vanderbilt, jr., Granger A. Hollister, Robert M. Searle; Secretary, Joseph C. Collins; Treasurer, Edward L. Rossiter.

*Main business office:* Canandaigua.

#### **The Canisteo Gas Company**

*Organization:* Incorporated October 3, 1898, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of natural gas.

*Principal officers:* President, Harry Bradley; Vice-president, George N. Bradley; Secretary and Treasurer, Justin B. Bradley.

*Main business office:* Canisteo.

#### **Canton Electric Light and Power Company**

*Organization:* Incorporated February 23, 1887, under the act for the formation of gas light companies (L. 1848, ch. 37).

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, W. Chamberlain; Vice-president, W. N. Beard; Secretary and Treasurer, J. E. Johnson.

*Main business office:* Canton.

#### **Carroll Electric Light and Power Company**

*Organization:* Incorporated August 17, 1912, under the Transportation Corporations Law. Purchased franchises, etc., of Frewsburg Electric Light and Power Company,

incorporated January 5, 1907, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, D. H. Siggins; Vice-president, H. A. Siggins; Secretary and Treasurer, Sam Q. Smith.

*Main business office:* 101 Liberty street, Warren, Penna.

#### **Carthage Electric Light and Power Company**

See Northern New York Utilities, Inc.

*Organization:* Incorporated May 3, 1901, under the Transportation Corporations Law. November 30, 1914, was merged into Northern New York Utilities, Inc.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Effly Falls, town of Croghan.

*Principal officers:* President, C. C. Burns; Vice-president, S. L. George; Secretary, F. A. Rogers; Treasurer, John B. Taylor.

*Main business office:* Carthage.

#### **Castleton (Josef Goergen)**

No report of the operations of this plant has been rendered to the Public Service Commission, Second District, since 1911.

#### **The Cataract Power and Conduit Company**

*Control by other corporation:* Majority of capital stock owned by The Niagara Falls Power Company.

*Organization:* Incorporated June 17, 1896, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years from June 17, 1896.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Edward A. Wickes; Vice-presidents, George Urban, jr., Charles R. Huntley; Secretary and Treasurer, de Lancey Rankine.

*Main business office:* 200 Electric Building, Buffalo.

#### **The Catskill Mountain Gas Company**

*Organization:* Incorporated May 5, 1904, under the Transportation Corporations Law.

*Term of corporate existence:* Forty-nine years.

*Location of generating plant:* Acetylene gas: Fleischmanns.

*Principal officers:* President, C. V. Spriggs; Vice-president, Herbert Lasher; Secretary, Otis H. Todd; Treasurer, A. H. Todd.

*Main business office:* Fleischmanns.

#### **Cattaraugus County Lighting Company**

See Olean Electric Light and Power Company (new company).

*Organization:* Incorporated December 9, 1902, under the Transportation Corporations Law, under the name Empire Electric Company of Franklinville, N. Y. It succeeded to the franchises originally granted to The Franklinville Electric Light Company, incorporated May 13, 1893, under the same act (term fifty years), and by it assigned to Citizens Electric Light Company of Franklinville, N. Y., incorporated November 18, 1901, under the same act (term fifty years). The name was changed as above by order of the Supreme Court to take effect September 15, 1913 (filed in office of Secretary of State August 8, 1913; see further order authorizing filing *nunc pro tunc* as of September 13, 1913, filed September 27, 1913). September 17, 1914, name was changed to Olean Electric Light and Power Company (see that title).

*Term of corporate existence:* Fifty years (Empire Electric Company of Franklinville, N. Y.)

*Location of generating plant:* Electric: Franklinville.

*Principal officers:* President, Arthur A. McGivney; Secretary, John J. Gallagher; Treasurer, Walter A. Zineke.

*Main business office:* Franklinville.

#### **Cattaraugus Electric Light and Power Company**

*Organization:* Incorporated July 24, 1900, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Cattaraugus.

*Principal officers:* Acting President, A. J. Setter; Secretary and Treasurer, H. C. Milks.

*Main business office:* Cattaraugus.

#### **Cayadutta Generating Company**

*Control by other corporation:* Entire capital stock owned by Fulton County Gas and Electric Company.

*Organization:* Incorporated March 26, 1910, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Berryville (not in operation at close of year).

*Principal officers:* President, J. C. DeLong; Secretary, G. W. Curran; Treasurer, L. C. Smith.

*Main business office:* Fonda.

#### **The Cazenovia Electric Company**

*Organization:* Incorporated May 15, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Cazenovia.

*Principal officers:* President, Henry Burden; Vice-president, R. S. Brewster; Secretary and Treasurer, H. G. Phelps.

*Main business office:* Cazenovia.

#### **Central Hudson Gas and Electric Company**

*Organization:* Incorporated April 26, 1911, as a consolidation of Poughkeepsie Light, Heat and Power Company, incorporated October 3, 1901, under the Transportation Corporations Law (term fifty years); Newburgh Light, Heat and Power Company, incorporated November 12, 1900, under the Transportation Corporations Law (term fifty years); and Hudson Counties Gas and Electric Company, incorporated May 17, 1905, under the Transportation Corporations Law (term fifty years).

Newburgh Light, Heat and Power Company acquired the franchises, etc., of Consumer's Gas Company, incorporated April 30, 1878, under the act for the formation of gas light companies, L. 1848, ch. 37 (term fifty years); Newburgh Gas Light Company, incorporated May 17, 1852, under the same act (term fifty years from May 10, 1852); The Edison Electric Illuminating Company of Newburgh, incorporated October 29, 1883, under the same act (term fifty years from October 22, 1883); The Newburgh Electric Lighting Company, incorporated June 24, 1885, under the General Manufacturing Law, L. 1848, ch. 40 (term fifty years); and The Consolidated Gas, Electric Light, Heat and Power Company of Newburgh, N. Y., incorporated August 5, 1895, as a consolidation of Newburgh Electric Light and Power Company, incorporated July 31, 1888, under the General Manufacturing Law, L. 1848, ch. 40 (term fifty years from July 9, 1888), and The Edison Electric Illuminating Company. This company also acquired by purchase in 1902, the Marlborough electric plant, and April 23, 1910, the Wallkill electric plant.

Poughkeepsie Light, Heat and Power Company acquired the franchises and property of Poughkeepsie Gas Light Company, incorporated December 18, 1850, under the act for the incorporation of gas light companies, L. 1848, ch. 37 (term fifty years; extended for fifty years from

December 4, 1900, by certificate filed July 29, 1901, by order of the Supreme Court); Citizens Gas Company of Poughkeepsie, incorporated December 28, 1874, under the same act (term fifty years); and Poughkeepsie Electric Light and Power Company, incorporated April 7, 1885, under the General Manufacturing Law, L. 1848, ch. 40 (term fifty years).

Hudson Counties Gas and Electric Company acquired the franchises and property of The Cornwall Electric Lighting and Power Company, incorporated October 3, 1891, under the Transportation Corporations Law (term fifty years), and Security Light and Power Company, incorporated as Consolidated Electric Light, Heat and Power Company of Poughkeepsie, N. Y., July 30, 1901, under the Transportation Corporations Law (term fifty years); certificate of removal of principal office to Cornwall filed June 19, 1907. Above name assumed October 17, 1907, by order of the Supreme Court.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Foot of Mill street, Poughkeepsie; Montgomery and 3rd streets, Newburgh; Water gas: Laurel and Gate streets, Poughkeepsie; Dock street and River front, Poughkeepsie; South Colden and Renwick streets, Newburgh.

*Principal officers:* President, Thaddeus R. Beal; Vice-president, John L. Wilkie; Secretary, P. A. Burnes; Treasurer, William Schickle.

*Main business office:* 50 Market street, Poughkeepsie.

#### **Central New York Gas and Electric Company**

*Control by other corporation:* Entire capital stock owned by Empire Gas and Electric Company.

*Organization:* Incorporated March 11, 1911, as a consolidation of Geneva-Seneca Electric Company (term fifty years), and Wayne County Gas and Electric Company (term fifty years).

Geneva-Seneca Electric Company was incorporated November 17, 1906, as a consolidation of Geneva Power and Light Company, incorporated April 1, 1898, under the Transportation Corporations Law (term fifty years), and Seneca Edison Company, incorporated April 14, 1899, under the Transportation Corporations Law (term fifty years). Preliminary to the approval by the Commission of the agreement of consolidation, Geneva-Seneca Electric Company acquired the electric plant in the village of Phelps operated under the name of J. Q. Howe's Sons Electric Light Company. It also succeeded through Geneva Power and Light Company to franchises of Geneva Brush Electric Light and Power Company, incorporated November 30, 1889, under the General Manufacturing Law (L. 1848, ch. 40), term fifty years from November 30, 1889. These franchises were originally granted in 1884 to Brush-Swan Electric Light Company of New England, incorporated May 24, 1882, under the same law (term fifty years), whose rights were succeeded to by Brush Electric Company of Cleveland, Ohio, and assigned by the last named company to Geneva Power and Light Company. It also succeeded to the franchises of The Waterloo and Seneca Falls Electric Light and Power Company, incorporated September 9, 1886, under the act for the formation of gas light companies (L. 1848, ch. 37), term fifty years from September 1, 1886. These franchises were originally the property of Excelsior Electric Company, incorporated August 3, 1881, under the General Manufacturing Law, term fifty years from August 8, 1881. It also succeeded to the franchises of Geneva Steam Heating Company, incorporated August 13, 1898, under the Business Corporations Law (term fifty years), merged February 3, 1908, into Economic Power and Construction Company. May 24, 1910, the Commission authorized Geneva-Seneca Electric Company to purchase the property at Geneva of Economic Power and Construction Company.

The latter company was incorporated by special act passed April 22, 1893 (ch. 459).

Wayne County Gas and Electric Company was incorporated July 13, 1910, as a consolidation of Palmyra Gas Gas and Electric Company, incorporated January 25, 1905, under the Transportation Corporations Law (term fifty years); Newark (N. Y.) Gas Light and Fuel Company, incorporated May 24, 1899, under the Transportation Corporations Law (term fifty years); The New Light, Heat and Power Company of Newark, New York, incorporated February 23, 1899, under the Transportation Corporations Law (term fifty years); The Lyons Gas Light Company, incorporated January 25, 1859, under the act for the formation of gas light companies (term forty-nine years from January 1, 1859; revived and extended for fifty years from the time specified in the original certificate of incorporation, pursuant to order of the Supreme Court and section 32 of the General Corporation Law, by certificate dated January 19, 1909; certificate and order filed in office of Secretary of State February 5, 1909); and Wayne County Electric Company, in turn formed by consolidation April 25, 1901 (term fifty years), of The Lyons Electric Light and Power Company, incorporated June 11, 1889, under the act for the formation of gas light companies (term fifty years); and Lux Electric Light, Heat and Power Company, incorporated March 15, 1901, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Geneva, Newark, Lyons, Waterloo, Seneca Falls; Coal gas and water gas: Newark (not operating).

*Principal officers:* President, E. H. Palmer; Vice-president, H. O. Palmer; Secretary, L. G. Hoskins; Treasurer, C. H. Pierce.

*Main business office:* 103 Castle street, Geneva.

#### *Lessor Company*

**Tracy Development Company:** Incorporated November 10, 1911, under the Business Corporations Law. Plant (under construction) leased to Central New York Gas and Electric Company.

*Term of corporate existence:* Perpetual.

*Remarks:* Returns incomplete; not tabulated. The following information is abstracted from the report as rendered. Balance sheet December 31, 1914:

<i>Assets Side:</i>	
Cost of plant and equipment under construction.....	\$393,042
Cash.....	257
Bills receivable.....	4,000
Accounts receivable.....	211,810
Unamortized debit discount and expense.....	17,987
Total.....	\$627,096
<i>Liabilities Side:</i>	
Funded debt.....	\$250,000
Bills payable.....	59,000
Accounts payable.....	14,346
Interest accrued on bonds.....	3,750
Common stock.....	300,000
Total.....	\$627,096

No income or expenses are reported for 1914.

*Principal officers:* President, Ernest G. Gould; Secretary and Treasurer, Edwin K. Baldwin.

*Corporate office:* Waterloo.

#### **Central New York Power Company**

*Organization:* Incorporated May 15, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Canastota; Coal gas and water gas: Canastota.

*Principal officers:* President, James C. Brady; Vice-president, William E. Lewis; Secretary, M. J. Brayton; Treasurer, George H. Stack.

*Main business office:* 222 Genesee street, Utica.

#### **The Champlain Electric Company**

*Organization:* Incorporated August 21, 1899, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Champlain.

*Principal officers:* President, J. R. Kellas; Secretary, L. M. Kellas; Treasurer, F. J. Clark.

*Main business office:* Champlain.

#### **Chasm Power Company**

*Organization:* Incorporated July 28, 1902, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: near village of Chateaugay.

*Principal officers:* President, J. S. Van Vechten; Vice-president, W. T. Thayer; Secretary, R. R. Humphrey; Treasurer, E. S. Duffy.

*Main business office:* Chateaugay.

#### **Chatham Electric Light, Heat and Power Company**

*Organization:* Incorporated June 13, 1895, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Chatham.

*Principal officers:* President and Secretary, John O. Mickle; Vice-president, William E. Mahar; Treasurer, John P. Mickle.

*Main business office:* Chatham.

#### **The Chaumont Electric Light Company**

*Organization:* Incorporated May 12, 1911, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Chaumont.

*Principal officers:* President, George Diefendorf; Treasurer, Charles N. Arnold.

*Main business office:* Chaumont.

#### **Cherry Gas and Oil Company**

*Organization:* Incorporated January 13, 1910, under the Business Corporations Law.

*Term of corporate existence:* Perpetual.

*Location of natural gas wells:* Town of Hamburg.

*Principal officers:* President, Henry Baltzar; Vice-president, R. W. Savage; Secretary, A. C. Parsons; Treasurer, Henry Brocksopp.

*Main business office:* Hamburg.

#### **The Cherry Valley Gas Company**

*Organization:* Incorporated September 18, 1906, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Acetylene gas: Cherry Valley.

*Principal officers:* President, S. W. Barnum; Vice-president, Benjamin Wightman; Secretary, Fred S. Brien; Treasurer, A. S. Pearson.

*Main business office:* Cherry Valley.

#### **The Chuctanunda Gas Light Company**

*Organization:* Incorporated April 9, 1860, under the act for the formation of gas light companies (L. 1848, ch. 37).

*Term of corporate existence:* Fifty years from April 1, 1860; extended fifty years by certificate dated January 21, 1910, filed January 25, 1910.

*Location of generating plant:* Coal gas and water gas: Riverside Place, Amsterdam.

*Principal officers:* President, John K. Stewart; Vice-president, William H. Cooper; Secretary and Treasurer, Freeman S. Van Derveer.

*Main business office:* 33 Market street, Amsterdam.

#### **Churchville Oil and Natural Gas Company**

*Organization:* Incorporated May 21, 1907, under the Business Corporations Law.

*Term of corporate existence:* Five years; extended fifty years by certificate dated February 10, 1912, filed March 12, 1912.

*Location of natural gas wells:* Riga township, Monroe county.

*Principal officers:* President, Frank B. Barnard; Vice-president, George W. Morris; Secretary and Treasurer, E. J. Hill.

*Main business office:* 1110 Prudential Building, Buffalo.

#### **Cincinnatus Gas Company**

*Organization:* Incorporated October 25, 1897, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Gasoline gas: Cincinnati.

*Principal officers:* President, P. C. Wheeler; Vice-president, B. R. Corning; Secretary, M. L. Hulbert; Treasurer, George A. Hoskins.

*Main business office:* Cincinnati.

#### **Citizens Gas and Fuel Company of Dunkirk**

*Organization:* Incorporated December 1, 1900, under the Transportation Corporations Law. In December, 1911, the property of this company was sold under foreclosure to William E. Carroll.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of natural gas.

*Remarks:* It is stated in the verification of the report that "The Citizens Gas and Fuel Company of Dunkirk is now operating its plant and franchises by sufferance of deponent who is the owner of the same, having purchased the same upon the foreclosure of the mortgage given by said Citizens Gas and Fuel Company." It further appears that the owner of the property, William E. Carroll, also owns more than two-thirds of the company's capital stock.

*Principal officers:* No officers reported; business managed by William E. Carroll.

*Main business office:* 490 Ellicott Square, Buffalo.

#### **Cliff Electrical Distributing Company**

*Organization:* Incorporated March 15, 1909, under the Transportation Corporations Law, and succeeded to that part of the franchises, works, and system relating to the generating and distributing of electric power of The Niagara Falls Hydraulic Power and Manufacturing Company, incorporated April 23, 1878, under "An act to provide for the organization and regulation of certain business corporations" (L. 1875, ch. 611), term fifty years. (See special acts relating to The Niagara Falls Hydraulic Power and Manufacturing Company: L. 1896, ch. 968; L. 1905, ch. 508; L. 1906, ch. 54).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Niagara Falls.

*Principal officers:* President, C. P. H. Schoellkopf; Vice-presidents, Walter H. Schoellkopf, Morris Cohn, jr.; Secretary and Treasurer, Paul A. Schoellkopf.

*Main business office:* Walnut avenue and Canal Basin, Niagara Falls.

#### **Clinton Gas Company**

*Organization:* Incorporated July 14, 1900, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Gasoline gas: East Hampton.

*Principal officers:* President, D. G. Milford; Vice-president, D. E. Osborne; Secretary and Treasurer, C. H. Thomas.

*Main business office:* East Hampton.

#### **Cohoes Gas Light Company**

*Organization:* Incorporated September 13, 1852, under the act for the formation of gas light companies (L. 1848, ch. 37).

*Term of corporate existence:* Fifty years from September 13, 1852; certificate of extension for fifty years dated May 13, 1902, filed May 15, 1902.

*Location of generating plants:* Electric: North Mohawk street, Whitehall street, Cohoes; Water gas: Whitehall street, Cohoes.

*Principal officers:* President and Treasurer, Lorenzo Semple; Secretary, W. P. Parsons.

*Main business office:* North Mohawk street, Cohoes.

#### **Cold Spring Light, Heat and Power Company**

*Organization:* Incorporated October 12, 1899, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Cold Spring.

*Principal officers:* President, J. G. Southard; Vice-president, B. W. Wilson; Secretary and Treasurer, Gerald V. Grace.

*Main business office:* Cold Spring.

#### **Colliers Light, Heat and Power Company**

*Control by other corporation:* Entire capital stock owned by Otsego and Herkimer Railroad Company.

*Organization:* Incorporated July 27, 1912, under the Transportation Corporations Law. July 1, 1913, it took over the operation of Clinton Mills Power Company, incorporated September 24, 1896, under the Transportation Corporations Law (term fifty years), and The Richfield Springs Electric Light and Power Company, incorporated April 3, 1888, under the General Manufacturing Law (L. 1848, ch. 40), term fifty years from February 16, 1888.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Peter C. Schutrum; Vice-president, W. Boardman Reed; Secretary, James A. Byrne; Treasurer, James L. de Rosset.

*Main business office:* Cooperstown.

#### **Comfort Natural Gas Company**

*Organization:* Incorporated June 22, 1912, under the Business Corporations Law.

*Term of corporate existence:* Perpetual.

*Location of natural gas wells:* Orchard Park.

*Principal officers:* President, Thomas B. Cravy; Vice-president, William H. Phelps; Secretary, William H. Hecox; Treasurer, M. R. Christian.

*Main business office:* Phelps Block, Binghamton.

#### **Conant-Bryant Power Company**

*Organization:* Incorporated April 9, 1910, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, C. L. Bryant; Vice-president, C. J. Chapman; Secretary and Treasurer, R. W. Bryant.

*Main business office:* 95 West Genesee street, Buffalo.

#### **Consolidated Electric Company**

*Organization:* Incorporated March 21, 1893, as a consolidation of The Greenwich Electric Light and Power Company, incorporated June 6, 1891, under the Transportation Corporations Law (term fifty years), and The Cambridge Electric Light and Power Company, incorporated July 29, 1891, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Middle Falls.

*Principal officers:* President, Henry Gray; Vice-president, Michael Sonn; Secretary, I. V. H. Gill; Treasurer, H. C. Gray.

*Main business office:* Greenwich.

#### **Consolidated Light and Power Company of Whitehall**

*Control by other corporation:* Entire capital stock owned by Utica Gas and Electric Company.

*Organization:* Incorporated March 15, 1901, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Whitehall.

*Principal officers:* President, James C. Brady; Vice-president, W. E. Lewis; Secretary, M. J. Brayton; Treasurer, G. H. Stack.

*Main business office:* Whitehall.

#### **The Consumers Natural Gas Company**

*Organization:* Incorporated April 20, 1903, under the Business Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of natural gas wells:* Town of Dix, Schuyler county.

*Principal officers:* President, George G. Reynolds; Secretary, Arthur B. Sliter; Treasurer, Harry S. Thayer.

*Main business office:* 401 Robinson Building, Elmira.

#### **Corinth Electric Light and Power Company**

*Organization:* Incorporated June 18, 1907, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Allen Curtis; Vice-president, H. F. Curtis; Secretary and Treasurer, Warren Curtis, jr.

*Main business office:* Corinth.

#### **Corning Light and Power Corporation**

*Organization:* Incorporated March 27, 1913, under the Transportation Corporations Law, as a reorganization of Corning Gas and Electric Company, which was sold under foreclosure March 22, 1913, to Daniel J. Creem, and operated by him until October 1, 1913. The last named company was incorporated May 27, 1901, under the Transportation Corporations Law (term fifty years). The Corning Gas Company, incorporated August 5, 1862, under the act for the formation of gas light companies (L. 1848, ch. 37), term August 1, 1862, to July 31, 1912, and Corning Light and Power Company, incorporated September 12, 1900, under the Transportation Corporations Law (term fifty years), were merged into Corning Gas and Electric Company July 18, 1901.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Corning; Coal gas: Corning.

*Principal officers:* President, Daniel J. Creem; Vice-president, Paul T. Brady; Secretary and Treasurer, Clinton L. Rossiter.

*Main business office:* Corning.

#### **The Cortland County Traction Company**

*Organization:* See Electric Railroad Corporations.

*Term of corporate existence:* Fifty years from May 14, 1894 (The Cortland and Homer Traction Company).

*Location of generating plant:* Electric: Cortland.

*Principal officers:* President, D. W. Van Hoesen; Vice-president, E. H. Brewer; Secretary, G. H. Garrison; Treasurer, Edwin Duffey.

*Main business office:* Cortland.

#### **The Courter Electric Company**

*Organization:* Incorporated April 1, 1893, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Cobleskill.

*Principal officers:* President, Charles H. Holmes; Secretary and Treasurer, C. H. Borst.

*Main business office:* Cobleskill.

#### **Croton Falls (George Juengst and Sons)**

*Organization:* Unincorporated; plant owned by George Juengst and Sons.

*Location of generating plant:* Electric: Croton Falls.

*Remarks:* Returns incomplete; not tabulated. This firm operates an electric light and power station in connection with its manufacturing plant, and accounts of electric operations are not completely separated from those of the electric plant. Balance sheet December 31, 1914:

<i>Assets Side:</i>	
Cash.....	\$385
Accounts receivable.....	11,738
Materials and supplies.....	7,960
Miscellaneous free investments.....	6,847
Fixed capital.....	113,143
Total.....	\$140,073
<i>Liabilities Side:</i>	
Interest matured and unpaid.....	\$4,903
Bills payable.....	2,500
Accounts payable.....	742

Mortgages totaling \$140,000 placed on both manufacturing and electric plants and equipment are also reported.

Total electric revenues for 1914 are given as \$25,081, with operating expenses totaling \$18,158 and taxes of \$379.

Company reports 648 consumers' meters in service and 43 flat rate consumers at close of 1914.

*Main business office:* Croton Falls.

#### **Crystal City Gas Company**

*Organization:* Incorporated August 30, 1904, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Distribution of natural gas.

*Principal officers:* President, B. W. Wellington; Secretary and Treasurer, W. B. Hunt.

*Main business office:* Corning.

#### **The Dansville Gas and Electric Company**

*Organization:* Incorporated October 26, 1899, under the Transportation Corporations Law. Purchased May 1, 1900, franchises, etc., of the Dansville Gas and Electric Light Company, incorporated October 24, 1895, under the Transportation Corporations Law (term fifty years); voluntarily dissolved by certificate filed February 14, 1901.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Dansville; Water gas: Dansville.

*Principal officers:* President, L. T. Mason; Vice-president and Treasurer, C. E. Mason; Secretary, C. G. MacAvoy.

*Main business office:* Dansville.

#### **The Deer River Power Company**

*Organization:* Incorporated February 2, 1909, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Copenhagen.

*Principal officers:* President, S. R. Cleveland; Vice-president, George H. Cobb; Secretary and Treasurer, Lou B. Cleveland.

*Main business office:* 16 Cleveland Building, Watertown.

#### **Delaware and Otsego Light and Power Company**

*Organization:* Incorporated August 21, 1906, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: East Sidney.

*Principal officers:* President, E. A. Mackey; Vice-president and Secretary, F. B. Rose; Treasurer, T. U. Wiens.  
*Main business office:* Franklin.

#### **Delaware County Electric Light and Power Company**

*Organization:* Incorporated November 25, 1910, under the Transportation Corporations Law. May 1, 1911, the plant of the Delhi Electric Company (incorporated July 1, 1891, under the Transportation Corporations Law [term fifty years from June 30, 1891]; January 10, 1910, Jonas M. Peterson appointed receiver by order of the Supreme Court) was transferred to Delaware County Electric Light and Power Company.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Delhi.

*Principal officers:* President, L. H. Hale, jr.; Vice-president, E. C. Deal; Secretary and Treasurer, E. B. Coler.

*Main business office:* Delhi.

#### **The Depew and Lancaster Light, Power and Conduit Company**

*Control by other corporation:* Majority of capital stock owned by Depew and Lancaster Corporation (incorporated June 15, 1907, under the Business Corporations Law).

*Organization:* Incorporated February 15, 1897 (certificates of extension of business and purposes filed May 4, 1914, and October 5, 1914) under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years (extension for twenty years filed May 1, 1914).

*Location of generating plant:* Electric: 173 Central avenue, Lancaster.

*Location of natural gas wells:* Townships of Lancaster and Alden.

*Remarks:* An investigation made by the Commission in connection with certain proceedings before it has developed the fact that the operations of The Depew and Lancaster Light, Power and Conduit Company were closely interrelated with similar operations carried on by the affiliated Depew and Lancaster Corporation. The latter company was for a time claimed not to be subject to the Commission's jurisdiction and has never made a report to it. As a result of the investigation referred to, it appears that the business of the two corporations has been conducted practically as the business of a single concern, but that in the attempt to maintain the theory of two separate corporations, one under the Commission's jurisdiction and one not subject to such supervision, the accounts of the two companies have been so intermingled that neither can show by itself an accurate financial statement of the business. For example, expenses that should have been equitably apportioned between the two corporations have been charged up almost entirely to The Depew and Lancaster Light, Power and Conduit Company although the revenues for securing which the expenses were incurred have been credited largely to the Depew and Lancaster Corporation. The Commission has approved the acquisition by The Depew and Lancaster Light, Power and Conduit Company of the securities and property of the Depew and Lancaster Corporation, and as of January 1, 1915, the accounts of the two companies were to be consolidated and the entire business was to be conducted after that date by and in the name of The Depew and Lancaster Light, Power and Conduit Company. The Depew and Lancaster Corporation was dissolved by certificate filed April 9, 1915.

*Principal officers:* President, George R. Teller; Vice-president, George A. Davis; Secretary and Treasurer, Ernest Feyler.

*Main business office:* 173 Central avenue, Lancaster.

#### **The Deposit Electric Company**

*Organization:* Incorporated January 20, 1892, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Stilesville.

*Principal officers:* President and Treasurer, John H. Rogers; Vice-president, Charles W. Place; Secretary, Raymond W. Smith.

*Main business office:* Deposit.

#### **The DeRuyter Gas Company**

*Organization:* Incorporated March 1, 1899, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Gasoline gas: DeRuyter.

*Principal officers:* President, I. E. Smith; Vice-president, M. E. Tallett; Secretary, H. D. Preston; Treasurer, F. S. Mitchell.

*Main business office:* DeRuyter.

#### **Despatch Heat, Light and Power Company**

*Control by other corporation:* Entire capital stock owned by Eastern Monroe Electric Light and Gas Company.

*Organization:* Incorporated July 8, 1904, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: East Rochester.

*Principal officers:* President, Horace E. Andrews; Vice-presidents, William K. Vanderbilt, jr., Granger A. Hollister, Robert M. Searle; Secretary, Joseph C. Collins; Treasurer, Edward L. Rossiter.

*Main business office:* Commercial street, East Rochester.

#### **Dunkirk Distribution Company**

*Organization:* Incorporated August 8, 1910, under the Transportation Corporations Law. Acquired the distribution system of Dunkirk Power and Heating Company, incorporated December 22, 1902, under the Business Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, A. W. Cummings; Vice-president, C. J. Carney; Secretary, H. T. Litchfield; Treasurer, John Lechner.

*Main business office:* 205 Central avenue, Dunkirk.

#### **Dunkirk Electrical Manufacturing Company**

*Organization:* Incorporated July 6, 1910, under the Business Corporations Law.

*Term of corporate existence:* Perpetual.

*Location of generating plant:* Electric: Dunkirk.

*Principal officers:* President, A. W. Cummings; Vice-president, C. J. Carney; Secretary, H. T. Litchfield; Treasurer, John Lechner.

*Main business office:* Dunkirk.

#### **The Dutchess Light, Heat and Power Company of Rhinebeck, N. Y.**

*Organization:* Incorporated June 28, 1900, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Rhinebeck.

*Principal officers:* President, Frank Herrick; Secretary, R. Raymond Rikert; Treasurer, Thaddeus A. Traver.

*Main business office:* Rhinebeck.

#### **Dwaas Electric Company**

*Organization:* Incorporated September 30, 1908, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, E. E. Sabourin; Vice-president, A. E. Eyer; Secretary, E. Jouriles; Treasurer, A. Stoodley.

*Main business office:* Hudson Falls.

#### **The Earlville Electric Light Company**

*Organization:* Incorporated June 26, 1907, under the Transportation Corporations Law. Succeeded to the property of the Parson's "Low-Down" Wagon Works, incor-

porated January 19, 1903, as United Wagon Company, under the Business Corporations Law (term perpetual), and name changed by order of Supreme Court December 26, 1905, as above.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Earlville.

*Principal officers:* President, John R. Parsons; Vice-president, Fred M. Parsons; Secretary and Treasurer, Ola P. Crandall.

*Main business office:* Earlville.

#### East Aurora Electric Light Company

*Organization:* Incorporated November 3, 1890, under the General Manufacturing Law (L. 1848, ch. 40).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: East Aurora.

*Principal officers:* President, M. B. Searls; Secretary and Treasurer, R. S. Persons.

*Main business office:* East Aurora.

#### East Creek Electric Light and Power Company

*Organization:* Incorporated March 24, 1902, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Inghams Mills, East Creek.

*Principal officers:* President, Howard W. Starr; Vice-president, Charles E. Snyder; Secretary and Treasurer, George A. Harris.

*Main business office:* St. Johnsville.

#### Eastern Monroe Electric Light and Gas Company

*Control by other corporation:* Entire capital stock owned by The Mohawk Valley Company.

*Organization:* Incorporated January 20, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Horace E. Andrews; Vice-presidents, William K. Vanderbilt, jr., Granger A. Hollister, Robert M. Scarle; Secretary, Joseph C. Collins; Treasurer, Edward L. Rossiter.

*Main business office:* 34 Clinton avenue, North, Rochester.

#### East Hampton Electric Light Company

*Organization:* Incorporated June 20, 1902, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: East Hampton.

*Principal officers:* President, Henry A. James; Vice-president, George E. Munroe; Secretary, William J. Irwin; Treasurer, Joseph S. Osborne.

*Main business office:* East Hampton.

#### Eden Gas and Fuel Company

*Organization:* Incorporated June 28, 1907, under the Business Corporations Law.

*Term of corporate existence:* Perpetual.

*Location of natural gas wells:* Eden.

*Principal officers:* President, E. H. Davis; Vice-president, Charles Eckhardt; Secretary and Treasurer, Henry Hickman.

*Main business office:* Eden.

#### Edison Electric Light and Power Company of Amsterdam

*Control by other corporation:* Entire capital stock owned by Fonda, Johnstown and Gloversville Railroad Company.

*Organization:* Incorporated June 23, 1903, as a consolidation of The Edison Electric Light and Power Company of the City of Amsterdam, N. Y., incorporated May

1, 1886, under the act authorizing the formation of gas light companies (term fifty years from April 15, 1886), and The Amsterdam Arc Light Company, incorporated December 15, 1887, under the General Manufacturing Law (term fifty years from December 15, 1887).

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, William Harris; Vice-presidents, Z. B. Whitney, W. H. Collins; Secretary, George A. Harris; Treasurer, Lyman K. Brown.

*Main business office:* 102 West Fulton street, Gloversville.

#### Edmeston Light, Heat and Power Company

*Organization:* Incorporated May 5, 1904, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Acetylene gas: Edmeston.

*Principal officers:* President and Treasurer, C. T. Coats; Vice-president, B. S. Gilson; Secretary, V. D. Robinson.

*Main business office:* Edmeston.

#### The Electric Light Company of New Paltz

*Organization:* Incorporated January 16, 1902, under the Transportation Corporations Law. Stock issued for property of The New Paltz Electric Light Company, incorporated November 29, 1892, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: New Paltz (not operated during 1914).

*Remarks:* Returns incomplete; not tabulated. Balance sheet December 31, 1914:

*Principal officers:* President, Ray Tompkins; Vice-president, F. H. Hill; Secretary and Treasurer, Henry Morgan.

*Main business office:* Hulett Building, Elmira.

**Elmira Water, Light and Railroad Company**

*Control by other corporation:* Majority of capital stock owned by United Gas and Electric Corporation.

*Organization:* See Electric Railroad Corporations.

*Term of corporate existence:* Fifty years from May 26, 1900 (date of filing of amended certificate).

*Location of generating plants and nature of service:* Electric: East Water street, Elmira; 620 Madison avenue, Elmira; Coal gas: 620 Madison avenue, Elmira; Natural gas: Distribution of purchased gas.

*Principal officers:* President, Ray Tompkins; Vice-president, S. J. Dill; Secretary and Treasurer, C. A. Kolstad.

*Main business office:* Hulett Building, Elmira.

**Empire Coke Company**

*Organization:* Incorporated April 4, 1903, under the Business Corporations Law.

*Term of corporate existence:* Perpetual.

*Remarks:* Returns incomplete; not tabulated. Effective December 1, 1912, the coke ovens of the company located at Waterloo were leased to the Semet-Solvay Company. This latter company operates the plant under an agreement with the owner which in substance provides that the operating company shall supply the owner with gas at a minimum price of 10 cents per M cu. ft., and that the owner shall also share in the profits from operation under certain specified conditions. The gas delivered by the Semet-Solvay Company to the Empire Coke Company is in turn delivered by the latter to its subsidiaries for distribution. During the year ended December 31, 1914, 351,275 M cu. ft. were so delivered to Empire Gas and Electric Company and to Central New York Gas and Electric Company, for \$123,014. By the terms of the operating agreement, maintenance and improvements are to be deducted by the operating company, with other expenses, from revenue in computing "profits"; and from the amount so determined, after allowing for compensation to the Solvay company for its supervision, the Empire company is to be reimbursed for its expenditures for taxes and for the purchase of gas from the Solvay company before net profits are finally divided. At the close of 1914 there was a balance on the Empire company's books against the Solvay company of \$70,989 on account of the reimbursement above mentioned. This represents an increase of \$40,896 during the year, this amount having been charged to operating expenses. Balance sheet December 31, 1914:

#### **Empire Gas and Electric Company**

*Control by other corporation:* Entire capital stock owned by Empire Coke Company.

*Organization:* Incorporated April 11, 1911, under the Transportation Corporations Law. August 14, 1911, Inter-Urban Gas Company, incorporated January 21, 1903, under the Transportation Corporations Law (term fifty years), was merged into Empire Gas and Electric Company. January 11, 1906, Geneva Gas Company, incorporated July 10, 1897, under the Transportation Corporations Law (term fifty years), was merged into Inter-Urban Gas Company. August 4, 1911, Seneca Falls and Waterloo Gas Light Company, incorporated December 24, 1856 (term fifty years from December 22, 1856; certificate of extension for corporate existence of Inter-Urban Gas Company to January 21, 1953, dated January 9, 1906, filed January 11, 1906), under the act authorizing the formation of gas light companies, was merged into Inter-Urban Gas Company. December 4, 1911, Auburn Gas Company, incorporated December 18, 1901, under the Transportation Corporations Law (term fifty years), was merged into Empire Gas and Electric Company. December 28, 1901, The Auburn Gas Light Company, incorporated January 29, 1850, under the act for the formation of gas light companies (L. 1848, ch. 37), term fifty years from January 11, 1850; extended fifty years by certificate dated December 1, 1897, filed December 6, 1897, was merged into Auburn Gas Company.

Empire Gas and Electric Company purchased all property and franchises of the following companies: Auburn Light, Heat and Power Company, incorporated October 26, 1899, under the Transportation Corporations Law (December 21, 1900, The Auburn Electric Light Company incorporated December 21, 1885 [also certificate of incorporation filed May 2, 1884], under the General Manufacturing Law, under the name of Brush-Swan Electric Light Company of Auburn [term fifty years]; name changed to The Auburn Electric Light Company by order of the Supreme Court April 5, 1887, and the powers of which were extended to the supply of steam by certificate filed July 18, 1899, was merged into Auburn Light, Heat and Power Company, and the powers of the latter company were extended to the supply of steam from a central station); The Auburn Subway and Electric Company, incorporated January 10, 1902, under the Business Corporations Law (term one hundred years); and Citizens Light and Power Company of Auburn, N. Y., incorporated May 7, 1900, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: North street, Auburn; Coal gas: Water street, Auburn; Fall street, Seneca Falls; Main street, Waterloo; Wadsworth street, Geneva; Water gas: Clark street, Auburn.

*Principal officers:* President, E. H. Palmer; Vice-president, H. O. Palmer; Secretary, L. G. Hoskins; Treasurer, C. H. Pierce.

*Main business office:* 103 Castle street, Geneva.

#### **The Empire Gas and Fuel Company, Limited**

*Organization:* Incorporated August 4, 1885, under "An act to provide for the organization and regulation of certain business corporations" (L. 1875, ch. 611). The distributing plant of the Iroquois Natural Gas Company, supplying consumers in East Wellsville, was purchased as of September 1, 1914.

*Term of corporate existence:* Fifty years.

*Location of natural gas wells:* Allegany and Steuben counties.

*Principal officers:* President and Secretary, Harry Bradley; Vice-president and Treasurer, George H. Bradley.

*Main business office:* Wellsville.

#### **Eureka Gas Company**

*Organization:* Incorporated January 22, 1906, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Acetylene gas: Candor.

*Principal officers:* President, H. D. Heath; Vice-president, J. K. Holly; Secretary and Treasurer, F. L. Heath.

*Main business office:* Candor.

#### **The Fidelity Gas Company of Hoosick Falls, New York**

*Organization:* Incorporated October 13, 1899, under the provisions of the General Manufacturing Law (L. 1848, ch. 40). March 14, 1900, it merged Hoosick Falls Gas Light Company, incorporated May 31, 1889, under the act for the formation of gas light companies (L. 1848, ch. 37), term fifty years. See also certificate filed January 3, 1872 (term fourteen years).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Coal gas: Hoosick Falls.

*Principal officers:* President, Joseph A. Duffy; Vice-president, Thomas C. Hinds; Secretary, George A. Wardell.

*Main business office:* 15 Exchange Place, Jersey City, N. J.

#### **Fishers Island Electric Light, Heat and Power Company**

*Organization:* Incorporated April 30, 1889, under the laws of the State of New Jersey.

*Term of corporate existence:* Not stated.

*Location of generating plant:* Electric: Fishers Island.

*Principal officers:* President, F. E. Hine; Secretary, Alfred L. Ferguson; Treasurer, Walton Ferguson.

*Main business office:* Fishers Island.

#### **The Fort Covington Light, Heat and Power Company**

*Organization:* Incorporated November 12, 1903, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Fort Covington.

*Principal officers:* President, P. Keefe; Secretary and Treasurer, W. S. H. Keefe.

*Main business office:* Fort Covington.

#### **Fort Plain Gas and Electric Light, Heat and Power Company**

*Organization:* Incorporated May 15, 1888, under the General Manufacturing Law (L. 1848, ch. 40).

*Term of corporate existence:* Fifty years from May 15, 1888.

*Location of generating plant:* Water gas: Fort Plain; Electric: All energy purchased from East Creek Electric Light and Power Company and Mohawk Hydro-Electric Company.

*Principal officers:* President, A. D. Sheffield; Vice-president, W. E. Diefendorf; Secretary and Treasurer, A. Dunn.

*Main business office:* Fort Plain.

#### **Franklin Springs Electric Light Company**

*Control by other corporation:* Majority of capital stock owned by Clinton Metallic Paint Company.

*Organization:* Incorporated January 31, 1905, under the Transportation Corporations Law. Rents line of College Hill Electric Light Company, incorporated February 1, 1905, under the Transportation Corporations Law (term fifty years).

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, D. D. Smyth; Vice-president, F. Hastings Smyth; Secretary and Treasurer, G. A. Rodenbaeck.

*Main business office:* Franklin Springs.

#### **Frost Gas Company**

*Organization:* Incorporated May 29, 1906, under laws of Delaware, with a general charter permitting operation as a natural gas company. Certificate authorizing transaction of business in New York filed July 10, 1906.

*Term of corporate existence:* Perpetual.

*Location of natural gas wells:* Towns of Sheridan, Pomfret, and Hanover.

*Principal officers:* President, W. H. Frost; Vice-president, T. J. Cummings; Secretary, H. W. Frost; Treasurer, C. J. Berg.

*Main business office:* Fredonia.

#### **Fulton Chain Electric Company**

*Organization:* Incorporated November 8, 1906, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Fulton Chain.

*Principal officers:* President, Frederick Cleveland; Vice-president, Frederick Kellogg; Secretary and Treasurer, J. G. Hoffman.

*Main business office:* Fulton Chain.

#### **Fulton County Gas and Electric Company**

*Control by other corporation:* Majority of capital stock owned by The United Gas Improvement Company.

*Organization:* Incorporated May 7, 1900, under the Transportation Corporations Law, and purchased the property, franchises, and capital stock of The Johnstown and Gloversville Gas Company, incorporated March 16, 1857, as The Johnstown Gas Light Company, under the act for the formation of gas light companies (L. 1848, ch. 37), term fifty years; name changed as above October 21, 1886, by order of the Supreme Court; and Gloversville Electric Company, incorporated July 31, 1889, under the General Manufacturing Law (L. 1848, ch. 40), and ch. 73 of the laws of 1882 (term fifty years from July 9, 1889). Also purchased the property, franchises, and capital stock of The Johnstown Electric Light and Power Company, incorporated March 15, 1887, under the act for the formation of gas light companies (term fifty years), and the same was merged May 23, 1900, into Fulton County Gas and Electric Company.

*Term of corporate existence:* Fifty years from May 7, 1900.

*Location of generating plants:* Electric: Gloversville, Johnstown; Water gas: Gloversville.

*Principal officers:* President, R. A. C. Smith; Vice-presidents, Walton Clark, Lewis Lillie; Secretary, G. W. Curran; Treasurer, James Ball.

*Main business office:* Gloversville.

#### **Fulton Fuel and Light Company**

*Organization:* Incorporated September 15, 1902, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Coal gas and water gas: 48 South First street, Fulton.

*Principal officers:* President, J. A. Foster; Vice-president, B. O. Tippy; Secretary, L. G. Adams; Treasurer, W. E. Moss.

*Main business office:* 48 South First street, Fulton.

#### **Fulton Light, Heat and Power Company**

*Organization:* Incorporated March 14, 1902, under the Transportation Corporations Law. Succeeded to the franchises, etc., of The Fulton Electric Light and Power Com-

pany, incorporated February 24, 1891, under the General Manufacturing Law (L. 1848, ch. 40).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: East side lower dam; Van Buren and North 6th streets, Fulton.

*Principal officers:* President, M. J. Warner; Vice-president, L. W. Emerick; Secretary and Treasurer, T. C. Clark.

*Main business office:* 103 Oneida street, Fulton.

#### **The Garden City Company**

*Organization:* Domestic corporation, incorporated January 20, 1893, under the Business Corporations Law, to acquire, hold, and lease real and personal property, etc.

*Location of generating plant:* Electric: Garden City.

*Remarks:* Returns incomplete; not tabulated. The corporation owns a large amount of real property in Nassau county which has been developed. As an incident to the developing of said property, the company maintains on the property a plant for the generation of electricity which it distributes for its own use and for sale to its tenants and other residents of Garden City. No balance sheet is reported, but it is stated that capital stock to the par value of \$2,497,600 was outstanding at close of year. Total revenues from electric operations during 1914 are given as \$16,956, of which \$5517 was credited "by company's own use"; and total operating expenses, taxes, and uncollectible bills are reported as \$10,889. The number of meters owned at close of year is given as 213.

*Principal officers:* President, A. W. Evarts; Vice-president, Devereux Emmet; Secretary, Charles S. Butler; Treasurer, Lorenzo Semple.

*Main business office:* Garden City.

#### **The Gas Light Company of Waverly**

*Organization:* Incorporated January 6, 1873, under the act for the formation of gas light companies. Owns stock and bonds of Athens and Sayre Gas Company.

*Term of corporate existence:* Fifty years from January 2, 1873.

*Location of generating plant:* Coal gas: Waverly (not operated during 1914).

*Principal officers:* President, R. F. Page; Secretary, J. G. Pembleton; Treasurer, O. L. Haverly.

*Main business office:* Waverly.

#### **General Transmission Company**

*Control by other corporation:* Entire capital stock owned by Buffalo General Electric Company.

*Organization:* Incorporated May 23, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, William R. Huntley; Vice-president, George Urban, jr.; Secretary and Treasurer, Horace L. Mann.

*Main business office:* Electric Building, 39 Genesee street, Buffalo.

#### **Genesee Light and Power Company**

*Organization:* Incorporated September 23, 1909, as a reorganization of The Genesee County Electric Light, Power and Gas Company, incorporated May 26, 1905, under the Transportation Corporations Law; amended certificate (territory) filed April 26, 1907. December 1, 1913, it acquired the lighting plant and property of the United States Gypsum Company in Oakfield.

*Term of corporate existence:* Fifty years (The Genesee County Electric Light, Power and Gas Company).

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President and Treasurer, Walter C. Lewis; Vice-president, Rudolph F. Rabe; Secretary, M. W. Comstock.

*Main business office:* 40-42 Ellicott street, Batavia.

**Genesee Valley Power Company**

*Organization:* Incorporated September 23, 1904, under the Business Corporations Law.

*Term of corporate existence:* Perpetual.

*Location of generating plant:* Electric: near Fillmore.

*Principal officers:* President and Treasurer, W. L. Young; Vice-president, Emma D. Young; Secretary, H. G. Young.

*Main business office:* Fillmore.

**The Genesee Gas Light Company**

*Organization:* Incorporated April 12, 1860, under the act for the formation of gas light companies; powers extended to the supply of electricity by certificate filed July 9, 1894.

*Term of corporate existence:* Fifty years; extended fifty years from April 10, 1910, by certificate dated March 10, 1910, filed March 14, 1910.

*Location of generating plants:* Electric: Genesee; Coal gas and water gas: Genesee.

*Principal officers:* President, William A. Brodie; Secretary and Treasurer, George B. Adams.

*Main business office:* Genesee.

**Glen Cove Light and Power Company**

*Organization:* Incorporated July 31, 1903, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Harvey S. Ladew; Vice-president, Mrs. Charles Wall; Secretary, James I. Taylor.

*Main business office:* Glen Cove.

**Glens Falls Gas and Electric Light Company**

*Control by other corporation:* Entire capital stock owned by Utica Gas and Electric Company.

*Organization:* Incorporated July 20, 1899, as a consolidation of The Glens Falls Electric Light and Power Company, Limited, incorporated January 31, 1884, under "An act to provide for the organization and regulation of certain business corporations" (L. 1875, ch. 611), term fifty years from January 21, 1884; and Glens Falls Gas Light Company, incorporated June 17, 1854, under the act for the formation of gas light companies (L. 1848, ch. 37), term fifty years from June 15, 1854.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Glens Falls (not operated during 1914); Coal gas: Glens Falls.

*Principal officers:* President, James C. Brady; Vice-president, William E. Lewis; Secretary, M. J. Brayton; Treasurer, George H. Stack.

*Main business office:* Glens Falls.

**Gorham Marl and Natural Gas Company**

*Organization:* Incorporated May 25, 1906, under the Business Corporations Law. Succeeded to the franchises and property of Gorham Natural Gas and Mining Company, incorporated October 8, 1903, under the Business Corporations Law (term fifty years).

*Term of corporate existence:* Seventy-five years.

*Location of natural gas wells:* Gorham.

*Principal officers:* President, A. D. Allen; Vice-president, C. M. Thompson; Secretary, C. D. Seofield; Treasurer, A. M. Phillips.

*Main business office:* Gorham.

**Goshen Illuminating Company**

*Organization:* Incorporated October 9, 1905, under the Transportation Corporations Law. Took over the property and franchises formerly owned by Goshen Gas and Fuel Company, incorporated April 29, 1902, under the Trans-

portation Corporations Law (term fifty years), which in turn took over the franchises of Goshen Gas Light Company, incorporated June 13, 1879, under the act for the formation of gas light companies (L. 1848, ch. 37), term fifty years.

*Term of corporate existence:* Fifty years from October 9, 1905.

*Location of generating plant:* Coal gas: Goshen.

*Principal officers:* President and Treasurer, John H. Findlay; Secretary, Benjamin J. Macdonald.

*Main business office:* Goshen.

**The Goshen Light and Power Company**

*Control by other corporation:* Majority of capital stock owned by Orange County Engineering Company.

*Organization:* Incorporated September 21, 1891, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President and Treasurer, R. W. Smith; Secretary, W. A. Wells.

*Main business office:* Monroe.

**Gowanda Natural Gas Company**

*Organization:* Incorporated December 8, 1896 (law not stated; filed with transportation corporations).

*Term of corporate existence:* Fifty years.

*Location of natural gas wells:* Near Gowanda.

*Principal officers:* President, Secretary, and Treasurer, Michael McIntyre.

*Main business office:* Gowanda.

**Granby and Hemenway Gas Company, Inc.**

*Organization:* Incorporated July 8, 1914, under the Business Corporations Law.

*Term of corporate existence:* Perpetual.

*Location of natural gas wells:* Naples.

*Principal officers:* President, Mrs. Edna A. Hemenway; Secretary, James W. Granby; Treasurer, George R. Granby.

*Main business office:* Naples.

**Granville Electric and Gas Company**

*Organization:* Incorporated August 26, 1903, under the Transportation Corporations Law. It acquired the franchises, etc., of Granville Electric Light and Power Company (electric), incorporated May 16, 1899, under the Transportation Corporations Law (term fifty years); and Granville Light, Power and Fuel Company (gas), incorporated February 3, 1902, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Granville; Water gas: Granville.

*Principal officers:* President, B. G. Higley; Vice-presidents, F. T. Pember, George Tait; Secretary and Treasurer, Grace M. Flood.

*Main business office:* Granville.

**The Great Bear Light and Power Company**

See Schenevus Electric Light and Power Company.

*Organization:* Incorporated September 30, 1907, under the Transportation Corporations Law. The property and franchises of Schenevus Electric Light and Power Company were purchased December 1, 1914, effective January 1, 1915.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: East Worcester.

*Principal officers:* President, J. L. Elliott; Secretary, Joseph Hinchman; Treasurer, William F. Sharpe.

*Main business office:* East Worcester.

**Gregory Electric Company, Inc.**

*Organization:* Incorporated June 4, 1913, under the Transportation Corporations Law, and succeeded to the plant of A. W. Gregory, doing business as Northern Light Company.

*Term of corporate existence:* Twenty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President and Treasurer, A. W. Gregory; Vice-president, A. Sophia Gregory; Secretary, Edna M. Gregory.

*Main business office:* Morristown.

**The Halfmoon Light, Heat and Power Company**

*Organization:* Incorporated August 16, 1899, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Mechanicville (not operated during 1914); Water gas: Mechanicville.

*Principal officers:* President, J. C. Duncan; Vice-president, E. H. Strong; Secretary, H. O. Bailey; Treasurer, W. L. Howland.

*Main business office:* Mechanicville.

**Hammondsport Electric Light Company**

*Organization:* Incorporated July 14, 1902, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Hammondsport.

*Principal officers:* President, C. A. Champlin; Vice-president, P. G. Zimmer; Secretary and Treasurer, J. L. Hubbs.

*Main business office:* Hammondsport.

**The Hannawa Falls Water Power Company**

*Organization:* Incorporated March 30, 1899, under the Business Corporations Law. October 3, 1906, Edwin A. Merrit, jr., was appointed receiver by the Supreme Court. Receivership discharged July 5, 1913.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Near Hannawa Falls.

*Principal officers:* President, William B. Cogswell; Vice-president, E. J. Page; Treasurer, F. A. Stoughton.

*Main business office:* Potsdam.

**Harrisville Electric Light and Power Company**

*Organization:* Incorporated December 5, 1904, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Mark S. Wilder; Vice-president and Treasurer, Don F. Sprague; Secretary, Frank Wilder.

*Main business office:* Harrisville.

**Hartwick Power Company**

*Control by other corporation:* Entire capital stock owned by Otsego and Herkimer Railroad Company.

*Organization:* Incorporated December 27, 1909, under the Transportation Corporations Law; amended certificate (amount of stock and territory) filed March 26, 1910; second amended certificate (territory) filed April 6, 1910. About April 1, 1911, acquired hydro-electric development system of Susquehanna River Power Company, incorporated February 17, 1908, under the Business Corporations Law (term one hundred years).

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, J. B. Mayer; Vice-president, W. Boardman Reed; Secretary, J. L. DeRosset; Treasurer, S. W. Mower.

*Main business office:* Cooperstown.

**Hermon Electric Light Company**

*Organization:* Incorporated September 11, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, G. T. Chancy; Vice-president, Florence Popple; Secretary and Treasurer, W. G. Popple.

*Main business office:* Hermon.

**Higley Falls (Snell Power Company)**

Unincorporated electric plant. A resolution of the Public Service Commission, Second District, dated February 12, 1914, approved *nunc pro tunc* the construction and operation of a power plant at Higley Falls in the town of Colton, St. Lawrence county. The power plant was finally completed and equipped with machinery for the production of electric power on or about June 1, 1913. No report had been filed by this company at date of going to press.

**Hilton Electric Light, Power and Heat Company**

*Organization:* Incorporated September 15, 1909, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Hilton.

*Principal officers:* President, J. E. Cooper; Vice-president and Secretary, M. D. Holbrook; Treasurer, A. B. Fraser.

*Main business office:* Hilton.

**Home Gas Company**

*Organization:* Incorporated June 7, 1897, under the Business Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of natural gas.

*Principal officers:* President, F. H. Raymond; Vice-president, L. J. White; Secretary and Treasurer, John J. Roberts.

*Main business office:* Ceres.

**Homer and Cortland Gas Light Company**

*Control by other corporation:* Majority of capital stock owned by Associated Gas and Electric Company.

*Organization:* Incorporated October 13, 1860, under the act for the formation of gas light companies.

*Term of corporate existence:* Fifty years; extended fifty years by certificate dated June 11, 1909, filed June 18, 1909; further certificate of extension for fifty years from October 13, 1910, filed June 13, 1914, by order of Supreme Court.

*Location of generating plant:* Coal gas: Homer Road.

*Principal officers:* President, J. H. Pardee; Vice-presidents, C. A. Greenidge, J. I. Mange; Secretary and Treasurer, H. B. Brown.

*Main business office:* 43 Exchange Place, New York city.

**Hoosac River Electric Light and Power Company**

*Control by other corporation:* Majority of capital stock owned by Schenectady Power Company.

*Organization:* Incorporated August 18, 1903, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, George E. Greene; Vice-president, Howard W. Starr; Secretary and Treasurer, James O. Carr.

*Main business office:* Schaghticoke.

#### **Hornell Electric Company**

*Organization:* Incorporated April 26, 1886, as The American Illuminating Company of Hornellsville, under the General Manufacturing Law; name changed by order of Supreme Court April 15, 1907, to Hornell Electric Company. In 1899 purchased the franchises and property of The American Heating Company of Hornellsville, incorporated August 23, 1898, under the Business Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Hornell.

*Principal officers:* President, H. L. Elkins; Vice-presidents, E. F. McCabe, L. T. Mason; Secretary, R. S. Smyth; Treasurer, William Maul Measey.

*Main business office:* Hornell.

#### **Hornell Gas Light Company**

*Organization:* Incorporated June 27, 1894, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of natural gas.

*Principal officers:* President, Harry Bradley; Vice-president, George H. Bradley; Secretary and Treasurer, Justin B. Bradley.

*Main business office:* Hornell.

#### **Huntington Gas Company**

*Control by other corporation:* Entire capital stock owned by Huntington Light and Power Company.

*Organization:* Incorporated September 18, 1895, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Water gas: Huntington Harbor.

*Principal officers:* President, H. S. Brush; Secretary and Treasurer, Douglass Conklin.

*Main business office:* Huntington.

#### **Huntington Light and Power Company**

*Organization:* Incorporated September 3, 1902, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Huntington Harbor.

*Principal officers:* President, Henry S. Brush; Vice-president, W. J. Matheson; Secretary and Treasurer, Douglass Conklin.

*Main business office:* Huntington.

#### **Hydro-Electric Power Company**

*Organization:* Incorporated under the name of The Theresa Woolen Company, May 13, 1907, under the Business Corporations Law; August 1, 1909, name changed as above.

*Term of corporate existence:* Fifty years (The Theresa Woolen Company).

*Location of generating plant:* Electric: Theresa.

*Principal officers:* President, Frederick L. Santway; Vice-president, James B. Voek; Secretary and Treasurer, George P. Schwarz.

*Main business office:* Theresa.

#### **International Power and Transmission Company**

*Organization:* Incorporated May 15, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, George Bullock; Vice-president, S. J. Dill; Secretary and Treasurer, E. E. Omeyer.

*Main business office:* 117 Main street, Lockport.

#### **Inter-Village Electric Corporation**

*Organization:* Incorporated October 23, 1912, under the Transportation Corporations Law. Succeeded April 1, 1913, to the property and franchises of Howard A. Pierce Electric Light Company, incorporated September 25, 1909, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Albert Dodge; Secretary, W. F. Nurzey; Treasurer, George T. Ballachey.

*Main business office:* Hamburg.

#### **Iroquois Natural Gas Company**

*Control by other corporation:* Majority of capital stock owned by National Fuel Gas Company.

*Organization:* Incorporated May 20, 1911, under the Business Corporations Law. July 1, 1912, it acquired the franchises, works, systems, and property of the following companies: The Buffalo Natural Gas Fuel Company; Springville Natural Gas Company; New Angola Gas Company; Salamanca Gas Company; Clear Creek Oil and Gas Company; United Natural Gas Company (portion in New York state); also the private plant of W. W. Richardson. November 1, 1912, it acquired the franchises, etc., of Lancaster-Depew Natural Gas Company. In October, 1912, a sale of the franchises, etc., of Armor Gas and Oil Company to Iroquois Natural Gas Company was made; certificate of voluntary dissolution of the former company filed July 7, 1913. August 15, 1912, the Commission authorized the assignment of a franchise in the village of Little Valley granted to United Natural Gas Company, to Iroquois Natural Gas Company. November 18, 1913, the Commission approved the transfer of plant and property of Reed Brothers & Co. and John N. Lockwood, in Lackawanna, to this company. January 24, 1914, it acquired the plant and franchises of Frontier Natural Gas Company, which company was voluntarily dissolved by certificate filed April 16, 1914. April 27, 1914, it acquired one producing well and gathering lines from Nenno Gas and Oil Company, and July 29, 1914, the properties of the LaQuinn Gas Company in the town of East Hamburg.

*Term of corporate existence:* Fifty years.

*Location of natural gas wells:* Allegany, Cattaraugus, and Erie counties.

*Principal officers:* President, W. W. Richardson; Vice-president, L. M. Bass; Secretary, B. C. Oliphant; Treasurer, W. M. Cusack.

*Main business office:* 206 Iroquois Building, Buffalo.

#### **Lessor Company**

**Erie County Natural Gas Fuel Company, Limited:** Incorporated November 13, 1889, under "An act to provide for the organization and regulation of certain business corporations" (L. 1875, ch. 611) term fifty years.

*Remarks:* Returns incomplete; not tabulated. This corporation reports that it no longer has a field of production. Its mains and service pipes in Buffalo have been leased to the Buffalo Natural Gas Fuel Company at a flat annual rental of \$6000, but upon the sale of the latter company's properties to the Iroquois Natural Gas Company the lease was assigned to the last named company. Balance sheet December 31, 1914:

<i>Assets Side:</i>	
Cash.....	\$33,088
Fixed capital.....	133,329
Land.....	4,000
Suspense.....	351,018
Total.....	\$521,435
<i>Liabilities Side:</i>	
Common stock.....	\$475,000
Corporate surplus.....	46,435
Total.....	\$521,435

The income and corporate surplus or deficit accounts for 1914 are not reported.

*Principal officers:* President, F. X. Binz; Vice-president, A. W. Hickman; Secretary, Joseph P. Schlattner; Treasurer, E. G. S. Miller.

*Corporate office:* 360 Main street, Buffalo.

#### **Ithaca Electric Light and Power Company**

*Control by other corporation:* Entire capital stock owned by Associated Gas and Electric Company.

*Organization:* Incorporated June 9, 1903, under the Transportation Corporations Law. Succeeded to Brush-Swan Electric Light Company of Ithaca, N. Y., incorporated December 11, 1884, under the General Manufacturing Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, J. H. Pardee; Vice-presidents, C. A. Greenidge, J. I. Mange; Secretary and Treasurer, H. B. Brown.

*Main business office:* Ithaca.

#### **The Ithaca Gas Light Company**

*Control by other corporation:* Majority of capital stock owned by Associated Gas and Electric Company.

*Organization:* Incorporated October 28, 1852, under the act authorizing the formation of gas light companies (L. 1848, ch 37).

*Term of corporate existence:* Fifty years from October 25, 1852; certificate of extension for fifty years dated October 21, 1901, filed November 12, 1901.

*Location of generating plant:* Coal gas and water gas: Ithaca.

*Principal officers:* President, J. H. Pardee; Vice-presidents, C. A. Greenidge, J. I. Mange; Secretary and Treasurer, H. B. Brown.

*Main business office:* Ithaca.

#### **Jamestown Lighting and Power Company**

*Organization:* Incorporated August 25, 1902, under the Transportation Corporations Law. Succeeded to the franchises and property of Jamestown Electric Light and Power Company, incorporated June 17, 1887, under the General Manufacturing Law (term fifty years from June 17, 1887).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Jamestown (not operated since January, 1914; partly dismantled).

*Principal officers:* President, A. N. Broadhead; Vice-president, S. B. Broadhead; Secretary and Treasurer, Albert S. Price.

*Main business office:* 316 North Main street, Jamestown.

#### **The Jeffersonville Gas Company**

Formerly supplied gasoline gas in the unincorporated village of Jeffersonville. A letter dated March 17, 1915, signed by C. G. Yager, former secretary of this company, states that "The Jeffersonville Gas Company is no longer in business". No further reports will be required.

#### **Jordan Electric Light and Power Company**

*Organization:* Incorporated September 25, 1888, under the General Manufacturing Law (L. 1848, ch. 40).

*Term of corporate existence:* Fifty years from September 24, 1888.

*Location of generating plant:* Electric: Jordan.

*Principal officers:* President, Secretary, and Treasurer, S. L. Rockwell.

*Main business office:* Jordan.

#### **Kanes Falls Electric Company**

*Organization:* Incorporated June 14, 1898, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Kanes Falls, Truthville, Granville.

*Principal officers:* President, Eugene L. Ashley; Vice-president, D. C. Ashley; Secretary and Treasurer, J. Melvin Adams.

*Main business office:* 40 Warren street, Glens Falls.

#### **Katonah Lighting Company**

*Organization:* Incorporated May 27, 1907, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Bedford Hills.

*Principal officers:* President, Edward P. Barrett; Vice-president, Alfred F. Avery; Secretary, Arthur M. Cornell; Treasurer, Robertson T. Barrett.

*Main business office:* Katonah.

#### **Kerhonkson (Charles H. Stokes)**

Unincorporated electric plant. Mr. Stokes purchases electric energy from the Honk Falls Power Company, and distributes it in the villages of Kerhonkson, Port Ben, Wawarsing, and vicinity. He states that he received \$2435 from the sale of electric energy during 1914, and paid the Honk Falls Power Company \$1579, leaving a balance to him of \$856. He estimates his expenditures on the lines, etc., at \$500.

#### **Keyes Electric Company**

*Organization:* Incorporated January 9, 1908, under the Transportation Corporations Law. Purchased at foreclosure sale, property and franchises of Consolidated Electric Light and Power Company of Gowanda, N. Y., incorporated October 4, 1902, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Gowanda.

*Principal officers:* President and Treasurer, G. G. Keyes; Vice-president, Jennie E. Keyes; Secretary, J. G. Keyes.

*Main business office:* Gowanda.

#### **Keystone Gas Company**

*Organization:* Incorporated February 8, 1881, under the laws of Pennsylvania.

*Term of corporate existence:* Not stated.

*Nature of service:* Transmission and distribution of natural gas.

*Principal officers:* President, John L. Emerson; Vice-president, J. A. Johnson; Secretary and Treasurer, J. N. Pew, jr.

*Main business office:* 1421 Chestnut street, Philadelphia, Penna.

#### **Kingston Gas and Electric Company**

*Control by other corporation:* Majority of capital stock owned by The American Gas Company.

*Organization:* Incorporated May 21, 1902, under the Transportation Corporations Law. January 14, 1905, merged The Kingston Electric Company, incorporated August 26, 1892, as a consolidation of The Kingston Electric Light, Heat and Power Company, incorporated November 13, 1888, under the General Manufacturing Law (term fifty years), which took over the property and franchises of The Kingston and Rondout Schuyler Electric Light Company, incorporated January 30, 1886, under the act for the formation of gas light companies (term fifty years); and Rondout and Kingston Gas Light Company, incorporated May 27, 1854, under the act for the formation of gas light companies (L. 1848, ch. 37), term fifty years from May 1, 1854.

*Term of corporate existence:* Fifty years; extended fifty years by certificate dated December 14, 1904, filed January 4, 1905.

*Location of generating plants:* Electric: 113 Jansen avenue, Kingston; Coal gas and water gas: East Strand and North streets, Kingston.

*Principal officers:* President, Morris W. Stroud; Vice-president, S. P. Curtis; Secretary, W. L. Fox; Treasurer, J. B. Townsend, 3rd.

*Main business office:* 611 Broadway, Kingston.

#### **Lackawanna-Reserve Gas Company**

*Organization:* Incorporated February 7, 1911, under the Business Corporations Law. Succeeded to the franchises, etc., of Reserve Gas Company, unincorporated, organized in February, 1906.

*Term of corporate existence:* One hundred years.

*Location of natural gas wells:* West Seneca.

*Principal officers:* President, H. S. Jones; Vice-president, Edward Letchworth; Secretary and Treasurer, I. B. Reed.

*Main business office:* 206 Iroquois Building, Buffalo.

#### **The LeRoy Hydraulic Electric Gas Company**

*Organization:* Incorporated August 22, 1895, under the Transportation Corporations Law, as The LeRoy Hydraulic Electric Company; certificate of extension of powers to supply gas filed January 25, 1904; name changed as above from April 15, 1904, by order filed March 16, 1904. Acquired franchises, etc., of The LeRoy Gas and Electric Company, incorporated September 21, 1899, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: LeRoy.

*Principal officers:* President, Charles F. Prentice; Vice-president and Treasurer, D. C. Howard Prentice; Secretary, John C. Ross.

*Main business office:* LeRoy.

#### **Lewiston and Lake Ontario Shore Power Company**

*Organization:* Incorporated August 21, 1911, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Charles H. Tugwell; Vice-president, John L. Hall; Secretary, Clarence J. Baker; Treasurer, J. Boardman Scovell.

*Main business office:* Lewiston.

#### **Liberty Light and Power Company**

*Control by other corporation:* Majority of capital stock owned by Loomis Sanatorium.

*Organization:* Incorporated August 25, 1897, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Liberty.

*Principal officers:* President, Henry R. Taylor; Vice-president, Moses Taylor; Secretary and Treasurer, James J. Donohue.

*Main business office:* Liberty.

#### **Lima-Honeoye Light and Railroad Company**

*Organization:* See Electric Railroad Corporations.

*Term of corporate existence:* Fifty years, by certificate of Lima-Honeoye Light Company filed June 25, 1910; nine hundred years by amended certificate of Lima-Honeoye Light and Railroad Company filed September 12, 1910.

*Location of generating plant:* Electric: between Lima and Honeoye Falls.

*Principal officers:* President, Mortimer D. Gould; Vice-president, William C. Likly; Secretary, Donald M. Lewis; Treasurer, Alexander Russell.

*Main business office:* Avon.

#### **Lessor Company**

**Lima-Honeoye Electric Light and Railroad Company:** The property of this corporation is leased to and operated by Lima-Honeoye Light and Railroad Company.

*Remarks:* Returns incomplete; not tabulated. The balance sheet as of December 31, 1914, shows \$24,370 as the cost of plant and equipment, \$5000 common stock, and a surplus of \$19,370. It is stated that there were no revenues and no expenses during 1914.

*Principal officers:* President, Alvin H. Dewey; Secretary, George H. Bliven.

*Corporate office:* 440 Powers Building, Rochester.

#### **Livingston Manor Electric Company**

*Organization:* Incorporated October 29, 1904, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: near Livingston Manor.

*Principal officers:* President, F. M. Woolsey; Vice-president, V. A. Finch; Secretary and Treasurer, W. R. Woolsey.

*Main business office:* Livingston Manor.

#### **Livingston-Niagara Power Company**

*Organization:* Incorporated August 7, 1909, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Merton E. Lewis; Vice-presidents, Quiney W. Hershey, Charles J. Brown; Secretary, Henry G. Strong; Treasurer, Henry C. Brewster.

*Main business office:* Avon.

#### **The Livonia Light and Heat Company**

*Organization:* Incorporated March 16, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Livonia.

*Principal officers:* President, William W. Dake; Secretary, Donald M. Lewis; Treasurer, Alexander Russell.

*Main business office:* Avon.

#### **Lockport Light, Heat and Power Company**

*Control by other corporation:* Majority of capital stock owned by Lockport Gas and Electric Light Company.

*Organization:* Incorporated May 28, 1907, under the Transportation Corporations Law. Under authority of the Commission's order of December 21, 1907, it acquired the properties and franchises of Lockport Gas and Electric Light Company, incorporated July 17, 1894, under the Transportation Corporations Law (term fifty years); powers extended to supply of steam from a central station by certificate filed July 24, 1906; and Economy Light, Fuel and Power Company, incorporated May 31, 1905, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Elno street; Race street, Lockport; Coal gas and water gas: Corner Transit, LaGrange, and Saxton streets, Lockport.

*Principal officers:* President, S. J. Dill; Vice-president, George Bullock; Secretary and Treasurer, Henry Morgan.

*Main business office:* 113-115 Main street, Lockport.

#### **Long Island Lighting Company**

*Organization:* Incorporated December 31, 1910, under the Transportation Corporations Law. June 19, 1911, it merged the following companies: Amityville Electric Light Company, incorporated October 5, 1892, under the Transportation Corporations Law (term fifty years); The Northport Electric Light Company, incorporated April 3, 1893, under the Transportation Corporations Law (term fifty years); The Sayville Electric Company, incorporated June 9, 1900, under the Transportation Corporations Law

(term fifty years); and The Islip Electric Light Company, incorporated November 11, 1909, under the Transportation Corporations Law (term fifty years). August 5, 1914, the Commission granted an order permitting Sag Harbor Lighting Company, incorporated January 29, 1902, under the Transportation Corporations Law (term fifty years), to transfer its works and property to this company; also permitting Henry F. Cook to transfer certain franchises to this company.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Northport, Sayville, Amityville, Islip (not fully equipped).

*Principal officers:* President, Ellis L. Phillips; Vice-president, George W. Olmsted; Secretary, Henry R. Frost; Treasurer, Gurney E. Lott.

*Main business office:* 50 Church street, New York.

#### **Macedon Milling Company (Edwin Youngs)**

Unincorporated electric plant. Returns incomplete; not tabulated. It appears that about \$690 was paid for electric energy purchased, and \$700 received from the sale thereof. The cost of plant and equipment is given as \$4000.

#### **Madrid Electric Light Company, Inc.**

*Organization:* Incorporated October 10, 1912, under the Transportation Corporations Law; succeeded to the plant, etc., of A. D. Whitney.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Madrid.

*Principal officers:* President and Treasurer, A. D. Whitney; Vice-president, A. C. Meeker; Secretary, F. J. Merriman.

*Main business office:* Madrid.

#### **Malone Light and Power Company**

*Organization:* Incorporated May 4, 1899 (amended certificate filed June 25, 1914), as a consolidation of The Malone Light, Heat, Power and Coal Company, incorporated November 30, 1892, as a consolidation (term twenty-five years) of The Malone Gas Company, incorporated April 22, 1871, under the act for the formation of gas light companies (L. 1847, ch. 37), term fifty years, and The Malone Electric Light and Power Company, incorporated August 9, 1886, under the same act (term fifty years); and High Falls Electric Company, incorporated March 22, 1899, under the Transportation Corporations Law (term fifty years). July 1, 1914, this company merged Franklin County Hydraulic Corporation, incorporated March 19, 1913, under the Business Corporations Law (term perpetual).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: High Falls, Malone, Chasm Falls; Coal gas: Malone.

*Principal officers:* President, M. S. Wilder; Vice-president, B. R. Clark; Secretary and Treasurer, H. C. Wilder.

*Main business office:* Malone.

#### **Marcellus Lighting Company, Inc.**

*Organization:* Incorporated November 8, 1912, under the Transportation Corporations Law; succeeded to the plant, etc., of Frank W. Knapp.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, S. Slocombe; Vice-president and Treasurer, F. W. Knapp; Secretary, Marion E. Knapp.

*Main business office:* Marcellus.

#### **Margaretville Gas Light Company**

*Organization:* Incorporated June 1, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years from June 1, 1905.

*Location of generating plant:* Gasoline gas: Margaretville.

*Principal officers:* President, J. N. Hitt; Vice-president, W. H. Brown; Secretary, H. Rotemund; Treasurer, N. D. Olmstead.

*Main business office:* Margaretville.

#### **Marion Power Company**

*Organization:* Incorporated February 21, 1911, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, G. R. Mills; Vice-president and Secretary, C. W. Mills; Treasurer, Willard H. Richardson.

*Main business office:* 28 Main street, Sodus.

#### **The Massena Electric Light and Power Company**

*Control by other corporation:* Majority of capital stock owned by The St. Lawrence Securities Company.

*Organization:* Incorporated February 6, 1899, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Arthur V. Davis; Vice-president and Secretary, G. R. Gibbons; Treasurer, F. A. Stoughton.

*Main business office:* Potsdam.

#### **Mechanicville Electric Light and Gas Company**

*Organization:* Incorporated May 26, 1902, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Willow Glen.

*Remarks:* Returns incomplete; not tabulated. The statement of assets and liabilities is incomplete, but the following items are reported: Assets: Cash \$144, materials and supplies \$401, fixed capital \$6886; \$5000 capital stock is shown as outstanding, and it is stated that there were judgments and mortgages totaling \$34,884 against the respondent at close of year. The following information is also given: Operating revenues, \$13,225; operating expenses, \$14,432; taxes, \$87; uncollectible bills, \$1815. Consumers' meters in service at close of year, 744.

*Principal officers:* President and Treasurer, Edwin Farrow; Vice-president, A. Greenaway; Secretary, M. J. Farrow.

*Main business office:* Willow Glen.

#### **The Merchants Gas Company of South Otselic, N. Y.**

*Organization:* Incorporated May 6, 1896, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Gasoline gas: South Otselic.

*Principal officers:* President, E. J. Stack; Vice-president, W. M. Reynolds; Secretary, F. E. Cox; Treasurer, J. S. Brown.

*Main business office:* South Otselic.

#### **Mexico Electric Company**

*Organization:* Incorporated September 10, 1890, under the General Manufacturing Law (L. 1848, ch. 40).

*Term of corporate existence:* Fifty years from September 10, 1890.

*Location of generating plant:* Electric: one mile south of village of Mexico.

*Principal officers:* President and Treasurer, S. B. Storer; Vice-president and Secretary, E. M. White.

*Main business office:* 724 University Block, Syracuse.

### **The Middleburgh and Schoharie Electric Light, Heat and Power Company**

*Organization:* Incorporated August 7, 1900, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Frisbieville.

*Principal officers:* President, Daniel D. Frisbie; Vice-president, N. D. Manning; Secretary, G. Norton Frisbie; Treasurer, Frank A. Sullivan.

*Main business office:* Middleburgh.

### **Middleport Gas and Electric Light Company**

*Organization:* Incorporated May 2, 1901, under the Transportation Corporations Law. Succeeded to the franchises, etc., of Middleport Power Company, incorporated February 17, 1899, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Edgar Knapp; Vice-president, E. J. Lewis; Secretary, F. M. Smith; Treasurer, J. J. Mack.

*Main business office:* Middleport.

### **Middleville Electric Light Company**

*Organization:* Incorporated July 7, 1904, under the Transportation Corporations Law.

*Term of corporate existence:* Forty-nine years.

*Location of generating plant:* Electric: Middleville.

*Principal officers:* President, Fred W. Begent; Vice-president, Anna F. Begent; Secretary and Treasurer, Florence D. Begent.

*Main business office:* Middleville.

### **Millbrook Gas and Electric Company**

*Organization:* Incorporated December 3, 1898, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Acetylene gas: Millbrook.

*Principal officers:* President, A. E. Dieterich; Vice-president, G. Howard Davison; Secretary and Treasurer, Walter F. Haight.

*Main business office:* Bank of Millbrook, Millbrook.

### **The Millerton Electric Light Company**

*Control by other corporation:* Majority of capital stock owned by The Connecticut Power Company.

*Organization:* Incorporated October 4, 1907, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Frederick P. Royce; Vice-president, Guy L. Weymouth; Secretary, William T. Crawford; Treasurer, Henry B. Sawyer.

*Main business office:* Millerton.

### **Mineville Light, Heat and Power Company**

*Control by other corporation:* Majority of capital stock owned by Witherbee Sherman Company.

*Organization:* Incorporated October 18, 1909, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, S. LeFine; Vice-president, H. Comstock; Secretary and Treasurer, William V. Bartlett.

*Main business office:* Mineville.

### **Mohawk Gas Company of Schenectady**

*Control by other corporation:* Majority of capital stock owned by Schenectady Illuminating Company.

*Organization:* Incorporated December 18, 1894, under the Transportation Corporations Law; originally The Schenectady Gas Light Company, incorporated September 16, 1872, under the act for the formation of gas light companies (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Coal gas and water gas: 35 Villa road, Schenectady.

*Principal officers:* Vice-president, Henry W. Peek; Secretary and Treasurer, James O. Carr.

*Main business office:* 509-511 State street, Schenectady.

### **Mohawk Hydro-Electric Company**

*Organization:* Incorporated May 17, 1910, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Ephratah.

*Principal officers:* President, William Barclay Parsons; Vice-president, H. M. Brinckerhoff; Secretary, A. J. Nichols; Treasurer, G. G. Beals.

*Main business office:* 60 Wall street, New York city.

### **The Montgomery Electric Light and Power Company**

*Control by other corporation:* Majority of capital stock owned by Beech Nut Packing Company.

*Organization:* Incorporated February 27, 1899, under the Transportation Corporations Law, and succeeded to the franchises and property of The Canajoharie Electric Light and Power Company, incorporated March 8, 1895, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, B. Arkell; Vice-president, W. H. Lipe; Secretary, F. E. Barbour; Treasurer, W. J. Roser.

*Main business office:* Canajoharie.

### **The Mooers Electric Light Company, Inc.**

*Control by other corporation:* Majority of capital stock owned by Mooers Heat and Power Company.

*Organization:* Incorporated October 9, 1913, under the Transportation Corporations Law. Succeeded to the franchise of H. Wallace Knapp.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Mooers.

*Principal officers:* President and Treasurer, H. Wallace Knapp; Vice-president, Minnie L. Knapp; Secretary, Fred E. Fillmore.

*Main business office:* Mooers.

### **The Moravia Electric Light, Heat and Power Company**

*Control by other corporation:* Majority of capital stock owned by The Moravia Electric Company.

*Organization:* Incorporated June 15, 1891, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years from June 15, 1891.

*Location of generating plant:* Electric: Moravia.

*Principal officers:* President, John Tabor; Vice-president, William Fitts; Secretary, W. J. H. Parker; Treasurer, Lewis C. Reynolds.

*Main business office:* Moravia.

### **Morgan and Wyman Electric Light and Power Company**

*Organization:* Incorporated March 17, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Twenty years.

*Location of generating plant:* Electric: Dover Plains.

*Principal officers:* President and Vice-president, Charles S. Wyman; Secretary and Treasurer, H. S. Nelson.  
*Main business office:* Dover Plains.

#### **The Morris Gas Company**

*Organization:* Incorporated May 28, 1898, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Gasoline gas: Morris.

*Principal officers:* President, Lynn B. Kenyon; Vice-president, P. J. Hahn; Secretary and Treasurer, C. O. Mansfield.

*Main business office:* Morris.

#### **Mt. Morris Illuminating Company**

*Organization:* Incorporated December 5, 1889, under the General Manufacturing Law (L. 1848, ch. 40).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Mt. Morris.

*Principal officers:* President, John C. Winters; Treasurer, John M. Prophet.

*Main business office:* Mt. Morris.

#### **Municipal Gas Company of the City of Albany**

*Organization:* Incorporated July 13, 1885, under the act for the formation of gas light companies (L. 1848, ch. 37); powers extended to supply of electricity by certificate filed April 26, 1893; and further extended to acquiring stock of Albany Electric Illuminating Company by certificate filed the same day. In 1885 and 1886 it acquired the stock and control of The Albany Gas Light Company, incorporated by a special act passed March 27, 1841 (ch. 74), term not specified; see also "An act to incorporate the Gas Light Company of the City of Albany," passed March 29, 1825 (ch. 59), and "An act to incorporate the Albany Gas Light Company," passed April 11, 1833 (ch. 135); and the franchises of The Peoples Gas Light Company of the City of Albany, incorporated February 5, 1872, under the act for the formation of gas light companies (L. 1848, ch. 37), term fifty years. By special act passed May 11, 1888 (ch. 287), it was authorized to lay mains and carry on business in any place within ten miles of the city of Albany except the city of Troy and the [then] village of Lansingburgh and village of Waterford. In 1888 it obtained a franchise from the Village of West Troy [now city of Watervliet] to use the mains, etc., of The West Troy Gas Light Company, incorporated January 31, 1853, under the act for the formation of gas light companies (term fifty years), that company having conveyed all its mains to Municipal Gas Company of the City of Albany. The West Troy Gas Light Company was dissolved by decree of the Supreme Court dated November 25, 1890, filed in office of Secretary of State December 2, 1890. It acquired in 1894 the capital stock and property of Albany Electric Illuminating Company, incorporated April 7, 1881, under the General Manufacturing Law (L. 1848, ch. 40), term fifty years; and The Edison Light and Power Company of Albany, incorporated July 24, 1886, under the General Manufacturing Law, its purposes including production of steam for heat, etc. (term fifty years from July 24, 1886).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: 71-85 Trinity Place, Albany; Water gas: 1165 Broadway, Albany.

*Principal officers:* President, Nicholas F. Brady; Vice-president, Carl H. Graf; Secretary and Treasurer, William G. Furlong.

*Main business office:* 112 State street, Albany.

#### **The Murray Electric Light and Power Company**

*Organization:* Incorporated February 26, 1900, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Monticello.

*Principal officers:* President, P. C. Murray; Vice-president and Treasurer, Delia Murray; Secretary, C. P. Murray.

*Main business office:* Monticello.

#### **Nassau and Suffolk Lighting Company**

*Organization:* Incorporated May 13, 1905, under the Transportation Corporations Law. January 3, 1906, the following companies were merged into Nassau and Suffolk Lighting Company: Nassau Illuminating and Power Company (gas), incorporated February 6, 1905, under the Transportation Corporations Law (term fifty years); certificate of extension of powers to include the furnishing of electricity filed March 27, 1905; South Shore Gas Company of Freeport (gas), incorporated March 6, 1905, under the Transportation Corporations Law (term fifty years); certificate of extension (territory) filed April 19, 1905; Nassau County Gas Company (gas and electricity), incorporated January 29, 1903, under the Transportation Corporations Law (term fifty years). October 31, 1905, The Hempstead Gas Light Company, incorporated April 12, 1859, under the act for the formation of gas light companies (term thirty years; term extended for thirty years from April 12, 1889, by authority of special act passed June 7, 1890, ch. 538, by certificate filed June 11, 1890), was merged with Nassau County Gas Company.

*Term of corporate existence:* Fifty years (see extension The Hempstead Gas Light Company, above).

*Location of generating plant:* Water gas: Hempstead.

*Principal officers:* President, George MacDonald; Vice-presidents, Charles Cooper, David B. Helm; Secretary, Joseph MacDonald; Treasurer, W. H. B. Cooper.

*Main business office:* 149 Broadway, New York city.

#### **Nassau Light and Power Company**

*Organization:* Incorporated February 7, 1900, under the Transportation Corporations Law, as Roslyn Light and Power Company of Roslyn, Nassau county, New York (electric); name changed July 19, 1902, by order of the Supreme Court, to Nassau Light and Power Company; powers extended to supply gas, by certificate filed March 10, 1904. The Franklin Electric Illuminating Company, incorporated February 26, 1895, under the Transportation Corporations Law (term fifty years), was merged into Nassau Light and Power Company July 2, 1903. In 1904 the company purchased the property of North Hempstead Light and Power Company, incorporated January 27, 1902, under the Transportation Corporations Law (term fifty years), and prior thereto Hempstead Municipal Light Plant. Oyster Bay Electric Light and Power Company, incorporated October 13, 1891, under the Transportation Corporations Law (term fifty years), was merged into Nassau Light and Power Company November 8, 1909. The Floral Park Light and Power Company, incorporated May 27, 1902, under the Transportation Corporations Law (term fifty years), was merged into Nassau Light and Power Company November 8, 1909. Nassau Gas, Heat and Power Company, incorporated February 20, 1904, under the Transportation Corporations Law (term fifty years), was merged into Nassau Light and Power Company November 8, 1909.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Glenwood, Long Island.

*Principal officers:* President, E. D. Morgan; Vice-presidents, Percy Chubb, C. I. Reeves; Secretary, R. O. Wilson; Treasurer, C. I. Reeves.

*Main business office:* Mineola.

**Nenno Natural Gas and Oil Company**

A letter from the president, M. W. Nenno, dated December 26, 1914, advises that the natural gas wells which belonged to the company have been pulled and abandoned and operations discontinued. No further reports will be required from this company as long as conditions remain unchanged.

**The New Berlin Light and Power Company**

*Organization:* Incorporated June 12, 1889, under the act for the formation of gas light companies (L. 1848, ch. 37).

*Term of corporate existence:* Fifty years from June 12, 1889.

*Location of generating plant:* Electric: New Berlin.

*Principal officers:* President, J. J. Cannell; Vice-president, I. L. Richer; Secretary and Treasurer, G. H. Butterfield.

*Main business office:* New Berlin.

**Newfane Electric Company**

*Control by other corporation:* Majority of capital stock owned by Lockport Felt Company.

*Organization:* Incorporated December 5, 1901, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Newfane.

*Principal officers:* Vice-president, Joseph H. Eilers; Secretary and Treasurer, William H. Lee.

*Main business office:* Newfane.

**Newport Electric Light and Power Company**

*Organization:* Incorporated January 16, 1899, under the Transportation Corporations Law.

*Term of corporate existence:* Forty-nine years.

*Location of generating plant:* Electric: Newport.

*Principal officers:* President, George S. Woodin; Secretary, A. James Eckert; Treasurer, A. W. Woodin.

*Main business office:* Newport.

**New York and Ontario Power Company**

This company owns franchises in the city of Ogdensburg, villages of Waddington and Massena, and town of Lisbon, and reports that it "does not sell electricity to consumers but leases its plant to William Marshall, who takes receipts in lieu of wages". The generating plant is at Waddington. No report has been rendered to the Public Service Commission, Second District, for the year ended December 31, 1914.

**New York State Natural Gas Corporation**

*Organization:* Incorporated November 1, 1913, under the Transportation Corporations Law.

*Term of corporate existence:* Perpetual.

*Location of natural gas wells:* Pavilion.

*Principal officers:* President, Roy A. Streeter; Vice-president, Roy C. Corbin; Secretary, Leslie J. Texter; Treasurer, Wallon E. Sawyer.

*Main business office:* Pavilion.

**Niagara and Erie Power Company**

*Control by other corporations:* Entire capital stock owned by Niagara, Lockport and Ontario Power Company, Buffalo and Lake Erie Traction Company, and Erie and Suburban Railway Company.

*Organization:* Incorporated July 12, 1909, under the Transportation Corporations Law. Purchased electric light, gas, and heating plant and the capital stock of The Fredonia Natural Gas Light Company from Buffalo and Lake Erie Traction Company. The Fredonia Natural Gas Light Company was incorporated March 31, 1865, under the General Manufacturing Law (term fifty years from October 1, 1864). Its gas plant is now inoperative. The

company purchased from The Niagara, Lockport and Ontario Power Company the Gardenville sub-station and distributing system, and high tension transmission line extending from Athol Springs to the works of the Lackawanna Steel Company at Lackawanna.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Francis V. Greene; Vice-president, Joseph B. Mayer; Secretary and Treasurer, W. L. O'Rourke.

*Main business office:* Marine Bank Building, Buffalo.

**Niagara Falls Gas and Electric Light Company**

*Control by other corporation:* Majority of capital stock owned by Niagara Falls Electrical Transmission Company.

*Organization:* Incorporated January 2, 1900, under the Transportation Corporations Law. It acquired the property and franchises of The Niagara Falls Gas Company, incorporated December 31, 1859, under the act for the formation of gas light companies (term fifty years); and The Power City Illuminating Company, incorporated February 8, 1893, under the Transportation Corporations Law (term fifty years); also the franchise in the city of Niagara Falls, Ontario, of Niagara Falls Gas Company, Limited, incorporated under the laws of the Province of Ontario.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: LaSalle (not operated during 1914); Coal gas: Foot of Niagara street, Niagara Falls.

*Principal officers:* President, F. A. Dudley; Vice-president and Treasurer, Frederic Nicholls; Secretary, D. H. McDougall.

*Main business office:* 306 Niagara street, Niagara Falls.

**The Niagara Falls Power Company**

*Organization:* Incorporated by special act passed March 31, 1886 (ch. 83), under the name of Niagara River Hydraulic Tunnel, Power and Sewer Company of Niagara Falls, New York (see amendments, L. 1886, ch. 489; L. 1889, ch. 109). *Principal officers:* President, F. D. Corey; Vice-president, Langdon Albright; Secretary, H. E. Nichols; Treasurer, H. C. Mather.

*Corporate office:* Marine Bank Building, Buffalo.

#### **The Nichols Gas Company**

*Organization:* Incorporated April 10, 1902, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Acetylene gas: Nichols.

*Principal officers:* President, H. C. Kirby; Vice-president, H. A. Latham; Secretary and Treasurer, J. C. Latham.

*Main business office:* Main street, Nichols.

#### **The North Buffalo Natural Gas Fuel Company**

*Organization:* Incorporated February 15, 1889, under the act for the formation of gas light companies (L. 1848, ch. 37).

*Term of corporate existence:* Fifty years.

*Location of natural gas wells:* Buffalo.

*Principal officers:* President, F. M. Lowry; Vice-president, C. E. Hill; Secretary and Treasurer, Arthur J. Devlin.

*Main business office:* 842 Marine National Bank Building, Buffalo.

#### **North Collins Fuel and Supply Company**

*Organization:* Incorporated April 12, 1901, under the Business Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of natural gas wells:* North Collins.

*Principal officers:* President, Charles E. Williams; Vice-president, George J. Brendel; Secretary, Frank C. Brendel; Treasurer, Joseph Thiel.

*Main business office:* 524 Brisbane Building, Buffalo.

#### **North Creek Electric Company**

*Organization:* Incorporated July 6, 1909, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: three miles north of North Creek.

*Principal officers:* President, Charles S. Wood; Vice-president, P. Moynahan; Secretary and Treasurer, Charles S. Wade.

*Main business office:* North Creek.

#### **Northern Adirondack Power Company**

*Organization:* Incorporated August 15, 1898, under the name of Keeseville Electric Company, under the Transportation Corporations Law. Name changed to Northern Adirondack Power Company, to take effect February 10, 1912, by order filed January 11, 1912.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Ausable Chasm.

*Principal officers:* President, Thomas O'Connor; Vice-president, Karl J. Severance; Secretary, Emma J. Powers; Treasurer, William P. Dauchy.

*Main business office:* 52 Broad street, Waterford.

#### **Northern New York Utilities, Inc.**

See Carthage Electric Light and Power Company, and Watertown Light and Power Company.

*Organization:* Incorporated May 12, 1913, under the Transportation Corporations Law. December 11, 1914, it merged Watertown Light and Power Company; and November 19, 1914, it purchased the franchises, etc., of Carthage Electric Light and Power Company, which was voluntarily dissolved by certificate filed January 11, 1915.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Mill street, Watertown; Dexter; South Edwards; Effley Falls; Taylorville; Black River; Coal gas and water gas: 327 Engine street, Watertown.

*Principal officers:* President, C. C. Burns; Vice-presidents, S. L. George, F. A. Rogers; Secretary, F. A. Rogers; Treasurer, John B. Taylor.

*Main business office:* 137 Arsenal street, Watertown.

#### **Northern Power Company**

*Organization:* Incorporated May 16, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, W. B. Cogswell; Vice-president, E. J. Page; Treasurer, F. A. Stoughton.

*Main business office:* Potsdam.

#### **The Northern Wayne Electric Light and Power Company**

*Organization:* Incorporated March 6, 1911, under the Transportation Corporations Law. Succeeded to the plant and franchises of O. M. Curtis, transacting business under the name of Wolcott Electric Light and Power Company.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Wolcott.

*Principal officers:* President and Treasurer, Omar M. Curtis; Secretary, William J. Clapper.

*Main business office:* Wolcott.

#### **Northern Westchester Lighting Company**

*Control by other corporation:* Entire capital stock owned by Westchester Lighting Company.

*Organization:* Incorporated May 5, 1905, under the Transportation Corporations Law. May 26, 1905, the following companies were merged into Northern Westchester Lighting Company: Ossining Heat, Light and Power Company, incorporated December 27, 1900, under the Transportation Corporations Law (term fifty years from December 27, 1900); Northern Westchester Light and Power Company, incorporated December 8, 1904, under the Transportation Corporations Law (term fifty years); and Briarcliff Manor Light and Power Company, incorporated November 1, 1900, under the Transportation Corporations Law (term fifty years). Northern Westchester Lighting Company is also owner of franchises and privileges of The Sing Sing Electric Lighting Company, incorporated April 11, 1889, under the General Manufacturing Law (L. 1848, ch. 40), for the purpose of manufacturing electricity as provided in L. 1882, ch. 73, amending ch. 512 of laws 1879 (term fifty years); Sing Sing Gas Manufacturing Company, incorporated November 1, 1855 (earlier certificate filed June 25, 1855, same name), under the act for the formation of gas light companies (term fifty years); and Croton Electric Light and Power Company, incorporated July 3, 1900, under the Transportation Corporations Law (term fifty years from July 3, 1900).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Foot of Broadway, Ossining; Water gas: Water street, Ossining.

*Principal officers:* President, F. A. Stratton; Vice-president, Stuart Wilder; Secretary, B. W. Stilwell; Treasurer, R. A. Carter.

*Main business office:* 127 Main street, Ossining.

#### **North Shore Electric Light and Power Company**

*Organization:* Incorporated March 10, 1909, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years from March 10, 1909.

*Location of generating plant:* Electric: Port Jefferson.

*Principal officers:* President, Ellis L. Phillips; Vice-president, Gurney E. Lott; Secretary, Benjamin T. West; Treasurer, Henry R. Frost.

*Main business office:* Port Jefferson.

#### **North Syracuse Light and Power Company**

*Organization:* Incorporated December 27, 1909, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Main business office:* North Syracuse.

#### **The Norwich Gas and Electric Company**

See The Oxford Electric Light Company.

*Control by other corporation:* Majority of capital stock deposited with Philadelphia Trust, Safe Deposit and Insurance Company as trustee.

*Organization:* Incorporated November 15, 1899, under the Transportation Corporations Law. November 13, 1914, it merged The Oxford Electric Light Company (transfer taking effect from July 31, 1914).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Norwich; Water gas: Norwich.

*Principal officers:* President, J. H. Pardee; Vice-presidents, C. A. Greenidge, J. I. Mange; Secretary and Treasurer, H. B. Brown.

*Main business office:* Norwich.

#### **The Norwood Electric Light and Power Company**

*Organization:* Incorporated September 5, 1894, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Yalesville.

*Principal officers:* President and Secretary, S. P. Phelps; Vice-president, A. M. Phelps; Treasurer, C. F. Vanece.

*Main business office:* Norwood.

#### **Ogdensburg Gas Company**

*Control by other corporation:* Majority of capital stock owned by St. Lawrence Gas, Electric and Transportation Company.

*Organization:* Incorporated August 23, 1854, under the act for the formation of gas light companies (L. 1848, ch. 37).

*Term of corporate existence:* Fifty years from August 18, 1854; certificate of extension for fifty years dated July 6, 1904, filed July 8, 1904; amended certificate of extension filed August 12, 1904.

*Location of generating plant:* Coal gas: King street, Ogdensburg.

*Principal officers:* President and Treasurer, E. E. Hawkins; Secretary, R. E. Waterman.

*Main business office:* 1 Ford street, Ogdensburg.

#### **Ogdensburg Power and Light Company**

*Control by other corporation:* Majority of capital stock owned by St. Lawrence Gas, Electric and Transportation Company.

*Organization:* Incorporated May 24, 1897, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Main street; Lake and River streets, Ogdensburg.

*Principal officers:* President and Treasurer, E. E. Hawkins; Secretary, R. E. Waterman.

*Main business office:* 1 Ford street, Ogdensburg.

#### **Olean Electric Light and Power Company**

See Cattaraugus County Lighting Company.

*Organization:* The Olean Electric Light and Power Company (old company), incorporated November 11, 1887, under the General Manufacturing Law (L. 1848, ch. 40), was succeeded by Olean Electric Light and Power Company (new company), formerly Cattaraugus County Lighting Company; see that title.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Olean, Franklinville.

*Principal officers:* President, Arthur A. McGivney; Vice-presidents, Fred B. Hoff, Walter A. Zinke; Secretary, John J. Gallagher; Treasurer, Peter C. Schutrum.

*Main business office:* Olean.

#### **The Oliver Gas and Fuel Company**

*Organization:* Incorporated April 9, 1912, under the Business Corporations Law.

*Term of corporate existence:* Perpetual.

*Remarks:* Returns incomplete; not tabulated. February 3, 1913, this company was authorized by the Public Service Commission, Second District, to construct and maintain its pipe lines, etc., and to exercise its franchise for the purpose of selling and distributing natural gas in the town of Tonawanda, Erie county; and was also authorized to issue \$2100 par value common capital stock. The report for the year ended December 31, 1914, states that "The plant consists only of pipes laid throughout the town of Tonawanda used for the distribution of gas," and that "There are no debts or obligations outstanding and a very few accounts due, only for sale of gas".

*Principal officers:* President, Robert M. Zimmerman; Secretary, Margaret Zimmerman; Treasurer, Ida M. Zimmerman.

*Main business office:* Kenmore.

#### **Oneonta Light and Power Company**

*Organization:* Incorporated February 24, 1902, under the Transportation Corporations Law. It acquired the

property of The Oneonta Gas Light Company, incorporated June 9, 1881, under the act for the formation of gas light companies (term fifty years), voluntarily dissolved under section 57 of the Stock Corporation Law, certificate filed July 5, 1902; and the property of The Oneonta Electric Light and Power Company, incorporated September 19, 1887, under the act for the formation of gas light companies (term fifty years), voluntarily dissolved under section 57 of the Stock Corporation Law, certificate filed July 5, 1902. Electric Water Power Company of Oneonta, incorporated by special act passed April 12, 1898 (ch. 234), term ninety-nine years, was merged into Oneonta Light and Power Company September 7, 1911.

*Term of corporate existence:* Fifty years from February 24, 1902.

*Location of generating plants:* Electric: Oneonta; Water gas: Oneonta.

*Principal officers:* President, Edward E. Arnold; Secretary and Treasurer, J. R. Gladding.

*Main business office:* 53 Canal street, Providence, R. I.

#### Ontario Gas Company

*Organization:* Incorporated August 19, 1902, under the Business Corporations Law (term ninety-nine years), and consolidated January 25, 1904, with Lima Natural Gas Company, incorporated October 9, 1902, under the Business Corporations Law (term fifty years), under the name of Ontario Gas Company. Succeeded to the franchises, etc., of Ontario Improvement and Gas Company, Limited, incorporated October 27, 1883, under "An act to provide for the organization and regulation of certain business corporations" (L. 1875, ch. 611), term fifty years.

*Term of corporate existence:* Fifty years (consolidated company).

*Location of natural gas wells:* Towns of West Bloomfield, East Bloomfield, Bristol, Richmond, and Lima.

*Principal officers:* President, A. Miner Wellman; Vice-president, H. A. Corbin; Secretary and Treasurer, Guy Wellman.

*Main business office:* Honeoye Falls.

#### Ontario Light and Traction Company

*Control by other corporation:* Entire capital stock owned by New York State Railways.

*Organization:* Incorporated June 7, 1900, as a reorganization of Canandaigua Electric Light and Railroad Company, incorporated March 6, 1888, as Canandaigua Electric Light Company, under the General Manufacturing Law (term fifty years from February 25, 1888). Canandaigua Electric Light Company purchased June 24, 1893, under foreclosure sale, the property of Canandaigua Street Railroad Company, under authority of special act passed April 12, 1893 (ch. 357); and on July 21, 1893, filed an amended certificate of incorporation by which name of company was changed to Canandaigua Electric Light and Railroad Company. Canandaigua Street Railroad Company was incorporated May 4, 1886, under the act for the incorporation of street surface railroads (L. 1884, ch. 252), term fifty years. The street railroad of this company is leased to and operated by New York State Railways.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Littleville, Canandaigua, Shortsville; plants at Canandaigua and Shortsville not reported as operated during 1914.

*Principal officers:* President, Horace E. Andrews; Vice-presidents, William K. Vanderbilt, jr., Granger A. Hollister, Robert M. Searle; Secretary, Joseph C. Collins; Treasurer, Edward L. Rossiter.

*Main business office:* 34 Clinton avenue, North, Rochester.

#### The Orange and Rockland Electric Company

*Organization:* Incorporated March 31, 1895, under the Transportation Corporations Law; amended certificate filed January 15, 1907.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Monroe.

*Principal officers:* President, R. W. Smith; Vice-president, Alfred J. Crane; Secretary, Zael Paddleford; Treasurer, Frank Durland.

*Main business office:* Monroe.

#### Orange County Lighting Company

*Organization:* Incorporated January 3, 1905, as a reorganization of Orange County Gas and Electric Company, incorporated April 30, 1900, under the Transportation Corporations Law. Purchased December 1, 1905, the franchises, works, system, and property of Consumers Light and Power Company of Middletown, New York, incorporated February 11, 1901, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years (Orange County Gas and Electric Company).

*Location of generating plants:* Electric: Middletown; Water gas: Middletown.

*Principal officers:* President, L. C. Purdy; Vice-president, A. W. Preston; Secretary, Theo. L. Reeve; Treasurer, Arh Taylor.

*Main business office:* Middletown, N. Y.

#### Oswegatchie Light and Power Company

*Control by other corporation:* Majority of capital stock owned by International Pulp Company.

*Organization:* Incorporated July 6, 1894, under the Transportation Corporations Law. Succeeded to the franchises, etc., of American Illuminating and Power Company of Gouverneur, N. Y., incorporated November 15, 1887 (act not specified; filed as manufacturing corporation), term fifty years.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Fowler, Hailesboro.

*Principal officers:* President, M. Doyle; Vice-president, W. C. Geer; Secretary, S. J. McCrimlisk; Treasurer, M. M. Belding, jr.

*Main business office:* Gouverneur.

#### Oswego River Power Transmission Company

*Organization:* Incorporated May 13, 1905, under the Transportation Corporations Law. In 1911 it acquired the franchises of The Hannibal Electric Company, incorporated May 16, 1910, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, S. B. Storer; Vice-president, E. M. White; Secretary and Treasurer, G. W. Pulver.

*Main business office:* 724 University Block, Syracuse.

#### Otego Lighting Company

*Organization:* Incorporated October 26, 1903, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Gasoline gas: Otego.

*Principal officers:* President, V. S. Fuller; Secretary, M. J. Fuller Morgan; Treasurer, G. M. Fuller Conner.

*Main business office:* Otego.

#### Ovid Electric Company

*Organization:* Incorporated September 18, 1903, under the Transportation Corporations Law. February 19, 1914, the Commission authorized the lessor, Ulysses Light, Heat and Power Company, incorporated December 5, 1903,

under the Transportation Corporations Law (term fifty years), to sell all franchises and property to this company.

*Term of corporate existence:* Fifty years from July 1, 1903.

*Location of generating plant:* Electric: Taughannock Falls.

*Principal officers:* President and Treasurer, A. Buys; Secretary, Orville Buys.

*Main business office:* Trumansburg.

#### *Lessor Company*

**Ulysses Electric Light, Heat and Power Company:** The property of this company was formerly leased to and operated by the Ovid Electric Company. February 19, 1914, the Public Service Commission, Second District, granted the Ulysses Electric Light, Heat and Power Company permission to sell all its property and franchises to the Ovid Electric Company. No report was required from this corporation for the year ended December 31, 1914.

#### **The Owego Gas Light Company**

*Organization:* Incorporated March 24, 1856, under the act for the formation of gas light companies (L. 1848, ch. 37).

*Term of corporate existence:* Fifty years from March 20, 1856; extended for fifty years by certificate dated April 2, 1909, filed April 8, 1909, as authorized by order of Supreme Court granted March 22, 1909, and filed with such certificate.

*Location of generating plant:* Coal gas: Owego.

*Principal officers:* President and Treasurer, William T. Morris; Secretary, Morris Tracy.

*Main business office:* Owego.

#### **The Owego Light and Power Company**

*Organization:* Incorporated November 5, 1890, under the General Manufacturing Law (L. 1848, ch. 40).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Owego.

*Principal officers:* President, W. S. Truman; Vice-president, W. G. Phelps; Secretary and Treasurer, George F. Andrews.

*Main business office:* Owego.

#### **The Oxford Electric Light Company**

See Norwich Gas and Electric Company.

*Organization:* Incorporated April 14, 1892, under the Transportation Corporations Law. July 31, 1914, it was succeeded by Norwich Gas and Electric Company, with which it was merged November 13, 1914.

*Term of corporate existence:* Until April 1, 1942.

*Location of generating plant:* Electric: Oxford.

*Principal officers:* President, J. I. Mange; Vice-president, J. C. Estelow; Secretary and Treasurer, W. E. O'Neil.

*Main business office:* Oxford.

#### **The Panama Power Company**

*Organization:* Incorporated August 13, 1907, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Panama.

*Principal officers:* President, L. C. Green; Vice-president, Walter Tanner; Secretary and Treasurer, E. M. Wiltsie.

*Main business office:* Panama.

#### **The Parish Lighting Company**

*Organization:* Incorporated July 10, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Twenty-five years.

*Location of generating plant:* Acetylene gas: Parish.

*Principal officers:* President, L. M. Robertson; Vice-president, George Weaver; Secretary and Treasurer, R. C. Robertson.

*Main business office:* Parish.

#### **The Patchogue Electric Light Company**

*Organization:* Incorporated March 3, 1888, under the act for the formation of gas light companies (L. 1848, ch. 37).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Patchogue.

*Principal officers:* President, E. E. Hawkins, jr.; Vice-president, Joseph T. Losee; Secretary, Howard S. Conklin; Treasurer, Ralph R. Hawkins.

*Main business office:* Patchogue.

#### **Patchogue Gas Company**

*Organization:* Incorporated October 21, 1902, under the Transportation Corporations Law. In August, 1911, purchased property, etc., of Bellport Lighting Company, incorporated April 17, 1905, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Water gas: Patchogue.

*Principal officers:* President, George T. Peck; Secretary and Treasurer, Robert Taylor.

*Main business office:* Patchogue.

#### **The Paul Smith's Electric Light and Power and Railroad Company**

*Organization:* For history of organization see Electric Railroad Corporations.

*Term of corporate existence:* Fifty years from July 10, 1905.

*Location of generating plants:* Electric: Saranac Lake (not reported as operated during 1914), Union Falls, Franklin Falls.

*Principal officers:* President and Secretary, Paul Smith; Treasurer, Phelps Smith.

*Main business office:* Saranac Lake.

#### **The Pavilion Natural Gas Company**

*Control by other corporation:* Majority of capital stock owned by Independent Natural Gas Company.

*Organization:* Incorporated November 15, 1905, under the Business Corporations Law.

*Term of corporate existence:* Perpetual.

*Location of natural gas wells:* Genesee and Wyoming counties, near Pavilion.

*Principal officers:* President, John A. Beck; Vice-president, Charles E. Suecop; Secretary and Treasurer, John H. Friday.

*Main business office:* LeRoy.

#### **Peekskill Lighting and Railroad Company**

*Control by other corporation:* Majority of capital stock owned by Westchester Lighting Company.

*Organization:* See Electric Railroad Corporations.

*Term of corporate existence:* Five hundred years from August 28, 1900 (amended certificate of Peekskill Lighting and Railroad Company).

*Location of generating plants:* Electric: Water street, Peekskill; Water gas: Water street, Peekskill.

*Principal officers:* President, F. A. Stratton; Vice-president, Stuart Wilder; Secretary, B. W. Stilwell; Treasurer, R. A. Carter.

*Main business office:* 127 Main street, Ossining.

#### **Pennsylvania Gas Company**

*Control by other corporation:* Majority of capital stock owned by National Fuel Gas Company.

*Organization:* Incorporated July 8, 1881, under the name of Warren Light and Heat Company, under the laws of Pennsylvania, which purchased the property of the following named companies, incorporated under the laws of Pennsylvania, at the following dates: The Warren County, Pennsylvania, Gas Fuel and Heating Company, July 8, 1881; The Rural Heat and Light Company, July

8, 1881; The Pleasant Gas and Heat Company, May 25, 1883; The Glade Gas and Heat Company, November 15, 1883; The Kinzua Natural Gas Company, September 20, 1883; The Pine Grove Gas Company, November 13, 1883; The Elk Gas Company, September 20, 1883; The North Warren Gas and Heat Company, November 15, 1883. Authorized to transact business in the State of New York by certificate filed January 30, 1893, with the Secretary of State.

*Term of corporate existence:* Ninety-nine years.

*Location of natural gas wells:* All wells located in Pennsylvania.

*Principal officers:* President, Walter Jennings; Vice-president, J. P. Jefferson; Secretary and Treasurer, W. H. Filler.

*Main business office:* 213 Second avenue, Warren, Penna.

#### **The Penn Yan Gas Light Company**

*Organization:* Incorporated May 14, 1860, under the act for the formation of gas light companies (L. 1848, ch. 37).

*Term of corporate existence:* Fifty years from May 9, 1860; extended fifty years by certificate dated June 11, 1909, filed June 18, 1909.

*Location of generating plant:* Coal gas: Penn Yan.

*Principal officers:* President and Treasurer, William T. Morris; Secretary, Morris Tracy.

*Main business office:* Penn Yan.

#### **People's Electric Light and Power Company of Silver Creek**

*Organization:* Incorporated May 26, 1892, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Silver Creek.

*Principal officers:* Vice-president, Lyman Newton; Secretary, Leon H. Brand.

*Main business office:* Silver Creek.

#### **Peoples Gas and Electric Company of Oswego**

*Organization:* Incorporated April 26, 1900, under the Transportation Corporations Law, and acquired the property and franchises of the following companies: Oswego Gas Light Company, incorporated April 22, 1852, under the act for the formation of gas light companies (term fifty years); Home Electric Light Company, Limited, incorporated August 5, 1886, under "An act to provide for the organization and regulation of certain business corporations," L. 1875, ch. 611 (term fifty years); and Peoples Electric Light and Power Company, incorporated December 10, 1890, under the General Manufacturing Law (term fifty years from December 10, 1890). *Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: 70 East First street; foot Hubbard street, Oswego (not in operation since 1911); Coal gas: West Utica street, Oswego.

*Principal officers:* President, A. B. Tenney; Vice-presidents, D. E. Manson, H. T. Sands; Secretary, H. P. Wood; Treasurer, R. F. Whitney.

*Main business office:* 70 East First street, Oswego.

#### **The People's Natural Gas Company**

*Organization:* Incorporated September 16, 1901, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of natural gas wells:* Ebenezer.

*Principal officers:* President, Fred L. Vogel; Vice-president, Mary Vogel; Secretary and Treasurer, William J. Doetsch.

*Main business office:* 894 Ellicott Square, Buffalo.

#### **The Perry Electric Light Company**

*Organization:* Incorporated February 11, 1893, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Perry.

*Principal officers:* President, George W. Olmsted; Vice-president, L. P. Benedict; Secretary, Henry R. Frost; Treasurer, C. W. Torrey.

*Main business office:* Perry.

#### **Philmont Lighting and Power Company**

*Organization:* Incorporated January 7, 1907, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Acetylene gas: Philmont.

*Principal officers:* President, George Leary; Secretary and Treasurer, Fred H. Schomburg.

*Main business office:* Philmont.

#### **Phoenix (Robert J. Pendergast)**

It appears that Mr. Pendergast formerly owned both a natural gas and an electric plant situated in the village of Phoenix. A letter from Mr. Pendergast dated May 24, 1915, states that the "supply of natural gas gave out several years ago" and that the "mains are not now in use". The electric plant formerly owned by Mr. Pendergast has been transferred to the Phoenix Gas and Electric Company, Inc., under which title the operations of this plant for the year ended December 31, 1914, are reported.

#### **Phoenix Gas and Electric Company, Inc.**

*Organization:* Incorporated December 2, 1913, under the Transportation Corporations Law. Succeeded to the franchises, etc., of Phoenix Fuel, Light and Water Company, incorporated April 19, 1905, under the Business Corporations Law, which in turn succeeded to franchises, etc., of Phoenix Natural Gas and Oil Company, incorporated July 12, 1895, under the Business Corporations Law (term fifty years); name changed to The Fulton-Phoenix Natural Gas Company by order of the Supreme Court April 25, 1898. Phoenix Fuel, Light and Water Company acquired gas plant of Phoenix Fuel and Light Company, incorporated September 27, 1902, under the Business Corporations Law (term fifty years); (voluntarily dissolved by certificate filed March 20, 1906); also water works from Phoenix Water Supply Company; also industrial works, including building and water power, from Oswego River Realty Company at the time of the organization of the company. It was adjudicated a bankrupt June 21, 1912, G. Harold Merry, trustee. March 15, 1913, the assets of the company were sold and transferred to Robert J. Pendergast, later succeeded by Phoenix Gas and Electric Company, Inc., as above stated.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Phoenix (not operated during 1914).

*Principal officers:* President, J. A. Hawks; Vice-president, Herbert Dunn; Secretary and Treasurer, L. M. Hutchinson.

*Main business office:* Phoenix.

#### **Pierce Natural Gas Company**

*Organization:* Incorporated September 27, 1911, under the Business Corporations Law.

*Term of corporate existence:* Perpetual.

*Location of natural gas wells:* Town of Hamburg, Erie county.

*Principal officers:* President, V. Mott Pierce; Vice-president, Horace F. Hunt; Secretary, Everett H. Hunt; Treasurer, Charles G. Heger.

*Main business office:* Hamburg.

**Pine Bush (Edward R. Senn)**

October 13, 1914, the Public Service Commission, Second District, approved the construction of an electric plant by Edward R. Senn in the lighting district of the unincorporated village of Pine Bush, in the town of Crawford, Orange county, and for the exercise of franchise rights in said lighting district. No report has been rendered to the Public Service Commission, Second District, for the period ended December 31, 1914.

**The Pittsford Light and Heat Company**

*Organization:* Incorporated February 21, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Acetylene gas: Pittsford.

*Principal officers:* President, John Steve; Secretary and Treasurer, B. N. Wiltsie.

*Main business office:* Pittsford.

**Plattsburgh Gas and Electric Company**

*Organization:* Incorporated August 14, 1909, as a consolidation of Plattsburgh Light, Heat and Power Company, incorporated December 30, 1889, under the act for the formation of gas light companies (term fifty years); and Lozier Light and Power Company, incorporated August 6, 1904, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Saranac street, Plattsburgh; Indian Rapids; Coal gas and water gas: Saranac street, Plattsburgh.

*Principal officers:* President, George M. Cole; Vice-president, William M. Levy; Secretary and Treasurer, O. J. Nichols.

*Main business office:* 30 Margaret street, Plattsburgh.

**Port Henry Light, Heat and Power Company**

*Organization:* Incorporated June 26, 1906, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Port Henry.

*Principal officers:* President, Wallace Murray; Vice-president, Seward A. Foote; Secretary, George H. Barwise; Treasurer, Cyril F. Carpenter.

*Main business office:* Port Henry.

**Port Jefferson Electric Light Company**

*Organization:* Incorporated January 25, 1896, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Port Jefferson.

*Principal officers:* President, H. M. Randall; Vice-president, W. L. Davis; Secretary and Treasurer, W. T. Wheeler.

*Main business office:* Port Jefferson.

**Port Jervis Light and Power Company**

*Organization:* Incorporated April 16, 1909, under the Transportation Corporations Law, taking title to the lighting and power properties of Port Jervis Electric Light, Power, Gas and Railroad Company, incorporated November 22, 1901, under the name of The Port Jervis Electric Light, Power and Gas Company, as a consolidation (term fifty years) of Port Jervis Light and Power Company, incorporated March 5, 1898, under the Transportation Corporations Law (term fifty years); Deerpark Electric Light Company of Port Jervis, Limited, incorporated September 10, 1886, under "An act to provide for the organization and regulation of certain business corporations" (L. 1875, ch. 611), term thirty years; and The Port Jervis Gas Company, incorporated August 24, 1894,

under the Transportation Corporations Law (term fifty years). The name of The Port Jervis Electric Light, Power and Gas Company was changed, under section 21 of the Railroad Law, by certificate filed February 4, 1902, to Port Jervis Electric Light, Power, Gas and Railroad Company.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Port Jervis; Water gas: Port Jervis.

*Principal officers:* President, E. E. Mandeville; Vice-president, George H. Stephenson; Secretary and Treasurer, M. F. Moury.

*Main business office:* Port Jervis.

**The Potsdam Electric Light and Power Company**

*Control by other corporation:* Entire capital stock owned by Hannawa Falls Water Power Company.

*Organization:* Incorporated October 14, 1886, under the act for the formation of gas light companies (L. 1848, ch. 37).

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, E. J. Page; Treasurer, F. A. Stoughton.

*Main business office:* Potsdam.

**Potter Gas Company**

*Organization:* Incorporated January 28, 1898, under the laws of Pennsylvania. Authorized to transact business in the State of New York by certificate filed with the Secretary of State February 7, 1903.

*Term of corporate existence:* Ninety-nine years.

*Location of natural gas wells:* Allegany county.

*Principal officers:* President, Robert Law, jr.; Vice-president, E. B. Reiser; Secretary, Howard White; Treasurer, W. H. Richards.

*Main business office:* 1011 Farmers Bank Building, Pittsburgh, Penna.

**Producers Gas Company**

*Organization:* Incorporated August 23, 1900, as a consolidation of Producers' Gas Company, incorporated June 11, 1891, under the Business Corporations Law (term fifty years); and The Allegany Gas Company, Limited, incorporated January 22, 1884, under "An act to provide for the organization and regulation of certain business corporations" (L. 1875, ch. 611), term fifty years.

*Term of corporate existence:* Fifty years.

*Location of natural gas wells:* Genesee, Bolivar, Wirt.

*Principal officers:* President, E. J. Wilson; Vice-president, G. S. Russell; Secretary and Treasurer, E. M. Johnson.

*Main business office:* Olean.

**Public Service Corporation of Long Island**

*Organization:* Incorporated December 9, 1911, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of water gas.

*Principal officers:* President, Henry MacDonald; Secretary, Joseph MacDonald; Treasurer, W. H. B. Cooper.

*Main business office:* 85 Liberty street, New York city.

**Pulaski Electric Light Company**

*Organization:* Incorporated June 29, 1900, under the Transportation Corporations Law. Certificate of extension (territory) filed December 4, 1911. November 27, 1912, the Commission approved a transfer of franchises in the towns of Orwell and Albion, Oswego county, to Salmon River Power Company.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Pulaski.

*Principal officers:* President, Fred D. Covey; Vice-president, Langdon Albright; Secretary and Treasurer, H. E. Nichols.

*Main business office:* Pulaski.

#### **The Pulaski Gas and Oil Company, Limited**

*Organization:* Incorporated January 13, 1890, under the name of The Pulaski Gas and Oil Company, Limited, under "An act to provide for the organization and regulation of certain business corporations" (L. 1875, ch. 611), term fifty years; reincorporated January 25, 1898, under the Business Corporations Law.

*Term of corporate existence:* Fifty years (reincorporated company).

*Location of natural gas wells:* Pulaski and vicinity.

*Principal officers:* President, Mary Douglas; Vice-president, S. J. Curry; Secretary and Treasurer, George W. Douglas.

*Main business office:* Pulaski.

#### **Queens Borough Gas and Electric Company**

Incorporated May 29, 1902, under the Transportation Corporations Law. September 19, 1902, it merged The Town of Hempstead Gas and Electric Light Company, incorporated May 20, 1882, under the act for the formation of gas light companies (term fifty years); and Queens Borough Electric Light and Power Company, incorporated February 28, 1898, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

This company, while conducting operations in a few villages within the Second Public Service District, is required to report only to the Commission of the First District.

#### **Quogue Gas Company**

*Organization:* Incorporated September 5, 1906, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Acetylene gas: Quogue.

*Principal officers:* President, David C. Townsend; Vice-president, Erastus F. Post; Secretary and Treasurer, Abram S. Post.

*Main business office:* Quogue.

#### **Randolph Light and Power Company, Inc.**

*Organization:* Incorporated March 30, 1914, under the Transportation Corporations Law. Took over property and business of Randolph Electric Light and Power Company (unincorporated).

*Location of generating plant:* Electric: Randolph.

*Principal officers:* President and Treasurer, G. M. Gest; Vice-president and Secretary, Ed. Wisniewski.

*Main business office:* 1330 Woolworth Building, New York city.

#### **Red Hook Light and Power Company**

*Organization:* Incorporated February 13, 1906, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Bingham Mills.

*Principal officers:* President, George Leary; Secretary and Treasurer, Fred H. Schomburg.

*Main business office:* 17 State street, New York city.

#### **Rensselaer Falls Electric Light and Power Company**

*Organization:* Incorporated December 23, 1908, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Rensselaer Falls.

*Principal officers:* President, Eugene Mansion; Vice-president, W. S. Blair; Secretary and Treasurer, Frank Mansion.

*Main business office:* Rensselaer Falls.

#### **Richburg (F. L. Putnam and Son)**

This partnership distributes a small amount of natural gas in the village of Richburg, in connection with its oil business. Returns are incomplete and have not been tabulated. It is stated that 7 oil and 3 gas wells were owned, and that between 20 and 25 flat rate consumers were served at the close of 1914.

#### **Richburg (Levi Hardman and Sons)**

This partnership distributes natural gas in connection with its oil business. Returns are incomplete and have not been tabulated. It is stated that a revenue of \$1350 was received from the sale of gas during 1914, and that there were 20 flat rate consumers and 22 consumers' meters in service at the close of the year. The amount invested in the business is estimated at \$5000.

#### **The Riddell Electric Light and Power Corporation**

*Organization:* Incorporated April 3, 1914, under the Transportation Corporations Law, as the Riddell Electric Light Company, Inc. Name changed as above by order of the Supreme Court effective August 15, 1914.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, E. J. Riddell; Vice-president, E. E. Riddell; Secretary and Treasurer, M. B. Riddell.

*Main business office:* Luzerne.

#### **The Ridge Road Gas and Oil Company**

*Organization:* Incorporated April 20, 1910, under the Business Corporations Law.

*Term of corporate existence:* Perpetual.

*Location of natural gas wells:* Village and town of Hamburg.

*Principal officers:* President, George M. Reimer; Vice-president, William Kock; Secretary, Benjamin J. Meyers; Treasurer, Jacob Hanck.

*Main business office:* Hamburg.

#### **The Ripley Electric Company**

*Organization:* Incorporated May 1, 1912, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Ripley.

*Principal officers:* President, S. E. Persons; Secretary and Treasurer, R. G. Hildred.

*Main business office:* Ripley.

#### **Riverhead Electric Light Company**

*Organization:* Incorporated November 9, 1893, under the Transportation Corporations Law. Amended certificate (territory and supply of gas) filed June 9, 1910. In 1910 bought plant of and succeeded Hallet Light and Power Company, incorporated June 27, 1907, under the Transportation Corporations Law (term fifty years). August 15, 1912, the Commission authorized the transfer of that part of its franchises in the town of Southampton to the Suffolk Light, Heat and Power Company.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Riverhead.

*Principal officers:* President, Timothy M. Griffing; Vice-president, Archibald Hallett; Secretary, Mary G. Litchard; Treasurer, Robert C. Griffing.

*Main business office:* Riverhead.

**Rochester Railway and Light Company**

*Control by other corporation:* Majority of capital stock owned by Mohawk Valley Company.

*Organization:* Incorporated June 11, 1904, as a consolidation of Rochester Gas and Electric Company, incorporated August 4, 1892, as a consolidation (term fifty years) of Rochester Gas Company, incorporated April 15, 1891, as a consolidation (term fifty years) in turn of The Rochester Gas Light Company, incorporated May 22, 1848, under the act for the formation of gas light companies (L. 1848, ch. 37), term fifty years; The Citizens Gas Company of Rochester, incorporated April 16, 1872, under the act for the formation of gas light companies (term fifty years); The Municipal Gas Light Company of the City of Rochester, incorporated March 30, 1880, under the act for the formation of gas light companies (term fifty years); The Rochester Electric Light Company, incorporated February 25, 1880, under the General Manufacturing Law (L. 1848, ch. 40), term fifty years; and The Edison Electric Illuminating Company of Rochester, incorporated April 23, 1886, under the act for the formation of gas light companies (term fifty years). December 2, 1899, Rochester Gas and Electric Company merged The Brush Electric Light Company of Rochester, incorporated June 25, 1881, under the General Manufacturing Law (term fifty years). May 24, 1904, it also merged Municipal Gas and Electric Company of Rochester, incorporated January 8, 1902, under the Transportation Corporations Law (term fifty years), into which on June 7, 1902, was merged Citizens Light and Power Company, incorporated October 4, 1892, under the Transportation Corporations Law (term fifty years), and Rochester Light and Power Company, incorporated January 6, 1903, under the Transportation Corporations Law (term fifty years). January 24, 1903, The Central Light and Power Company, incorporated July 24, 1893, under the Transportation Corporations Law (term fifty years), was merged into Rochester Light and Power Company. The Village of Charlotte sold its electric lighting plant to Rochester Railway and Light Company, which was operated from and after January 1, 1913.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Brown's Race, Mill street and Brown's Race, Central avenue and North Water street, St. Paul street and Driving Park avenue, South Water street, Hastings and Middle Falls, Graves street, Elmwood avenue, Freeman street, Litchfield street, Rochester; Coal gas and water gas: Vincent Street flats, Rochester.

*Principal officers:* President, Horace E. Andrews; Vice-presidents, Walter N. Kernan, Granger A. Hollister, Robert M. Searle; Secretary, Joseph C. Collins; Treasurer, Edward L. Rossiter.

*Main business office:* 34 Clinton avenue, North, Rochester.

**Rockland Electric Company**

April 28, 1914, the Public Service Commission, Second District, approved the merger of Rockland Electric Company and Rockland Light and Power Company, and granted permission to the latter company to exercise all the rights, privileges, and franchises of Rockland Electric Company. All operations of Rockland Electric Company during 1914 are included in the report of Rockland Light and Power Company (see that title).

**Rockland Light and Power Company**

*Control by other corporation:* Majority of capital stock owned by Rockland Purchase Syndicate.

*Organization:* Incorporated August 24, 1899, under the Transportation Corporations Law. October 14, 1899, it merged Nyack Electric Light and Power Company, incorporated April 20, 1887, under the General Manufacturing Law (term fifty years). November 10, 1902, it

merged The Spring Valley Gas and Electric Company, incorporated March 26, 1900, under the Transportation Corporations Law (term fifty years from March 26, 1900). July 23, 1903, it merged Haverstraw Electric Light, Heat and Power Company, incorporated March 23, 1891 (amended certificate, territory, filed July 23, 1903), under the act for the formation of gas light companies (term fifty years). January 26, 1909, it merged Nyack Gas Light and Fuel Company, incorporated May 3, 1893, under the Transportation Corporations Law (term fifty years), and May 18, 1914, Rockland Electric Company, incorporated March 23, 1893, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years from August 24, 1899.

*Location of generating plants:* Electric: Orangeburg, Hillburn, Haverstraw (not operated during 1914); Water gas: Nyack.

*Principal officers:* President, D. Edgar Manson; Vice-president, Albert B. Tenney; Secretary, Horace P. Wood; Treasurer, E. A. Bradley.

*Main business office:* Nyack.

**The Rome Gas, Electric Light and Power Company**

*Control by other corporation:* Majority of capital stock owned by National Gas, Electric Light and Power Company.

*Organization:* Incorporated May 8, 1901, under the Transportation Corporations Law. In May, 1901, it purchased the property, rights, and franchises of Rome Gas Light Company, incorporated April 9, 1852, under the act for the formation of gas light companies (term fifty years). See earlier certificate under the name of The Rome Gas Light Company, filed December 28, 1850 (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: South Madison street, Rome; Coal gas and water gas: South Madison street, Rome.

*Principal officers:* President, J. T. Lynn; Vice-president, John D. McMahon; Secretary, V. N. Gurney; Treasurer, A. L. Wilkinson.

*Main business office:* 1714 Ford Building, Detroit, Mich.

**The Roxbury Gas Lighting Company**

*Organization:* Incorporated November 7, 1903, under the Transportation Corporations Law.

*Term of corporate existence:* Forty-nine years.

*Location of generating plant:* Gasoline gas: Roxbury.

*Principal officers:* President, James R. Dart; Vice-president, Frank Rightmyer; Secretary and Treasurer, Frank D. Enderlin.

*Main business office:* Roxbury.

**Rushville Mining and Gas Company**

*Organization:* Incorporated June 7, 1901, under the Business Corporations Law.

*Term of corporate existence:* Forty-nine years.

*Location of natural gas wells:* Village of Rushville and town of Middlesex.

*Principal officers:* President, F. A. Page; Vice-president and Treasurer, R. E. Page; Secretary, E. P. Austin.

*Main business office:* 214 Main street, Hornell.

**Sag Harbor Electric Light and Power Company**

*Organization:* Incorporated April 13, 1899, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Sag Harbor.

*Principal officers:* President, Thomas P. Cunningham; Secretary, Paul Armitage; Treasurer, Harry W. Butts.

*Main business office:* Sag Harbor.

**Sag Harbor Lighting Company**

*Organization:* Incorporated January 29, 1902, under the Transportation Corporations Law (see Long Island Lighting Company).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Water gas: Sag Harbor.

*Principal officers:* President, George E. Fahys; Vice-president, Casper Schaefer; Secretary and Treasurer, H. F. Cook.

*Main business office:* Sag Harbor.

**Saint Lawrence International Electric Railroad & Land Company**

*Organization:* See Electric Railroad Corporations.

*Term of corporate existence:* Fifty years from May 1, 1900.

*Location of generating plant:* Electric: Alexandria Bay.

*Principal officers:* President, Jacob Amos; Vice-president and Treasurer, B. B. Faggart; Secretary, F. M. Hugo.

*Main business office:* Alexandria Bay.

**The St. Lawrence River Power Company**

*Control by other corporation:* Majority of capital stock owned by St. Lawrence Securities Company.

*Organization:* Incorporated December 24, 1902, as a reorganization of St. Lawrence Power Company of Massena, New York, incorporated by special act passed May 9, 1896 (ch. 484), as supplemented by an act passed April 26, 1898 (ch. 542).

*Term of corporate existence:* Fifty years (St. Lawrence Power Company).

*Location of generating plant:* Near Massena, St. Lawrence county.

*Principal officers:* President, Arthur V. Davis; Vice-president, Charles M. Hall; Secretary, G. R. Gibbons; Treasurer, R. E. Withers.

*Main business office:* Massena.

**St. Lawrence Transmission Company**

*Control by other corporation:* Majority of capital stocks owned by St. Lawrence Securities Company.

*Organization:* Incorporated November 21, 1904, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Arthur V. Davis; Vice-president and Secretary, George R. Gibbons; Treasurer, R. E. Withers.

*Main business office:* Potsdam.

**Saint Regis Light and Power Company**

*Organization:* Incorporated March 25, 1903, under the Transportation Corporations Law. Purchased plant of and succeeded St. Regis Falls Electric Light Company, incorporated February 4, 1899, under the Transportation Corporations Law (term twenty years).

*Term of corporate existence:* Forty-nine years.

*Location of generating plant:* Electric: near St. Regis Falls.

*Principal officers:* President, H. E. O'Neil; Secretary and Treasurer, A. S. O'Neil.

*Main business office:* St. Regis Falls.

**Salem Light, Heat and Power Company**

*Organization:* Incorporated December 22, 1906, under the Transportation Corporations Law. Purchased land, water rights, and plant of, and succeeded The Salem Electric Light and Power Company, incorporated December 22, 1897, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: East Greenwich.

*Principal officers:* President, John F. O'Brien; Secretary and Treasurer, Jarvis P. O'Brien.

*Main business office:* Salem.

**The Sandy Creek Oil and Gas Company, Limited**

*Organization:* Incorporated May 26, 1888, under "An act for the organization and regulation of certain business corporations" (L. 1875, ch. 611).

*Term of corporate existence:* Fifty years.

*Location of natural gas wells:* Lacona and Sandy Creek.

*Principal officers:* President, Peter G. Hydorn; Vice-president, C. L. Hydorn; Secretary and Treasurer, Don A. Colony.

*Main business office:* 2 Railroad avenue, Lacona.

**Saranac Lake Gas Company**

*Control by other corporation:* Majority of capital stocks owned by Public Utility Company, Philadelphia, Penna.

*Organization:* Incorporated August 8, 1908, under the Transportation Corporations Law. July 8, 1913, Charles A. Gruber was appointed receiver.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Water gas: Saranac Lake.

*Principal officers:* President, Horatio Nelson; Vice-president, H. McNeal; Secretary, D. J. Crook; Treasurer, S. A. Miller.

*Main business office:* 20 Main street, Saranac Lake.

**Saugerties Gas Light Company**

*Organization:* Incorporated October 15, 1860, under the act for the formation of gas light companies (L. 1848, ch. 37).

*Term of corporate existence:* Fifty years; extended fifty years by certificate dated November 12, 1908, filed November 24, 1908.

*Location of generating plant:* Coal gas: Saugerties.

*Principal officers:* President, William R. Kenan, jr.; Secretary, Thomas F. Walsh; Treasurer, R. B. Goodman.

*Main business office:* Saugerties.

**Sayre Electric Company**

*Control by other corporation:* Majority of capital stock owned by Atlantic Gas and Electric Company.

*Organization:* Incorporated September 27, 1906, under an act of the State of Pennsylvania entitled "An act supplementary to 'An act to provide for the incorporation and regulation of certain corporations,' approved the 29th day of April, A. D. 1874, providing for the merger and consolidation of certain corporations," as a consolidation and merger of The Tioga Point Electric Light and Power Company and The Electric Light and Power Company of Sayre, Penna., two Pennsylvania corporations; certificate of authority to Sayre Electric Company to do business in the State of New York filed March 28, 1907.

*Term of corporate existence:* Not given.

*Location of generating plant:* Electric: 240 Spring street, Sayre, Penna.

*Principal officers:* President, C. M. Pihl; Vice-president, F. S. Nicholson; Secretary, A. B. Cheadle; Treasurer, N. P. Zech.

*Main business office:* 134 West Lockhart street, Sayre, Penna.

**Lessor Company**

**The Waverly Electric Light and Power Company:** The pole line and other property of this company, incorporated March 12, 1891, under the General Manufacturing Law (L. 1848, ch. 40), term fifty years, are leased to Sayre Electric Company, which

also owns all its capital stock. The Waverly Electric Light and Power Company acquired the franchises, etc., of The Brush Electric Light and Power Company of Waverly, New York, incorporated March 16, 1887, under the General Manufacturing Law, L. 1848, ch. 40 (term fifty years). The funded debt amounting to \$40,000 has been assumed by the Sayre Electric Company, and is reported in its statement of funded debt included in the foregoing pages. No income or expenses are reported.

*Principal officers:* President, G. Tracy Rogers; Vice-president, R. H. Twigley; Secretary, Frederic Culver; Treasurer, W. B. Dinsmore.

*Corporate office:* 50 Pine street, New York city.

#### **Schenectady Illuminating Company**

*Control by other corporation:* Majority of capital stock owned by General Electric Company.

*Organization:* Incorporated June 3, 1886, as The Westinghouse Illuminating Company of Schenectady, N. Y., under the General Manufacturing Law (L. 1848, ch. 40); name changed April 15, 1892, to Schenectady Illuminating Company, by order of the Supreme Court.

*Term of corporate existence:* Fifty years from May 20, 1886.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* Vice-president, Henry W. Peck; Treasurer, James O. Carr.

*Main business office:* 509-511 State street, Schenectady.

#### **Schenectady Power Company**

*Control by other corporation:* Majority of capital stock owned by General Electric Company.

*Organization:* Incorporated May 1, 1903, under the Transportation Corporations Law, as Schaghticoke Electric Company; amended certificate (territory) filed September 5, 1907; further amended certificate (territory) filed October 23, 1907; name changed April 6, 1908, to Schenectady Power Company.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Schaghticoke, Johnsonville.

*Principal officers:* President, George E. Greene; Vice-president, Howard W. Starr; Secretary and Treasurer, James O. Carr.

*Main business office:* Schaghticoke.

#### **The Schenevus Electric Light and Power Company**

See Great Bear Light and Power Company.

*Organization:* Incorporated December 10, 1903, under the Transportation Corporations Law. December 1, 1914, this company sold its pole lines and property to Great Bear Light and Power Company effective January 1, 1915.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Schenevus.

*Principal officers:* President, M. E. Baldwin; Vice-president, John Graney; Secretary and Treasurer, H. Bernard.

*Main business office:* Schenevus.

#### **Schodack Light and Power Corporation**

*Organization:* Incorporated October 19, 1912, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, William Morrison; Vice-president, Charles Van Buren; Secretary, O. D. Woodford; Treasurer, L. M. Lansing.

*Main business office:* Castleton.

#### **The Scottsville Electric Light and Gas Company**

*Organization:* Incorporated November 9, 1904, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Merton E. Lewis; Secretary, Donald M. Lewis; Treasurer, Alexander Russell.

*Main business office:* Avon.

#### **Sea Cliff and Glen Cove Gas Company**

*Organization:* Incorporated February 1, 1904, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Water gas: Glen Cove.

*Principal officers:* President, George T. Peck; Secretary and Treasurer, Robert Taylor.

*Main business office:* Glen Cove.

#### **The Seely Electric Company**

*Organization:* Incorporated September 21, 1912, under the Transportation Corporations Law; succeeded to plant, etc., of S. Alfred Seely Estate.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Spencer.

*Principal officers:* President and Treasurer, Charles A. Seely; Vice-president and Secretary, Hart I. Seely.

*Main business office:* Spencer.

#### **Semet-Solvay Company**

*Control by other corporation:* Majority of capital stock owned by The Solvay Process Company.

*Organization:* Incorporated July 8, 1895, under the laws of Pennsylvania; general act of April 29, 1874. A certificate of authority to transact business in this State was filed in the office of the Secretary of State January 11, 1897.

*Term of corporate existence:* Perpetual.

*Remarks:* Returns incomplete; not tabulated. The actual business of this corporation is said to be that of engineer engaged in constructing and operating coke ovens for the manufacture of coke and the resultant byproducts of tar, ammonia, and gas. It has built and now operates or acts as consulting engineer in connection with the operation of 15 byproduct oven plants in 10 States, two of these plants being located in New York state: one at Syracuse and the other at Waterloo. The plant at Waterloo is owned by the Empire Coke Company, and was leased to the respondent December 1, 1912, pursuant to an authorization of the Public Service Commission, Second District, dated November 13, 1912. For the substance of the operating agreement see Empire Coke Company. The results of operations at the Waterloo plant during the year ended December 31, 1914, are reported as below; gas produced at Syracuse is used on the premises by the owner and lessor of the plant, The Solvay Process Company.

<b>Expenses:</b>	
Coke purchased from Empire Coke Company.....	\$459
Manufacture of coke and light oil, and concentration of ammonia....	131,685
Coke oven gas enrichment.....	6,002
Payment to Empire Coke Company as per lease of December 1, 1912, on account of water gas manufactured by them.....	3,013
<b>Total operating expenses.....</b>	<b>\$141,159</b>
Coal, 117,917 tons @ \$2.72.....	320,770
<b>Total cost.....</b>	<b>\$461,929</b>
<b>Revenues:</b>	
By sales of coke, tar, ammonia, and light oil.....	\$392,910
By sales of gas, 365,437 M cu. ft. @ \$0.10.....	36,544
<b>Total.....</b>	<b>429,453</b>
Inventory December 31, 1913 (coke, tar, ammonia and oils).....	\$50,195
Inventory December 31, 1914 (coke, tar, ammonia and oils).....	47,426
<b>Net decrease in stock.....</b>	<b>2,770</b>
<b>Total returns.....</b>	<b>\$426,684</b>
<b>Net loss for year ended December 31, 1914.....</b>	<b>\$35,246</b>
<b>Production of gas for year 365,437 M cu. ft.</b>	
<b>The balance sheet of the corporation as a whole December 31, 1914, is reported as follows:</b>	

<b>Assets Side:</b>	
Cash and accounts owing company.....	\$1,586,054
Real estate, plants, and equipment.....	3,103,230
Manufactured products and supplies.....	1,022,774
Investments in other companies.....	1,015,656
Patent-rights and contracts.....	142,550
Sundry debits.....	12,000
<b>Total.....</b>	<b>\$6,882,264</b>
<b>Liabilities Side:</b>	
Capital stock.....	\$4,000,000
Bills payable and accounts owed by company.....	761,757
Bonds due 1918.....	400,000
Reserve accounts.....	129,054
Undivided earnings.....	1,591,454
<b>Total.....</b>	<b>\$6,882,264</b>

Total revenues during 1914 for the corporation as a whole were \$7,393,338, and total expenditures \$7,258,178. In addition thereto dividends at the rate of 8% were paid during the year on the \$4,000,000 capital stock.

*Principal officers:* President, Rowland G. Hazard; Vice-presidents, H. H. S. Handy, Edward N. Trump, E. L. Pierce; Secretary, J. G. Hazard; Treasurer, Frederick R. Hazard.

*Main business office:* Solvay (Postoffice address, Syracuse).

#### Seneca River Power Company

*Organization:* Incorporated April 24, 1902, under the Transportation Corporations Law. November 18, 1903, Phoenix Electric Company, incorporated November 29, 1895, under the Transportation Corporations Law (term thirty years), was merged into Seneca River Power Company.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Baldwinsville.

*Principal officers:* President, S. B. Storer; Vice-president, E. M. White; Secretary and Treasurer, George W. Pulver.

*Main business office:* Baldwinsville.

#### Sherburne Gas Company

*Organization:* Incorporated January 26, 1907, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Gasoline gas: Sherburne.

*Principal officers:* President, E. Daniels; Vice-president, G. H. Shepard; Secretary, E. L. Whitney; Treasurer, W. I. French.

*Main business office:* Sherburne.

#### Sherman Electric Light Company

*Organization:* Incorporated January 16, 1899, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Sherman.

*Principal officers:* President, C. E. Cobb; Vice-president, Mrs. J. G. Bly; Secretary, C. E. Sheldon; Treasurer, Louise Hart.

*Main business office:* Sherman.

#### The Silver Creek Gas and Improvement Company

*Organization:* Incorporated October 21, 1903, under the Business Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of natural gas wells:* Silver Creek, Chautauqua county.

*Principal officers:* President, William E. Carroll; Vice-president, Samuel S. Carroll; Secretary and Treasurer, Harrison E. Martin.

*Main business office:* 490 Ellicott Square, Buffalo.

#### Snyder Gas Company

*Organization:* Incorporated December 22, 1909, under the Transportation Corporations Law.

*Term of corporate existence:* Forty-nine years.

*Location of natural gas wells:* Amherst.

*Principal officers:* President, H. A. Forman; Vice-president, J. W. Stearns; Secretary, H. B. Huver; Treasurer, S. D. Kittenger.

*Main business office:* 410 Fidelity Building, Buffalo.

#### Sodus Gas and Electric Light Company

*Organization:* Incorporated February 23, 1904, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, C. W. Mills; Vice-president, T. H. Munro; Secretary, G. R. Mills; Treasurer, A. E. Larkin.

*Main business office:* Sodus.

#### The Southern Dutchess Gas and Electric Company

*Organization:* Incorporated May 22, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Beacon (leased from The Citizens Railroad, Light and Power Company); Coal gas: Beacon.

*Principal officers:* President and Treasurer, J. T. Smith; Vice-president, C. H. Watson; Secretary, S. K. Phillips.

*Main business office:* Beacon.

#### Lessor Company

*Citizens Railroad, Light and Power Company:* Incorporated as The Carroll Electric Company, November 4, 1893, under the Transportation Corporations Law (term fifty years); name changed as above by order of Supreme Court December 26, 1901. The electric plant of this company is leased to and operated by The Southern Dutchess Gas and Electric Company; its electric railroad property is leased to and operated by the Fishkill Electric Railway Company.

*Remarks:* Returns incomplete, not tabulated. The following information is abstracted from the report as rendered. Balance sheet December 31, 1914:

<i>Assets Side:</i>	
Cash	\$286
Accounts receivable	1,455
Miscellaneous bond investments	13,500
Fixed capital, electric lighting	277,058
Fixed capital, electric railroad	217,547
<b>Total</b>	<b>\$509,846</b>
<i>Liabilities Side:</i>	
Interest matured and unpaid	\$4,333
Bills payable	14,000
Accounts payable	40,304
Funded debt	175,000
Common stock	175,000
Corporate surplus	101,208
<b>Total</b>	<b>\$509,846</b>
<i>Income account for 1914:</i>	
Rent accrued from lease of electric plant and equipment	\$10,000
Rent accrued from lease of electric railroad	9,000
Interest revenues	775
<b>Total non-operating revenues</b>	<b>\$19,775</b>
Interest accrued on funded debt	9,500
<b>Net or corporate income</b>	<b>\$10,275</b>
<i>Corporate surplus or deficit account for 1914:</i>	
Surplus balance at beginning of year	\$99,673
Net corporate income for year	10,275
Dividends declared 5%	8,740
Surplus balance at close of year	101,208

*Principal officers:* President, E. L. Tompkins; Vice-president, G. A. Schrader; Secretary, S. K. Phillips; Treasurer, B. L. Smith.

*Corporate office:* Beacon.

#### Southern New York Power Company

*Organization:* Incorporated March 25, 1910, under the Transportation Corporations Law. Succeeded to the franchise of The Walton Electric Light Company, incorporated October 28, 1891, under the Transportation Corporations Law (term twenty-five years).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Walton.

*Principal officers:* President, C. A. Graves; Vice-president, C. N. Jones; Secretary, C. W. Byram; Treasurer, R. C. Megargel.

*Main business office:* Walton.

#### The Southold Lighting Company

*Organization:* Incorporated May 31, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Acetylene gas: Southold.

*Principal officers:* President, J. H. Marshall; Vice-president, William H. Terry; Secretary, F. K. Terry; Treasurer, L. W. Korn.

*Main business office:* Southold.

**South Shore Gas Company**

*Organization:* Incorporated December 20, 1909, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Water gas: Babylon.

*Principal officers:* President, N. P. Cutler; Vice-president, George W. Ohmsted; Secretary, Henry R. Frost; Treasurer, Ellis L. Phillips.

*Main business office:* Babylon.

**South Shore Natural Gas and Fuel Company**

*Organization:* Incorporated February 10, 1904, under the Business Corporations Law. October 20, 1908, William E. Carroll was appointed receiver. June 3, 1912, the Commission authorized the purchase of franchises, etc., of The Welch Grape Juice Company.

*Term of corporate existence:* Fifty years.

*Location of natural gas wells:* Chautauqua county.

*Principal officers:* Receiver, William E. Carroll.

*Main business office:* 490 Ellicott Square, Buffalo.

**Standard Light, Heat and Power Company**

*Organization:* Incorporated August 30, 1898, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: near Sidney.

*Principal officers:* Vice-president, Edward O. Allen; Secretary and Treasurer, Jerome S. Seacord.

*Main business office:* Unadilla.

**Suburban Power Company**

*Control by other corporation:* Entire capital stock owned by Tonawanda Power Company.

*Organization:* Incorporated October 11, 1904, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Edward A. Wickes; Vice-president, de Lancey Rankine; Secretary, Frederick L. Lovelace; Treasurer, W. Paxton Little.

*Main business office:* Power House, Buffalo avenue, Niagara Falls.

**Suffern Gas Company**

*Organization:* Incorporated November 12, 1900, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Water gas: Suffern.

*Principal officers:* President and Treasurer, Edward Oakes; Secretary, L. W. La Fetra.

*Main business office:* Suffern.

**Suffolk Gas and Electric Light Company**

*Organization:* Incorporated May 16, 1898, under the Transportation Corporations Law. Succeeded to the property of The Mutual Gas Light Company of Suffolk County, State of New York, incorporated September 17, 1888, under the act for the formation of gas light companies (L. 1848, ch. 37), term fifty years. Bay Shore Electric Light Company, incorporated January 27, 1897, under the Transportation Corporations Law (term fifty years), was merged into Suffolk Gas and Electric Light Company November 15, 1901. Purchased under foreclosure mortgaged premises, property, rights and franchises of The Suffolk Gas Company, incorporated April 28, 1893, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years; extended for fifty years by certificate dated July 6, 1909, filed July 15, 1909.

*Location of generating plants:* Electric: Bay Shore; Water gas: Bay Shore.

*Principal officers:* President, H. B. Hubbard; Vice-president, Ellis L. Phillips; Secretary, Archibald McLaren; Treasurer, Russell F. Van Doorn.

*Main business office:* Bay Shore.

**The Suffolk Light, Heat and Power Company**

*Organization:* Incorporated August 7, 1901, under the Transportation Corporations Law. Succeeded to the franchises, etc., of The Southampton Electric Light Company, incorporated December 24, 1894, under the Transportation Corporations Law (term fifty years). August 15, 1912, the Commission authorized the transfer of that part of the franchises of Riverhead Electric Light Company in the town of Southampton to this company.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Southampton.

*Principal officers:* President, J. W. Kilbreth; Vice-president, J. M. Sheehan; Secretary, L. E. Terry; Treasurer, W. P. Bishop.

*Main business office:* Southampton.

**A. L. Swett Electric Light and Power Company**

*Organization:* Incorporated May 28, 1898, under the Transportation Corporations Law. In September, 1909, acquired property of Albion Power Company, incorporated July 1, 1898, under the Transportation Corporations Law (term fifty years); certificate of extension (territory and supply of gas) filed June 20, 1902. It succeeded to the franchises, etc., of The Albion Gas Light Company, incorporated May 10, 1858, under the act for the formation of gas light companies (L. 1848, ch. 37), term fifty years from May 10, 1858; see also certificate filed March 13, 1856 (term fifty years from March 7, 1856).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Medina, Glenwood Lake, Waterport; Coal gas: Albion.

*Principal officers:* President, A. L. Swett; Vice-president, L. M. Swett; Secretary, R. F. Swett; Treasurer, C. S. Swett.

*Main business office:* Medina.

**Syracuse Lighting Company**

*Control by other corporation:* Majority of capital stock owned by The Syracuse Light and Power Company.

*Organization:* Incorporated May 28, 1901, under the Transportation Corporations Law (corporate powers extended to the supply of steam by certificate filed July 1, 1901). July 1, 1901, it merged Electric Light and Power Company of Syracuse, incorporated September 12, 1892, under the Transportation Corporations Law (term fifty years), and Underground Electric Wire Company, incorporated June 28, 1897, under the Transportation Corporations Law (term fifty years). Electric Light and Power Company of Syracuse succeeded to the franchises, etc., of Syracuse Electric Light and Power Company, incorporated June 5, 1884, under the General Manufacturing Law (term fifty years from June 4, 1884). This latter company, under date of June 14, 1884, acquired by purchase all property in Syracuse of the Thomson-Houston Electric Company, incorporated under the laws of the State of Connecticut. As of July 1, 1902, it acquired the property, etc., of Syracuse Gas Company, incorporated December 9, 1895, under the Transportation Corporations Law (term fifty years). This company purchased as of January 1, 1896, all franchises, etc., of The Gas Light Company of Syracuse, incorporated February 9, 1849, under the act for the formation of gas light companies (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: 431 Fulton street, Syracuse; Coal gas and water gas: 143 Mechanic street, Syracuse.

*Principal officers:* President, James C. DeLong; Vice-presidents, Walton Clark, Lewis Lillie; Secretary, George W. Curran; Treasurer, E. W. Poole.

*Main business office:* 339 South Warren street, Syracuse.

#### **Syracuse Suburban Gas Company, Inc.**

*Control by other corporation:* Majority of capital stock owned by International Gas and Electric Company, Philadelphia, Penna.

*Organization:* Incorporated January 21, 1913, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of coal gas and water gas.

*Principal officers:* President, Louis Burkhead; Vice-president, W. L. Schug; Secretary, Orry R. Evans.

*Main business office:* Manlius street, East Syracuse.

#### **Theresa Electric Light Company (Frederick L. Santway and James B. Vock)**

Unincorporated electric plant. Returns incomplete; not tabulated. One-half interest in plant purchased by James B. Vock June 20, 1914. This company distributes electric energy purchased from Hydro-Electric Power Company of Theresa to various consumers in the village of Theresa. The cost of current purchased during 1914 is given as \$1055, and the revenues from the sale of such current as \$1583. The report shows 83 consumers at the close of 1914, and an estimated investment in plant and equipment of \$1500.

#### **The Thousand Island Electric Light and Power Company, Limited**

*Organization:* Incorporated January 5, 1889, under "An act to provide for the organization and regulation of certain business corporations" (L. 1875, ch. 611).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Clayton.

*Remarks:* Returns incomplete; not tabulated. Balance sheet December 31, 1914:

<i>Assets Side:</i>	
Cost of plant and equipment.....	\$47,780
Cash.....	368
Bills receivable.....	2,500
<b>Total.....</b>	<b>\$50,648</b>
<i>Liabilities Side:</i>	
Bills payable.....	\$2,000
Notes.....	19,575
Common stock.....	25,000
Corporate surplus.....	4,073
<b>Total.....</b>	<b>\$50,648</b>

Total revenues and expenses during 1914 are each reported at \$8150, rent deductions \$300, taxes \$401, and uncollectible bills \$2500. Report shows 25 consumers' meters in service and 75 flat rate consumers at close of 1914, together with a street lighting system comprising 26 arc and 28 incandescent lamps.

*Principal officers:* President, Charles A. Ellis; Vice-president, William H. Consaul; Secretary and Treasurer, C. E. Rees.

*Main business office:* Clayton.

#### **The Ticonderoga Electric Light and Power Company**

*Organization:* Incorporated April 2, 1887, under the act for the formation of gas light companies (L. 1848, ch. 37).

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Mrs. S. T. Burleigh; Vice-president, L. M. Burleigh; Secretary and Treasurer, W. C. Noyes.

*Main business office:* Ticonderoga.

#### **Tonawanda Power Company**

*Control by other corporation:* Entire capital stock owned by The Niagara Falls Power Company.

*Organization:* Incorporated March 21, 1899, as a consolidation of Tonawanda Lighting and Power Company, incorporated February 23, 1897, under the Transportation Corporations Law (term fifty years), and Tonawanda-Cataract Power Company, incorporated October 26, 1898, under the Transportation Corporations Law (term fifty years from October 26, 1898). Succeeded to the franchises, etc., of The Tonawanda Electric Power and Light Company, Limited, incorporated May 22, 1889, under "An act to provide for the organization and regulation of certain business corporations" (L. 1875, ch. 611), term fifty years; and Tonawanda and Wheatfield Electric Company, incorporated April 8, 1890, under the General Manufacturing Law (L. 1848, ch. 40), term fifty years from April 5, 1890.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Edward A. Wickes; Vice-president, de Lancey Rankine; Secretary, Frederick L. Lovelace; Treasurer, W. Paxton Little.

*Main business office:* 20 Webster street, North Tonawanda.

#### **Tri-County Natural Gas Company**

*Organization:* Incorporated July 25, 1908, under the Business Corporations Law.

*Term of corporate existence:* Perpetual.

*Nature of service:* Transmission and distribution of natural gas.

*Principal officers:* President and Treasurer, A. Miner Wellman; Vice-president, T. B. Crary; Secretary, Guy Wellman.

*Main business office:* Library Building, Main street, Caledonia.

#### **Troy Gas Company**

*Organization:* Incorporated October 11, 1889, as a consolidation of Troy Gas Light Company, incorporated April 6, 1848, under the act for the formation of gas light companies (L. 1848, ch. 37), term fifty years; The Troy Citizens' Gas Light Company, incorporated March 19, 1875, under the same act (term fifty years); and The Troy Fuel Gas Company, incorporated July 28, 1885, under the General Manufacturing Law (L. 1848, ch. 40), term fifty years from August 3, 1885. In 1892, by purchase, it acquired the property, etc., of The Troy Electric Light Company, incorporated February 21, 1885 (prior certificate of incorporation under same name filed April 16, 1883; see affidavit of majority of incorporators of prior company attached to certificate, showing that former company had not completed incorporation), under the General Manufacturing Law (term fifty years from February 21, 1885); and Edison Light and Power Company of Troy, incorporated February 11, 1888, under the General Manufacturing Law (term fifty years from February 11, 1888). October 18, 1907, Troy Gas Company merged The Beacon Electric Company of Lansingburgh, N. Y., incorporated May 1, 1896, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Liberty and River streets, Troy; Water gas: Smith avenue, Troy.

*Principal officers:* President, Edward Murphy, 2nd; Vice-president, H. C. Shields; Secretary and Treasurer, W. C. Coleman.

*Main business office:* Savings Bank Building, Troy.

#### **The Twin State Gas & Electric Company (Hoosick Falls Division)**

*Control by other corporation:* Majority of capital stock owned by National Light, Heat and Power Company.

*Organization:* Incorporated August 25, 1906, under the laws of Connecticut; and see laws of Maine, act of Febru-

ary 22, 1907 (ch. 103), as to right to exercise powers in Maine; certificate for doing business in the State of New York filed in Secretary of State's office April 23, 1908. Hoosick Falls Illuminating Company, incorporated May 15, 1905, under the Transportation Corporations Law (term fifty years), was merged into The Twin State Gas & Electric Company August 26, 1908. Succeeded to the franchises, etc., of Hoosick Falls Electric Company, incorporated September 19, 1900, under the Transportation Corporations Law (term fifty years); and Hoosick Falls Water Power and Light Company, incorporated April 14, 1896, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Perpetual.

*Location of generating plant:* Electric: Town of Hoosick, Rensselaer county.

*Remarks:* Report purports to cover only operations within New York state, i. e. in Hoosick Falls.

*Principal officers:* President, J. L. Meloon; Vice-president, Howard L. Olds; Secretary, A. D. Foster; Treasurer, W. G. Meloon.

*Main business office:* Hoosick Falls.

#### **Tyler Light and Power Company, Inc.**

*Organization:* Incorporated May 5, 1914, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Vernon.

*Principal officers:* President and Treasurer, E. E. Morris; Vice-president and Secretary, G. C. Capes.

*Main business office:* Vernon.

#### **Ulster Electric Light, Heat and Power Company**

*Control by other corporation:* Majority of capital stock owned by American Gas Company.

*Organization:* Incorporated May 7, 1903, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Saugerties.

*Principal officers:* President, M. W. Stroud; Vice-president, S. P. Curtis; Secretary, W. L. Fox; Treasurer, J. B. Townsend, 3rd.

*Main business office:* Saugerties.

#### **The Union Electric Company**

*Organization:* Incorporated February 20, 1899, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Whitney Point.

*Principal officers:* President, D. O'Conner; Secretary, Mrs. John O'Conner.

*Main business office:* Whitney Point.

#### **Union Springs Gas Company (Marion Yauger)**

Unincorporated acetylene gas plant. Returns incomplete; not tabulated. Cost of plant and equipment operating revenues, and operating expenses are each given as \$400.

#### **Union Springs Light and Power Company**

*Organization:* Incorporated December 1, 1911, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Union Springs.

*Principal officers:* President and Treasurer, F. L. Mason; Vice-president, L. A. Mason; Secretary, F. L. Eggleston.

*Main business office:* Union Springs.

#### **United Gas, Electric Light and Fuel Company of Sandy Hill and Fort Edward, New York**

*Control by other corporation:* Majority of capital stock owned by Utica Gas and Electric Company.

*Organization:* Incorporated September 14, 1899, under the Transportation Corporations Law. It succeeded to the franchises, etc., of The Fort Edward Electric Light and Power Company, Limited, incorporated December 20, 1887, under the act to provide for the formation and regulation of certain business corporations (L. 1875, ch. 611), term fifty years.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Energy purchased from Glens Falls Gas and Electric Light Company; Coal gas: Fort Edward.

*Principal officers:* President, James C. Brady; Vice-president, William E. Lewis; Secretary, M. J. Brayton; Treasurer, George H. Stack.

*Main business office:* 217 Main street, Hudson Falls.

#### **Upper Hudson Electric and Railroad Company**

*Organization:* Originally incorporated May 28, 1901, under the Transportation Corporations Law, under the name Upper Hudson Electric Company. June 5, 1901, it merged The Athens Electric Light and Power Company, incorporated October 27, 1898, under the Transportation Corporations Law (term fifty years); and The Coxsackie Electric Light Company, incorporated April 30, 1898, under the Transportation Corporations Law (term fifty years). March 4, 1903, it merged The Ravena Electric Company, incorporated March 12, 1901, under the Transportation Corporations Law (term fifty years). June 3, 1905, an amended certificate of incorporation was filed under section 21 of the Railroad Law, authorizing increase of stock to \$500,000 and changing corporate title to Upper Hudson Electric and Railroad Company. December 5, 1912, it was consolidated with Schoharie Light and Power Company and Catskill Illuminating and Power Company, under the same name. Schoharie Light and Power Company was incorporated November 3, 1904, under the Transportation Corporations Law, with powers as an electrical corporation; extended to supply of gas and to lease the properties and franchises of Catskill Illuminating and Power Company, by certificates filed May 6, 1907 (term fifty years; extended for fifty years from expiration of that period by certificate dated March 11, 1907, filed March 16, 1907). Leased plant of Catskill Illuminating and Power Company (electricity), incorporated September 22, 1890, under the General Manufacturing Law (L. 1848, ch. 40): powers extended to supply of gas by certificate filed May 10, 1893 (term fifty years from September 22, 1890). See special act passed April 17, 1858 (ch. 313), authorizing the trustees of the Village of Catskill to permit the construction of gas works and to loan the credit of the corporation for the same. November 14, 1912, when approving such consolidation, the Commission also approved the sale of the franchises, etc., of Cairo Electric Light and Power Company, incorporated June 23, 1905, under the Transportation Corporations Law (term fifty years), to Schoharie Light and Power Company.

*Term of corporate existence:* Fifty years (by amended certificate under section 21 of the Railroad Law, one hundred years; see also agreement of consolidation, fifty years).

*Location of generating plants:* Electric: Catskill, Coxsackie, Cairo, Hunter; Coal gas: Catskill.

*Principal officers:* President, Edwin A. Stevens; Vice-president, Cyrus Showers; Secretary, Fred W. Titus; Treasurer, J. M. Sheehan.

*Main business office:* Catskill.

#### **Utica Gas and Electric Company**

*Organization:* Incorporated May 10, 1902, under the Transportation Corporations Law; amended certificate (territory) filed October 4, 1907. May 26, 1902, Equitable Gas and Electric Company of Utica, incorporated February

25, 1888, as a consolidation (term fifty years) of Equitable Gas Light and Fuel Company of Utica, incorporated May 18, 1886, under the act for the formation of gas light companies (L. 1848, ch. 37), term fifty years; and Utica Electric and Gas Company, incorporated April 8, 1887, as a consolidation (term fifty years) of The Utica Gas Light Company, incorporated November 23, 1848, under the act for the formation of gas light companies (term fifty years); and The Central New York Electric Light and Power Company, incorporated August 24, 1881, under the General Manufacturing Law (term fifty years); and The Utica Electric Light and Power Company, incorporated December 8, 1899 (see earlier agreement of consolidation between same companies and Utica Electrical Manufacturing and Supply Company, filed June 27, 1899, which later agreement recites was not carried into effect), as a consolidation (term fifty years) of The Utica Electric Light Company, incorporated January 9, 1888, under the General Manufacturing Law (term fifty years from January 9, 1888), and Trenton Falls Electric Light and Power Company, incorporated June 1, 1899, under the Transportation Corporations Law (term fifty years); which merged into itself November 20, 1899, Utica Electrical Manufacturing and Supply Company, incorporated May 26, 1890, under the General Manufacturing Law (term fifty years); were merged into Utica Gas and Electric Company. July 1, 1907, it merged Herkimer County Light and Power Company, incorporated April 20, 1898, as a consolidation (term fifty years) of Herkimer Gas Light Company, incorporated May 17, 1881, under the act for the formation of gas light companies (term fifty years); United Gas and Electric Companies, incorporated January 11, 1897, as a consolidation (term fifty years) of The Little Falls Electric Light and Power Company, incorporated March 1, 1892, under the Transportation Corporations Law (term fifty years); and The Little Falls Gas Light Company, incorporated October 20, 1869, under the act for the formation of gas light companies (term to September 1, 1911); and The Ilion and Mohawk Gas Light Company, incorporated August 2, 1869, under the act for the formation of gas light companies (term fifty years from July 28, 1869).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Trenton Falls; Dolgeville; Little Falls; Frankfort; Washington street, Utica; Cornelia street, Utica; Coal gas: Ilion, Herkimer, Little Falls; Water gas: Washington street, Utica.

*Principal officers:* President, James C. Brady; Vice-president, William E. Lewis; Secretary, M. J. Brayton; Treasurer, George H. Stack.

*Main business office:* 222 Genesee street, Utica.

#### **The Vestal Lighting Company**

*Organization:* Incorporated November 25, 1908, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, H. D. Harris; Vice-president, Lee DuBois; Secretary, B. D. Leighton; Treasurer, W. S. Pierce.

*Main business office:* Vestal.

#### **The Wallkill Valley Electric Light and Power Company**

*Organization:* Incorporated May 4, 1893, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Walden (not in service in 1914).

*Principal officers:* President, Anson J. Fowler; Secretary and Treasurer, C. Fred Fowler.

*Main business office:* Walden.

#### **Wappingers Falls (Garner Print Works and Bleachery)**

The main business of this company is bleaching cloth, in connection with which both an electric and a gas plant have been operated. During 1914 the operation of the gas plant was discontinued.

*Principal officers:* President, S. M. Milliken; Vice-presidents, Charles E. Perkins, Robert Mains; Secretary, R. S. Holbrook.

*Main business office:* Wappingers Falls.

#### **Warren County Electric Light, Heat and Power Company**

In a previous report the corporation states as follows: "The land and pole lines of the company constitute all its property. The Hudson Valley Railway Company, which owns all the stock (\$10,000 par value), acted for the company in acquiring this property with the proceeds of the company's capital stock, and itself uses the same as the agent of the company, reporting the operations thereof in the report of its own operations." There is nothing to indicate that this statement does not still apply. The company owns certain lands about four miles north of the village of Warrensburgh, and certain flowage rights along the Hudson river northerly to what is known as Tumble Head Falls; it also owns certain rights of way for the location of high tension pole lines, and franchises in the towns of Moreau and Queensbury, and village of Glens Falls.

*Principal officers:* President, C. S. Sims; Vice-president, W. H. Williams; Secretary, W. H. Elder; Treasurer, H. F. Atherton.

*Corporate office:* 598 Broadway, Albany.

#### **Warsaw Gas and Electric Company**

*Organization:* Incorporated November 3, 1892, as a consolidation of The Warsaw Electric Light and Power Company, Limited, incorporated December 11, 1890, under "An act to provide for the organization and regulation of certain business corporations" (L. 1875, ch. 611), term fifty years; and The Citizens Gas Light Company, incorporated January 14, 1871, under the act for the formation of gas light companies (L. 1848, ch. 37), term fifty years.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Murray street, Warsaw; Water gas: Court street, Warsaw.

*Principal officers:* President, George W. Olmsted; Vice-president, E. H. Morris; Secretary, Henry R. Frost; Treasurer, Ellis L. Phillips.

*Main business office:* Warsaw.

#### **Warwick Valley Light and Power Company**

*Control by other corporation:* Entire capital stock owned by Orange and Rockland Electric Company.

*Organization:* Incorporated March 7, 1889, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, R. W. Smith; Secretary, Elwood C. Smith; Treasurer, Frank Durland.

*Main business office:* Monroe.

#### **Watertown Light and Power Company**

See Northern New York Utilities, Inc.

*Organization:* Incorporated July 8, 1908, as a consolidation of Watertown Gas Light Company, incorporated February 28, 1852, under the act for the formation of gas light companies (L. 1848, ch. 37), term fifty years; and Watertown Light and Power Company, incorporated June 1, 1906, under the Transportation Corporations Law (term fifty years), amended certificate (territory) filed July 22, 1912. It succeeded to the franchises, etc., of Watertown Electric Light Company, Limited, incorporated August 25, 1885, under the act to provide for the organization and

regulation of certain business corporations (L. 1875, ch. 611), term thirty years from August 11, 1885. August 26, 1913, Dexter Electric Light and Power Company, incorporated May 26, 1905, under the Transportation Corporations Law (term fifty years), was merged into Watertown Light and Power Company. On November 30, 1914, Watertown Light and Power Company was merged into Northern New York Utilities, Inc. (see that title).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Mill and Moulton streets, Watertown; Black River; Dexter; South Edwards; Coal gas and water gas: 327 Engine street, Watertown.

*Principal officers:* President, C. C. Burns; Vice-president, S. L. George; Secretary, F. A. Rogers; Treasurer, John B. Taylor.

*Main business office:* 137 Arsenal street, Watertown.

#### The Waterville Gas and Electric Company

*Organization:* Incorporated August 1, 1903, as a consolidation of Waterville Electric Light and Power Company, incorporated December 5, 1899, under the Transportation Corporations Law (term fifty years); amended certificate filed February 2, 1903, changing title to Waterville Electric Light and Power Company and extending its powers to the supply of steam; and The Waterville Gas Light Company, incorporated July 6, 1881, under the act for the formation of gas light companies (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Waterville; Coal gas and water gas: Waterville.

*Principal officers:* President, Orrin Terry; Secretary, C. M. Wickwire; Treasurer, M. M. Terry.

*Main business office:* Main street, Waterville.

#### Watkins Illuminating and Power Company

*Organization:* Incorporated October 14, 1905, as a reorganization of Watkins Consolidated Gas and Electric Light Company, incorporated June 15, 1901, under the Transportation Corporations Law. Succeeded to the franchises, etc., of The Watkins Gas Company, Limited, incorporated March 9, 1878, under "An act to provide for the organization and regulation of certain business corporations" (L. 1875, ch. 611), term fifty years from January 8, 1878; and of the Watkins Gas Light Company, incorporated February 17, 1869, as a manufacturing corporation (term to January 1, 1919).

*Term of corporate existence:* Fifty years (Watkins Consolidated Gas and Electric Light Company).

*Location of generating plant:* Coal gas: Watkins.

*Principal officers:* President, George A. Walter; Secretary and Treasurer, C. M. Durland.

*Main business office:* East Fourth street, Watkins.

#### Wayland Electric Light and Power Company (John Kimmel)

*Organization:* Unincorporated; plant owned by John Kimmel.

*Location of generating plant:* Electric: Wayland.

*Remarks:* Returns incomplete; not tabulated. Assets and liabilities as of December 31, 1914 are reported as follows:

Assets:	
Cash.....	\$150
Bills receivable.....	300
Materials and supplies.....	2,500
Fixed capital.....	27,500
<b>Total assets.....</b>	<b>\$30,450</b>
Liabilities:	
Bills payable.....	\$8,000
Accounts payable.....	1,800
Materials and supplies unpaid for.....	300
Funded debt.....	2,000
<b>Total liabilities.....</b>	<b>\$12,100</b>

Total revenues for 1914 are given as \$13,456, entirely from sales of current, with total expenses of \$18,798. No surplus or deficit account is reported, and no record is kept of the quantity of current generated or sold except in the case of current sold for

municipal street lighting, 19,362 kw.h. Consumers' meters in service at close of year are given as 215.

*Main business office:* Wayland.

#### Wayland-Steuben Power Company, Inc.

*Organization:* Incorporated December 26, 1913, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Wayland.

*Remarks:* Returns incomplete; not tabulated. Balance sheet December 31, 1914:

Assets Side:	
Cash.....	\$448
Other current assets.....	524
Fixed capital.....	38,784
Prepayments.....	29
Corporate deficit.....	5,368
<b>Total.....</b>	<b>\$45,153</b>
Liabilities Side:	
Interest matured and unpaid.....	\$1,050
Bills payable.....	1,000
Accounts payable.....	1,266
Funded debt.....	26,837
Common stock.....	15,000
<b>Total.....</b>	<b>\$45,153</b>

Total revenues for 1914 are given as \$6309, entirely from sales of current to the Wayland Electric Light and Power Company and to the Wayne Power Company, with total expenses of \$11,677. No surplus or deficit account is reported. Three hundred and forty-six thousand two hundred and ten kw.h. of electric energy are reported as having been generated during the year, entirely by steam power. Of this amount, 241,717 kw.h. were sold to the electrical companies above mentioned; and the remainder, 104,493 kw.h., is given as unaccounted for.

*Principal officers:* President and Treasurer, John Kimmel; Vice-president, O. F. Kiefer; Secretary, Victor M. Kimmel.

*Main business office:* Wayland.

#### Wayne Power Company

*Organization:* Incorporated March 4, 1912, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, G. R. Wells; Vice-president, Anna G. Putnam; Secretary, C. W. Mills; Treasurer, Willard H. Richardson.

*Main business office:* Sodus.

#### Webster Gas Company

*Organization:* Incorporated June 11, 1907, under the Transportation Corporations Law. It acquired the franchises, etc., originally granted to J. K. Rush, and by him assigned to The Rush Acetylene Generator Company, incorporated January 18, 1904, under the Business Corporations Law (term perpetual).

*Term of corporate existence:* Fifty years.

*Remarks:* A letter over the signature of George G. Mason, treasurer, dated December 26, 1913, states that it was then the company's intention to discontinue its operations (the manufacture and sale of acetylene gas) on January 1, 1914. No report for 1914 was made.

#### Weedsport Electric Light Company

*Control by other corporation:* Entire capital stock owned by Empire Gas and Electric Company.

*Organization:* Incorporated April 11, 1899, under the Transportation Corporations Law.

*Term of corporate existence:* Twenty years.

*Location of generating plant:* Electric: Weedsport.

*Principal officers:* President, H. O. Palmer; Vice-president, H. L. Coleman; Secretary, L. C. Reynolds; Treasurer, C. H. Pierce.

*Main business office:* 103 Castle street, Geneva.

#### Wells Island Light and Heat Company

*Organization:* Incorporated August 24, 1907, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Acetylene gas: Thousand Island Park.

*Remarks:* Returns incomplete; not tabulated. This corporation manufactures and sells acetylene gas at Thousand Island Park, where it has a franchise reported to have been granted by the Thousand Island Park Association, the consideration being that to the Association should be paid 5 per cent of the gross receipts from operation. The report for the year ended December 31, 1914, states that \$475 worth of gas was produced during the year, and that there is owing on notes about \$5000.

*Principal officers:* President, L. L. Matteson; Secretary and Treasurer, James A. Morris.

*Main business office:* Thousand Island Park.

#### **The Wellsville Electric Light, Heat and Power Company**

*Control by other corporation:* Majority of capital stock owned by United Water and Light Company.

*Organization:* Incorporated February 20, 1893, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Wellsville.

*Principal officers:* President, James Macken; Vice-president, A. M. Lynu; Secretary, W. D. Freer; Treasurer, D. M. Watt.

*Main business office:* Wellsville.

#### **West Branch Light and Power Company**

*Organization:* Incorporated February 8, 1906, under the Transportation Corporations Law (term fifty years), and consolidated without change of name August 8, 1906, with The Stamford Electric Light Company, incorporated July 6, 1892, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence of consolidated company:* Fifty years.

*Location of generating plants:* Electric: Stamford, South Kortright.

*Principal officers:* President and Treasurer, John P. Grant; Vice-president, Carrie E. Grant; Secretary, Helen R. Taylor.

*Main business office:* Stamford.

#### **Westchester Lighting Company**

*Control by other corporation:* Majority of capital stock owned by Consolidated Gas Company of New York.

*Organization:* Incorporated November 5, 1900, under the Transportation Corporations Law. December 1, 1900, the following corporations were merged into Westchester Lighting Company: The Yonkers Gas Light Company incorporated May 12, 1854, under the act for the formation of gas light companies (term fifty years); Municipal Gas Company of Yonkers, incorporated June 2, 1879, under the same act (term fifty years); The Westchester Gas Light Company of the City of Yonkers, incorporated September 24, 1875, under the act for the formation of gas light companies (term fifty years: see also certificate of incorporation of The Westchester Gas Light Company filed January 2, 1886, under the General Manufacturing Law); New York Suburban Gas Company, incorporated March 9, 1899, as a consolidation (term fifty years) of Eastchester Gas Light Company, incorporated September 11, 1890, under the General Manufacturing Law (term fifty years); The Pelham Gas Light Company, incorporated January 16, 1895, under the Transportation Corporations Law (term fifty years); Larchmont Gas Company incorporated January 6, 1897, under the Transportation Corporations Law (term fifty years); and Westchester Gas and Electric Company, incorporated January 2, 1897, under the Transportation Corporations Law (term fifty years). March 30, 1899, New Rochelle Gas and Fuel Company, incorporated December 1, 1887, under the act for the formation of gas light companies (term fifty years), was consolidated with New York Suburban Gas Company under the name of the

latter. Westchester Gas and Coke Company, incorporated March 6, 1899, under the Transportation Corporations Law (term fifty years); Port Chester Electric Lighting Company, incorporated June 28, 1898, under the Transportation Corporations Law (term fifty years); Huguenot Electric Light, Heat and Power Company, incorporated May 1, 1900, amended certificate (territory) filed December 1, 1900, under the Transportation Corporations Law (term fifty years); Eastchester Electric Company, incorporated July 26, 1889, under the General Manufacturing Law (term fifty years from July 1, 1889). July 23, 1891, The Combination Electric Light and Power Company, incorporated October 1, 1890, under the General Manufacturing Law, was consolidated with Eastchester Electric Company under the name of the latter (term fifty years from May, 1891). Larchmont Electric Light Company, incorporated February 23, 1894, under the Transportation Corporations Law (term fifty years from February 19, 1894); The Pelham Electric Light and Power Company, incorporated January 30, 1897, under the Transportation Corporations Law (term fifty years); and Mount Kisco Lighting Company, incorporated June 23, 1899, under the Transportation Corporations Law (term fifty years from June 23, 1899). December 1, 1902, the following corporations were merged into Westchester Lighting Company: Hudson River Gas and Electric Company, incorporated June 6, 1895, as a consolidation of Tarrytown and Irvington Union Gas Light Company, incorporated March 14, 1859, under the act for the formation of gas light companies (term fifty years); Excelsior Electric Light Company of Tarrytown, incorporated July 2, 1893, under the Transportation Corporations Law (term fifty years); New York and Dobbs Ferry Light, Heat and Power Company, incorporated June 11, 1894, as a consolidation (term fifty years) of Irvington and Greenburg Gas Company, incorporated May 15, 1894, under the Transportation Corporations Law (term fifty years), and Dobbs Ferry Lighting Company, incorporated April 28, 1894, under the Transportation Corporations Law (term fifty years); and Dobbs Ferry and Hastings Gas Company, incorporated May 5, 1887, under the General Manufacturing Law (term fifty years); and White Plains Lighting Company, incorporated June 10, 1898, under the Transportation Corporations Law (term fifty years). October 20, 1904, New York and Westchester Lighting Company, incorporated July 11, 1904, under the Transportation Corporations Law (term fifty years), was also merged into Westchester Lighting Company. June 13, 1914, Pelham Bay Park Electric Light, Power and Storage Company, incorporated July 23, 1890, under the General Manufacturing Law, was merged into Westchester Lighting Company.

*Term of corporate existence:* Fifty years.

*Location of generating plants:* Electric: Tarrytown. New Rochelle, Mt. Kisco; Coal gas: Pelham; Water gas: 119 Woodworth avenue, Yonkers; Pelham, Rye, White Plains, Tarrytown.

*Principal officers:* President, F. A. Stratton; Vice-presidents, B. W. Stilwell, W. J. Clark; Secretary, R. A. Carter; Treasurer, E. S. Bellows.

*Main business office:* Mount Vernon.

#### **Western New York Electric Company**

*Organization:* Incorporated November 2, 1911, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, A. N. Broadhead; Vice-president, S. B. Broadhead; Secretary, William R. Reynolds; Treasurer, Albert S. Price.

*Main business office:* 316 North Main street, Jamestown, N. Y.

**The Western Vermont Power and Light Company**

Adds "Inc." in New York.

*Organization:* Incorporated July 2, 1912, under the general laws, chapter 187, of the Public Statutes of the State of Vermont. Certificate authorizing the transaction of business in this State filed June 27, 1913.

*Term of corporate existence:* Not stated.

*Location of generating plant:* Electric: Carvers Falls, Vt.

*Remarks:* The business of this corporation in New York state is so inconsiderable that a complete report has not been required, and no figures for it are included in the tabulations. The following information is the substance of the report rendered for 1914:

Par value of stock issued and outstanding.....	\$120,000
Par value of bonds issued and outstanding.....	\$400,000
Amount paid as dividends on stock during 1914.....	\$10,200
Amount paid as interest on bonds during 1914.....	\$20,000
Total receipts during 1914.....	\$59,917
Total expenditures during 1914.....	\$30,714
Quantity of current sold in New York state during 1914.....	433,610 kw.h.
Total revenue from sale of current in New York state during 1914.....	\$3,327

*Principal officers:* President, Joseph B. Taylor; Vice-president, T. W. Moloney; Secretary, O. Clement Swenson; Treasurer, C. H. West.

*Main business office:* Rutland, Vt.

**West Shore Gas Company**

*Organization:* Incorporated December 15, 1905, under the Transportation Corporations Law. It succeeded to the franchises and property of The Haverstraw Light and Fuel Gas Company, incorporated July 26, 1898, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Water gas: Haverstraw.

*Principal officers:* President, A. G. Scully; Secretary, H. F. Bragg; Treasurer, J. A. Smith.

*Main business office:* Haverstraw.

**West Winfield Gas Company**

*Organization:* Incorporated December 4, 1897, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Gasoline gas: West Winfield.

*Principal officers:* President, J. H. Stephens; Vice-president, H. H. Wheeler; Secretary, A. J. Rose; Treasurer, A. C. Hackley.

*Main business office:* West Winfield.

**Wetmore Electric Company**

*Organization:* Incorporated August 20, 1898, under the Transportation Corporations Law. March 22, 1899, The Lowville Electric Light and Power Company, Limited,

incorporated February 13, 1889, under "Act to provide for the organization and regulation of certain business corporations" (L. 1875, ch. 611), term twenty-five years, was merged into Wetmore Electric Company.

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Belfort.

*Principal officers:* President, Charles D. Moore; Vice-president, Christina Schraub; Secretary, Charles S. Mereness; Treasurer, Henry A. Petrie.

*Main business office:* Lowville.

**Williamsville Natural Gas Company**

*Organization:* Incorporated September 7, 1904, under the Business Corporations Law.

*Term of corporate existence:* Fifty years.

*Location of natural gas wells:* Williamsville.

*Principal officers:* President, J. W. Stearns; Secretary and Treasurer, Edward C. Koester.

*Main business office:* 401 Iroquois Building, Buffalo.

**Yates Electric Light and Power Company**

*Control by other corporation:* Entire capital stock owned by Taylor Chemical Company.

*Organization:* Incorporated June 16, 1900, under the Transportation Corporations Law. Succeeded to the franchise of Penn Yan Electric Light and Power Company, incorporated August 4, 1891, under the Transportation Corporations Law (term fifty years).

*Term of corporate existence:* Fifty years.

*Location of generating plant:* Electric: Seneca Mills.

*Principal officers:* Secretary, William J. Tylee.

*Main business office:* Penn Yan.

**The Yonkers Electric Light and Power Company**

*Control by other corporation:* Majority of capital stock owned by The New York Edison Company.

*Organization:* Incorporated October 22, 1886, under the name of The Yonkers Schuyler Electric Company, under the act authorizing the formation of gas light companies (L. 1848, ch. 37); and May 24, 1892, name changed to The Yonkers Electric Light and Power Company by order of the Supreme Court.

*Term of corporate existence:* Fifty years.

*Nature of service:* Transmission and distribution of electric energy.

*Principal officers:* President, Thomas E. Murray; Vice-president, Arthur Williams; Secretary, J. W. Lieb; Treasurer, Joseph Williams.

*Main business office:* 9 Manor House Square, Yonkers.

**PART II: INCHOATE AND DORMANT CORPORATIONS**

The following statement gives for corporations organized to carry on an electric or gas business, which have either not yet begun operations or have ceased operations without becoming defunct as a corporation, a brief abstract of the more important information shown in their annual reports or in the Commission's records. No attempt has been made to tabulate returns of inchoate and dormant corporations.

**Brookfield Electric Light and Power Company, Inc.**

*History:* Incorporated in December, 1913; \$2500 par value of capital stock authorized by Public Service Commission, Second District, March 16, 1914. Corporation organized to supply the village of Brookfield, Madison county, with lighting facilities.

Balance sheet December 31, 1914:

<i>Assets Side:</i>	
Cash.....	\$104
Bills receivable.....	120
Other current assets.....	840
Fixed capital.....	3,762
	<b>\$4,826</b>

<i>Liabilities Side:</i>	
Interest matured and unpaid.....	\$30
Bills payable.....	1,050
Salaries and wages unpaid.....	91
Materials and supplies unpaid.....	418
Common stock.....	2,320
Surplus.....	917
<b>Total.....</b>	<b>\$4,826</b>

No income or expenses are reported for 1914.

*Principal officers:* President, C. H. Brown; Secretary, F. M. Spooner; Treasurer, M. T. Hibbard.

*Main business office:* Brookfield.

**Canadian-American Power Corporation**

*History:* Incorporated July 30, 1913. September 18, 1913, the Public Service Commission, Second District, authorized the issuance of \$500 par value of common stock for incorporation purposes. Applications for permission to commence construction and to exercise its franchises, to issue \$935,000 par value preferred stock and \$2,999,500 par value common stock, and to merge the Niagara Falls Electrical Transmission Company, were pending before the Commission at the close of 1914.

*Principal officers:* President, Rodman E. Griscom; Vice-president, Francis T. Homer; Secretary and Treasurer, Marshall J. Dodge.

*Main business office:* 40 Wall street, New York city.

**Churchville Light and Heating Company**

A letter dated July 16, 1914, from William L. Ormrod, ex-president, states that "the Churchville Light and Heating Company, Churchville, is no longer in business, having sold out to the Village of Churchville early in January, 1914."

**Cohoes Company**

*History:* Original charter as a hydraulic corporation dated March 28, 1826. August 28, 1913, the Public Service Commission, Second District, approved the application of the Cohoes Company to exercise rights and privileges under certain franchises and to construct a hydro-electric plant upon the lands in the bed of the Mohawk river adjacent to the uplands of the petitioner in the city of Cohoes, for the purpose of furnishing to manufactories, etc., electric power in place of hydraulic power.

Balance sheet December 31, 1914:

Assets Side:	
Cash.....	\$86,664
Accounts receivable.....	69,719
Investments.....	157,692
Fixed capital, electric.....	5,195,721
Suspense.....	440,201
<b>Total.....</b>	<b>\$5,949,996</b>
Liabilities Side:	
Bills payable.....	\$728,000
Accrued amortization of capital.....	88,870
Common stock.....	1,200,000
Corporate surplus.....	3,932,126
<b>Total.....</b>	<b>\$5,949,99</b>

The income account shows \$8415 interest received and \$25,906 interest paid during 1914.

Fixed capital is reported to consist of "Real estate, water rights, developed and undeveloped dams and canals, factories, Crescent property, and farms".

*Principal officers:* President and Treasurer, Lorenzo Semple; Secretary, W. P. Parsons.

*Main business office:* Cohoes.

**Consumers' Gas Company of Long Island**

*History:* Incorporated March 14, 1914. The order of the Public Service Commission, Second District, dated September 10, 1914, authorized the respondent to construct and operate a gas plant in the towns of Southold and Riverhead, Suffolk county, and to exercise privileges under franchises granted by those towns.

Balance sheet December 31, 1914:

Assets Side:	
Cost of plant and equipment.....	\$8,820
Cash.....	644
Stock subscriptions.....	3,690
Deficit.....	178
<b>Total.....</b>	<b>\$13,332</b>

<b>Total.....</b>	<b>\$13,332</b>

Expenses and income deductions for 1914 are reported as salaries and expenses of general officers \$11, and interest deductions \$167. No mention of any revenue is made.

*Principal officers:* President, Moritz Korff; Vice-presi-

dent, Archibald McLaren; Secretary and Treasurer, Robert Taylor.

*Main business office:* Room 507, 35 Nassau street, New York city.

**Endicott-Union Gas Company**

*History:* Incorporated February 19, 1911. As of December 31, 1913, the report states: "No plant or equipment yet erected. The incorporators have expended large sums of money on account of incorporation, securing charter, franchises, attorney's fees, bonds for franchises, and other necessary expenses, but no stock or bonds have been issued. The engineers who have been employed to go over the matter carefully for the purpose of getting business started, claim plant and equipment can not be made and erected with amount authorized by Commission owing to increased cost of materials, labor, etc." The issue of a mortgage to secure the payment of bonds to be issued thereunder, to the maximum amount of \$150,000, has been authorized by the Public Service Commission, Second District. Of this \$150,000, the aggregate amount of \$75,000 par value of bonds may be issued when the \$25,000 capital stock shall have been subscribed for, cash paid in, and proof of issue filed with the Commission. The corporation has franchises covering natural gas operations in the villages of Endicott and Union. The report of this company for the year ended December 31, 1914, had not been filed at date of going to press.

**The Harvest Gas and Oil Company**

*History:* July 3, 1913, the Public Service Commission, Second District, authorized the respondent to build and operate a plant for the conveyance and distribution of natural gas in the town of East Hamburg, Erie county, and to issue \$1400 par value of common stock in addition to the \$2100 already issued. The balance sheet as of December 31, 1914, shows an investment in meters, pipe, regulators, house pump and fittings, amounting to \$7138. On the other side are shown common stock \$3500 and corporate surplus \$3638. The company reports that it has a franchise to supply the Jewettville Brick Company with natural gas at 13 cents per M cu. ft. at Orchard Park, and at 14 cents per M cu. ft. at Jewettville. No mention of any revenues or expenses is made although it is stated that one well and four miles of pipe line were in operation at close of year.

*Principal officers:* President, John Strebel; Vice-president, William Beck; Secretary, Charles H. Brown; Treasurer, Frank E. Murphy.

*Main business office:* Orchard Park.

**Heuvelton Heat, Light and Power Company**

*History:* Incorporated September 19, 1908 under the Transportation Corporations Law. February 10, 1913, the Public Service Commission, Second District, approved the transfer to the Heuvelton Heat, Light and Power Company of certain properties and franchises owned by Edward L. Thornton, operating an electric plant in the village of Heuvelton, St. Lawrence county. The Commission also approved the exercise by the Heuvelton Heat, Light and Power Company of all rights under such franchise in the towns of Oswegatchie and DePeyster, and consented to the issue of \$25,000 capital stock in payment for the property. The transfer was effected March 5, 1913. September 1, 1913, the corporation ceased operations, and October 14, 1913, sold its real estate not used in electric operations and distributed the proceeds to the stockholders. The report for 1914 states that \$750 was received during the year for rent of saw and grist mill. No other revenues or expenses are reported.

*Principal officers:* President, Edward L. Thornton; Secretary and Treasurer, Joseph F. Brown.

*Main business office:* Canton.

### Long Island Gas Corporation

*History:* By order of the Public Service Commission, Second District, dated August 5, 1914, consent was given to the transfer by the Sag Harbor Lighting Company of all its works, system, franchises, and property to the Long Island Gas Corporation; also to the transfer by Henry F. Cook of certain franchises from the Town and Village of Southampton; and permission and approval were given to the Long Island Gas Corporation to exercise the rights and privileges for construction, maintenance, and operation under said last named franchises. No exercise of the privileges conferred by this order appears to have been made during 1914, and no report for that year has been filed.

### Long Lake Light, Heat and Power Company

*History:* Incorporated April 10, 1912. Authorized June 10, 1912, by the Public Service Commission, Second District, to construct and operate an electric light plant in Long Lake, Hamilton county, and to exercise privileges under a franchise granted to it by the Town of Long Lake. On the same date the corporation was also authorized to issue its common capital stock to the amount of \$6000. It reports that on December 31, 1914, no stock had yet been issued presumably for the reason that the company had not yet obtained the water power that it expected to get at the time of incorporation, the project being deferred as there is a prospect of obtaining a better source of water supply at another point than that originally contemplated.

*Principal officers:* President, John P. Brannen; Secretary, Henry D. Kellogg; Treasurer, L. L. Jennings.

*Main business office:* Long Lake.

### New York Central Gas Company, Inc.

Incorporated January 31, 1913, for the purpose of producing and distributing natural gas. Franchises are claimed for the towns of Avon, Geneseo, Leicester, Lima, and Mt. Morris, Livingston county; Elba and Oakfield, Genesee county; and Canandaigua, Ontario county. There is no indication of any construction having been begun.

### New York Gas Company

No report was required from this company for the year 1914. A letter from George T. Armstrong, assignee of the above named corporation, stated that "the assets would not begin to pay one-half of the liabilities" and that the corporation was practically defunct.

### Niagara Falls Electrical Transmission Company

*History:* Incorporated February 25, 1905, for the transmission and sale of electricity. It is controlled through stock ownership by the Electrical Development Company of Ontario, Limited. It owns franchises in the towns of Tonawanda, Lockport, Pendleton, Royalton, and Sweden; cities of Tonawanda, North Tonawanda, and Lockport; and villages of Medina and Holley. In addition to above franchises, this company has a controlling interest in the Niagara Falls Gas and Electric Light Company, and is said to claim privileges of franchises owned by that company. Its only revenues are those accruing from the rental of real estate, which amounted to \$240 during 1914; taxes, insurance, and miscellaneous expenses amounted to \$554, developing a deficit of \$314 as the net result of the year's operations. Interest deductions were \$36,117, making the net corporate loss for the year \$36,431, which added to the deficit of \$149,073 at the beginning of the year leaves a deficit of \$185,504 at the close of the year.

Balance sheet December 31, 1914:

Assets Side:	
Accounts receivable.....	\$175,433
Miscellaneous free investments.....	51,500
Fixed capital.....	108,756
Prepayments.....	14
Amortization not elsewhere provided for.....	216,423
Corporate deficit.....	185,504
Total.....	\$737,630

### Liabilities Side:

Advances by controlling corporation.....	\$577,840
Funded debt.....	59,790
Common stock.....	100,000
Total.....	\$737,630

*Principal officers:* President and Treasurer, Frederic Nicholls; Vice-president, Frank A. Dudley; Secretary, Albert Oakley.

*Main business office:* 45 Fall street, Niagara Falls.

### Oriskany Hydro-Electric Company

*History:* Incorporated January 7, 1907, to develop water power on the Oriskany creek, and to generate, transmit, and sell electricity. It holds franchises to furnish electric current in a number of villages and towns in Oneida, Madison, and Chenango counties. By order of the Public Service Commission, Second District, dated February 24, 1910, the company was authorized to issue \$425,000 par value of its capital stock and \$1,100,000 par value of first mortgage bonds: \$50,000 par value of capital stock which was issued in exchange for land and water rights held by trustees for the corporation has since been returned to the corporation, with the exception of eleven shares. No bonds have been issued. Negotiations are under way for financing.

*Principal officers:* President, H. W. Roberts; Vice-presidents, F. F. McBride, G. W. Sauborn, H. H. Hathaway; Secretary, F. F. McBride; Treasurer, F. G. Mott.

*Main business office:* 222 Arcade Building, Utica.

### Port Henry Gas Company

The secretary of the above named corporation advises that on or about the 18th day of December, 1912, the company went out of business and that it is his belief that the plant will never be operated again. The company has not dissolved, however, nor has it surrendered its franchise. April 4, 1914, a judgment for the sum of \$1508 was entered against the company in favor of Witherbee, Sherman and Company. The Village of Port Henry is now being supplied with electric energy by the Port Henry Light, Heat and Power Company.

*Principal officers:* Vice-president, L. S. Collins; Secretary and Treasurer, H. E. Kidder.

*Main business office:* Port Henry.

### Sylvan Beach Electric Light and Power Company

*History:* It appears that there has been a *de facto* municipal corporation in the town of Vienna of the so called area or territory of Sylvan Beach, which supposed corporation, exercising municipal powers under chapter 361 of the laws of 1901, by a vote of its inhabitants and property owners, in the years 1910 and 1911 built and established an electric lighting and power plant to operate within its boundaries. For the purpose of building its plant, it issued municipal bonds to the amount of \$6000 at 5 per cent interest, \$1000 becoming due and payable serially after February 28, 1915. It also borrowed on its notes \$2638 at 6 per cent interest. October 17, 1911, the Court of Appeals declared said chapter 361 of the laws of 1901 to be illegal and unconstitutional, whereupon the so called municipal corporation of Sylvan Beach ceased to exist. A letter dated January 7, 1915, advises that "on the 23rd of June last, Supreme Court Justice Hubbs of Oswego County issued an order to the former board of trustees of Sylvan Beach, directing that they re-convene and assume their duties, and take the necessary steps toward liquidating the debts then standing against the old municipality, principal of which were the unpaid notes and bonds issued to raise money for the building of the electric lighting plant. The order was obeyed by the board, which re-convened, elected its successors in office, as the old law directed, and made the necessary assessment and tax levy. The tax is now being collected. The lighting plant, in the

meantime, has remained idle since September 15, 1912." No report will be required of this corporation for 1915, since there is apparently no intention on the part of the incorporators of resuming operations.

*Principal officers:* President, Ira L. Snell; Vice-president, Roswell B. Downing; Secretary and Treasurer, Anna M. Hemstreet.

*Main business office:* Canastota.

#### Trenton Oil, Gas and Fuel Company

*History:* Authorized by the Public Service Commission, Second District, under date of July 24, 1913, to exercise a franchise and to construct and maintain a natural gas plant in the town of Aurora, Erie county. The report for the year ended December 31, 1914, states that the company has one well in operation. Revenues from the sale of gas from this well, situated at Jewettville, are reported as \$547. Total expenditures for the year are given as \$535, and the cash balance on hand at close of year as \$64.

*Principal officers:* President, Roswell S. Price; Vice-president, Frederick Fox; Secretary, D. A. Minard; Treasurer, Howard M. Albee.

*Main business office:* 216 Pearl street, Buffalo.

#### Tri-County Light and Power Company

*History:* Incorporated April 4, 1912. By orders of June 18 and 26, 1912, it was authorized by the Public Service Commission, Second District, to construct and operate electric plants in the town of Gilboa, county of Schoharie; town of Prattsville, Green county; and town of Roxbury, Delaware county; and to exercise privileges under franchises granted by those towns. The order of June 18th also authorized the company to issue \$5000 par value of its capital stock and \$60,900 par value of its 30-year 5 per cent gold bonds.

Balance sheet December 31, 1914:

<i>Assets Side:</i>	
Cash.....	\$2,228
Accounts receivable.....	28
Fixed capital, electric.....	41,022
Fixed capital, other departments.....	1,211
Unamortized debt discount and expense.....	2,220
<b>Total.....</b>	<b>\$46,709</b>
<i>Liabilities Side:</i>	
Interest matured and unpaid.....	\$750
Accounts payable.....	931
Funded debt.....	40,000
Common stock.....	5,000
Corporate surplus.....	28
<b>Total.....</b>	<b>\$46,709</b>

The hydraulic power plant by which electric energy is to be generated was completed in December, 1914. A few consumers were supplied during the year, but it is stated that such service is still in the experimental stage, whatever expenses there are being borne by the West Branch Light and Power Company.

*Principal officers:* President and Treasurer, John P. Grant; Vice-president, Carrie E. Grant; Secretary, Helen R. Taylor.

*Main business office:* Stamford.

#### The Thomson-Houston Electric Light Company of Yonkers

*History:* Incorporated July 11, 1888, under the General Manufacturing Law (term fifty years). The balance sheet as of December 31, 1914, shows \$100,000 electric fixed capital, described as "Rights, property, and franchises," as the only asset; against this is a liability for \$100,000 common stock, the majority of which is owned by the Yonkers Electric Light and Power Company. The only franchise claimed by the respondent is one for the city of Yonkers. The intention of the company as regards future development is not stated.

*Principal officers:* President, Thomas E. Murray; Vice-president, Nicholas F. Brady; Secretary and Treasurer, Joseph Williams.

*Main business office:* 9 Manor House Square, Yonkers.

#### Waterford Electric Light, Heat and Power Company

This corporation is not now operating, owing to the appropriation of its lands by the State of New York for the purposes of the barge canal. Its only revenues during the year were \$8 derived from the rental of lands still owned. Payments for taxes and incidentals are given as \$69: \$500,000 common stock and \$500,000 mortgage bonds are reported as outstanding at close of 1914. No balance sheet or income account is reported.

*Principal officers:* President, John T. Christie; Vice-president, William P. Dauchy; Secretary, Thomas O'Connor; Treasurer, James H. Caldwell.

*Main business office:* Waterford.

#### The Wynantskill Hydro-Electric Company

*History:* Incorporated March 10, 1911, under article 7 of the Transportation Corporations Law. By order of the Public Service Commission dated August 1, 1911, it was authorized to construct and operate an electric plant in the towns of Sand Lake and North Greenbush, Rensselaer county, and to exercise privileges under franchises granted by those towns; \$7500 par value of capital stock was also authorized by that order. November 26, 1912, it was authorized to issue an additional \$4500 par value of capital stock, together with \$7500 par value of mortgage bonds.

Balance sheet December 31, 1914:

<i>Assets Side:</i>	
Cash.....	\$100
Fixed capital.....	17,535
<b>Total.....</b>	<b>\$17,635</b>
<i>Liabilities Side:</i>	
Funded debt.....	\$6,200
Common stock.....	5,625
Preferred stock.....	1,875
Surplus.....	3,935
<b>Total.....</b>	<b>\$17,635</b>

The income and corporate surplus or deficit accounts for 1914 are not reported.

*Principal officers:* President, C. C. Hastings; Vice-president and Treasurer, D. H. Hastings; Secretary, E. R. Hastings.

*Main business office:* West Sand Lake.

### PART III: MUNICIPALLY OWNED ELECTRIC OR GAS PLANTS

The following statement gives a complete list of municipally owned electric or gas plants under the Commission's jurisdiction, with brief abstracts of the returns made by those whose reports were too incomplete or inconsistent for tabulation.

#### Village of Arcade

Electric plant, controlled by Village Board of Trustees, three members.

#### Village of Bath

A letter dated January 8, 1915, from G. H. Parker, president of the Board of Trustees, states that the electric

plant "is under construction and will not be in operation for at least six months". No report for the year ended February 28, 1915, was required by the Commission.

#### Village of Bergen

Electric plant, controlled by Board of Light Commissioners, three members.

**Village of Boonville**

Electric plant, controlled by Board of Light Commissioners, three members.

**Village of Brocton**

Electric plant, controlled by Village Board of Trustees, five members.

**Village of Camden**

Electric plant, controlled by Light Commission, three members.

**Village of Cape Vincent**

Electric plant, controlled by Water and Light Board, two members.

**Village of Castile**

Electric plant, controlled by Village Board of Trustees, five members.

*Remarks:* Returns incomplete; not tabulated. The report of this municipality for the year ended February 28, 1915, does not give any statement of assets and liabilities except the cost of plant and equipment \$13,000, unmatrued interest accrued \$38, and funded debt outstanding \$6500. Production expenses are given as \$5743. The revenues appear to have been \$5926, exclusive of an appropriation of \$1500 by the municipality.

**Village of Clifton Springs**

Electric plant, controlled by Board of Trustees, five members.

*Remarks:* Returns incomplete; not tabulated. As of February 28, 1915, 265 consumers' meters were reported in service, with a street lighting system comprising 50 500-watt arc lamps. Bonds to the amount of \$16,000 were reported as outstanding against the plant. No income or corporate surplus or deficit account is given.

**Village of Clinton**

Electric plant, controlled by Light Commission, five members.

**Village of Dryden**

Acetylene gas plant, controlled by Board of Trustees.

*Remarks:* Returns incomplete; not tabulated. Report covering year ended February 28, 1915, does not give any statement of assets and liabilities except the cost of plant and equipment \$4000, materials and supplies on hand \$75, and funded debt outstanding \$2750. No statement of receipts and disbursements is made. Dryden village lights its streets from this gas plant, and also supplies private users at \$1.25 per hundred feet of gas. The number of consumers' meters in service at close of year is given as 75.

**City of Dunkirk**

Electric plant, controlled by Board of Water Commissioners, three members.

**Village of Fairport**

Electric plant, controlled by Municipal Commission, three members.

**Village of Frankfort**

Electric plant, controlled by Municipal Electric Light Commission, three members.

**Village of Freeport**

Electric plant, controlled by Board of Village Trustees, four members.

**Village of Greene**

Electric plant, controlled by Municipal Board, three members.

**Village of Green Island**

Electric plant, controlled by Electric Light Commission, three members.

**Village of Greenport**

Electric plant, controlled by Village Board of Trustees, three members.

**Village of Groton**

Electric plant, controlled by Board of Water and Light Commissioners, three members.

**Village of Hadley**

Electric plant, controlled by Town Board, six members.

**Village of Hamilton**

Electric plant, controlled by Board of Water and Light Commissioners, three members.

**Village of Herkimer**

Electric plant, controlled by Municipal Commission, four members.

**Village of Holley**

Electric plant, controlled by Board of Light Commissioners, three members.

**Village of Ilion**

Electric plant, controlled by Board of Light Commissioners, five members.

**City of Jamestown**

Electric plant, controlled by Board of Water and Light Commissioners, five members.

**Village of Lake Placid**

Electric plant, controlled by Board of Trustees, five members.

*Remarks:* Report received too late for tabulation. Balance sheet February 28, 1915:

<i>Assets Side:</i>	
Cash.....	\$2,815
Accounts receivable.....	1,682
Materials and supplies.....	2,126
Fixed capital, electric.....	67,046
<b>Total.....</b>	<b>\$73,669</b>
<i>Liabilities Side:</i>	
Accounts payable.....	\$969
Funded debt.....	44,600
Accrued amortization of capital.....	5,650
Surplus.....	22,450
<b>Total.....</b>	<b>\$73,669</b>

**Income account for year ended February 28, 1915:**

Revenue from municipal light and power.....	\$7,091	
Revenue from commercial metered lighting.....	11,620	\$18,711
<b>Production expenses.....</b>	<b>\$11,600</b>	
General expenses.....	1,124	
Taxes.....	432	13,155
<b>Net operating revenue.....</b>	<b>\$6,324</b>	
Non-operating income.....	5	5
<b>Gross income.....</b>	<b>\$6,329</b>	
Interest paid on funded debt.....	\$2,172	
Other interest.....	422	2,594
<b>Net income.....</b>	<b>\$3,734</b>	
	<i>Debits</i>	<i>Credits</i>
Surplus balance beginning of year.....		\$17,400
Net income for year.....		3,734
Appropriation from municipality for maintenance.....		1,040
Miscellaneous adjustments.....		378
Bad debts written off.....	\$102	
Surplus balance at close of year.....	22,450	
	<b>\$22,552</b>	<b>\$22,552</b>

Report shows 345,227 kw.h. sold during year, of which 118,574 kw.h. were sold to private consumers; 169,019 kw.h. to municipality for light and power other than street lighting; and 57,634 kw.h. for municipal street lighting. The plant is reported to have had at the close of the year 1 flat rate consumer and 498 consumers' meters in service.

**Village of Little Valley**

Electric plant, controlled by Board of Water and Light Commissioners, three members.

**Village of Marathon**

Electric plant, controlled by Board of Water and Light Commissioners, three members.

**Village of Mayville**

Electric plant, controlled by Village Board of Trustees, five members.

*Remarks:* Returns incomplete; not tabulated. Accounts of Electric department are not kept separate from those of the

Water department, and therefore details of operations can not be reported. Total electric operating revenues are reported as \$5018, \$700 of which was an appropriation for street lighting made by the Village. The amount of expenses is not given. At the close of the year there were 2 flat rate consumers and 190 consumers' meters in service. The municipal street lighting system comprised 146 incandescent lamps.

#### **Village of Mohawk**

Electric plant, controlled by Municipal Commission, four members.

#### **Village of Penn Yan**

Electric plant, controlled by Municipal Board, five members.

#### **Village of Philadelphia**

Electric plant, controlled by Village Board of Trustees, three members.

#### **Village of Port Byron**

Electric plant, controlled by Village Board of Trustees, five members.

#### **Village of Rockville Center**

Electric plant, controlled by Village Board of Trustees, five members.

#### **Village of Rouses Point**

Electric plant, controlled by Village Board, three members.

#### **City of Salamanca**

Electric plant, controlled by Water and Light Commission, three members.

#### **Village of Savannah**

Electric plant, controlled by Village Board of Trustees, five members.

#### **Village of Sherburne**

Electric plant, controlled by Village Board of Trustees, three members.

#### **Village of Silver Springs**

Electric plant, controlled by Board of Trustees.

#### **Village of Skaneateles**

Electric plant, controlled by Municipal Board, three members.

#### **Village of Solvay**

Electric plant, controlled by Water and Light Commission, four members.

*Remarks:* Returns incomplete; not tabulated. This municipality purchases current from the Syracuse Lighting Company, receiving it at a sub-station owned by the Village and distributing from that point without transforming. The station is also used as a pumping station. The statement of assets and liabilities is incomplete, but the following items are reported:

Assets: cash \$4656, accounts receivable \$277, materials and supplies \$1672, fixed capital \$33,444. Liabilities are not given; \$1444 is reported as having been expended during the year for transformers, meters, poles and wire. The income account for the year ended February 28, 1915, shows the following figures: Electric operating revenues \$14,872; cost of 512,400 kw.h. purchased \$2845; other expenses \$5928. No appropriations were made by the municipality for the lighting department during the year. At the close of the year the street lighting system included 248 incandescent lamps. Of the total number of kw.h. of electric energy purchased, 197,201 kw.h. were sold to private consumers, 165,200 kw.h. were used by the Water department, 88,488 kw.h. were delivered to the street lighting system, 6379 kw.h. were used in the Electric department, and 55,132 kw.h. were lost or remained unaccounted for.

#### **Village of Springville**

Electric plant, controlled by Village Board of Trustees, five members.

#### **Village of Theresa**

Electric plant, controlled by Board of Light Commissioners, three members.

#### **Village of Tully**

Electric plant, controlled by Board of Water and Light Commissioners, three members.

#### **Village of Tupper Lake**

Electric plant, controlled by Village Board of Trustees, five members.

#### **Village of Union**

Electric plant, controlled by Board of Trustees, five members.

*Remarks:* Returns incomplete; not tabulated. No balance sheet or details of revenues or expenses are shown. Inclosed with the report to the Public Service Commission, Second District, for the year ended February 28, 1915, was a printed statement showing the following receipts and disbursements:

Balance on hand February 28, 1914	\$719
Received from taxes	2,995
Received from barrel	4
Received from George Gilinsky	20
Received from collections	3,489
<b>Total</b>	<b>\$7,227</b>
Total disbursements	6,769

Balance February 28, 1915..... \$458

Bonds outstanding at close of year were reported as \$10,020. At the close of the year 231 consumers' meters were reported in service. Street lighting system comprises 40 enclosed arc lamps and 10 incandescent lamps. Base rate for electric lighting 10 cents per kw.h.

#### **Village of Watkins**

Electric plant controlled by Board of Water, Sewer, and Electric Light Commissioners, five members.

#### **Village of Westfield**

Electric plant, controlled by Board of Light Commissioners, three members.

## ELECTRICAL CORPORATIONS (CLASS A)

Electrical Corporations of Class A are those whose operating revenues for the three years next preceding that covered by the latest annual report to the Commission have averaged over \$25,000 per annum. The figures following the name give the order in which the corporation appears in the tables.

Babylon Electric Light Company.....	E 38	Nassau Light and Power Company.....	E 9
Binghamton Light, Heat and Power Company.....	E 11	Niagara and Erie Power Company.....	E 13
Buffalo and Niagara Falls Electric Light and Power Company.....	E 10	Niagara Falls Power Company, The.....	E 1
Buffalo General Electric Company.....	E 3	Niagara, Lockport and Ontario Power Company.....	E 4
Carthage Electric Light and Power Company.....	E 31	Northern Power Company.....	E 15
Cataract Power and Conduit Company, The.....	E 2	Ogdensburg Power and Light Company.....	E 27
Cliff Electrical Distributing Company.....	E 6	Olean Electric Light and Power Company (old).....	E 21a
Colliers Light, Heat and Power Company.....	E 52	Olean Electric Light and Power Company (new).....	E 21b
Consolidated Electric Company.....	E 41	Ontario Light and Traction Company.....	E 33
Cortland County Traction Company, The.....	E 22	Orange and Rockland Electric Company, The.....	E 29
Despatch Heat, Light and Power Company.....	E 36	Oswegatchie Light and Power Company.....	E 56
East Creek Electric Light and Power Company.....	E 20	Oswego River Power Transmission Company.....	E 47
Eastern Monroe Electric Light and Gas Company <sup>1</sup> .....	E 44	Owego Light and Power Company, The.....	E 50
Edison Electric Light and Power Company of Amsterdam.....	E 17	Patchogue Electric Light Company.....	E 32
Fulton Light, Heat and Power Company.....	E 25	Paul Smith's Electric Light and Power and Railroad Company, The....	E 26
Genesee Light and Power Company.....	E 19	Potsdam Electric Light and Power Company, The.....	E 54
Glen Cove Light and Power Company.....	E 51	St. Lawrence River Power Company, The.....	E 7
Hannawa Falls Water Power Company.....	E 30	Sayre Electric Company.....	E 24
Hartwick Power Company.....	E 58	Schenectady Illuminating Company.....	E 5
Hornell Electric Company.....	E 34	Schenectady Power Company.....	E 14
Huntington Light and Power Company.....	E 35	Seneca River Power Company.....	E 46
International Power and Transmission Company.....	E 48	Sodus Gas and Electric Light Company.....	E 40
Ithaca Electric Light and Power Company.....	E 16	Standard Light, Heat and Power Company.....	E 45
Jamestown Lighting and Power Company.....	E 23	Suffolk Light, Heat and Power Company, The.....	E 37
LeRoy Hydraulic Electric Gas Company.....	E 42	Tonawanda Power Company.....	E 12
Liberty Light and Power Company <sup>1</sup> .....	E 55	Twin State Gas and Electric Company, The (Hoosick Falls Division)...	E 39
Livingston-Niagara Power Company <sup>1</sup> .....	E 43	Wallkill Valley Electric Light and Power Company.....	E 57
Long Island Lighting Company.....	E 18	Wetmore Electric Company.....	E 53
Mohawk Hydro-Electric Company.....	E 28	Yonkers Electric Light and Power Company, The.....	E 8
Montgomery Electric Light and Power Company, The.....	E 49		

Returns not tabulated; see Historical and Explanatory Statement.

Rockland Electric Company

<sup>1</sup> This corporation, while having average revenues below \$25,000 per annum for the three years next preceding that covered by the latest annual report to the Commission, made its report on the form provided for corporations in Class A, and is therefore included in this list.

## UNINCORPORATED ELECTRIC PLANT (CLASS A)

Returns not tabulated; see Historical and Explanatory Statement.

Ellenville (Honk Falls Power Company)

TABLE 301: BALANCE SHEET, ELECTRICAL

Figures in *italics* denote *credit balances* on the assets side and *debit balances* on the liabilities side.

The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in

<sup>1</sup> The book cost of land and improvements not devoted to electric operations is included with "Fixed capital, electric" in the case of such property acquired prior to January 1, 1909. Similar property acquired on or since that date is included with "Fixed capital, other departments".

<sup>2</sup> Includes \$630,020 "Replacement suspense".

<sup>3</sup> Includes \$1,256,443 "Construction work in progress".

<sup>4</sup> Includes \$190,973 renewal and contingency reserve (optional).

<sup>5</sup> Includes unmatured interest accrued on entire nominal issue, although bonds to the par value of \$40,000 are reported as held by or for the respondent.

TABLE 302: INCOME AND CORPORATE SURPLUS OR DEFICIT ACCOUNTS,

Figures in *italics* denote *losses during year and deficits*.

The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in

<sup>1</sup> Respondent makes no charge against operations for uncollectible bills, but appropriated from surplus during the year \$7000 to "Reserve for bad debts".

<sup>2</sup> Includes \$221,525 credited to "Replacement suspense" pursuant to order of Public Service Commission, Second District, and \$7000 appropriated by respondent during the year to "Reserve for bad debts" in lieu of a charge against operations for uncollectible bills.

<sup>3</sup> Includes \$11,120 "Discount on company's bonds purchased for sinking fund".

<sup>4</sup> Includes \$53,040 "Premium, interest, expenses, etc., on retirement of bonds".

<sup>5</sup> Adjustment of error in previous year's accounting received too late for inclusion in the Commission's published report for 1913.

<sup>6</sup> Includes \$38,183 "Sinking fund reserve," and \$30,187 "Adjustment of reserve for dividends".

<sup>7</sup> "Operating expenses prior period."

<sup>8</sup> \$1911 interest on bonds reacquired for sinking fund is charged to "Sinking fund accruals".

\* Includes \$151,887 purchase price of sundry parcels of land for storage sites, etc., held temporarily in suspense as "Special land account".

† Balance sheet as of July 31, 1914; see Historical and Explanatory Statement.

‡ Report covers period August 1, to December 31, 1914; see Historical and Explanatory Statement.

\* Includes \$115,000 "Intangible capital".

† Includes \$56,695 "Construction work in progress".

‡ \$232,000 short time notes are included in funded debt while not such in form, because they are temporarily substituted for a like par value of bonds, and it is the intention to fund them eventually.

TABLE 302: INCOME AND CORPORATE SURPLUS OR DEFICIT ACCOUNTS,

Figures in *italics* denote *losses during year and deficits*.

The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in

† Report covers period January 1, to July 31, 1914; see Historical and Explanatory Statement.

‡ Adjustment made as result of examination by Public Service Commission, Second District.

§ Report covers period August 1, to December 31, 1914; see Historical and Explanatory Statement.

|| Interest on \$232,000 short time notes to be eventually funded is included with interest on funded debt; this interest is payable only at the option of the company's board of directors, and is credited back in "Other additions to surplus".

|| Adjustment made as result of examination by Public Service Commission, Second District.

|| Not the amount previously reported, but the amount used by respondent in re-writing its books during the year.

|| Includes \$442,104 "Cancellation of W. B. Cogswell and Potsdam Red Sandstone Company accounts," and \$7638 correction of fixed capital accounts.

|| Amount appropriated during the year to provide for amortization accrued prior to 1914.

|| Composed chiefly of adjustments made on the respondent's books during the year.

16													15

<sup>13</sup> Balance sheet purports to represent assets and liabilities of Hoosick Falls Division only, but as there is no separate corporate organization the apportionment is obviously more or less arbitrary. "Other reserves and suspense credits" includes \$212,440 "Internal accounts with other Divisions".

<sup>14</sup> Represents "Contracts" (apparently with Niagara, Lockport and Ontario Power Co. for furnishing electric energy to respondent).

<sup>15</sup> Includes \$9000 "Suspense to be amortized".

TABLE 302: INCOME AND CORPORATE SURPLUS OR DEFICIT ACCOUNTS

Figures in *italics* denote *losses during year* and *deficits*.

The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in

<sup>22</sup> Income account purports to represent transactions of Hoosick Falls Division only, but as there is no separate corporate organization the apportionment is obviously more or less arbitrary. The disposition of the constructive income for the year is not indicated except by the notation "Carried to main office".

<sup>24</sup> Net credit resulting from changes in fixed capital accounts after examination by Commission's examiners and engineers.

<sup>25</sup> \$4591 adjustment of accounts receivable to take upon books bills for December sales of current, not previously credited to revenue; \$1015 "Inventory in excess of last year"; and \$417 adjustments of accounts receivable.

## (CLASS A), DECEMBER 31, 1914 (concluded)

Canadian Niagara Power Co. debenture series " B " ..... Canadian Niagara Power Co. debenture series " C " .....  Totals. ....	%        4.25 5  						

The consideration for 10,050 shares appears to have been the execution of a contract for the sale of power to The Cataract Power and Conduit Company, and the assignment to it of the following franchises and contracts theretofore owned by The Niagara Falls Power Company: (a) Franchise for the distribution of power in the city of Buffalo; (b) License to use canal lands in the city of Buffalo; (c) Contracts with Buffalo Railway Company and Buffalo General Electric Company for the sale of power.

<sup>2</sup> The following investments are carried on the books at a total valuation of \$1,500,000: 10,050 shares of The Cataract Power and Conduit Company, 2500 shares of Tonawanda Power Company, 1600 shares common and 1345 shares preferred stock of Niagara Junction Railway Company.

<sup>3</sup> "Purchased with lands deeded to Niagara Development Company for its residential district in Niagara Falls."

\* 4102 shares at a valuation of \$518,891 acquired October, 1893, and 110 shares at a valuation of \$13,970 acquired December, 1898, in exchange for equal amounts of capital stock of respondent.

<sup>6</sup> Received in exchange for like par value of capital stock of respondent.

7,300 shares acquired December, 1892, in consideration of \$300,000 par value of first mortgage bonds; 1895 shares acquired at various times for \$18,950 cash; 80 shares "acquired from time to time by the respondent without money consideration".

<sup>8</sup> Net profits from operation during year 1914.

\* Purchased with land deeded to Niagara Junction Railway Company for right of way.

<sup>10</sup> 1344 shares acquired October, 1903, at a valuation of \$221,167, in consideration of capital stock of the respondent to the amount of \$219,009 and \$2158 cash; 1 share of \$100 purchased October, 1899, for cash.

<sup>11</sup> Received in exchange for like par values of Tonawanda-Cataract Power Company and Tonawanda Lighting and Heating Company capital stocks.

<sup>13</sup> 5000 shares acquired by issue of \$614,000 par value of common stock and \$200,000 par value of first mortgage bonds of respondent; 1000 shares received as a stock dividend.

<sup>14</sup> \$50,000 par value of stock was received in part payment for plant and lines sold Niagara and Erie Power Company; \$10,000 was purchased for cash at par.

<sup>15</sup> Received in exchange for like par value of first preferred stock of respondent.

<sup>17</sup> \$80,000 par value of bonds and a special contract for the sale of power to respondent received in consideration of the conveyance by deed of certain prop-

respondent received in consideration of the conveyance by deed of certain property and water rights.

TABLE 303: MISCELLANEOUS INVESTMENTS, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED  
DECEMBER 31, 1914 (concluded)

Only those corporations are included which report items that appear in the Balance Sheet, Table 301, as "Miscellaneous Investments".  
The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

<sup>18</sup> This amount represents the appraised value, including cost of improvements, of properties purchased by respondent in connection with water rights, etc., and taken out of Land account.

<sup>19</sup> Received in exchange for like par value of bonds of respondent.

<sup>20</sup> Acquired with property at time of purchase under foreclosure sale. Actual money cost can not be separated from cost of other property.

<sup>21</sup> "Represents cost to respondent of acquiring \$60,000 of bonds of the Huntington Gas Company which have been canceled of record."

TABLE 304: FIXED CAPITAL, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

So far as fixed capital costs have been classified according to the prescribed uniform system of accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304 as reported. The book accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts".

The amounts shown as "Balance at close of year" but not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions, but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year.

Figures in *italics* indicate *decreases or credit balances*.

The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

acquired on or since that date is included with "Total fixed capital, other departments".

The book cost of land and improvements not devoted to electric operations is included with "Undistributed book value," Electric department, in the case of such property acquired prior to January 1, 1909. Similar property

TABLE 304: FIXED CAPITAL, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (continued)

So far as fixed capital costs have been classified according to the prescribed uniform system of accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304 as reported. The book accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts". The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year.

Figures in italics indicate decreases or credit balances.

The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

\* Includes various adjustments made on account of re-classification of respondent's fixed capital.

\* Includes \$22 "Commercial incandescent lamp fixtures," and \$11 "Commercial arc lamp fixtures."

\* Includes \$84 "Commercial incandescent lamp fixtures," and \$11 "Commercial arc lamp fixtures."

\* Report covers period January 1 to July 31, 1914; see Historical and Explanatory Statement.

\* Report covers period August 1 to December 31, 1914; see Historical and Explanatory Statement.

TABLE 304: FIXED CAPITAL, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (continued)

So far as fixed capital costs have been classified according to the prescribed uniform system of accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304 as reported. The hook accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed hook value" and "Other fixed capital not classified by prescribed accounts." The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year.

Figures in *italics* indicate *decreases or credit balances*.

The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49

\* Expenditures on account of "Poles and fixtures" are included under "Distribution system."

\* Expenditures on account of "Line transformers and devices" are included under "Electric meters."

TABLE 304: FIXED CAPITAL, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (continued)

So far as fixed capital costs have been classified according to the prescribed uniform system of accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304 as reported. The book accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts." This is due to corrections, adjustments, and transfers which are not considered as part of the year's transactions but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year. Figures in *italics* indicate *decreases or credit balances*.

The corporations are named in the order of their average revenues during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

TABLE 304: FIXED CAPITAL, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (continued)

So far as fixed capital costs have been classified according to the prescribed uniform system of accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304 as reported. The book accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions, "Undistributed book value," and "Other fixed capital not classified by prescribed accounts." The amounts shown as "Balance at close of year," will not in all cases equal the sum of the "Net increase during year," added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year. Figures in *italics* indicate decreases or credit balances.

The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

TABLE 304: FIXED CAPITAL, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (concluded)

So far as fixed capital costs have been classified according to the prescribed uniform system of accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304 as reported. The book accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts". The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year," added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions but which have been shown in the current report of the corporation concerned as though they have been recorded in the figures for the previous year.

Figures in *italics* indicate decreases or credit balances.

The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

TABLE 305 a: FUNDED DEBT, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole. Only those corporations are included which report funded debt outstanding at some time during the year.  
 The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.  
 The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

[illegible]

<sup>1</sup> This column shows matured interest unpaid as reported by the corporation. It is evident in some cases that interest due July 1st has been included under this heading, while other cases it has not been included; and in still other cases the report does not show whether interest due July 1st has or has not been included.

<sup>2</sup> Covered by special deposit.  
<sup>3</sup> Lien upon property of Schenectady Railway Company as well as upon property of Schenectady Illuminating Company. At close of year all bonds except \$44,000 covered by special deposit with a trustee had been secured and covered and the lien discharged.

<sup>4</sup> Includes \$389 accrued interest paid by purchasers of bonds sold between interest dates.

<sup>6</sup> Pennsylvania corporation; securities not authorized by any public authority of State of New York.

<sup>7</sup> While these securities are one year notes in form, they are included in funded debt statement because they are temporarily substituted for a like par value of bonds, and it is the intention to fund them eventually with the proceeds of a new issue of bonds. These notes are payable only at the option of the company's board of directors, and is included in "Other funded debt."

<sup>8</sup> Connecticut corporation; securities not authorized by any public authority of State of New York.

<sup>9</sup> Includes \$75 accrued interest paid by purchasers of bonds sold between interest dates.

TABLE 305 b: FUNDED DEBT ISSUED OR ASSUMED, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

Only those corporations are included which report funded debt actually issued or assumed during the year. The date of authorization is the reported date of the final authorization necessary to the legal validity of the issue. The amount shown under "Par value authorized" is the amount of the particular authorization or authorizations under which the issue during the year has been made. The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

Corp. No.	Name of corporation and designation of securities	Interest rate	Dates		By whom authorized	Par value				Average price realized per cent of par

<sup>1</sup> Bonds of the Olean Electric Light and Power Co. (old) assumed by respondent at date of merger; see Historical and Explanatory Statement.

<sup>2</sup> Pennsylvania corporation; securities not authorized by any public authority of State of New York.

<sup>3</sup> Issued to retire a like par value of gold notes.

<sup>4</sup> \$500,000 issued for refunding purposes; \$58,000 for outstanding obligations; \$53,000 for payment of receiver's certificates; \$138,000 for acquisition of stock of Northern Power Co.; \$51,000 for other accounts payable.

<sup>5</sup> Issued in exchange for a like par value of certificates of indebtedness.

<sup>6</sup> Issued to retire outstanding notes of like par value.

TABLE 306 a: CAPITAL STOCKS, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding stocks (i. e. stocks not held by or for the issuing corporation) of the corporation as a whole. Stock not otherwise specifically described is common.

The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

<sup>1</sup> Includes \$250,000 to convert at option of holders, par for par, general mortgage gold coupon bonds.

<sup>2</sup> Report covers period January 1 to July 31, 1914; see Historical and Explanatory Statement.

<sup>3</sup> Report covers period August 1 to December 31, 1914; see Historical and Explanatory Statement.

<sup>4</sup> Pennsylvania corporation; stock not authorized by any public authority of State of New York.

<sup>5</sup> Report covers period January 1 to November 30, 1914; see Historical and Explanatory Statement.

<sup>6</sup> Connecticut corporation; stock not authorized by any public authority of State of New York. The information here given evidently applies to the corporation as a whole and not merely to the Hoosick Falls Division.

<sup>7</sup> Dividends declared on only 7½ shares, majority holders waiving right to demand dividends on their holdings.

TABLE 306 b: CAPITAL STOCKS ISSUED, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

Only those corporations are included which report capital stock actually issued during the year.

Stock not otherwise specifically described is common.

The date of authorization is the reported date of the final authorization necessary to the legal validity of the issue. The amount shown under "Par value authorized" is the amount of the particular authorization or authorizations under which the issue during the year has been made.

The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

<sup>1</sup> "Although the report of December 31, 1913, showed \$158,400 in outstanding stocks yet there were but 1000 shares actually issued up to that time; the balance (2160 shares) were not issued until 1914."

<sup>2</sup> Issued "To cover services in connection with original construction, general superintendence, and direction of construction work".

<sup>3</sup> Issued in exchange for property, franchises, etc., of the Olean Electric Light and Power Co. (old).

TABLE 309: OPERATING REVENUES, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

"Net revenue" is the net amount charged to the consumer, i. e. gross price less any discounts or allowances.  
The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

<sup>11</sup> So reported, though not the sum of items given.

<sup>12</sup> Details not reported.

TABLE 310: OPERATING EXPENSES, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

The averages are based on the number of kilowatt hours sold except where otherwise noted. Figures in *italics* denote credits. The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

56	Sold.....	596,722,326		237,027,514				244,651,276							

<sup>1</sup> Energy supplied without charge under contract with respondent's subsidiary, Canadian Niagara Power Co.  
<sup>2</sup> Per k.w.h. generated.  
<sup>3</sup> Includes \$5850 "Miscellaneous jobbing expenses," and \$89 "Repairs of electric appliances."  
<sup>4</sup> Includes \$96 production expenses not distributed.  
<sup>5</sup> Estimated.

TABLE 310: OPERATING EXPENSES, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (continued)

The averages are based on the number of kilowatt hours sold except where otherwise noted. Figures in *italics* denote credits. The corporations are named in the order of their average revenues during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

TABLE 310: OPERATING EXPENSES, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (continued)

The averages are based on the number of kilowatt hours sold except where otherwise noted. Figures in *italics* denote credits. The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

<sup>2</sup> Per k.w.h. generated. <sup>3</sup> Per k.w.h. purchased. <sup>16</sup> Averages are based on amount given as quantity of alternating current generated, all of which is reported to have been sold in Lighting and Power department; direct current (amounting in 1914 to 734,074 kw.h.) is assigned to Traction department; production expenses are apportioned between the Lighting and Traction departments on the basis of the ratios borne by A.C. and D.C. energy, respectively, to total energy generated.

TABLE 310: OPERATING EXPENSES, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (continued)

The averages are based on the number of kilowatt hours sold except where otherwise noted. Figures in *italics* denote credits.  
The corporations are named in the order of their average revenues during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

<sup>2</sup> Per kw.h. generated.  
<sup>3</sup> Per kw.h. purchased.

<sup>19</sup> Though the respondent reports a charge of \$1267 to the account "Electric energy from other sources," the quantity of energy received therefor is not stated.

TABLE 310: OPERATING EXPENSES, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (continued)

The averages are based on the number of kilowatt hours sold except where otherwise noted. Figures in *italics* denote credits. The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

<sup>2</sup> Energy supplied without charge under contract with respondent's subsidiary, Canadian Niagara Power Co.<sup>3</sup> Energy used by company is included with energy lost or unaccounted for.<sup>4</sup> Estimated.<sup>5</sup> Estimated distribution line losses are included with amount sold so that "Lost or unaccounted for" as reported refers to station losses only.<sup>6</sup> Includes 768,582 kw.h. delivered as water rent.<sup>7</sup> Includes 30,921 kw.h. supplied without direct charge to Village of Batavia under franchise requirements.<sup>11</sup> Of this amount, 734,074 kw.h. represents D.C. energy used by respondent in its Traction department.<sup>12</sup> During the year 336 tons of coal were consumed at emergency steam station.<sup>13</sup> Both steam and water-power are used for generation; amounts generated by each not separately reported.

## (CLASS A), YEAR ENDED DECEMBER 31, 1914

E 51	Glen Cove Light and Power	Croghan†, Lowville*, Denmark†, New Bremen†.
E 52	Colliers Light, Heat and Power	Potsdam*†.
E 53	Wetmore Electric	Liberty*†.
E 54	Potsdam Electric Light and Power	Gouverneur*, Hailsboro†.
E 55	Liberty Light and Power	Walden*.
E 56	Oswegatchie Light and Power	Hartwick†.
E 57	Wallkill Valley Electric Light and Power	
E 58	Hartwick Power	

<sup>1</sup> Names of cities are in black face type; names of incorporated villages are indicated by an asterisk (\*); names of towns and unincorporated villages by a dagger (†); in case of latter class reports do not always indicate whether a company operates in town or village, or both.

<sup>9</sup> Current supplied only at wholesale to distributing company.

<sup>10</sup> Report covers period January 1 to July 31, 1914; see Historical and Explanatory Statement.

<sup>11</sup> Report covers period August 1 to December 31, 1914; see Historical and Explanatory Statement.

<sup>12</sup> Also supplies energy in South Waverly, Sayre, and Athens, Penna.

<sup>13</sup> Report covers period January 1 to November 30, 1914; see Historical and Explanatory Statement.

TABLE 311 b: STREET LIGHTING STATISTICS, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

Only those corporations are included which report street lighting.

The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

<sup>1</sup> Names of cities are in **black face type**; names of incorporated villages are indicated by an asterisk (\*); names of towns and unincorporated villages by a dagger (†); in case of latter class reports do not always indicate whether a company operates in town or village, or both. <sup>2</sup> All arc lamps are enclosed type except as noted. <sup>3</sup> Lamps are 55-watt. <sup>4</sup> Ornamental posts, each post containing 4 60-watt and 1 100-watt incandescent lamps. <sup>5</sup> Lamps are 100-watt. <sup>6</sup> Lamps are 60-watt. <sup>7</sup> Lamps owned by City of Niagara Falls and operated for decorative street lighting under an agreement by which current for such purposes is furnished free by the Cliff Electrical Distributing Co. and Niagara Falls Power Co. and distributed free by the Buffalo

and Niagara Falls Electric Light and Power Co. <sup>8</sup> Clusters of lamps. <sup>9</sup> Lamps on memorial arch, number and candle-power not given. <sup>10</sup> Lamps are 50-watt. <sup>11</sup> Owned by Village of Fort Johnson. <sup>12</sup> Current supplied at \$0.075 per k.w.h. <sup>13</sup> \$0.10 per k.w.h. first 30 k.w.h. each month; \$0.05 per k.w.h. all additional. <sup>14</sup> This corporation also supplies certain localities in Pennsylvania with 8 450-watt arc, 153 80-c.p. incandescent, and 200 60-c.p. incandescent street lamps. <sup>15</sup> Contract with City of Ogdensburg provides that respondent shall furnish 136 arc and 170 incandescent lamps for \$10,500 yearly. <sup>16</sup> Per cluster of three lamps.

TABLE 311 b: STREET LIGHTING STATISTICS, ELECTRICAL CORPORATIONS (CLASS A), YEAR ENDED  
DECEMBER 31, 1914 (concluded)

Only those corporations are included which report street lighting.

The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 49.

<sup>1</sup> Report covers period January 1 to July 31, 1914; see Historical and Explanatory Statement.

<sup>2</sup> Report covers period August 1 to December 31, 1914; see Historical and Explanatory Statement.

<sup>3</sup> The salaries of all clerks and executives of this corporation are paid by the Rochester Railway and Light Company.

<sup>4</sup> "All labor furnished from outside sources."

<sup>5</sup> Respondent states that it has no employees.

<sup>6</sup> Report covers period January 1 to November 30, 1914; see Historical and Explanatory Statement.

## ELECTRICAL AND GAS CORPORATIONS (CLASS A)

Electrical and Gas Corporations of Class A are those whose operating revenues for the three years next preceding that covered by the latest annual report to the Commission have averaged over \$25,000 per annum in either the Electric department or the Gas department. The figures following the name give the order in which the corporation appears in the tables.

<sup>1</sup> \$141,089 reported by company as "Contingent expenses, electric," and \$156,126 reported by company as "Contingent expenses, gas," is excluded from operating expenses and shown as an appropriation from surplus, since it is credited to an optional reserve which at the discretion of the company's directors may be used for any purpose whatever.

<sup>2</sup> Represents the excess of actual over estimated repairs formerly credited to surplus and charged to "Accrued amortization of capital," which entries were reversed during the year.

<sup>3</sup> Bond discount and expense incorrectly charged to surplus in 1909.

<sup>4</sup> Income account for electric operations covers a period February 1 to December 31, 1914; for gas operations December 1 to 31, 1914; see Historical and Explanatory Statement.

<sup>2</sup> Represents the excess of actual over estimated repairs formerly credited to surplus and charged to "Accrued amortization of capital" which entries were reversed during the year.

<sup>8</sup> \$31,735 reported by company as "Contingent expenses, electric," and \$4145 reported by company as "Contingent expenses, gas," are excluded from operating expenses and shown as an appropriation from surplus, since it is credited to an optional reserve which at the discretion of the company's directors may be used for any purpose whatever.

<sup>9</sup> Company claims that no accurate apportionment of taxes can be made as between the different departments; the total amount of \$43,800 is deducted from "Total operating income".

<sup>10</sup> "Amount credited to sinking fund reserve, discharged by purchase and cancellation of bonds."

<sup>11</sup> Net debit resulting from changes in fixed capital accounts after examination by the Commission's examiners and engineers.

<sup>12</sup> \$11,194 reported by company as "Contingent expenses, electric," \$4579 reported by company as "Contingent expenses, gas," and \$3214 reported by company as "Contingent expenses, other departments," are excluded from operating expenses and shown as an appropriation from surplus, since it is credited to an optional reserve which at the discretion of the company's directors may be used for any purpose whatever.

<sup>3</sup> Company formed for extension of respondent's plant to Niagara Falls, Canada; amount of investment covers cost of mains, services, etc.; not operated since the discovery of natural gas in that vicinity.

<sup>4</sup> Exchange of securities.

TABLE 304: FIXED CAPITAL, ELECTRICAL AND GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304, as reported. The book accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts." The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions, but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year.

Figures in *italics* denote *decreases* or *credit balances*.

The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 91.

TABLE 304: FIXED CAPITAL, ELECTRICAL AND GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (continued)

So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304 as reported. The book accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and when for this reason they are shown as "Balance at close of year" and "Other fixed capital not classified by prescribed accounts." Undistributed book value " added to the balance given in the abstracts for 1913. This is due to corrections, which are not considered part of the year's transactions, but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year.

Figures in *Italics* denote decreases or credit balances.

The corporations are named in the order of their average revenues during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 91.

<sup>1</sup> A part of the total investment is not distributed between departments.

Report covers period January 1 to November 30, 1914; see Historical and Explanatory Statement.

TABLE 304: FIXED CAPITAL, ELECTRICAL AND GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (continued)

So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304, as reported. The hook accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts". The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions, but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year.

Figures in italics denote decreases or credit balances.

The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 91.

TABLE 304: FIXED CAPITAL, ELECTRICAL AND GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (continued)

So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304, as reported. The book accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts". The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions, but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year. Figures in *italics* denote *decreases* or *credit* balances. The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 91.

TABLE 304: FIXED CAPITAL, ELECTRICAL AND GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (concluded)

So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304, as reported. The book accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts".

The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions, but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year.

Figures in *italics* denote *decreases or credit balances*.

The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 91.

TABLE 305 a: FUNDED DEBT, ELECTRICAL AND GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole. Only those corporations are included which report funded debt outstanding at some time during the year.  
The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.  
The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 91.

<sup>1</sup> This column shows matured interest unpaid as reported by the corporation. It is evident in some cases that interest due July 1st has been included under this head; in other cases that such interest has not been included;while in still other instances the report does not show whether interest due July 1st has or has not been included.  
<sup>2</sup> Covered by special deposit.

TABLE 305 b: FUNDED DEBT ISSUED OR ASSUMED, ELECTRICAL AND GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

Only those corporations are included which report funded debt actually issued or assumed during the year. The date of authorization is the reported date of the final authorization necessary to the legal validity of the issue. The amount shown under "Par value authorized" is the amount of the particular authorization or authorizations under which the issue during the year has been made. The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 91.

Co.	Corp. No.	Name of corporation and designation of securities	Interest rate	Dates		By whom authorized	Par value			Average price realized per cent of par

<sup>1</sup> Issued to redeem the mortgage bonds of the Citizens Light and Power Company.

<sup>2</sup> Exchanged for a like par value of New York Suburban Gas Company bonds.

<sup>3</sup> Exchanged for a like par value of Foughkeepsie Electric Light and Power Company first mortgage bonds.

<sup>4</sup> Respondent authorized to issue \$1,580,000 par value of its capital stock or convertible notes.

<sup>5</sup> Assumed on merger of Watertown Light and Power Company.

<sup>6</sup> Issued for the acquisition of the assets and properties of the Carthage Electric Light and Power Company.

<sup>7</sup> Issued to refund a like par value of Auburn Gas Company bonds.

<sup>8</sup> Assumed on merger of Rockland Electric Company.

<sup>9</sup> Assumed on merger of Franklin County Hydraulic Corporation.

<sup>10</sup> Issued to retire \$254,000 par value of collateral trust bonds at 101 and accrued interest.

<sup>11</sup> Issued to retire \$353,000 par value of bonds of West Side Railroad Company.

<sup>12</sup> Issued to retire a like par value of Franklin County Hydraulic Corporation bonds.

TABLE 306 a: CAPITAL STOCKS, ELECTRICAL AND GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding stocks (*i. e.* stocks not held by or for the issuing corporation) of the corporation as a whole. The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority. Stock not otherwise specifically described is common. The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 91.

<sup>1</sup> Respondent authorized to issue \$1,880,000 par value of its common capital stock or convertible bonds.

<sup>2</sup> Report covers period January 1 to November 30, 1914; see Historical and Explanatory Statement.

TABLE 306 b: CAPITAL STOCKS ISSUED, ELECTRICAL AND GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

Only those corporations are included which report stock actually issued during the year. The date of authorization is the reported date of the final authorization necessary to the legal validity of the issue. The amount shown under "Par value authorized" is the amount of the particular authorization or authorizations under which the issue during the year has been made. The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 91.

<sup>1</sup> Respondent authorized to issue \$1,880,000 par value of its common capital stock or convertible bonds.

<sup>2</sup> \$47,900 for the acquisition of land and water rights, \$34,600 to pay outstanding short term notes, \$50,000 in part payment for purchase of Carthage Electric Light and Power Company, \$435,600 exchanged for stock of Watertown Light and Power Company.

<sup>3</sup> \$80,000 issued in part payment for purchase of assets and property of Carthage

Electric Light and Power Company, and \$217,800 exchanged for stock of Watertown Light and Power Company.

<sup>4</sup> \$242,000 issued in exchange for stock of the Rockland Electric Company, \$202,000 issued in payment of notes of that corporation, and \$19,000 for respondent's own notes.

<sup>5</sup> Entire capital stock of the Franklin County Hydraulic Corporation, amounting to \$100,000 par value.

TABLE 309: OPERATING REVENUES, ELECTRICAL AND GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

"Net revenue" is the net amount charged the consumer, i. e. gross price less any discounts or allowances.  
 Figures in *italics* denote losses.

The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 91.

<sup>4</sup> Electric operations cover period February 1 to December 31, 1914; gas operations cover period December 1 to 31, 1914; see Historical and Explanatory Statement.

<sup>6</sup> There is included in "Total from sales of current" \$921, and in "Total from sales of gas" \$1598, representing amounts received from consumers for failure to pay bills promptly.

<sup>7</sup> Report covers period January 1 to November 30, 1914; see Historical and Explanatory Statement.

TABLE 309: OPERATING REVENUES, ELECTRICAL AND GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (continued)

"Net revenue" is the net amount charged the consumer, i. e. gross price less any discounts or allowances.

Figures in *italics* denote losses.

The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 91.

s Estimated.

"Net revenue" is the net amount charged the consumer, i. e. gross price less any discounts or allowances.  
 Figures in *italics* denote losses.  
 The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 91.

<sup>11</sup> Natural gas.

TABLE 310: OPERATING EXPENSES, ELECTRICAL AND GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

The averages are based on the number of kilowatt hours electricity or thousand cubic feet gas sold except where otherwise noted. Figures in *italics* denote credits. The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 91.

TABLE 310: OPERATING EXPENSES, ELECTRICAL AND GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (continued)

The averages are based on the number of kilowatt hours electricity or thousand cubic feet gas sold except where otherwise noted. Figures in *italics* denote credits. The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 91.

TABLE 310: OPERATING EXPENSES, ELECTRICAL AND GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (continued)

The averages are based on the number of kilowatt hours electricity or thousand cubic feet gas sold except where otherwise noted. Figures in *italics* denote credits. The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 91.

TABLE 310: OPERATING EXPENSES, ELECTRICAL AND GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (concluded)

The averages are based on the number of kilowatt hours electricity or thousand cubic feet gas sold except where otherwise noted. Figures in *italics* denote credits. The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 91.

<sup>2</sup> Average based on 9,277,600 kw.h. generated with 49,495,000 lbs. of coal; for the remaining 85,754 kw.h., 55,372 gals. of crude oil were used. <sup>4</sup> Fuel cost is an estimate based on reported number of tons of coal used for generating power at reported average price per ton of coal received. <sup>6</sup> Generated jointly with Rockland Electric Company, a New Jersey corporation; of this amount, 466,484 kw.h. are reported as having been sold by that company. <sup>7</sup> Includes 466,484 kw.h. sold by Rockland Electric Company, and 4420 kw.h. supplied to municipality without direct charge. <sup>8</sup> Includes energy used by

all departments of company in addition to 822,012 kw.h. supplied Frisbie Mill under contract for the acquisition of certain water rights. <sup>9</sup> Both steam and water-power are used but records are not separately kept. <sup>10</sup> Includes 693,463 kw.h. used in Electric Railroad department. <sup>11</sup> Estimated. <sup>12</sup> Of this amount, 7,948,993 kw.h. were used in Electric Railroad and Water departments. <sup>13</sup> Includes 9305 kw.h. furnished in accordance with franchise requirements without direct charge. <sup>14</sup> Includes 7141 kw.h. furnished in accordance with franchise requirements without direct charge.

## (CLASS A), YEAR ENDED DECEMBER 31, 1914

in alphabetic order and their ranking on the basis of operating revenues see page 91.

## COAL GAS AND WATER GAS CORPORATIONS (CLASS A)

---

Coal Gas and Water Gas Corporations of Class A are those whose operating revenues for the three years next preceding that covered by the latest annual report to the Commission have averaged over \$25,000 per annum. The figures following the name give the order in which the corporation appears in the tables.

Binghamton Gas Works.....	G	3	Ithaca Gas Light Company, The.....	G	6
Buffalo Gas Company.....	G	1	Mohawk Gas Company of Schenectady.....	G	2
Canandaigua Gas-Light Company, The.....	G	9	Nassau and Suffolk Lighting Company.....	G	4
Chuctanunda Gas Light Company, The.....	G	5	Niagara Light, Heat and Power Company <sup>1</sup> .....	GN	1
Fulton Fuel and Light Company.....	G	7	Ogdensburg Gas Company.....	G	10
Homer and Cortland Gas Light Company.....	G	8			

<sup>1</sup> Combined manufactured gas and natural gas corporation.

Returns not tabulated; see Historical and Explanatory Statement.

Empire Coke Company

| Semet-Solvay Company

TABLE 304: FIXED CAPITAL, COAL GAS AND WATER GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304, as reported. The book accounts representing fixed capital installed prior to December 31, 1908; have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts". This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions, but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year.

Figures in *italics* denote *decreases* or *credit balances*.

The corporations are named in the order of their average revenues from coal gas and water gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 143.

TABLE 304: FIXED CAPITAL, COAL GAS AND WATER GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914 (concluded)

So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304, as reported. The book accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts". The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions, but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year.

Figures in *italics* denote *decreases* or *credit balances*.

The corporations are named in the order of their average revenues from coal gas and water gas operations during the year ended December 31, 1914, for their names in alphabetic order and their ranking on the basis of operating revenues see page 143.

TABLE 305 a: FUNDED DEBT, COAL GAS AND WATER GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding debt (*i. e.* securities not held by or for the issuing corporation) of the corporation as a whole. Only those corporations are included which report funded debt outstanding at some time during the year.

The amounts shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from coal gas and water gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 143.

	Totals.....				8,181,000	8,181,000	408,175	372,000

<sup>1</sup> Includes \$153 interest accrued on bonds at time of sale and not charged against income.

TABLE 305 b: FUNDED DEBT ISSUED OR ASSUMED, COAL GAS AND WATER GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

Only those corporations are included which report funded debt actually issued or assumed during the year.

The date of authorization is the reported date of the final authorization necessary to the legal validity of the issue. The amount shown under "Par value authorized" is the amount of the particular authorization or authorizations under which the issue during the year has been made.

The corporations are named in the order of their average revenues from coal gas and water gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 143.

Corp. No.	Name of corporation and designation of securities	Interest rate	Dates		By whom authorized	Par value			Average price realized per cent of par
			Authorization	Maturity		Authorized	Issued or assumed during year	Issued for cash	
G 3	<b>Binghamton Gas Works:</b>								
	General mortgage 50-year gold bonds.....	% 5	Aug 5, 1914	1954	P. S. C. 2nd Dist.....	Dollars 25,000	Dollars 25,000	Dollars 25,000	90

<sup>1</sup> Issued to retire a like par value of first mortgage gold bonds.

<sup>2</sup> Issued in payment of outstanding indebtedness.

TABLE 306 a: CAPITAL STOCKS, COAL GAS AND WATER GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding stocks (i. e. stocks not held by or for the issuing corporation) of the corporation as a whole. The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority. Stock not otherwise specifically described is common. The corporations are named in the order of their average revenues from coal gas and water gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 143.

<sup>1</sup> Issued in payment of outstanding indebtedness.

TABLE 309: OPERATING REVENUES, COAL GAS AND WATER GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

"Net revenue" is the net amount charged the consumer, *i. e.* gross price less any discounts or allowances.

Figures in *italics* denote *losses*.  
The corporations are named in the order of their average revenues from coal gas and water gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 143.

<sup>1</sup> Estimated "cost" of residuals produced and cost of coke purchased for re-sale is charged against revenue account "Sales of residuals and byproducts," so that the balance in that account represents chiefly net revenue from sale of coke, whether or not such coke is actually a residual product.

<sup>2</sup> Includes 11,936 M cu.ft. of natural gas sold at an average net price of \$0.34, producing net revenue of \$4025

TABLE 310: OPERATING EXPENSES, COAL GAS AND WATER GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

The averages are based on the number of cubic feet sold unless otherwise noted. Figures in *italics* denote credits.  
The corporations are named in the order of their average revenues from coal gas and water gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 143.

## NATURAL GAS CORPORATIONS (CLASS A)

---

Natural Gas Corporations of Class A are those whose operating revenues for the three years next preceding that covered by the latest annual report to the Commission have averaged over \$25,000. The figures following the name give the order in which the corporation appears in the tables.

Akron Natural Gas Company, The.....	N	13	Keystone Gas Company.....	N	6
Alden-Batavia Natural Gas Company, The.....	N	7	Ontario Gas Company.....	N	12
Crystal City Gas Company.....	N	11	Pavilion Natural Gas Company, The.....	N	8
Elmira Water, Light and Railroad Company <sup>1</sup> .....	EGN	1	Pennsylvania Gas Company.....	N	2
Empire Gas and Fuel Company, Limited, The.....	N	4	Potter Gas Company.....	N	3
Frost Gas Company.....	N	10	Producers Gas Company.....	N	9
Hornell Gas Light Company.....	N	14	South Shore Natural Gas and Fuel Company.....	N	5
Iroquois Natural Gas Company.....	N	1			

<sup>1</sup> Electrical, manufactured gas, and natural gas corporation; included with natural gas corporations in respect to natural gas operations only.

<sup>4</sup> Appropriation to "Reserve for accrued amortization of capital".

<sup>5</sup> Includes \$30,516 net debit resulting from changes in fixed capital accounts after examination by the Commission's examiners and engineers.

<sup>6</sup> Includes \$1831 "Adjustment entry with the Elmira Transmission Corporation made on December 31st; this is now handled through operating revenue".

TABLE 304: FIXED CAPITAL, NATURAL GAS CORPORATIONS

So far as fixed capital costs have been classified according to the uniform nomenclature used for convenience in the annual reports to the Public Service accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been uniformly classified, and where for this or any other reason the amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the current report of the corporation concerned as though they had been recorded in the figures for the previous year.

Figures in *italics* denote *decreases* or *credit* balances.

The corporations are named in the order of their average revenues from natural gas operations during the year ended December 31, 1914; for their names in

<sup>1</sup> Includes a credit of \$2614 to fixed capital in Oil department.

<sup>2</sup> Includes \$522,335 fixed capital in Oil department.

## (CLASS A), YEAR ENDED DECEMBER 31, 1914

Commission, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304, as reported. The book expenditures are not so classified the total is shown against the captions "Undistributed book value" and "Other fixed capital not uniformly classified".

abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions, but which have been shown in alphabetic order and their ranking on the basis of operating revenues see page 155.

TABLE 305 a: FUNDED DEBT, NATURAL GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding debt (*i. e.* securities not held by or for the issuing corporation) of the corporation as a whole. Only those corporations are included which report funded debt outstanding at some time during the year.  
 The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.  
 The corporations are named in the order of their average revenues from natural gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 155.

Corp. No.	Name of corporation and designation of securities	Date of maturity	Interest provisions		Par value		Interest

<sup>1</sup> Pennsylvania corporation; securities not authorized by any public authority of the State of New York.

<sup>2</sup> One note for \$6000 due April 1st each year until all are paid.

<sup>3</sup> Delaware corporation; securities not authorized by any public authority of the State of New York.

<sup>4</sup> \$3500 par value mature annually until March 15, 1915, when the remaining \$15,000 par value will become due.

TABLE 305 b: FUNDED DEBT ISSUED OR ASSUMED, NATURAL GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

Only those corporations are included which report funded debt actually issued during the year.  
 The date of authorization is the reported date of the final authorization necessary to the legal validity of the issue. The amount shown under "Par value authorized" is the amount of the particular authorization or authorizations under which the issue during the year has been made.

Corp. No.	Name of corporation and designation of securities	Interest rate	Dates		By whom authorized	Par value				Average price realized per cent of par
			Authori- zation	Maturity		Author- ized	Issued or assumed during year	Issued for cash	Issued for other consid- eration

TABLE 306 a: CAPITAL STOCKS, NATURAL GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding stocks (*i. e.* stocks not held by or for the issuing corporation) of the corporation as a whole.  
 The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.  
 Stock not otherwise specifically described is common.

The corporations are named in the order of their average revenues from natural gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 155.

<sup>2</sup> Delaware corporation; securities not authorized by any public authority of the State of New York.

TABLE 306 b: CAPITAL STOCKS ISSUED, NATURAL GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

? corporation in this group reports any capital stocks issued during the year.

TABLE 309: OPERATING REVENUES, NATURAL GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914

"Net revenue" is the net amount charged to the consumer, i. e., gross price less any discounts or allowances.  
 The corporations are named in the order of their average revenues from natural gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 155.

<sup>1</sup> Estimated.  
<sup>2</sup> Gas supplied for municipal street lighting is not reported, and is excluded from total sales of gas.  
<sup>3</sup> This company distributes gas furnished by the Empire Gas and Fuel Company, Ltd., for which it pays the latter company 61 per cent of the receipts from the sale thereof; in addition, 8 per cent is paid to the parties who secured the natural gas franchise in the city of Hornell. During the year, 418,860 M cu.ft. were thus distributed, the respondent receiving \$42,314 therefor.  
<sup>4</sup> Includes 252 M cu.ft. of gas used at respondent's offices and works.

TABLE 310: OPERATING EXPENSES, NATURAL GAS CORPORATIONS

Except where otherwise noted, the averages on lines 1 to 8 are based on the number of thousand cubic feet gas produced; those on line 9 are based on the The corporations are named in the order of their average revenues from natural gas operations during the year ended December 31, 1914; for their names in

TABLE 310: OPERATING EXPENSES, NATURAL GAS CORPORATIONS (CLASS A), YEAR ENDED DECEMBER 31, 1914  
(concluded)

Except where otherwise noted, the averages on lines 1 to 8 are based on the number of thousand cubic feet gas produced; those on line 9 are based on the number of thousand cubic feet gas purchased; and those on the remaining lines on the number of thousand cubic feet gas sold. Figures in *italics* denote credits. The corporations are named in the order of their average revenues from natural gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 155.

## MUNICIPAL ELECTRIC PLANTS (CLASSES A AND B)

---

Municipal Electric Plants of Classes A and B are those whose operating revenues for the three years next preceding that covered by the latest annual report to the Commission have averaged over \$10,000 per annum. The figures following the name give the order in which the plant appears in the tables.

Boonville.....	MEem 14	Ilion.....	MEem 5

<sup>1</sup> Net corporate income for the months of January and February, 1914. The operations covering these two months are not included in this report.<sup>2</sup> Amount erroneously deducted from surplus in previous year and shown on the balance sheet as "Appropriation for purchase of plant and equipment".<sup>3</sup> "Amortization unprovided for elsewhere."<sup>4</sup> Includes \$4036 unexplained discrepancy between the surplus reported on the balance sheet and the surplus developed from the reported figures for income and outgo during the year.<sup>5</sup> Report is for year ended December 31, 1914.<sup>6</sup> Report is for year ended January 31, 1915.<sup>7</sup> Chiefly accounts of lighting plant with other village departments for current supplied previous to 1911, charged off as "Uncollectible".<sup>8</sup> Interest accrued on funded debt apparently included with other interest deductions.

36	Grand total fixed capital:															36

<sup>1</sup> Includes turbine generator.

<sup>2</sup> Fixed capital December 31, 1914.

<sup>3</sup> Fixed capital January 31, 1915.

So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304, as reported. The book accounts representing fixed capital installed prior to February 28, 1909, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts". The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1914. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions, but which have been shown in the current report of the plant concerned as though they had been recorded in the figures for the previous year.

Figures in *italics* indicate decreases or credit balances.

The plants are named in the order of their average revenues from electric operations during the year ended February 28, 1915; for their names in alphabetic order and their ranking on the basis of operating revenues see page 167.

TABLE 304: FIXED CAPITAL, MUNICIPAL ELECTRIC PLANTS (CLASSES A AND B), YEAR ENDED FEBRUARY 28, 1915 (concluded)

So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304, as reported. The book accounts representing fixed capital installed prior to February 28, 1909, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts". The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1914. This is due to corrections, and transfers which are not considered part of the year's transactions, but which have been shown in the current report of the plant concerned as though they had been recorded in the figures for the previous year. Figures in *italics* indicate decreases or credit balances. The plants are named in the order of their average revenues from electric operations during the year ended February 28, 1915; for their names in alphabetic order and their ranking on the basis of operating revenues see page 167.

<sup>1</sup> Report is for year ended December 31, 1914.

<sup>2</sup> Supplied without credit to revenue for municipal street lighting.

<sup>3</sup> Report is for year ended January 31, 1915.

<sup>4</sup> Includes 202,450 kw.h. purchased.

<sup>5</sup> 1596 M cu.ft. of natural gas used for fuel, at an average cost of 20½ cents per M cu.ft.

<sup>6</sup> Estimated.

<sup>7</sup> Commercial metered light and power; no record of quantity sold to flat rate consumers.

<sup>8</sup> Includes 1202 kw.h. supplied the Watkins Telephone Co. for use of poles.

<sup>9</sup> Represents the amount purchased; the amount generated is not reported.

<sup>10</sup> 35,000 gals. of oil used for fuel at an average cost of 3½ cents per gal.

TABLE 311 b: STREET LIGHTING STATISTICS, MUNICIPAL ELECTRIC PLANTS (CLASSES A AND B), YEAR ENDED FEBRUARY 28, 1915

The plants are named in the order of their average revenues from electric operations during the year ended February 28, 1915; for their names in alphabetic order and their ranking on the basis of operating revenues see page 167.

<sup>1</sup> Enclosed unless otherwise noted.

<sup>2</sup> Includes 296 open arc lamps.

<sup>3</sup> Report is for year ended December 31, 1914.

<sup>4</sup> Flaming arc.

<sup>5</sup> Report is for year ended January 31, 1915.

<sup>6</sup> Open arcs.

<sup>7</sup> 12 3-light clusters.

<sup>8</sup> Flat rate of \$2500 per annum.

<sup>9</sup> During the year \$5000 was appropriated by municipality for street and other municipal lighting; estimate of amount to be appropriated based on consumption during preceding year.

<sup>10</sup> Boulevard lamps.

<sup>11</sup> 100-watts.

TABLE 314: ACCIDENTS TO PERSONS, MUNICIPAL ELECTRIC PLANTS (CLASSES A AND B), YEAR ENDED FEBRUARY 28, 1915

No plant in this group reports any accidents to persons during the year.

## ELECTRICAL CORPORATIONS (CLASS B)

Electrical Corporations of Class B are those whose operating revenues for the three years next preceding that covered by the latest annual report to the Commission have averaged between \$25,000 and \$10,000 per annum. The figures following the name give the order in which the corporation appears in the tables.

Atlantic Light and Power Company.....	Em 20	Kanes Falls Electric Company.....	Em 1
Avon Electric Company.....	Em 27	Katonah Lighting Company.....	Em 15
Binghamton Railway Company.....	Em 19	Massena Electric Light and Power Company, The.....	Em 3
Broadalbin Electric Light and Power Company.....	Em 5	Middleport Gas and Electric Light Company.....	Em 18
Canton Electric Light and Power Company.....	Em 21	Mount Morris Illuminating Company.....	Em 33
Cattaraugus County Lighting Company.....	Em 11	Murray Electric Light and Power Company.....	Em 7
Cayadutta Generating Company.....	Em 22	Newfane Electric Company.....	Em 24
Cazenovia Electric Company, The.....	Em 23	Northern Wayne Electric Light and Power Company.....	Em 10
Chasm Power Company.....	Em 28	Norwood Electric Light and Power Company.....	Em 29
Chatham Electric Light, Heat and Power Company.....	Em 6	Perry Electric Light Company, The.....	Em 25
Consolidated Light and Power Company of Whitehall.....	Em 8	Port Henry Light, Heat and Power Company.....	Em 31
Courter Electric Company, The.....	Em 26	Port Jefferson Electric Light Company.....	Em 32
Deposit Electric Company.....	Em 16	Riverhead Electric Light Company.....	Em 13
Dunkirk Electrical Manufacturing Company <sup>1</sup> .....	Em 39	Saint Lawrence International Electric Railroad & Land Company.....	Em 38
Dutchess Light, Heat and Power Company of Rhinebeck, The.....	Em 9	Southern New York Power Company.....	Em 14
East Aurora Electric Light Company.....	Em 35	Ulster Electric Light, Heat and Power Company.....	Em 36
East Hampton Electric Light Company.....	Em 4	Warwick Valley Light and Power Company.....	Em 2
Ellenville Electric Company.....	Em 12	Wellsville Electric Light, Heat and Power Company.....	Em 30
General Transmission Company <sup>1</sup> .....	Em 40	West Branch Light and Power Company.....	Em 34
Goshen Light and Power Company.....	Em 17	Yates Electric Light and Power Company.....	Em 37

Returns not tabulated; see Historical and Explanatory Statement.

Electric Light Company of New Paltz, The  
Mechanicville Electric Light and Gas Company

Wayland-Steuben Power Company, Inc.

<sup>1</sup> This corporation, while having average revenues below \$10,000 per annum for the three years next preceding that covered by the latest annual report to the Commission, made its report on the form provided for corporations in Class B, and is therefore included in this list.

## UNINCORPORATED ELECTRIC PLANTS (CLASS B)

Wadhams and Westport Electric Light and Power Company (D. F. Payne)..... IEm 1

Returns not tabulated; see Historical and Explanatory Statement.

Croton Falls (George Juengst and Sons)  
Garden City Company, The

Wayland Electric Light and Power Company.

TABLE 301: BALANCE SHEET, ELECTRICAL CORPORATIONS (CLASS B), DECEMBER 31, 1914

The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 177.

<sup>1</sup> So reported though not the sum of the items given.

<sup>2</sup> Adjustment of errors during former periods.

<sup>3</sup> Amount retained by former owners.

<sup>4</sup> Interest waived by bondholders.

<sup>5</sup> Profits withdrawn from business by owner.

<sup>6</sup> Includes \$17,400 unaccounted for difference between the surplus as shown by the reported statement of assets and liabilities and the surplus reached by adding the net results of the year's transactions, as reported, to the surplus at the close of the preceding year as given in that year's annual report; and \$8000 reported as "Notes retired" although no adequate explanation of such a charge to surplus has been made.

TABLE 304: FIXED CAPITAL, ELECTRICAL CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304 as reported. The book accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts". The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions, but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year.

Figures in *italics* denote *decreases* or *credit balances*.  
The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 177.

\* Report covers period January 1 to July 31, 1914; see Historical and Explanatory Statement.

TABLE 304: FIXED CAPITAL, ELECTRICAL CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914 (continued)

So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304 as reported. The book accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts". The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions, but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year.

Figures in *italics* denote decreases or credit balances.  
The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 177.

TABLE 304: FIXED CAPITAL, ELECTRICAL CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914 (concluded)

So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304 as reported. The book accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts".

The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions, but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year.

Figures in *italics* denote *decreases or credit balances*.

TABLE 305 a: FUNDED DEBT, ELECTRICAL CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole. Only those corporations are included which report funded debt outstanding at some time during the year.  
 The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.  
 The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 177.

TABLE 305 b: FUNDED DEBT ISSUED OR ASSUMED, ELECTRICAL CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

Only those corporations are included which report funded debt actually issued or assumed during the year.  
 The date of authorization is the reported date of the final authorization necessary to the legal validity of the issue. The amount shown under "Par value authorized" is the amount of the particular authorization or authorizations under which the issue during the year has been made.  
 The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 177.

<sup>1</sup> Issued in payment of outstanding indebtedness.

<sup>2</sup> Assumed as part of purchase price of Algonquin Red Slate Co.

TABLE 306 a: CAPITAL STOCKS, ELECTRICAL CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding stocks (i. e. stocks not held by or for the issuing corporation) of the corporation as a whole. Stock not otherwise specifically described is common.

The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 177.

TABLE 306 b: CAPITAL STOCKS ISSUED, ELECTRICAL CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

Only those corporations are included which report capital stock actually issued during the year. Stock not otherwise specifically described is common.

The date of authorization is the reported date of the final authorization necessary to the legal validity of the issue. The amount shown under "Par value authorized" is the amount of the particular authorization or authorizations under which the issue during the year has been made.

The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 177.

Corp. No.	Name of corporation and securities issued	Date of authorization	By whom authorized	Par value				Average price realized per cent of par
				Authorized	Issued during year	Issued for cash	Issued for other consideration

<sup>2</sup> Estimated.  
<sup>3</sup> Includes \$121 freight and express, \$120 office rent, \$169 office expenses, and \$523 discount.  
<sup>4</sup> Includes \$2833 power gas from other sources.

TABLE 310: OPERATING EXPENSES, ELECTRICAL CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914 (concluded)

Figures in *italics* denote *credits*.  
The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 177.

Em 35	East Aurora Electric Light.....	East Aurora*
Em 36	Ulster Electric Light, Heat and Power.....	Saugerties*
Em 37	Yates Electric Light and Power.....	Penn Yan*, Milo†
Em 38	St. Lawrence International Electric Railroad & Land.....	Alexandria Bay*, Belle Isle†, Edgewood Park†, Point Vivian†, Rose Island†, St. Lawrence Park†
Em 39	Dunkirk Electrical Manufacturing.....	<sup>3</sup>
Em 40	General Transmission.....	Cheektowaga†
IEm 1	Wadhams and Westport Electric Light and Power.....	Westport*†, Mineville†, Wadhamst

<sup>1</sup> Names of incorporated villages are indicated by an asterisk (\*); names of towns and unincorporated villages by a dagger (†); in case of latter class, reports do not always indicate whether a company operated in town or village, or both.

<sup>3</sup> Report covers period January 1 to July 31, 1914; see Historical and Explanatory Statement.

<sup>3</sup> Sells only at wholesale to Dunkirk Distribution Co.

TABLE 311 b: STREET LIGHTING STATISTICS, ELECTRICAL CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

Only those corporations are included which report street lighting.  
The corporations are named in the order of their average revenues from electric operations during the year ended December 31, 1914; for their names in alphabetical order and their ranking on the basis of operating revenues see page 177.

## ELECTRICAL AND GAS CORPORATIONS (CLASS B)

---

Electrical and Gas Corporations of Class B are those whose operating revenues for the three years next preceding that covered by the latest annual report to the Commission have averaged between \$25,000 and \$10,000 per annum in either the Electric department or the Gas department. The figures following the name give the order in which the corporation appears in the tables.

Bath Electric and Gas Light Company.....	EGm 3	Granville Electric and Gas Company.....	EGm 4
Dansville Gas and Electric Company, The.....	EGm 2	Norwich Gas and Electric Company, The.....	EGm 1
Fort Plain Gas and Electric Light, Heat and Power Company.....	EGm 5	Warsaw Gas and Electric Company <sup>1</sup> .....	EGm 6

<sup>1</sup> This corporation, while having average revenues below \$10,000 per annum in both the Electric department and the Gas department, made its report on the form provided for corporations in Class B, and is therefore included in this list.

<sup>1</sup> Adjustments chiefly resulting from revision of accounts upon recommendation of the Public Service Commission's examiners and engineers at time of merging Oxford Electric Light Company.

<sup>2</sup> Represents a transfer to fixed capital accounts of certain amounts previously charged in error to operating expenses.

<sup>3</sup> Gas operations cover period January 1 to October 31, 1914; see Historical and Explanatory Statement.

TABLE 304: FIXED CAPITAL, ELECTRICAL AND GAS CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304, as reported. The book accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been reclassified by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the caption "Other fixed capital not classified by prescribed accounts". The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year," added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions, but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year.

Figures in *italics* denote *decreases* or *credit balances*.

The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 199.

TABLE 305 a: FUNDED DEBT, ELECTRICAL AND GAS CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole. Only those corporations are included which report funded debt outstanding at some time during the year.

The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 199.

TABLE 305 b: FUNDED DEBT ISSUED OR ASSUMED, ELECTRICAL AND GAS CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

Only those corporations are included which report funded debt actually issued or assumed during the year.

The date of authorization is the reported date of the final authorization necessary to the legal validity of the issue. The amount shown under "Par value authorized" is the amount of the particular authorization or authorizations under which the issue during the year has been made.

The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 199.

TABLE 306 a: CAPITAL STOCKS, ELECTRICAL AND GAS CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding stocks (i. e. stocks not held by or for the issuing corporation) of the corporation as a whole.

The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

Stock not otherwise specifically described is common.

The corporations are named in the order of their average revenues from electric and gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 199.

## COAL GAS AND WATER GAS CORPORATIONS (CLASS B)

---

Coal Gas and Water Gas Corporations of Class B are those whose operating revenues for the three years next preceding that covered by the latest annual report to the Commission have averaged between \$25,000 and \$10,000 per annum. The figures following the name give the order in which the corporation appears in the tables.

Brockport Gas Light Company, The.....	Gm 7	Sag Harbor Lighting Company.....	Gm 6
Gas Light Company of Waverly, The.....	Gm 8	Saugerties Gas Light Company.....	Gm 3

<sup>1</sup> "Amortization unprovided for elsewhere."

<sup>2</sup> Represents construction paid for by bondholders' committee with moneys contributed by bondholders, the amount of which, pending completion of plans for financing, was carried in suspense and not charged into fixed capital accounts.

TABLE 304: FIXED CAPITAL, COAL GAS AND WATER GAS CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304, as reported. The book accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts". The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1913. This is due to corrections, and transfers which are not considered part of the year's transactions, but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year. Figures in *italics* denote *decreases* or *credit balances*.

The corporations are named in the order of their average revenues from coal gas and water gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 209.

So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304, as reported. The book accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the appropriate primary account, "Undistributed book value," and "Other fixed capital not classified by prescribed accounts." The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions, but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year.

Figures in *italics* denote *decreases* or *credit balances*.

The corporations are named in the order of their average revenues from coal gas and water gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 209.

TABLE 305 a: FUNDED DEBT, COAL GAS AND WATER GAS CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole. Only those corporations are included which report funded debt outstanding at some time during the year.

The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from coal gas and water gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 209.

<sup>1</sup> Includes accrued interest paid by purchasers on bonds sold between interest dates.

<sup>2</sup> Presumably interest due January 1, 1915.

TABLE 305 b: FUNDED DEBT ISSUED OR ASSUMED, COAL GAS AND WATER GAS CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

Only those corporations are included which report funded debt actually issued or assumed during the year.

The date of authorization is the reported date of the final authorization necessary to the legal validity of the issue. The amount shown under "Par value authorized" is the amount of the particular authorization or authorizations under which the issue during the year has been made.

The corporations are named in the order of their average revenues from coal gas and water gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 209.

TABLE 306 a: CAPITAL STOCKS, COAL GAS AND WATER GAS CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding stocks (i. e. stocks not held by or for the issuing corporation) of the corporation as a whole.

The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

Stock not otherwise specifically described is common.

The corporations are named in the order of their average revenues from coal gas and water gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 209.

TABLE 306 b: CAPITAL STOCKS ISSUED, COAL GAS AND WATER GAS CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

The only corporation in this group which reports any capital stocks issued or assumed during the year is the Public Service Corporation of Long Island. This corporation issued \$6200 par value of capital stock during the year under authorizations by the Public Service Commission, Second District, dated November 27, 1912, December 20, 1912, and March 6, 1913, of a total par value of \$92,300. This stock was all issued at par for cash.

TABLE 309: OPERATING REVENUES, COAL GAS AND WATER GAS CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

Figures in *italics* denote losses.  
The corporations are named in the order of their average revenues from coal gas and water gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 206.

## NATURAL GAS CORPORATIONS (CLASS B)

---

Natural Gas Corporations of Class B are those whose operating revenues for the three years next preceding that covered by the latest annual report to the Commission have averaged between \$25,000 and \$10,000 per annum. The figures following the name give the order in which the corporation appears in the tables.

Addison Gas and Power Company.....	Nm 5	Gowanda Natural Gas Company.....	Nm 2

<sup>1</sup> Interest adjustment.

TABLE 304: FIXED CAPITAL, NATURAL GAS CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 304, as reported. The book accounts representing fixed capital installed prior to December 31, 1908, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts".

The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions, but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year.

Figures in *italics* denote decreases or credit balances.

The corporations are named in the order of their average revenues from natural gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 217.

<sup>2</sup> Includes \$1475 "New wells acquired".

TABLE 305 a: FUNDED DEBT, NATURAL GAS CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole. Only those corporations are included which report funded debt outstanding at some time during the year.

The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

Corp. No.	Name of corporation and designation of securities	Date of maturity	Interest provisions		Par value		Interest		
			Rate	Dates payable	Author-ized	Actually outstand-ing at close of year	Accrued during year	Paid during year	Matured and unpaid at close of year
Nm 6	Consumers Natural Gas: Mortgage bonds.....	1915	% 6	Feb & Aug	Dollars 25,000	Dollars 25,000	Dollars 1,500	Dollars 1,500	Dollars 2,160

TABLE 305 b: FUNDED DEBT ISSUED OR ASSUMED, NATURAL GAS CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

No corporation in this group reports any funded debt issued or assumed during the year.

TABLE 306 a: CAPITAL STOCKS, NATURAL GAS CORPORATIONS (CLASS B), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding stocks (i. e. stocks not held by or for the issuing corporation) of the corporation as a whole. The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

Stock not otherwise specifically described is common.

The corporations are named in the order of their average revenues from natural gas operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 217.

## ELECTRIC AND GAS PLANTS (CLASS C)

The tables following comprise an abstract of the more important figures shown in the reports of electric and gas plants whose operating revenues for the three years next preceding that covered by the latest annual reports to the Commission have averaged less than \$10,000. Many of these plants do not keep their accounts and other records in much detail; it is often evident that the reported figures are not proper charges or credits against the captions where they appear, but it has not been possible without an unwarranted expenditure of time and energy to discover the truth. Attention has been called to most instances of this sort in a footnote. In many cases, where the reports give little or no information, no figures have been tabulated, but a brief note concerning the company making such a report appears in the Historical and Explanatory Statement. The corporations and plants of each class are ranked according to their operating revenues, and the figures following each name indicate the order in which it appears in the tables.

### ELECTRICAL CORPORATIONS (CLASS C)

Adams Electric Light Company.....	4	Marion Power Company.....	61

<sup>1</sup> Figures in italics denote deficits. <sup>2</sup> Nitrogen. <sup>3</sup> Operating profits due from E. M. and W. Ferguson. <sup>4</sup> Funds advanced and interest thereon by J. and S. Ferguson. <sup>5</sup> Due from stockholders. <sup>6</sup> \$22.50 for 100-c-p. \$32.50 for 200-c-p. <sup>7</sup> Includes electricity purchased, \$2425. <sup>8</sup> 45 lamps at Rensselaer Falls, \$6; 45 lamps at DeKalb Junction, \$10. <sup>9</sup> Notes maturing December 31, 1915, "Working capital furnished by stockholders". <sup>10</sup> \$599 reported as "Depreciation," but shown as a charge against gross income,

should apparently be included with operating expenses. <sup>11</sup> Report states that company had "actually issued" \$2000 par value of its capital stock, but this is not recognized on the reported balance sheet. <sup>12</sup> Includes some items of cost of new equipment and its installation improperly charged to operating expenses. <sup>13</sup> Report covers period January 1 to November 30, 1914; see Historical and Explanatory Statement.

## PLANTS (CLASS C), 1914 (continued)

and their ranking on the basis of operating revenues see page 223.

<sup>1</sup> Figures in *italics* denote *deficits*. <sup>2</sup> Report covers period January 19, 1914, to January 19, 1915. <sup>3</sup> 9 lamps at \$8; 48 lamps at \$15. <sup>4</sup> 15 40-c.p. lamps at \$20; 20 200-c.p. lamps at \$32; 15 60-c.p. lamps at \$21. <sup>5</sup> Report states that the income of the business exceeds the outlay by \$904, but figures given are inconsistent. <sup>6</sup> Investment in plant. <sup>7</sup> 47 lamps at \$10; 44 lamps at \$9; 14 lamps at \$7; 85 lamps at \$7 and \$8. <sup>8</sup> Described as "Funded debt," but no supporting details given. <sup>9</sup> 63 lamps at \$11.62; 23 lamps at \$13.50. <sup>10</sup> Report covers period July 1 to December 31, 1914; see Historical and Explanatory Statement. <sup>11</sup> Real estate mortgage. <sup>12</sup> Estimated. <sup>13</sup> Report covers period April 1, date of beginning operations, to December 31, 1914. <sup>14</sup> \$219 reported as "Depreciation," but shown as a charge against gross income, should apparently be included with operating expenses. <sup>15</sup> Sales and expenses are apparently estimated. <sup>16</sup> Partly estimated.

## PLANTS (CLASS C), 1914 (continued)

and their ranking on the basis of operating revenues see pages 223 and 224.

<sup>1</sup> Figures in *italics* denote deficits. <sup>2</sup> \$1000 reported as "Depreciation," but shown as charge against gross income, should apparently be included with operating expenses. <sup>3</sup> Unfinished contract. <sup>4</sup> "Bills due." <sup>5</sup> Loss on sale of appliances. <sup>6</sup> Amount raised by general tax. <sup>7</sup> Cost of gas purchased. <sup>8</sup> Represents franchise, leases, and rights of way. <sup>9</sup> \$1169 reported as "Depreciation," but shown as charge against gross income, should apparently be included with operating expenses. <sup>10</sup> Special deposits. <sup>11</sup> Includes interest for 1913. <sup>12</sup> \$13,489 for depreciation charged off erroneously in previous year; and \$4662 bills and accounts payable charged to former owners of company as part of agreement for purchase by present stockholders.

<sup>13</sup> 5 arc lamps at \$25; 52 incandescent lamps at \$7.20. <sup>14</sup> Includes \$30,000 "Franchises, leases, etc." <sup>15</sup> Includes \$11,000 "Capital stock assessment." <sup>16</sup> "Amortization charged to reduce value of plant to proper value. Wells abandoned during year." <sup>17</sup> "Depreciation and 2 wells abandoned." <sup>18</sup> This company distributes gas as agent for the Producers Gas Company of Olean and receives 35% of the gas sold as its share. <sup>19</sup> Taxes not reported separately; it is assumed that they are included with operating expenses. <sup>20</sup> January 1 to July 1, \$0.25 per M cu.ft.; July 1 to December 31, \$0.30 per M cu.ft. <sup>21</sup> Investment in plant. <sup>22</sup> Gas purchased.

## PLANTS (CLASS C), 1914 (continued)

order and their ranking on the basis of operating revenues see page 224.

<sup>1</sup> Figures in *italics* denote deficits. <sup>2</sup> \$1.25 per 100 cu.ft. <sup>3</sup> Includes \$680 rebate on carbide; \$846 returned drums. <sup>4</sup> The 82 lamps were supplied at \$0.025 per lamp per night. <sup>5</sup> \$1000 was appropriated for street lighting. <sup>6</sup> Non-operating revenue. <sup>7</sup> To pay bonds and build addition to power house. <sup>8</sup> 95 100-c.p. lamps at \$6.05; 5 60-c.p. lamps at \$4.95; so reported though no revenue is shown from street lighting.

## CORPORATIONS EXEMPT FROM REPORTING

Subdivision 13, section 66, chapter 480, laws of 1910, provides that where the owning, operating, managing, or controlling of a gas or electric plant by a corporation is wholly subsidiary and incidental to other business carried on by it, and is inconsiderable in amount and not general in its character, the Public Service Commissions may exempt such corporation from making full reports and from the keeping of accounts as to such subsidiary and incidental business. Pursuant to the authority of that statute, the Public Service Commission, Second District, November 13, 1911, passed a resolution adopting the following general rules for the exemption of such corporations:

1. That any corporation or person seeking exemption shall furnish to the Commission a statement, duly verified by an officer of the corporation, showing —

- (a) The name of the corporation;
- (b) The nature and extent of its general business;
- (c) The location of its plant or place of business at which gas or electricity is produced;
- (d) The extent of its gas or electric business, showing the number of consumers supplied and the amount of revenues accruing from such business;
- (e) That the gas or electric business is not general in its character, *i. e.* it does not attempt to supply an entire community or any considerable portion thereof.

2. Upon receipt of a satisfactory showing upon the foregoing points the Commission may by order exempt such corporation or person from making full reports and keeping separate accounts for the subsidiary and incidental gas or electric business. But such corporation or person will be required each year, at the time for filing annual reports to the Commission, to report in form prescribed and upon blanks to be supplied, duly verified statements showing that the situation upon which the exemption was made remains substantially unchanged.

3. For any reason that the Commission may deem satisfactory, any exemption may be revoked at any time.

4. A list of all corporations or persons exempted under these rules will be published in the Annual Report of the Commission.

The following named corporations and persons have been exempted by orders of the Commission:

Borst, Charles A., Kirkland, N. Y.  
 Cheney Piano Action Company, Castleton, N. Y.  
 Clifton Springs Sanitarium Company, The, Clifton Springs, N. Y.  
 Coles, Roswell, Cottekill, N. Y.  
 Columbia Mills, Inc., The, Minetto, N. Y.  
 Comstock, W. H., Company, Ltd., The, Morristown, N. Y.  
 Farley, George, Forestport, N. Y.  
 Gilbert, Henry L., Gilbertsville, N. Y.  
 Hind, Arthur, Clark Mills, N. Y.  
 Kilmer, J. M. and W. S., Binghamton, N. Y.  
 Lantry, M. W., Hogansburg, N. Y.  
 Lawrence Park Heat, Light and Power Company, Bronxville, N. Y.  
 McFarland, John, Hannibal, N. Y.

Nye Brothers, Jay, N. Y.  
 Ontario Industrial Company, Oswego, N. Y.  
 Orcutt, B. L. & Sons, Inc., Dickinson Center, N. Y.  
 St. Lawrence Pyrites Company, Hermon, N. Y.  
 Schoonmaker, H. S., Estate, Seneca Castle, N. Y.  
 Security Mutual Life Insurance Company, Binghamton, N. Y.  
 Sherman, A., Lumber Company, Parishville, N. Y.  
 Sylvan Beach Amusement Company, Sylvan Beach, N. Y.  
 Thompson, M. F., Binghamton, N. Y.  
 Tyler, N. A., Lumber Company, The, Vernon, N. Y.  
 Union Bag and Paper Company, Hudson Falls, N. Y.  
 Wands Glove Company, Candor, N. Y.

The following named corporations and persons, listed last year among those exempted from making full reports, no longer conduct electric or gas operations of a sort subject to the Commission's supervision:

Palen's, H. W., Sons, Kingston, N. Y.  
 Pierce & Lazell, Stockton, N. Y.  
 Rogers, J. & J., Company, Ausable Forks, N. Y.

STATEMENT GIVING THE ORGANIZATION OF CORPORATIONS OPERATING TELEGRAPH AND TELEPHONE LINES  
WITHIN THE STATE OF NEW YORK DECEMBER 31, 1914.

---

# TELEGRAPH AND TELEPHONE CORPORATIONS

## HISTORICAL AND EXPLANATORY STATEMENT

### PART I: OPERATING CORPORATIONS

The following statement gives for operating telegraph and telephone corporations under the Commission's jurisdiction the history of their organization and certain other information which can not be conveniently shown in tabulated form. For the most part the facts given are based on annual reports and correspondence relating thereto. The dates of organization, consolidation, merger, etc., have, however, so far as possible been verified by reference to the records of the Secretary of State. In a few cases where reports have not been received or have been so incomplete or inconsistent as to render of no value the inclusion in the tables of any statistics taken from them, the name of the corporation has been omitted from the tables, and is included only in this statement with a brief abstract of such information as is available. The statement includes all operating telegraph and telephone corporations but does not include the operating unincorporated telephone plants, two in number: the returns in these annual reports have in both instances been tabulated.

### TELEGRAPH CORPORATIONS

#### **The Adirondack, Lake George and Saratoga Telegraph Company**

*Control by other corporation:* Majority of capital stock owned by The Western Union Telegraph Company.

*Organization:* Incorporated February 25, 1887, under the Telegraph Act (L. 1848, ch. 265).

*Term of corporate existence:* March 1, 1887, to March 1, 1937.

*Principal officers:* President, Herbert Smith; Vice-president, B. Brooks; Secretary and Treasurer, C. E. McKim.

*Principal office:* 16 Dey street, New York city.

#### **The Great North Western Telegraph Company of Canada**

*Organization:* Incorporated May 7, 1880, under the laws of the Dominion of Canada. This company leases all its lines in the United States to The Western Union Telegraph Company, except those on and along the Grand Trunk Railway between Fort Covington and Massena Springs.

*Term of corporate existence:* Not stated.

*Principal officers:* President, Z. G. Lash; Vice-president, Adam Brown; Secretary, A. C. McConnell; Treasurer, D. E. Henry.

*Principal office:* 17 East Wellington street, Toronto, Canada.

#### **Postal Telegraph-Cable Company**

*Control by other corporation:* Entire capital stock held by The Farmers Loan and Trust Company as trustee for the bondholders under the mortgage of the Commercial Cable Company.

*Organization:* Incorporated January 25, 1886, under the Telegraph Act (L. 1848, ch. 265). See also certificate filed October 20, 1883, incorporating Postal Telegraph and Cable Company. Lines of Champlain Telegraph Company, incorporated March 19, 1889, under the Telegraph Act (L. 1848, ch. 265), term five hundred years from date of recording in Albany county, were purchased June 2, 1911, and that company was voluntarily dissolved by certificate filed June 16, 1911. Lines of Commercial Union Telegraph Company (incorporated March 31, 1886) in the State, and ducts of Empire City Subway Company

(Limited), incorporated July 12, 1890, in New York city, are leased by Postal Telegraph-Cable Company.

*Term of corporate existence:* January 25, 1886, to January 1, 1886.

*Principal officers:* President, Clarence H. Mackay; Vice-presidents, Edward Reynolds, Charles C. Adams, Charles P. Bruch, Welcome I. Capen, and Edward C. Platt; Secretary, John O. Stevens; Treasurer, Edward C. Platt.

*Principal office:* 253 Broadway, New York city.

#### **The Western Union Telegraph Company**

*Organization:* Incorporated April 8, 1851, under the Telegraph Act (L. 1848, ch. 265), under the name of The New York and Mississippi Valley Printing Telegraph Company. Certificate of resolution to incorporate using name of "The New York & Mississippi Valley Printing Telegraph Company" filed February 21, 1854, under chapter 471 of laws of 1853, amending the Telegraph Act (term January 20, 1854, to April 1, 1951). Name changed by special act passed April 4, 1856 (ch. 97), to The Western Union Telegraph Company. Amended certificate filed October 30, 1911, adding to the lines of telegraph operated and controlled by it certain cables and land lines leased from The Anglo-American Telegraph Company, Limited, and The Direct United States Cable Company, Limited, corporations organized under the laws of Great Britain. In 1912 it took over, with slight exceptions, the property in the State of New York of The Great North Western Telegraph Company of Canada (see that title). This company succeeded to property, etc., of Mutual Union Telegraph Company, incorporated October 5, 1880, under the Telegraph Act, term one hundred years from the filing of certificate of incorporation in the offices of the Clerk of New York County and Secretary of State, the latter October 5, 1880. Certificate of extension of lines filed October 4, 1882, pursuant to chapter 425 of the laws of 1862 amending the Telegraph Act.

*Term of corporate existence:* April 1, 1851, to April 1, 1951.

*Principal officers:* President, Newcomb Carlton; Vice-presidents, G. W. E. Atkins and Belvidere Brooks; Secretary, W. H. Baker; Treasurer, A. R. Brewer.

*Principal office:* 195 Broadway, New York city.

## TELEPHONE CORPORATIONS

**Albany Home Telephone Company**

See New York Telephone Company.

*Control by other corporation:* Entire capital stock owned by Friendship Telephone Company.

*Organization:* Incorporated May 1, 1901, under the Transportation Corporations Law. April 2, 1912, merged West Shore Home Telephone Company, incorporated February 24, 1903, under the Transportation Corporations Law (term ninety-nine years from February 24, 1903). The property formerly belonging to West Shore Home Telephone Company was sold June 27, 1912, to New York Telephone Company. It also merged April 2, 1912, Rensselaer Home Telephone Company, incorporated January 16, 1909, under the Transportation Corporations Law (term ninety-nine years from January 16, 1909). October 30, 1914, it sold all its physical property to New York Telephone Company (see that title).

*Term of corporate existence:* Ninety-nine years from May 1, 1901.

*Principal officers:* President, Howard Hendrickson; Vice-presidents, I. H. Griswold, H. F. Stevens; Secretary, S. C. Ormsbee; Treasurer, W. W. Nicholson.

*Central office:* City of Albany.

*Principal office:* Corner Howard and Lodge streets, Albany.

**Allegany County Telephone Company**

*Control by other corporation:* Majority of capital stock owned by New York Telephone Company.

*Organization:* Incorporated August 18, 1910, under the Transportation Corporations Law. August 24, 1910, the following companies were merged into Allegany County Telephone Company; The Angelica Telephone Company, incorporated August 9, 1899, under the Transportation Corporations Law (term ninety-nine years); Belmont Citizens Telephone Company, incorporated February 17, 1902, under the Transportation Corporations Law (term ninety-nine years); The Belfast Telephone Company, incorporated January 12, 1897, under the Transportation Corporations Law (term twenty-five years from January 11, 1896); Bolivar Telephone Company, incorporated September 5, 1901, under the Transportation Corporations Law (term fifty years); and The Cuba Telephone Company, incorporated January 16, 1901, under the Transportation Corporations Law (term ninety-nine years). All of the real estate, plant and property, rights and privileges owned by New York Telephone Company and situated in Allegany county purchased by Allegany County Telephone Company during 1911, and transfer of franchises or rights included therein, approved by the Commission February 28, 1911.

*Term of corporate existence:* Perpetual.

*Principal officers:* President, F. C. Saunders; Vice-president, H. F. Stevens; Secretary, S. C. Ormsbee; Treasurer, George B. Rooth, jr.

*Central offices:* Villages of Angelica, Belfast, Belmont, Bolivar, Cuba, and Wellsville; unincorporated village of Allentown; also Shingle House and Genesee, Penna.

*Principal office:* 120 Main street, Wellsville.

**American Telephone and Telegraph Company**

*Organization:* Incorporated March 3, 1885, under "An act to provide for the incorporation and regulation of telegraph companies" (L. 1848, ch. 265); amended certificate (stock) filed May 17, 1888.

*Term of corporate existence:* Fifty years.

*Principal officers:* President, Theodore N. Vail; Vice-presidents, U. N. Bethell, N. C. Kingsbury, B. E. Sunny, H. B. Thayer, R. W. Devonshire; Secretary, A. A. Masters; Treasurer, G. D. Milne.

*Central office:* Does not furnish exchange service in the State of New York.

*Principal office:* 15 Dey street, New York city.

**Ashville and Panama Telephone and Telegraph Company**

*Organization:* Incorporated July 31, 1903, under the Transportation Corporations Law.

*Term of corporate existence:* Twenty-five years.

*Principal officers:* President, George W. Appleby; Vice-president, Edward L. Hall; Secretary and Treasurer, Alton H. Appleby.

#### **New York Telephone Company**

*Control by other corporation:* Majority of capital stock owned by American Telephone and Telegraph Company.

*Organization:* Incorporated June 18, 1896, under the Transportation Corporations Law. Immediately after its incorporation it acquired and succeeded to the properties and franchises of the Metropolitan Telephone and Telegraph Company, incorporated May 14, 1880, under the Telegraph Act (L. 1848, ch. 265), term fifty years, voluntarily dissolved by certificate filed August 6, 1896; and The Westchester Telephone Company, incorporated July 6, 1882, under the same act (term fifty years). In September, 1909, The New York and New Jersey Telephone Company, incorporated June 5, 1883, under the same act (term ninety-nine years), was connected and consolidated with New York Telephone Company. Prior to such consolidation and between the years 1883 and 1890, The New York and New Jersey Telephone Company acquired the property and franchises of the Long Island Telephone Company, incorporated February 17, 1894, under the Transportation Corporations Law (term one hundred years); The Staten Island Telephone Company, incorporated September 29, 1883, under the Telegraph Act (L. 1848, ch. 265), term ninety-nine years from September 27, 1883; The New Jersey Telephone Company, incorporated under the telegraph law of the State of New Jersey; The Metropolitan Telephone and Telegraph Company of New Jersey, incorporated under the telegraph law of the State of New Jersey; and The Domestic Telegraph and Telephone Company of Newark, New Jersey, incorporated under the telegraph law of the State of New Jersey. In September, 1909, New York Telephone Company also acquired the property and franchises of The Bell Telephone Company of Buffalo (this company was merged into New York Telephone Company July 7, 1911), incorporated April 25, 1879, under the Telegraph Act (L. 1848, ch. 265), term April 21, 1879, to January 1, 1929.

On the following dates the companies named were merged into The Bell Telephone Company of Buffalo: January 19, 1906, The Bliss Telephone Company, incorporated April 29, 1903, under the Transportation Corporations Law (term fifty years); January 19, 1906, Livonia Telephone Company, incorporated March 20, 1901, under the Transportation Corporations Law (term fifty years); January 19, 1906, Tonawanda Valley Telephone Company, incorporated June 26, 1905, under the Transportation Corporations Law (term fifty years); April 23, 1906, Churchville Telephone Company, incorporated December 29, 1904, under the Transportation Corporations Law (term one hundred years); June 20, 1906, The Wyoming and Cattaraugus Telephone Company, incorporated October 23, 1901, under the Transportation Corporations Law (term ninety-nine years); July 25, 1906, Elba Telephone Company, incorporated May 21, 1903, under the Transportation Corporations Law (term fifty years); June 2,

1903, Buffalo Valley Telephone Company, incorporated May 17, 1894, under the Transportation Corporations Law (term fifty years); February 3, 1904, Niagara Telephone Company, incorporated January 20, 1903, under the Transportation Corporations Law (term fifty years); August 8, 1904, Akron Telephone Company, incorporated August 19, 1902, under the Transportation Corporations Law (term fifty years); March 20, 1905, Wilson Telephone Company, incorporated January 9, 1899, under the Transportation Corporations Law (term twenty years).

Central New York Telephone and Telegraph Company, incorporated December 23, 1882, under the Telegraph Act (L. 1848, ch. 265), term ninety-nine years from December 23, 1882, was merged into New York Telephone Company September 22, 1909. On the dates named the following companies were merged into Central New York Telephone and Telegraph Company: July 24, 1906, The Madrid Telephone Company, incorporated September 19, 1904, under the Transportation Corporations Law (term fifty years); July 24, 1906, The Milford Telephone Company, incorporated February 20, 1899, under the Transportation Corporations Law (term ninety-nine years); July 24, 1906, Oneonta Telephone Company, incorporated September 16, 1902, under the Transportation Corporations Law (term ninety-nine years); July 24, 1906, Saint Lawrence Telephone Company, incorporated October 28, 1899, under the Transportation Corporations Law (term one hundred years); January 11, 1909, The Otisco and Cedarvale Telephone Company, incorporated July 24, 1900, under the Transportation Corporations Law (term fifty years). Prior to said merger with New York Telephone Company, and during the month of March, 1909, Central New York Telephone and Telegraph Company had purchased all the property and franchises of Hudson River Telephone Company, incorporated April 27, 1883, under the Telegraph Act (term ninety-nine years from April 26, 1883).

On the dates named the following companies were merged into Hudson River Telephone Company: December 17, 1906, The Franklin Telephone and Telegraph Company, incorporated January 19, 1899, under the Transportation Corporations Law (term twenty years); June 18, 1907, The Greenfield Telephone Company, incorporated October 11, 1900, under the Transportation Corporations Law (term fifty years from October 1, 1900); also of New York and Pennsylvania Telephone and Telegraph Company, incorporated December 7, 1882, under the Telegraph Act (term ninety-nine years from December 6, 1882); merged into New York Telephone Company July 8, 1910; and the Empire State Telephone and Telegraph Company, incorporated July 1, 1881, under the Telegraph Act (term ninety-nine years from July 1, 1881); merged into New York Telephone Company January 11, 1911.

On the following dates the companies named were merged into The Empire State Telephone and Telegraph Company: November 28, 1903, The Seneca Telephone Company, incorporated May 1, 1897, under the Transportation Corporations Law (term fifty years); February 13, 1907, Woodworth Telephone and Telegraph Company, incorporated June 13, 1905, under the Transportation Corporations Law (term fifty years); March 15, 1907, The Naples Telephone Exchange, incorporated May 15, 1902, under the Transportation Corporations Law (term ninety-nine years); March 15, 1907, Ontario and Steuben Telephone Company, incorporated July 15, 1905, under the Transportation Corporations Law (term ninety-nine years); March 15, 1907, The People's Telephone Company of Ontario County, incorporated November 1, 1899, under the Transportation Corporations Law (term ninety-nine years); October 8, 1907, Ontario Telephone Company, incorporated May 3, 1897, under the Transportation Corporations Law (term thirty years); November 30,

1907, Cortland Home Telephone Company, incorporated June 13, 1900, under the Transportation Corporations Law (term fifty years): amended certificate (territory) filed December 19, 1900; March 2, 1903, The Tioughnioga Telephone Company, incorporated May 7, 1902, under the Transportation Corporations Law (term fifty years) was merged into Cortland Home Telephone Company.

On the following dates the companies named were connected with and consolidated with New York Telephone Company: January 21, 1910, The Northeastern Telephone and Telegraph Company, incorporated May 23, 1907, under the telegraph law of New Jersey; January 28, 1910, the Sea Shore Telephone Company, incorporated April 4, 1900, under the same act; and January 29, 1910, the Hudson River Telephone Company of New Jersey, incorporated October 8, 1897, under the same act.

The following New York corporations, all organized under the Transportation Corporations Law, were on the dates mentioned merged into New York Telephone Company: March 18, 1911, Trumansburg Citizens Telephone Company, incorporated November 14, 1906 (term perpetual); March 18, 1911, The Jefferson County Telephone Company, incorporated January 27, 1908 (term perpetual); October 6, 1911, Plainville Telephone Company, incorporated June 8, 1905 (term twenty-five years); October 6, 1911, Cobleskill Telephone Company, incorporated October 5, 1896 (term fifty years); June 30, 1913, Wyoming County Telephone Company, incorporated March 30, 1899 (term fifty years); August 7, 1911, Cobleskill and Sharon Telephone Company, incorporated March 26, 1896, under the same act (term fifty years) was merged into Cobleskill Telephone Company; October 30, 1914, Crystal Lake Home Telephone Company, incorporated April 13, 1908, under the Transportation Corporations Law (term ninety-nine years).

The physical property of the following companies was purchased by New York Telephone Company on the dates named: April 14, 1911, The Amsterdam Automatic Telephone Company, incorporated May 8, 1896, under the Transportation Corporations Law (term fifty years); April 27, 1911, Clifton Park Telephone Company, incorporated June 4, 1903, under the Transportation Corporations Law (term twenty-five years); April 27, 1911, Home Telephone Company of Albion, incorporated March 24, 1904, under the Transportation Corporations Law (term fifty years); June 30, 1911, The Delaware River Telephone and Telegraph Company, incorporated September 10, 1895, under the Transportation Corporations Law (term fifty years); June 30, 1911, the telephone property and business of Herman S. Wells in Sullivan and Ulster counties; January 6, 1912, Eastern New York Telephone and Telegraph Company, incorporated March 10, 1902, under the Transportation Corporations Law (term ninety-nine years); March 29, 1912, Cayuga, Onondaga Telephone Company, incorporated October 12, 1908, as a reorganization of The Weedsport, Jordan and Elbridge Telephone Company, incorporated June 21, 1905, under the name of Weedsport Telephone Company, under the Transportation Corporations Law: name changed May 1, 1906, by order of the Supreme Court, to The Weedsport, Jordan and Elbridge Telephone Company, order filed March 19, 1906 (term ninety-nine years); April 30, 1912, Onondaga Independent Telephone Company, incorporated July 2, 1908, under the Transportation Corporations Law: succeeded to the property and franchises sold under foreclosure of Independent Telephone Company of Syracuse, incorporated June 29, 1905, under the Transportation Corporations Law (term perpetual); May 31, 1912, The Skancateles Telephone Company, incorporated April 22, 1902, under the Transportation Corporations Law (term fifty years); June 29, 1912, Baldwinsville Telephone Company, incorporated December 18, 1897, under the Transportation Corpora-

tions Law (term fifty years); July 1, 1912, Newburgh Home Telephone Company, incorporated December 12, 1906, under the Transportation Corporations Law (term ninety-nine years from December 12, 1906); July 1, 1912, Home Telephone Company of Frewsburg, New York, incorporated September 17, 1902, under the Transportation Corporations Law (term twenty years); July 1, 1912, The Deposit Telephone Company, incorporated July 30, 1906, under the Transportation Corporations Law (term fifty years); July 1, 1912, Kitchawan Telephone Company, incorporated August 24, 1904, under the Transportation Corporations Law (term ninety-nine years): voluntarily dissolved by certificate filed August 16, 1912; August 3, 1912, The Inter-State Telephone Company, incorporated July 13, 1894, under the Transportation Corporations Law (term fifty years from June 1, 1894); August 3, 1912, Dutchess County Telephone Company, incorporated November 12, 1900, under the Transportation Corporations Law (term one hundred years); August 15, 1912, Utica Home Telephone Company, incorporated December 13, 1901, under the Transportation Corporations Law (term fifty years); August 28, 1912, Citizens Standard Telephone Company, incorporated August 13, 1895, under the Transportation Corporations Law (term ninety-nine years from August 13, 1895); September 2, 1912, The Schoharie Valley Telephone Company, incorporated January 28, 1907, under the Transportation Corporations Law (term twenty-five years); October 16, 1912, Schenectady Home Telephone Company, incorporated August 10, 1901, under the Transportation Corporations Law (term ninety-nine years from August 10, 1901); October 19, 1912, The Hamilton Telephone Company, incorporated March 8, 1910, under the Transportation Corporations Law (term fifty years). *Principal office:* 332 Ellicott street, Buffalo.

**The Reading and Rock Stream Telephone and Telegraph Company**

*Organization:* Incorporated March 19, 1904, under the Transportation Corporations Law.

*Term of corporate existence:* Perpetual.

*Principal officers:* President, Charles Chapman; Vice-president, H. S. Howard; Secretary and Treasurer, A. S. Barnes.

*Central office:* Operated by Federal Telephone & Telegraph Company.

*Principal office:* Rock Stream.

**Red Hook Telephone Company**

*Organization:* Incorporated January 29, 1896, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Principal officers:* President and Treasurer, Peter H. Troy; Vice-president, J. Lewis Daley; Secretary, John Troy.

*Central offices:* Villages of Red Hook and Rhinebeck; unincorporated village of Staatsburg.

*Principal office:* 62 Market street, Poughkeepsie.

**The Red Jacket Telephone Company**

*Organization:* Incorporated April 20, 1903, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Principal officers:* President, Carlos P. Osgood; Vice-president, Robert B. Peck; Secretary, Willis C. Ellis; Treasurer, Oliver S. Titus.

*Central offices:* Villages of Manchester and Shortsville.

*Principal office:* Shortsville.

**Ripley Telephone Company**

*Organization:* Incorporated August 4, 1898, under the Transportation Corporations Law.

*Term of corporate existence:* One hundred years.

*Principal officers:* President, F. N. Randall; Vice-president, Hon. C. M. Hamilton; Secretary and Treasurer, J. W. Burrows.

*Central office:* Unincorporated village of Ripley.

*Principal office:* Ripley.

**Rochester Telephone Company**

*Organization:* Incorporated November 24, 1899, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Principal officers:* President, George R. Fuller; Vice-president, George F. Roth; Secretary, F. C. Goodwin; Treasurer, C. M. Beattie.

*Central offices:* City of Rochester (59 Stone street and 617 Park avenue).

*Principal office:* 59 Stone street, Rochester.

**The Rose Telephone Company**

*Organization:* Incorporated January 13, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Seventy-five years.

*Principal officers:* President, Hugh K. Rose; Vice-president, Edmund S. Rose; Secretary and Treasurer, William E. King.

*Central offices:* Villages of Hobart and Stamford; unincorporated villages of Davenport and Roxbury.

*Principal office:* Hobart.

**Rushford Telephone Company**

*Control by other corporation:* Majority of capital stock owned by Consolidated Telephone Company.

*Organization:* Incorporated January 4, 1906, under the Transportation Corporations Law.

*Term of corporate existence:* Ninety-nine years.

*Principal officers:* President, E. C. Gilbert; Vice-president, W. S. Mulleken; Secretary, Byron L. Moore; Treasurer, L. E. Hardy.

*Central office:* Unincorporated village of Rushford.

*Principal office:* 332 Ellicott street, Buffalo.

**Seneca-Gorham Telephone Company**

*Organization:* Incorporated June 10, 1903, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Principal officers:* President, Duncan S. Allen; Vice-president, G. A. Driscoll; Secretary, Rice McCauley; Treasurer, William Pulver.

*Central offices:* Village of Rushville and unincorporated village of Seneca.

*Principal office:* Stanley.

**The Sherburne Telephone Company**

*Control by other corporation:* Majority of capital stock owned by New York Telephone Company.

*Organization:* Incorporated March 14, 1904, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Principal officers:* President, John Nelson; Vice-president, B. H. Shepard; Secretary, S. C. Ormsbee; Treasurer, Ella Nelson.

*Central office:* Village of Sherburne.

*Principal office:* Sherburne.

**Sherman Telephone Company**

*Organization:* Incorporated January 25, 1899, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Principal officers:* President, Charles E. Sheldon; Vice-president, William H. Newall; Secretary and Treasurer, Herbert H. Corbett.

*Central office:* Village of Sherman.

*Principal office:* Sherman.

**State Line Telephone Company**

*Control by other corporation:* Majority of capital stock owned by State Line Telephone Company, S. D.

*Organization:* Incorporated July 17, 1903, under the Transportation Corporations Law.

*Term of corporate existence:* Nine hundred ninety-nine years.

*Principal officers:* President, Melvin G. Woolley; Vice-president, D. A. Reynolds; Secretary, Eugene H. Brock; Treasurer, Louis L. Ruppert.

*Central offices:* Village of Peekskill; unincorporated villages of Adams Corners and Pine Plains.

*Principal offices:* Peekskill, and 2 Rector street, New York city.

**State Telephone Company**

*Organization:* Incorporated December 31, 1909, under the Transportation Corporations Law.

*Term of corporate existence:* Ninety years.

*Principal officers:* President, William C. Harden; Vice-president, J. K. Hotaling; Secretary, Ernest L. Haight; Treasurer, Harrie McK. Curtis.

*Central offices:* Villages of Cocksackie and Ravena.

*Principal office:* Ravena.

**Suffolk County Telephone Company**

*Organization:* Incorporated August 11, 1903, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Principal officers:* President, Joseph T. Losee; Vice-president, A. P. Terry; Secretary, Daniel Chichester; Treasurer, John E. Ketcham.

*Central offices:* Village of Patchogue and unincorporated village of Holtsville.

*Principal office:* Patchogue.

**Ticonderoga Home Telephone Company**

*Organization:* Incorporated October 12, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Principal officers:* President, M. H. Turner; Vice-president, J. A. McLaughlin, Secretary, R. N. Clemons; Treasurer, D. C. Bascom.

*Central offices:* Village of Ticonderoga; unincorporated villages of Hague and Schroom Lake.

*Principal office:* Ticonderoga.

**Trumansburg Home Telephone Company**

*Organization:* Incorporated February 7, 1906, under the Transportation Corporations Law.

*Term of corporate existence:* Ninety-nine years.

*Principal officers:* President, Walter Mekeel; Vice-president, H. F. Owen; Secretary, J. K. Wheeler; Treasurer, Isaiah Mekeel.

*Central offices:* Villages of Trumansburg and Inter-laken.

*Principal office:* Trumansburg.

**Truxton and Cuyler Telephone Company**

*Organization:* Incorporated April 4, 1906, under the Transportation Corporations Law.

*Term of corporate existence:* Ninety-nine years.

*Remarks:* No report of the operations of this company for the year ended December 31, 1914, had been rendered up to date of going to press. The information in regard to officers and offices is taken from the report for the year ended December 31, 1913.

*Principal officers:* President, A. R. Bryant; Vice-president, F. L. Hilton; Secretary, L. D. Crandall; Treasurer, P. D. Muller.

*Central office:* Unincorporated village of Truxton.

*Principal office:* Truxton.

**Union Telephone Company**

*Organization:* Incorporated January 23, 1899, under the Transportation Corporations Law.

*Term of corporate existence:* Forty-nine years.

*Principal officers:* President, M. L. Siver; Vice-president, D. R. Buckley; Secretary and Treasurer, R. W. Siver.

*Central offices:* Villages of Bainbridge, Sidney, and Unadilla; unincorporated village of Guilford.

*Principal office:* Sidney.

**Union Telephone Company of Erie**

*Organization:* Incorporated August 31, 1904, under the laws of Pennsylvania, as a reorganization, purchasing Union Telephone and Telegraph Company of West Virginia. It is reported that the properties of this company passed into the hands of Theo. A. Lamb as receiver October 1, 1912.

*Term of corporate existence:* Not stated.

*Remarks:* Returns not tabulated. The report of the receiver shows the following revenues and expenses of the Olean exchange for the year ended December 31, 1914:

Operating revenues:	
Exchange service.....	\$5,174
Toll service.....	2,554
Total telephone operating revenues.....	\$7,728

Operating expenses:	
Maintenance.....	\$3,004
Traffic.....	2,857
Commercial.....	326
General and miscellaneous.....	150
Total telephone operating expenses.....	\$6,339

Income from telephone operations..... \$1,389

The amount of income is reported as "subject to further deductions for interest on fixed charges, etc., the exact amount unknown owing to the fact the Olean exchange is not handled separately on our books".

The average number of stations in service during the year is given as 345 including 55 service and connecting stations.

The balance sheet of the corporation as a whole December 31, 1914, is reported as follows:

Assets Side:	
Plant as of October 1, 1912.....	\$1,243,071
Franchises and rights of way.....	256,514
Construction since October 1, 1912.....	32,784
	\$1,532,369
Less materials from discount.....	12,088
	\$1,520,281
Furniture and fixtures.....	3,020
Mercer Telephone and Telegraph Co. stock.....	3,400

Surplus.....	187,120
Total.....	\$1,807,847

*Principal officers:* Receiver, T. A. Lamb; Acting Secretary and Treasurer, Henry R. Jeffs.

*Central offices:* Operates chiefly outside of State; the only central office within the State is located at Olean.

*Principal office:* 807 State street, Erie, Penna.

**The Walden Telephone Company**

*Organization:* Incorporated May 12, 1910, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Principal officers:* President and Treasurer, C. Fred Fowler; Vice-president, Joseph M. Fowler; Secretary, Anson J. Fowler.

*Central offices:* Villages of Montgomery and Walden.

*Principal office:* Walden.

**Walton Home Telephone Company**

*Organization:* Incorporated February 26, 1906, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Principal officers:* President, M. E. Combs; Secretary, A. L. Launt; Treasurer, J. A. Chambers.

*Central office:* Village of Walton.

*Principal office:* Walton.

**Walton People's Telephone Company**

*Organization:* Incorporated October 30, 1907, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Principal officers:* President, E. L. Jenks; Vice-president, W. J. Cranston; Secretary, A. G. Patterson; Treasurer, William R. Gladstone.

*Central office:* Village of Walton.

*Principal office:* Walton.

**Warwick Valley Telephone Company**

*Organization:* Incorporated January 16, 1902, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Principal officers:* President, G. H. Strong; Vice-president, W. C. Layear; Secretary and Treasurer, J. E. Barry.

*Central offices:* Village of Warwick; also Vernon, N. J.

*Principal office:* Warwick.

**Waterville Telephone Company**

*Organization:* Incorporated March 3, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Perpetual.

*Principal officers:* President, G. N. Bishopp; Vice-president, William S. Smith; Secretary and Treasurer, W. B. Bishopp.

*Central offices:* Village of Waterville and town of Marshall.

*Principal office:* Waterville.

**Wayne Telephone Company**

*Control by other corporation:* Majority of capital stock owned by New York Telephone Company.

*Organization:* Incorporated May 24, 1910, under the Transportation Corporations Law, amended certificate (verbal changes) filed August 27, 1910. On the following dates the companies named were merged into Wayne Telephone Company: June 4, 1910, The Wayne-Monroe Telephone Company, incorporated October 1, 1903, under the Transportation Corporations Law (term fifty years); June 4, 1910, Wayne County Telephone Company, incorporated July 26, 1902 (term fifty years), as a consolidation of The Wayne Telephone and Telegraph Company, incorporated December 17, 1895, under the Transportation Corporations Law (term fifty years); and the Lyons Telephone Company, incorporated March 27, 1899, under the Transportation Corporations Law (term fifty years); July 11, 1910, Newark Telephone Exchange, incorporated March 19, 1904, under the Transportation Corporations Law (term ninety-nine years). July 1, 1910, it leased New York Telephone Company's plant in Wayne county.

*Term of corporate existence:* Perpetual.

*Principal officers:* President, Albert Yeomans; Vice-president, H. P. McDonough; Secretary, S. C. Ormsbee; Treasurer, C. P. H. Vary.

*Central offices:* Villages of Clyde, Lyons, Macedon, Newark, Palmyra, Red Creek, and Wolcott; unincorporated villages of Huron, Marion, North Rose, Ontario, Sodus, Walworth, and Williamson.

*Principal office:* Newark.

**Western Sullivan Telephone and Telegraph Company**

*Organization:* Incorporated March 6, 1907, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Principal officers:* President, Jacob W. Keesler; Secretary, P. S. Hartman; Treasurer, J. C. Parr.

*Central office:* Unincorporated village of Callicoon.

*Principal office:* Callicoon.

**Westfield Telephone Company**

*Organization:* Incorporated August 19, 1897, under the Transportation Corporations Law.

*Term of corporate existence:* One hundred years.

*Principal officers:* President, M. D. Tennant; Vice-president, George H. Frost; Secretary and Treasurer, S. C. Crandall.

*Central office:* Village of Westfield.

*Principal office:* Westfield.

**The West Valley Telephone Company**

*Organization:* Incorporated September 29, 1905, under the Transportation Corporations Law.

*Term of corporate existence:* Fifty years.

*Principal officers:* President, J. C. Schumacher; Vice-president and Secretary, D. E. L. Fish; Treasurer, H. W. Kruse.

*Central office:* Switching done by the Federal Telephone & Telegraph Company at Springville.

*Principal office:* West Valley.

**York State Telephone Company**

*Control by other corporation:* Majority of capital stock owned by Friendship Telephone Company.

*Organization:* Incorporated September 23, 1901, under the Transportation Corporations Law. May 1, 1903, Bradford County Telephone Company, incorporated under the laws of the State of Pennsylvania, was merged into York State Telephone Company under the provisions of the laws of the State of Pennsylvania. Succeeded to the franchises and property of Elmira Telephone Company, incorporated December 1, 1897, under the Transportation Corporations Law, amended certificate (territory) filed June 11, 1901 (term one hundred years); and Binghamton Telephone Company, incorporated May 3, 1899, under the Transportation Corporations Law (term fifty years). W. W. Nicholson was appointed receiver of this company April 1, 1912.

*Term of corporate existence:* Fifty years.

*Principal officers:* President, H. C. Mandeville; Vice-president, H. F. Stevens; Secretary, S. C. Ormsbee; Treasurer, W. W. Nicholson.

*Central offices:* Cities of Elmira and Binghamton; villages of Endicott, Horseheads, and Lestershire.

*Principal office:* 211 Baldwin street, Elmira.

## PART II: INCHOATE AND DORMANT CORPORATIONS

The following statement gives for corporations organized to carry on a telegraph or telephone business, which have either not yet begun operations or have ceased operations without becoming defunct as a corporation, a brief abstract of the more important information shown in their annual reports or in the Commission's records. No attempt has been made to tabulate returns of inchoate and dormant corporations.

## TELEGRAPH CORPORATIONS

**Marconi Telegraph-Cable Company, Inc.**

*History:* A letter of the vice-president, John Bottomley, dated February 25, 1915, states that "none of the Marconi Telegraph-Cable companies have as yet commenced any business whatsoever, and in the State of New York this company does not own any wires whatsoever. In fact, it

owns nothing but some debts incurred in the incorporation of the company".

*Principal officers:* President, Edward J. Nally; Vice-president, John Bottomley; Secretary, Fred M. Sammis; Treasurer, George S. De Sousa.

*Principal office:* 42 Broad street, New York city.

## TELEPHONE CORPORATIONS

**Great Eastern Telephone Company**

*History:* Organized October 9, 1905, under the Transportation Corporations Law. Majority of capital stock owned by Great Eastern Telephone Company of South Dakota. A letter from the president, D. A. Reynolds, dated August 6, 1914, states "The Great Eastern Telephone Company was incorporated as a building and operating company in the utilization of certain franchise rights formerly granted to the New York Electric Lines Company for the old city of New York, and the New York & Eastern Telegraph & Telephone Company for the old city of Brooklyn, it being the purpose to finance the enterprise as a single proposition. The company's stock was made full paid by the transfer to it of certain patents, and the stock later sold at a price ranging between \$20 and \$30 a share, the proceeds of which were used in securing 107,000 contracts for its service, the perfecting of certain engineering plans, and the necessary expenses of maintenance. It made a contract with the New York Electric Lines Company for the necessary electric conductors for its system, but that company has been unable to fulfill its contract with the Great Eastern company because of protracted litigation. The contracts for service are more than seven years old, and of course valueless except to show a public demand; the engineering plans are more than five years old and will require a new survey because of the city development since the first survey was made; so that what the company possesses is of very doubtful value and must continue to remain so until the closing litigation on-behalf of the New York Electric Lines Company, which will enable it to re-finance and go forward with its enterprise. The company is, therefore, nothing more than a 'paper company,' with no assets of any description possessing the least market value."

Balance sheet December 31, 1914:

<i>Assets Side:</i>	
Accounts receivable.....	\$10,615
Office furniture.....	134
Corporate deficit.....	1,032,425
Total.....	\$1,043,175
<i>Liabilities Side:</i>	
Capital stock.....	\$980,900
Bills payable.....	5,100
Accounts payable.....	57,175
Total.....	\$1,043,175

As a result of various expenditures and adjustments the corporation's deficit was increased \$10,320 during 1914.

*Principal officers:* President, D. A. Reynolds; Vice-

president, M. B. Babcock; Secretary, William J. Lansley; Treasurer, M. E. Rippenhagen.

*Principal office:* 2 Rector street, New York city.

**New Rochelle and Westchester Telephone Company**

*History:* Organized in November, 1898, under the laws of New York.

Balance sheet December 31, 1914:

<i>Assets Side:</i>	
Fixed capital.....	\$10,000
Corporate deficit.....	183,535
Total.....	\$193,535
<i>Liabilities Side:</i>	
Common stock.....	\$150,000
Funded debt.....	*28,201
Bills payable.....	13,353
Matured interest, dividends, and rents unpaid.....	1,980
Total.....	\$193,535

\* Includes interest, amount not stated but apparently \$201.

This corporation is said to have done no business of any kind for a number of years. The intention of the company as regards future development is not stated.

*Principal officers:* President, Frederick Jones; Secretary and Treasurer, William Shirden.

*Principal office:* It is stated that the corporation "has no office". The address of the secretary and treasurer is 115 Broadway, New York city.

**New York Electric Lines Company**

*History:* Incorporated in 1882, under the laws of New York. "In April, 1883, it received a franchise from the Board of Aldermen of the City of New York, granting it the right to lay electrical conductors underground in the streets of said city. This franchise has been in almost continuous litigation ever since. An action is now pending on appeal in the Supreme Court, First Department, which will probably be argued during the present year." It appears that the books of accounts of this company covering the first years of its existence were destroyed by fire in 1892, and that since 1892 its affairs have been carried on under financial agreements, the general purport of which were to carry on the company, pay its expenses, and to conduct its work in litigation; and that consequently no books of accounts have been kept by the company.

*Principal officers:* President, Edwin M. Millard; Vice-president, Herman G. Loew; Secretary, Wayne W. Wilson; Treasurer, D. A. Reynolds.

*Main business office:* 2 Rector street, New York city.

<sup>1</sup> Includes \$9055 "Dividends on stocks held as lessee".

<sup>2</sup> Includes \$3,451,922 balance in the account known as "Other surplus reserved" which represented the cost of construction work in progress which had been previously charged to operating expenses.

<sup>3</sup> Includes \$1,000,000 depreciation accrued on ocean cable plant prior to December 31, 1913.

<sup>4</sup> The Postal Telegraph-Cable Company is a New York corporation whose report purports to show particulars of the telegraph property and operations of the Postal Telegraph system in New York state only.

TABLE 803: SECURITIES OWNED AND MISCELLANEOUS INVESTMENTS, TELEGRAPH AND CABLE CORPORATIONS, YEAR ENDED DECEMBER 31, 1914

The figures given are for the corporation as a whole; they are not segregated according to state lines.

Only those corporations are included which report items that appear in the Balance Sheet, Table 801, as "Investment securities," "Long term advances receivable," "Miscellaneous investments," and "Marketable securities".

The corporations are named in the order of their average revenues from telegraph and cable operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 253.

---

## TELEPHONE CORPORATIONS (CLASSES A AND B)

---

Telephone Corporations of Classes A and B are those whose operating revenues for the three years preceding that covered by the latest annual report to the Commission have averaged over \$50,000 per annum. The figures following the name give the order in which the corporation appears in the tables.

Albany Home Telephone Company.....	T 17	Home Telephone Company of Jamestown, N. Y., The.....	T 13
Allegany County Telephone Company.....	T 15	Mountain Home Telephone Company.....	T 5
American Telephone and Telegraph Company.....	T 2	New York Telephone Company.....	T 1
Black River Telephone Company.....	T 11	Orange County Telephone Company, The.....	T 14
Commercial Union Telephone Company.....	T 7	Otsego and Delaware Telephone Company.....	T 10
Federal Telephone & Telegraph Company.....	T 3	Rochester Telephone Company.....	T 4
Friendship Telephone Company <sup>1</sup> .....	T 16	Wayne Telephone Company.....	T 8
Glen Telephone Company.....	T 6	York State Telephone Company.....	T 9
Granville Telephone Company.....	T 12		

Returns not tabulated; see Historical and Explanatory Statement.

Union Telephone Company of Erie, Penna.

<sup>1</sup> This corporation, while having revenues from telephone operations of less than \$50,000 per annum, is required, because of the importance of its operations as a holding company, to render its annual report on the form provided for telephone corporations of Classes A and B, being similarly classified in these tabulations.

---

## INCHOATE AND DORMANT TELEPHONE CORPORATIONS (CLASSES A AND B)

Returns not tabulated; see Historical and Explanatory Statement.

Great Eastern Telephone Company	New York Electric Lines Company
New Rochelle and Westchester Telephone Company	

TABLE 701: BALANCE SHEET, TELEPHONE

The figures are given for the corporation as a whole; they are not segregated according to state lines.

The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in

\* Income account covers period January 1 to October 30, 1914; see Historical and Explanatory Statement.

† There has been deducted from the actual accruals during the year on funded

debt \$13, described as "Unexpended balance in hands of trustee applied in payment for period November 31, 1913, to May 1, 1914".

\* Appropriation to reserve for accrued depreciation.

TABLE 703: SECURITIES OWNED AND MISCELLANEOUS INVESTMENTS, TELEPHONE CORPORATIONS (CLASSES A AND B), YEAR ENDED DECEMBER 31, 1914

The figures given are for the corporation as a whole; they are not segregated according to state lines.  
 Only those corporations are included which report items that appear in the Balance Sheet, Table 701, as "Investment securities," "Advances to system corporations," or "Miscellaneous investments".  
 The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 259.

<sup>2</sup> A large part of these securities, together with other securities not now owned, were purchased by this company from the American Bell Telephone Company about the year 1900 for a lump sum and without subdivision by companies. Since then there have been exchanges of stocks, one for another, and for notes and bonds. It is, therefore, not possible to ascertain the actual money cost to respondent of each security.

<sup>3</sup> The American Telephone and Telegraph Company controls through ownership of their entire capital stock certain corporations herein listed under the heads "Operating state companies" and "Leasing state companies". The par value of the capital stock of these state companies is not recorded nor is it significant since the figure is generally a nominal one. The American Telephone and Telegraph Company in its report states in reference to these companies that they "have been organized from time to time to facilitate the construction of the lines comprising the long distance system owned, operated, and controlled by this company, the operations of which are shown elsewhere in this report, such companies having been thus organized to comply with the laws of

the several States. The entire capital stock of these companies is owned by this company, and for the purposes of operating and accounting these separate organizations, except in the case of companies designated 'Operating state companies' are disregarded. As to the latter, separate operation and accounting is maintained solely because of legal requirements. For the purposes of the company, in its reports to stockholders and directors and to the general public, the operating accounts are consolidated, duplications being omitted, and this report has been prepared in the same manner, disregarding altogether the above organizations and their financial and operating autonomy. For the same reasons the nominal book value of these stocks and the income which may have accrued to this company from these companies have been disregarded".

<sup>4</sup> Represents income accrued on the stock of the Century Telephone Construction Company, Rushford Telephone Company, Geneva Telephone Company, Rochester Telephone Company, and Hamlin Telephone Company, the book value of which is included in contract of \$2,000,000 carried on the books as a part of fixed capital installed prior to January 1, 1912.

YEAR ENDED DECEMBER 31, 1914 (continued)

The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 259.

[illegible]

<sup>6</sup> Respondent also reports a mortgage of \$1000 on this property.

<sup>6</sup> Respondent also reports a mortgage of \$1000 on this property.

TABLE 703: SECURITIES OWNED AND MISCELLANEOUS INVESTMENTS, TELEPHONE CORPORATIONS (CLASSES A AND B),  
YEAR ENDED DECEMBER 31, 1914 (concluded)

The figures given are for the corporation as a whole; they are not segregated according to state lines.

Only those corporations are included which report items that appear in the Balance Sheet, Table 701, as "Investment securities," "Advances to system corporations," or "Miscellaneous investments".

The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 259.

TABLE 704: FIXED CAPITAL, TELEPHONE CORPORATIONS (CLASSES A AND B), YEAR ENDED DECEMBER 31, 1914

The figures given are for the corporation as a whole; they are not segregated according to state lines. So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 704, as reported. The book accounts representing fixed capital installed prior to December 31, 1911, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts". The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year. Figures in *italics* denote *decreases* or *credit balances*. The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 259.

The New York Telephone Company and the American Telephone and Telegraph Company use a classification for fixed capital installed prior to December 31, 1911, the account titles of which are practically identical with those of the present prescribed classification. Because of certain variations in accounting practice before and since the effective date of the uniform classification, the book value of property acquired before that date is considered for the present to be "Not classified by prescribed accounts".

TABLE 704: FIXED CAPITAL, TELEPHONE CORPORATIONS (CLASSES A AND B), YEAR ENDED DECEMBER 31, 1914 (continued)

The figures given are for the corporation as a whole; they are not segregated according to state lines. So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts now effective, the net change during the year and the balance at the close of the year in each primary account are shown in Table 704, as reported. The book accounts representing fixed capital installed prior to December 31, 1911, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts". The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year. Figures in *italics* denote *decreases* or *credit balances*. The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 259.

TABLE 704: FIXED CAPITAL, TELEPHONE CORPORATIONS (CLASSES A AND B), YEAR ENDED DECEMBER 31, 1914 (concluded)

The figures given are for the corporation as a whole; they are not segregated according to state lines. So far as fixed capital costs have been classified according to the prescribed Uniform System of Accounts, Table 701, as reported. The book accounts representing fixed capital installed prior to December 31, 1911, have in most cases not yet been required by the Commission to be re-classified according to the now effective system, and where for this or any other reason expenditures are not so classified, the total is shown against the captions "Undistributed book value" and "Other fixed capital not classified by prescribed accounts". The amounts shown as "Balance at close of year" will not in all cases equal the sum of the "Net increase during year" added to the balance given in the abstracts for 1913. This is due to corrections, adjustments, and transfers which are not considered part of the year's transactions but which have been shown in the current report of the corporation concerned as though they had been recorded in the figures for the previous year. Figures in *italics* denote *decreases* or *credit balances*. The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 259.

<sup>1</sup> Report covers period January 1 to October 30, 1914; see Historical and Explanatory Statement.

<sup>2</sup> Includes \$46,793 representing value of plant of Rensselaer Telephone Company merged into respondent March 28, 1912.

<sup>3</sup> Includes \$922 credited to value of plant of Rensselaer Telephone Company merged into respondent March 28, 1912.

<sup>4</sup> Includes \$46,793 representing value of plant of Rensselaer Telephone Company merged into respondent March 28, 1912.

TABLE 705 a: LONG TERM DEBT, TELEPHONE CORPORATIONS (CLASSES A AND B), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding debt (% *e.* securities not held by or for the issuing corporation) of the corporation as a whole; they are not segregated according to state lines. Only those corporations are included which report long term debt outstanding at some time during the year.  
 The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.  
 The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 259.

<sup>1</sup> Bonds for the most part issued in denominations of pounds sterling, but here stated for convenience in terms of dollars. Amount outstanding includes all that may be issued without further authorization, since mortgage provides that in interpreting the limitation of \$75,000,000, one pound sterling shall be considered the equivalent of five dollars American.

<sup>2</sup> No default; unclaimed or provided for by special deposit or otherwise.

<sup>3</sup> Note dated September 15, 1909, and payable to the Western Union Telegraph Company for stock of New York Telephone Company.

TABLE 705 a: LONG TERM DEBT, TELEPHONE CORPORATIONS (CLASSES A AND B), YEAR ENDED DECEMBER 31, 1914 (concluded)

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole; they are not segregated according to state lines. Only those corporations are included which report long term debt outstanding at some time during the year.

The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 259.

† Report covers period January 1 to October 30, 1914; see Historical and Explanatory Statement.

TABLE 705 b: LONG TERM DEBT ISSUED OR ASSUMED, TELEPHONE CORPORATIONS (CLASSES A AND B), YEAR ENDED DECEMBER 31, 1914

Only those corporations are included which report long term debt actually issued or assumed during the year. The date of authorization is the reported date of the final authorization necessary to the legal validity of the issue. The amount shown under "Par value authorized" is the amount of the particular authorization or authorizations under which the issue during the year has been made. The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 259.

<sup>1</sup> Assumed on the purchase of the property of the issuing corporation.

<sup>2</sup> \$2700 issued, par for par, for stock of the Dunkirk Home Telephone Company; \$9000 issued to retire underlying bonds of Corning Telephone Company, Livingston County Home Telephone Company, and Wellsville Telephone Company.

<sup>3</sup> Issued for an equal value of coupons detached from general mortgage bonds of this company that were in the hands of the public.

<sup>4</sup> Issued in exchange for bonds of Adirondack Home Telephone Company, Norwood Telephone Company, and Clinton Telephone Company.

TABLE 706 a: CAPITAL STOCKS, TELEPHONE CORPORATIONS (CLASSES A AND B), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding capital stocks (i. e. stocks not held by or for the issuing corporation) of the corporation as a whole; they are not segregated according to state lines.  
 The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.  
 Stock not otherwise specifically described is common.  
 The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 259.

\* Reserve for amortization of intangibles.

† Land not used in operations.

\* Common stock has not been taken into account in prior reports to the Commission although it is stated that

it was "Made full paid and issued in payment for certain contracts and patents, and later certain portion was given as a bonus for preferred stock".

\* Includes \$4381 described by respondent as "deficit for year". As the deficit has already been accounted for in the profit and loss statement, it is not clear what this item actually represents.

<sup>17</sup> Appropriation to "Reserve for depreciation".

<sup>18</sup> Represents the amount of interest paid.

TABLE 701: BALANCE SHEET, TELEPHONE CORPORATIONS (CLASS C), DECEMBER 31, 1914 (concluded)

The figures given are for the corporation as a whole; they are not segregated according to state lines. Figures in *italics* denote *credit balances* on the assets side and *debit balances* on the liabilities side. The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 283.

<sup>2</sup> Income account covers period January 1 to October 1, 1914; see Historical and Explanatory Statement.

<sup>3</sup> Income account covers period October 1 to December 31, 1914; see Historical and Explanatory Statement.

<sup>4</sup> Includes \$2331 withdrawn by owner.

TABLE 705 a: LONG TERM DEBT, TELEPHONE CORPORATIONS (CLASS C), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole; they are not segregated according to state lines. Only those corporations are included which report long term debt outstanding at some time during the year.

The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 283.

<sup>1</sup> Report covers period January 1 to October 30, 1914; see Historical and Explanatory Statement.

<sup>2</sup> Includes \$37,000 pledged as collateral for short term notes which may be issued without authority of the Public Service Commission, Second District, only in case of sale by holder to cover default in payments on the notes.

<sup>3</sup> Includes \$3800 issued during the year without state or other public authority.

<sup>4</sup> Issued without state or other public authority.

<sup>5</sup> Report covers period January 1, 1913, to October 1, 1914; see Historical and Explanatory Statement.

TABLE 705 b: LONG TERM DEBT ISSUED OR ASSUMED, TELEPHONE CORPORATIONS (CLASS C), YEAR ENDED DECEMBER 31, 1914

Only those corporations are included which report long term debt actually issued or assumed during the year.

The date of authorization is the reported date of the final authorization necessary to the legal validity of the issue. The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 283.

Corp. No.	Name of corporation and designation of securities	Interest rate	Dates		By whom authorized	Par value				Average price realized per cent of par
			Authorization	Maturity		Authorized	Issued or assumed during year	Issued for cash	Issued for other consideration

TABLE 706 a: CAPITAL STOCKS, TELEPHONE CORPORATIONS (CLASS C), YEAR ENDED DECEMBER 31, 1914

The figures given are for the actually outstanding capital stocks (*i. e.* stocks not held by or for the issuing corporation) of the corporation as a whole; they are not segregated according to state lines. Stock not otherwise specifically described is common.

The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 283.

<sup>1</sup> Common stock has not been taken into account in prior reports to the Commission although it is stated that it was "Made full paid and issued in payment for certain contracts and patents, and later certain portion was given as a bonus for preferred stock".

<sup>2</sup> So reported though not shown as a deduction from income.

TABLE 705 a: CAPITAL STOCKS, TELEPHONE CORPORATIONS (CLASS C), YEAR ENDED DECEMBER 31, 1914 (concluded)<sup>1</sup>

The figures given are for the actually outstanding capital stocks (i. e. stocks not held by or for the issuing corporation) of the corporation as a whole; they are not segregated according to state lines. Stock not otherwise specifically described is common.

The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 283.

<sup>1</sup> On 120 shares of a par value of \$10 each, the entire issue at time dividend was declared.

TABLE 706 b: CAPITAL STOCKS ISSUED, TELEPHONE CORPORATIONS (CLASS C), YEAR ENDED DECEMBER 31, 1914

Only those corporations are included which report capital stock actually issued during the year.

The amount shown under "Par value authorized" is the amount already legally issued and outstanding in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 283.

<sup>1</sup> Report covers period January 1 to October 30, 1914; see Historical and Explanatory Statement.

<sup>2</sup> Average toll revenue per station high because of large amount of local toll business between the towns served.

<sup>3</sup> This corporation is engaged primarily in the operation of toll lines, the majority of stations operated by it being merely testing stations; hence average

number of stations in service during year is not given and average revenues on that basis have not been computed.

<sup>4</sup> Report covers period January 1 to October 1, 1914; see Historical and Explanatory Statement.

<sup>5</sup> Report covers period October 1 to December 31, 1914; see Historical and Explanatory Statement.

TABLE 710: OPERATING EXPENSES, TELEPHONE CORPORATIONS

The figures given are for the corporation as a whole; they are not segregated according to state lines. Figures in *italics* denote credits. The corporations are named in the order of their average revenues from telephone operations during the year ended December 31, 1914; for their names in

<sup>1</sup> Report covers period January 1 to October 30, 1914; see Historical and Explanatory Statement.<sup>4</sup> This corporation was engaged primarily in the operation of toll lines, the majority of stations operated by it being merely testing stations; hence average number of stations in service during year is not given and average operating expenses on that basis have not been computed.<sup>6</sup> Switching charges of Federal Telephone & Telegraph Company.<sup>7</sup> Report covers period January 1 to October 1, 1914; see Historical and Explanatory Statement.<sup>8</sup> Report covers period October 1 to December 31, 1914; see Historical and Explanatory Statement.

## STEAM CORPORATIONS

During the year ended December 31, 1914, there were eleven corporations coming within the definition in the Public Service Commissions Law of "Steam Corporations". Of these, nine were also electrical corporations or electrical and gas corporations, and made reports to the Commission as such. The steam operations of such companies are so closely related to the operations of the Electric department that in some cases no separate record has been kept of the cost of labor and materials used in producing steam for heat or power. The steam is quite generally exhaust from the boilers used in generating electric energy by steam power, and in such case its cost as a factor in the operation of the steam heating plant could at best be only a matter of more or less arbitrary estimate.

Inasmuch as the corporate balance sheet and income account of these steam corporations are except in two instances already shown in tables that appear elsewhere in this volume, and inasmuch as the revenues and expenses reported are for the reasons cited of doubtful significance, it has not seemed desirable for the present to attempt any tabular comparisons of these returns; and there is therefore simply given for each corporation a brief abstract of its report, showing for what they are worth the figures not already tabulated in the abstracts of reports of electrical and gas corporations.

### Central Hudson Gas and Electric Company

For balance sheet, income account, capitalization, etc., see tables of Electrical and Gas Corporations, Class A.

*Territory served:* Newburgh.

*Fixed capital:* The company reports the undistributed cost of capital devoted to steam heating operations December 31, 1914, at \$2395.

*Revenues:* Steam operating revenues during the year are reported as follows:

Steam revenue.....	\$12,556
Less credits and allowances.....	24
Total operating revenues.....	\$12,532

*Expenses:* Steam operating expenses during the year are reported as follows:

Cost of steam.....	\$9,744
Maintenance and operation of system.....	761
Commercial expenses.....	44
General and miscellaneous expenses.....	3
Total operating expenses.....	\$10,552
Taxes applicable to steam operations.....	178
Uncollectible bills.....	27
Total revenue deductions.....	\$10,757

*Rates:* The company reports the following rates in effect at the close of the year: 60¢ per 1000 for the first 10,000 lbs. condensation per month; 55¢ per 1000 for the next 10,000 lbs. condensation per month; 50¢ per 1000 for the next 10,000 lbs. condensation per month; 45¢ per 1000 for the next 20,000 lbs. condensation per month; 42½¢ per 1000 for the next 40,000 lbs. condensation per month; 37½¢ per 1000 for the next 250,000 lbs. condensation per month; 35¢ per 1000 for all in excess of 340,000 lbs. condensation per month; 5 per cent discount if bill is paid within ten days. Minimum charge \$3 per month.

### Central New York Gas and Electric Company

For balance sheet, income account, capitalization, etc., see tables of Electrical and Gas Corporations, Class A.

*Territory served:* Geneva and Newark.

*Fixed capital:* The company reports the undistributed cost of capital devoted to steam heating operations at close of year at \$102,224.

*Revenues:* Steam operating revenues during the year are reported as follows:

Steam heating.....	\$35,374
Steam penalties.....	109
Total operating revenues.....	\$35,483

*Expenses:* Steam operating expenses are not segregated from those of the Electric and Gas departments, with the exception of \$2371 reported as "Repairs".

*Rates:* The company reports the following rates in effect at the close of the year:

Geneva: 60¢ per 1000 for the first 50,000 lbs. condensation per month; 55¢ per 1000 for the second 50,000 lbs. condensation per month; 50¢ per 1000 for all over 100,000 lbs. condensation per month; 10 per cent discount if bill is paid within ten days.

Newark: 5¢ per square foot radiation per month; 10 per cent discount if bill is paid within ten days

### Dunkirk Electrical Manufacturing Company

For balance sheet, income account, capitalization, etc., see tables of Electrical Corporations, Class B.

*Territory served:* Dunkirk.

*Fixed capital:* The cost of capital specifically devoted to steam heating operations is not segregated from the cost of electric fixed capital.

*Revenues:* The company reports \$5671 revenue from the sale of high and low pressure steam to Dunkirk Power and Heating Company.

*Expenses:* Steam operating expenses during the year are reported as follows:

Production:	
Station superintendence and labor.....	\$1,076
Fuel for steam.....	1,972
Other station supplies and expenses.....	148
Repairs of power plant buildings.....	111
Repairs of steam equipment.....	91
Miscellaneous station repairs.....	33
Total production.....	\$3,432
General and miscellaneous:	
General administration.....	\$524
Insurance.....	115
General amortization, steam.....	608
	\$1,247

Total operating expenses.....	\$4,679
Taxes applicable to steam operations.....	56
Total revenue deductions.....	\$4,735

*Rates:* Respondent supplies steam only to Dunkirk Power and Heating Company at cost plus 10 per cent.

### Dunkirk Power and Heating Company

*Territory served:* Dunkirk.

Balance sheet December 31, 1914:

<i>Assets Side:</i>	
Cost of plant and equipment.....	\$6,816
Organization expenses.....	306
Good will.....	42,455
Cash.....	1
Accounts receivable.....	671
Deficit.....	9,238
Total.....	\$59,487
<i>Liabilities Side:</i>	
Capital stock.....	\$50,000
Accounts payable.....	6,817
Reserve for depreciation.....	2,670
Total.....	\$59,487

## Income account for year ended December 31, 1914:

Operating revenues:	
High pressure laundry service.....	\$886
Low pressure heating service.....	3,128
Total operating revenues.....	\$4,014
Operating expenses:	
Production:	
Steam from other sources.....	\$5,671
Transmission and distribution:	
Distribution subway rent.....	\$1
Repairs of distribution mains.....	48
Repairs of steam services.....	9
Steam meter operation and repairs.....	30
Total transmission and distribution.....	\$88
General and miscellaneous:	
General amortization.....	\$684
General stationery and printing.....	3
Store and stable expenses.....	7
Total general and miscellaneous.....	\$694
Total operating expenses.....	\$6,453
Taxes applicable to steam operations.....	34
Uncollectible bills.....	643
Total revenue deductions.....	\$7,130
Deficit from steam operations.....	\$3,116
Deficit at beginning of year.....	6,123
Deficit at close of year.....	\$9,238

*Rates:* The company reports the following rates in effect at the close of the year: 60¢ per 1000 lbs. condensation, less 20 per cent for low pressure heating. Flat rate for low pressure heating based on \$3 to \$5 per 1000 cubic feet of space per season, dependent on the character and exposure of the building; applies where charge is less than \$100 per season. High pressure service based on cost plus 10 per cent. No minimum rates.

## Empire Gas and Electric Company

For balance sheet, income account, capitalization, etc., see tables of Electrical and Gas Corporations, Class A.

*Territory served:* Auburn.

*Fixed capital:* The company reports the undistributed cost of capital devoted to steam heating operations December 31, 1914, at \$56,388.

*Revenues:* Steam operating revenues during the year are reported as follows:

Steam heat.....	\$25,605
Steam penalties.....	114
Total operating revenues.....	\$25,718

*Expenses:* Steam operating expenses are not segregated from those of the Electric and Gas departments, with the exception of \$957 reported as repairs.

*Rates:* The company reports the following rates in effect at the close of the year: Flat rate 45¢ per square foot radiation per year. Meter rate 50¢ per 1000 lbs. condensation per month. In each case there is a 10 per cent discount if bill is paid within ten days.

## Hornell Electric Company

For balance sheet, income account, capitalization, etc., see tables of Electrical Corporations, Class A.

*Territory served:* Hornell.

*Fixed capital:* The company reports the cost of capital devoted to steam heating operations December 31, 1914, as follows:

Steam mains and services.....	\$98,158
Steam meters.....	3,770
Steam meter installation.....	437
Total fixed capital.....	\$102,365

*Expenses:* Steam operating expenses during the year are reported as follows:

Production:	
Station superintendence and labor.....	\$1,403
Fuel.....	8,595
Other station supplies and expenses.....	369
Repairs power plant buildings.....	166
Repairs steam equipment.....	1,260
Miscellaneous station repairs.....	46
Total production.....	\$11,838
Transmission and distribution:	
Repairs steam mains.....	\$205
Repairs steam services.....	80
Repairs steam meters.....	192
Repairs steam tools.....	2
Setting and removing steam meters.....	42
Total transmission and distribution.....	\$521
Commercial expenses.....	\$771

General and miscellaneous:	
General administration.....	\$2,299
Insurance.....	562
Franchise requirements.....	935
Stationery and printing.....	13
Duplicate charges, Cr.....	965
Total general and miscellaneous.....	\$2,814

Total operating expenses.....	\$15,974
Taxes applicable to steam operations.....	1,345
Uncollectible bills.....	126

Total revenue deductions.....	\$17,445
-------------------------------	----------

*Rates:* The company reports the following rates in effect at the close of the year:

Building	Location	Radiation	Rate
Brick store.....	Inside	1 to 105	.32
Brick store.....	Outside	1 to 90	.32
Wood store.....	Inside	1 to 80	.32
Wood store.....	Outside	1 to 70	.32
Wood store.....	All exposed	1 to 50	.35
Brick dwelling.....		1 to 80	.38
Wood and paper dwelling.....		1 to 65	.38
Wood dwelling.....		1 to 50	.38
Brick tenement.....	Inside	1 to 105	.38
Brick tenement.....	Outside	1 to 90	.38
Wood tenement.....	Inside	1 to 80	.38
Wood tenement.....	Outside	1 to 70	.38
Brick hotel.....	Inside	1 to 125	.25
Brick hotel.....	Outside	1 to 100	.25

Dwellings: lower floor 38¢; upper floor 32¢, unless upper floor is also used for dwelling. Flat rate discounts: 250 to 350 feet of radiation 5 per cent; 350 to 500 feet of radiation 8 per cent; 500 to 850 feet of radiation 10 per cent. Meter rates: 55¢ per 1000 lbs. condensation per month: 20 per cent discount if bill is paid within fifteen days. No minimum charge.

## Lockport Light, Heat and Power Company

For balance sheet, income account, capitalization, etc., see tables of Electrical and Gas Corporations, Class A.

*Territory served:* Lockport.

*Fixed capital:* The company reports the cost of capital devoted to steam heating operations December 31, 1914, as follows:

Organization.....	\$1,126
Steam mains.....	154,290
Steam services.....	21,332
Steam meters.....	6,727
Steam meter installation.....	4,143
Other steam plant equipment.....	315
Steam tools and implements.....	260
Total fixed capital.....	\$188,193

*Revenues:* Steam operating revenues during the year are reported as follows:

Metered.....	\$45,189
Flat rate.....	2,073
Steam appliance sales.....	4
Total operating revenues.....	\$47,265

*Expenses:* Steam operating expenses during the year are reported as follows:

Production:	
Steam transferred to district heating, debit.....	\$17,358

Transmission and distribution:	
Distribution supplies and expenses.....	\$218
Work on consumers' premises.....	481
Setting and removing meters.....	400
Repairs of steam mains.....	544
Repairs of steam services.....	69
Repairs of steam meters.....	928
Repairs of distribution tools.....	15
Steam main expense.....	101
Steam service expense.....	61
Total transmission and distribution.....	\$2,818

Commercial and promotion expenses.....	\$1,753
--	---------

General and miscellaneous:	
Salaries of general officers.....	\$2,462
Salaries of general office clerks.....	314
General office supplies.....	213
Incidental expenses.....	251
General stationery and printing.....	105
Miscellaneous general expense.....	274
Insurance.....	509
General law expense.....	384
Law expenses connected with damages.....	96
Accidents and damages.....	96
Store expenses.....	124
Inventory adjustments, Cr.....	19
Total general and miscellaneous.....	\$4,815

Duplicate charges, Cr.....	\$187
----------------------------	-------

Total operating expenses.....	\$26,558
Taxes applicable to steam operations.....	2,840
Uncollectible bills.....	8

Total revenue deductions.....	\$29,406
-------------------------------	----------

**Rates:** The company reports that steam is sold at flat rates determined on cubical contents basis in accordance with use of building. Metered rates during 1914 are not reported, but for 1913 they were given as follows: 70¢ per 1000 for the first 10,000 lbs. or less consumed in any month; 65¢ per 1000 for the next 10,000 lbs. or less consumed in any month; 60¢ per 1000 for the next 10,000 lbs. or less consumed in any month; 55¢ per 1000 for the next 20,000 lbs. or less consumed in any month; 50¢ per 1000 for the next 40,000 lbs. or less consumed in any month; 45¢ per 1000 for the next 250,000 lbs. or less consumed in any month; 40¢ per 1000 for the next 340,000 lbs. consumed in any month. 15 per cent discount on all bills amounting to more than \$3.50 if paid within ten days. Minimum charge \$3 per month.

#### Penn Yan Steam Heating Company

**Territory served:** Penn Yan.

Balance sheet December 31, 1914:

<i>Assets Side:</i>	
Cost of plant and equipment.....	\$31,040
Materials and supplies.....	382
Cash.....	344
Bills receivable.....	467
Accounts receivable.....	2,771
Deficit.....	2,832
<b>Total.....</b>	<b>\$37,836</b>
<i>Liabilities Side:</i>	
Capital stock.....	\$30,000
Bills payable.....	7,836
<b>Total.....</b>	<b>\$37,836</b>

**Fixed capital:** The company reports the cost of capital devoted to steam heating operations December 31, 1914, as follows:

Mains and franchises.....	\$28,318
Traps, separators, and meters.....	2,722
<b>Total fixed capital.....</b>	<b>\$31,040</b>

**Income account for year ended December 31, 1914:**

Operating revenues.....	\$12,194
Operating expenses:	
Cost of steam purchased.....	\$9,651
Labor for repairs and maintenance.....	731
Supplies and repairs.....	450
Office supplies and salaries.....	84
General expense.....	62
<b>Total operating expenses.....</b>	<b>\$10,977</b>
Taxes applicable to steam operations.....	229
Uncollectible bills.....	176
<b>Total revenue deductions.....</b>	<b>\$11,382</b>
Operating income.....	\$812
Deficit at beginning of year.....	3,644
<b>Deficit at close of year.....</b>	<b>\$2,832</b>

**Rates:** The company reports the following rates in effect at the close of the year: 50¢ per 1000 for the first 50,000 lbs. condensation per month; 45¢ per 1000 for the next 50,000 lbs. condensation per month; 40¢ per 1000 for all over 100,000 lbs. condensation per month; 10 per cent discount for cash payment.

#### Port Jefferson Electric Light Company

For balance sheet, income account, capitalization, etc., see tables of Electrical Corporations, Class B.

**Territory served:** Town of Brookhaven.

**Fixed capital:** The company reports the undistributed cost of capital devoted to steam heating operations December 31, 1914, at \$10,910.

**Revenues:** The report shows a total revenue of \$1943 from sale of exhaust steam for heating purposes. No expenses have apparently been charged to this department.

**Rates:** The company reports the following rates in effect at the close of the year: 60¢ per 1000 for the first 25,000 lbs. condensation per month; 55¢ per 1000 for the next 25,000 lbs. condensation per month; 50¢ per 1000 for all over 50,000 lbs. condensation per month. Special rates for all year 'round laundry customers: 60¢ per 1000 for the first 10,000 lbs. condensation per month; 55¢ per 1000 for the second 10,000 lbs. condensation per month; 50¢ per 1000 for the third 10,000 lbs.

condensation per month; 45¢ per 1000 for all over 30,000 lbs. condensation per month.

#### Rochester Railway and Light Company

For balance sheet, income account, capitalization, etc., see tables of Electrical and Gas Corporations, Class A.

**Territory served:** Rochester.

**Fixed capital:** The company reports the cost of capital devoted to steam heating operations December 31, 1914 as follows:

Fixed capital installed prior to December 31, 1908.....	\$1,283
Fixed capital installed since December 31, 1908:	
Undistributable items.....	2,539
Trunk lines and mains.....	47,446
Steam services.....	1,506
Miscellaneous equipment.....	816
Customers' meters and traps.....	5,611
Meter installation.....	785
Other tangible steam capital.....	5,515
Accessory steam equipment.....	555
Engineering and superintendence.....	15
<b>Total fixed capital.....</b>	<b>\$66,072</b>

**Revenues:** The company reports \$53,525 undistributed revenues from the sale of steam.

**Expenses:** Steam operating expenses during the year are reported as follows:

<b>Production:</b>	
Station superintendence.....	\$30
Fuel for steam.....	33,891
Water.....	211
Production supplies.....	5
Repairs of steam accessories.....	382
Boiler room labor.....	165
<b>Total production.....</b>	<b>\$34,685</b>

<b>Transmission and distribution:</b>	
Distribution superintendence.....	\$751
Setting and removing meters.....	1,850
Work on consumers' premises.....	383
Repairs of steam mains.....	1,227
Repairs of services.....	214
Canvassing and soliciting.....	310

**Total transmission and distribution.....** 4,735

**Total operating expenses.....** \$39,421

No taxes or uncollectible bills were charged against steam operations.

**Rates:** Steam is supplied at a sliding scale, varying in the case of live steam from 50¢ per 1000 lbs. for a consumption of 90,000 lbs. per month to 24¢ per 1000 lbs. for a consumption of 4,000,000 lbs per month; and in the case of exhaust steam from 30¢ per 1000 lbs. for a consumption of 150,000 lbs. per month to 16½¢ per 1000 lbs. for a consumption of 6,600,000 lbs. per month. In each case the rates decrease regularly by 1-10 of a cent for each grade.

#### Waterville Gas and Electric Company

For particulars of corporate assets, liabilities, income, etc., see tables for Light, Heat, and Power Plants, Class C.

**Territory served:** Waterville.

**Fixed capital:** The cost of capital specifically devoted to steam operations is not segregated from the cost of electric fixed capital.

**Revenues:** The company reports \$2694 undistributed revenues from the sale of steam.

**Expenses:** Steam operating expenses for the year are reported as follows:

Fuel for steam heating.....	\$1,143
Labor expense.....	175
Repairs of steam mains.....	59
Printing and stationery.....	1
<b>Total operating expenses.....</b>	<b>\$1,378</b>
Taxes applicable to steam operations.....	137
<b>Total revenue deductions.....</b>	<b>\$1,514</b>

In addition, charges of \$13 for "Interest" and \$100 for "Other personal injuries" are reported, developing a surplus for the year of \$1067.

**Rates:** The base rate is given as 50¢ per 1000 lbs., with discounts as follows: 5 per cent on bills of \$10 or under; 10 per cent on bills of \$10 to \$17.50; 15 per cent on bills of \$17.50 to \$25; 20 per cent on bills of \$25 and over.
